3. Antenna design information

Yahoo group: ham
Date: 1998-08-11 09:12:44 UTC
From: John Robinson
Topic: 3 Message: 3

Hi, I hope someone has the information I need,
I am wanting to design a directional antenna for
HF (10M) either a quad, or a straight dipole beam.
Please, has someone got the calculations that will
allow me to design the antenna to the frequency I
need, also any construction tips you can give would
be appreciated.

-John.

Hmmm, I don't know much about quads, but by "straight dipole beam",
do you mean a Yagi?

> Please, has someone got the calculations that will
> allow me to design the antenna to the frequency I
> need, also any construction tips you can give would
> be appreciated.

I'm not sure where you are, but if you have a local library, try
looking for and borrowing a copy of a recent "ARRL Handbook".

Or look for any Ham Radio magazines in the library. You may find a
project for just what you're looking for.

Failing all that, I can probably give you a lot of the info you need
from what references I have here...

hi,

our email list provider "onelist" has been making improvements. for instance if you go to your individual "user center page" you'll be able to click to a page link called the "list center". on the list center page for this email list is a place to add your topic related bookmark (same as favorite places IE users). i have seen peolpe posting the URL's

of there related webpages. instead of going through all the archieves to find them it would be nice to just go to the list center page and click on a bookmark.

try it.

FYI

From: John Jensen
Topic: 10 Message: 10

Hello Everyone,
First I would like to say I am sorry to anyone who did not want to get this.I have started a new webring and I thought there might be some people who wanted to join.I am doing this instead of a links page which is I feel combursome I truly feel the webring is a easy way to direct people to a site.Here Is the list of what sites will be:

AMATEUR RADIO

A.R.E.S.

R.A.C.E.S.

POLICE SCANNERS

SEVERE WEATHER

SKY WARN

STORM CHASERS

If you would like to join then go to: http://www.hamsnet.net/kb9kqn/

Thanks and Again I am very sorry If you recieved this and did not want to.
John Jensen

All Flames can be directed to: skywarn@...

From: Peter J Anderson
Topic: 15 Message: 15

From: Paul Love <vk4xd@...>
Last century Dave G0DJA -asked the following:
Date: Tue, 28 Dec 1999 21:38:31 -0800
From: dave.g0dja@... (Dave Ackrill)
Subject: Discussion
So, if the list is called Amateur_Radio, why not let's start a thread?
OK, so here's one.

What will be the next new 'mode' or idea that will revive interest in
gaining an amateur license, or encourage people with one to use it?
Will it be linking repeaters to the internet? Will it be the removal of the
Morse test from obtaining a license?
Or, are people too used to mobile phones and talking to the world on
chatrooms/email to bother?
I'm not convinced that Amateur Radio will survive in it's present format,
and it will never have the prominence that it once had. It will stand or
fall on the "goodwill and enthusiasm" of those involved.
Declining numbers prove that making it easier to get a license doesn't
guarantee the prosperity of our hobby. It is easier than it ever has been to
gain a license , but fewer and fewer are taking up the challenge.
Perhaps it requires "promotion" based on the fact that it "isn't easy" ,but
lots of fun and challenge. After all, there is no comparison with talking on
a phone ,or a chat channel, with that "scratchy contact" with someone else
running also their own station not relying on ISP's or phone companies.
Setting up your station, is all part of the accomplishment of amateur radio
. When the "lines" are down you know you'll still be able the have that sked
with a radio pal , while the internet users are sobbing onto their keyboards
. You benefit from the work and self-training , no monthly access fees to
richen the purse of some multi-national company.
I'm not rubbishing the internet (I've used it since the pre-http days),just
talking up amateur radio , you can't and shouldn't compare the two.
I won't get involved with this Morse requirement debate , as it seems to
bring out the worst amateur radio has , the flame wars and vitriol do
nothing to enhance our hobby in the eyes of prospective participants.
I'm inclined to think it's a side issue and a distraction to really getting
down to why we want others to join us in a great hobby. There are a lot of
non-Morse license grades available with lots of interesting facets of radio
to be explored within their restrictions but few still take up the challenge
.
In Australia we have radio allocations that don't even need a license ,a HF
and a UHF Citizen's Radio Band , that are dying faster than Amateur radio.
The only new people using it are those that are escaping hefty commercial
license fees by using CB for business purposes , (contrary
to the letter of the law).
The bottom line is that "radio" isn't the flavor of the month anymore and

there aren't countless people out there who are amazed that we talk to New York or even the Space Shuttle. The trick is to grab the reduced percentage of those who still find it interesting and show them that we "enjoy" the challenge of doing it ourselves and the friendship of a world-wide community .
"What goes around comes around" , and who knows as people tire of the easily accessible technologies that are exploding all around us, (if we can survive in the interim), they may find something of Amateur Radio that sparks their imagination and motivates them to "do it themselves" instead of being spoon fed by the system. We must realize that amateur radio is not, and most probably, will never again be at the cutting edge, it's just a "hobby" for people with diverse backgrounds and abilities.
Happy New Year Everyone,
73 & Gud Dx de Paul. VK4XD
Paul D. Love - vk4xd@... *
ICQ 8869291 *
http://quasar.apana.org.au/~quasar/vk4xd/index.html *

I think that the ham community might go the way of the Dodo if they do not do something to get back the airwaves in the near future. I have picked up the interest of the APRS system myself and have revived my interest in the ham community as the result of the code change affective in the new year.
I have the sinking feeling that the radio waves we all use and love will be sold to make way for the big business that we feared a while back that tried to take the 2M and 70CM away from us, those LEO's. I have not upgraded due to the fact that I had to learn the code and am very tone deaf and can not copy very well even on a good day 5WPM.
The general public is not interested in the ham community anymore as we now have the ability to do so much more using the cell phone or the internet. My personal hope was to have the Y2K to give the hams to make a comeback but that did not happen as we can see. I will upgrade in the future to be a general in the amateur community but for how long remains a mystery. I am surprised to see the drop in the general population in the ham community in the local area, but the number of calls grew slightly in the fear of Y2K so the general public would have communications. But there are easier things to be than a ham, there is always CB.
I got out of being on the 11M band due to the fact there was so much foul language and the endless chit chat of mindless youths with nothing better to do than play "I am badder than you but can't come from behind my mic to prove it." Syndrome.
I am not knocking CB but the whole of the whole can be and more than likely will be judged on the select few that ruin it for the rest of us.
Well that is al I have to say on that matter. Any response I would welcome either to the list or my personal mail box.

Peter Anderson

16. Makeing the issue a little clearer

Yahoo group: ham
Date: 2000-01-14 05:49:51 UTC
From: Peter J Anderson
Topic: 16 Message: 16

What I am trying to do is start a list for the hamfest notification, not hamswap, my mistype generated a lot of response from all and I am sorry if you all have the idea that I was imposing on your own lists for the local area. What I was trying to do is give people the chance to be able to get the word out via email about the different swaps there are, either in their home town or if someone is traveling and wanted to check out a fest elsewhere. If this sounds like a good idea then let me know.

Sorry for the confusion and hope to hear from all of you

Peter

From: Eric J. Goforth
Topic: 20 Message: 20

Hello fellow HAM Buffs!!! Pretty new to the group, but I just wanted to share something with you all. My name is Eric J. Goforth, KF6ZDG. I am a co-developer for QRZ.com (of which I am sure you are all aware of). We (QRZ.com) are preparing to launch a brand new product and I am personally inviting you all to have a Sneak Peak. I am not going to invite any other group, and this will be the ONLY email sent about the subject.

The new online service is called eLogbook. It has all of the features that you would enjoy from a good high quality Logbook program with one exception! It's ONLINE, and it talks DIRECTLY with QRZ.com's master Database of callsigns. If you have used QRZ.com in the past and want to get a sneak peak of things to come, you are all invited to check it out. The URL is: http://qrz3.qrz.com/logbook This link will be brought down in a week or so for the Grand Opening on the QRZ.com website. Please feel free to get in there and begin using it now. The contacts that you make using the eLogbook now, will carry over when it's transferred to the Main QRZ.com website. If you have any questions, please don't hesitate to ask.

Anyhow, that's it.

73's!

Thank you for your time,
Eric J. Goforth

24. Tube sought for grandpa's HOMEBREW QRP project...

Yahoo group: ham
Date: 2001-01-14 19:02:45 UTC
From: J H
Topic: 24 Message: 24

Hello,
I visited my grandpa the other day, and went down into his basement. He's building some interesting stuff down there, and now is in the middle of a 6DQ6A-based transmiter QRP project. He's in his 80's and thinks that tubes are all but completely unavailable, and he said if this tube he has turns out bad, then the whole project is a bust! I want to find him this tube, or maybe two of them, so this project can come to fruition. I'll post photos, etc, if anybody asks and can provide the upload space somewhere. W0XO is his call, and he's in his last few years of hamming. If you know of a source for this tube, please let me know price/location, etc, and I'll get it to him ASAP. Feel free to re-post this info anywhere you want.

30. Kenwood HF accessories FS

Yahoo group: ham
Date: 2001-06-15 12:50:06 UTC
From: Ken Simpson, W8EK
Topic: 30 Message: 30

Kenwood HF Accessory items FS:

Kenwood SP-430
This is the speaker that matches the TS-430, TS-440,
TS-711, TS-811, and many other Kenwood rigs. This
one works 100%, and looks the same. There is not a
scratch on it that I can find. It looks like it just came
out of the box. I have the single page instruction sheet,
and think I can dig in the attic and find the original box
(it is 94 degrees here, and I don't want to go into the
attic until I need to!) for $75.

Kenwood MC-80 desk microphone
This desk mic has the 8 pin plug, and is made to work
with most all of the Kenwood rigs that take the 8 pin
plug. It is a very nice "gooseneck" type mic. This
particular unit is just like new in its box with the paper
work included for $90.

Kenwood MC-85 desk microphone
This desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one is in good shape, but not as good as the MC-80
and SP-430 listed above. It has a couple scratches on
it, but is still in great overall condition, with paper work,
in its box for $110.

Kenwood MC-43 S hand microphone
This is the "standard" microphone that came with many
of the rigs that take the 8 pin mic connector that this
one has on it. It has "up" and "down" switches, as well
as the normal PTT switch. This particular MC-43 is very
close to new. It is in its plastic bag. I am not sure if the
bag was ever opened or not, so if it is not new, it is very
close. $ 45

Kenwood heavy DC power cord
This is the actual Kenwood cord, and not a third party
make over. It has the two fuses, and has never been
opened. It fits all of the Kenwood (and Icom) rigs that
take the standard 6 pin power plug. $ 22

Prices do not include shipping from Florida.

Thanks.

31. Kenwood VHF and UHF accessories FS

Yahoo group: ham
Date: 2001-06-17 00:12:51 UTC
From: Ken Simpson, W8EK
Topic: 31 Message: 31

For Sale:

Kenwood BC-6 fast desk charger. Charges PB-21
and PB-21 H battery packs, as used on the Kenwood
TH-21 / 31 / 41 series of HTs. Holds two batteries,
charging one and then the other. Takes about an hour
to charge. It can also be used to power the radio
for base station use. With manual for $ 50.

Kenwood PB-21 H battery pack. This is the "heavy duty"
500 mahr pack. For use with the TH-21 / 31 /41 HTs.
With paper work for $ 35

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

DC power cable. This is the one that fit rigs such
as the TR-7400, and others (including some KDKs)
that look like a 2 pin microphone connector, with a
metal shell. $7

Kenwood "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood full size rubber duck antenna for the
TH-21 two meter HT. $ 10

Kenwood "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Service manual for Kenwood TS-440 HF xcvr.
Looks just like new. $ 20

I also have a variety of desk microphones available.

Prices do not include shipping from Florida.

Thanks.

33. TenTec equipment FS

Yahoo group: ham
Date: 2001-06-21 13:11:37 UTC
From: Ken Simpson, W8EK
Topic: 33 Message: 33

For Sale:

TenTec 545 Omni, Series A, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters (No WARC).
Full QSK on CW, and a fantastic receiver. Terrific audio
quality on SSB also. Built in audio CW filter. This one
was used by a blind ham, so has "dots" on the dial skirt,
so he knew the frequency he was on. If this is a problem
(and it does not really seem to be), I think I new dial skirt
could be obtained. This one is in great shape, with
manual for $200.

TenTec 560 Corsair transceiver. 160 through 10 m
including WARC bands. SSB or CW, with 100 Watts
output, digital readout, great QSK. With manual
for $450

TenTec 215 P Microphone (same as EV mic used on Drakes)
This mic is the "banana" style, with a separate base, and
has a Hi Z crystal element. It was used on the earlier
Argonauts, Tritons, etc. and has a 1/4 inch stereo plug
for a connector. This is the TenTec version of the EV
mic that was also used on the Drake "4" line. This one
looks like new, with only very minor scratching where
it slides in and out of the base. Most of these lost
their paint around the PTT switch, but this one looks
like new in that area. Paperwork and base are
included for $ 65.

Prices do not include shipping from Florida.

Thanks.

35. Rubber duck antennas FS

Yahoo group: ham
Date: 2001-07-04 14:35:36 UTC
From: Ken Simpson, W8EK
Topic: 35 Message: 35

Does anyone ever need any replacement antennas for
2 meter handhelds?

I have a variety of "rubber duck" antennas for sale.
All of them are made to cover the 2 meter band, and
are in like new condition. They come in two different
lengths. The regular are about 6 inches long, and look
like the normal antennas that come with most HTs.
Stubby are about 3 to 4 inches long, but seem to
actually perform better than the "regular" antennas.
If you haven't tried one of the stubbies, you will be
amazed at the difference.

I have antennas with the following connectors:
BNC - stubby
PL-259 - regular and stubby
5/16 inch x 32 thread (like Motorola) - regular and stubby
RCA - stubby
F - regular

Kenwood "Stubby duck" antenna for the TH-21,
two meter HT

Kenwood full size rubber duck antenna for the
TH-21 two meter HT.

Kenwood "Stubby duck" antenna for the TH-41.
440 MHz HT.

All are $10 each, plus shipping from Florida.

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

I also have a variety of microphones available.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 36 Message: 36

TenTec HF equipment for sale:

TenTec 546 Omni D, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters (No WARC).
Full QSK on CW, and a fantastic receiver. Terrific audio
quality on SSB also. Built in audio CW filter. This one is
in great shape, with manual for $295.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Has ammeter on front. Matches the Omni series.
Great condition, with manual for $ 100

TenTec 243 remote VFO.
For use with the Omni series of xcvrs. Allows "split"
operation, and also reception of 2 frequencies
simultaneously on the same band. Looks like new,
with manual for $110.

TenTec 248 noise blanker. This is the noise blanker
that goes in the Omni 546, Series A and Series B, xcvrs.
It is quite effective on some noise, and not effective
at all on other types of noise. It does not go in the Omni
series C, as they came with a blanker installed as a
standard item from the factory. This one has all the paper
work with it, for $50.

TenTec 1150 "Over Voltage Protection"
Made to plug into the 252 series of TenTec power supplies,
and provide protection in case the pass transistor on the
supply would short out. Like new, with paper work for $ 18.

TenTec 1140 circuit breaker.
Protect any of the 100 W output TenTec rigs, when not
using a real TenTec power supply (using it off of battery,
Astron supply, etc.). Carries 18 amps. $ 18

TenTec 227 antenna tuner.
Matches Omni series xcvrs. Inductor has 47 taps, so
it is almost like a roller inductor. Handles 300 watts.
Also has antenna switch for switching up to 4 antennas.
Looks and works like new, with paper work for $ 60.

TenTec KR-5 keyer with paddle.
This is a KR-5 and NOT the KR-5 A. This one
matches the original "PM" series rigs. It does not

have the orange button in the TenTec logo that can
be used as a straight key. This unit looks just like
new and is definitely collectable. With paper work
for $ 50.

TenTec 215 P Microphone (same as EV mic used on Drakes)
This mic is the "banana" style, with a separate base, and
has a Hi Z crystal element. It was used on the earlier
Argonauts, Tritons, Omnis, etc. and has a 1/4 inch stereo plug
for a connector. This is the TenTec version of the EV
mic that was also used on the Drake "4" line. This one
looks like new, with only very minor scratching where
it slides in and out of the base. Most of these lost
their paint around the PTT switch, but this one looks
like new in that area. Paperwork and base are
included for $ 65.

Prices do not include shipping from Florida.

Yahoo group: ham
Date: 2001-07-17 17:36:16 UTC
From: Ken Simpson, W8EK
Topic: 42 Message: 42

For Sale:

Pair of 4-400 A, Penta Lab tubes.
1958 date code. JAN designation.
These came from the estate of a silent key,
and I have no way to test them. In talking
with the widow, I would guess they are pulls
from a government transmitter. They are in their
boxes, and have "Full Out" written on the box,
so I assume this means they were running at
their rated output. If you get them, and are not
happy with them, you may return them for a
full refund, less shipping costs. $ 75 for the pair

4-250 tubes
Eimac, 1959, according to the box.
These are marked "NG" on the box, so I assume they
are only good for making lamps, or other ornaments.
$ 18 for the pair.

Prices do not include shipping from Florida.

Thanks.

TenTec equipment for sale:

TenTec 227 antenna tuner.
Matches Omni series xcvrs. Inductor has 47 taps, so
it is almost like a roller inductor. Handles 300 watts.
Also has antenna switch for switching up to 4 antennas.
Balun included, for balanced line. Looks and works like
new, with paper work for $ 60.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors
similar to the heavy duty 280 power supply. Good
for 20 amps at 13 V DC. This one looks almost like
new, and works the same. With manual for $ 115.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Has ammeter on front. Matches the Omni series.
Great condition, with manual for $ 100

TenTec 248 noise blanker. This is the noise blanker

Topic: 48 Message: 48

For Sale:

Kenwood SW-200 B power meter and SWR bridge
Two meters on it -- one for forward power and one
for reflected power. It can read average or peak
power. It will handle up to 3 sensors that can be for
various bands and power levels. This particular
meter is in very good condition, in its box, with the
paper work.

Kenwood SWC-2 direction coupler for SW-200 B above
For use from 140 to 450 MHz at power levels up to
100 W on FM or AM, 150 W on CW, and 200 W on
SSB. This is a "remote" sensor that has about 3 feet
of cable to go to the SW-200. With paper work.

Both units together, for $125 plus shipping from Florida.

54. WANTED: Rubber duck with SMA connector

Yahoo group: ham
Date: 2001-09-01 22:39:23 UTC
From: Ken Simpson, W8EK
Topic: 54 Message: 54

WANTED:

I am looking for a rubber duck with an SMA connector.
I would like the very small "mini" type, a couple
inches long.

More specifically, I would like one for 2 m and
440 MHz. My wife will be using it with a Yaesu VX-5,
and would like one that is smaller than the normal,
so it is easier to carry in her purse. I fully realize
that performance will suffer, but that is not an issue.

Anyone have a short SMA rubber duck?

Thanks.

59. TenTec equipment For Sale

Yahoo group: ham
Date: 2001-09-21 23:35:46 UTC
From: Ken Simpson, W8EK
Topic: 59 Message: 59

TenTec equipment for sale:

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors
similar to the heavy duty 280 power supply. Good
for 20 amps at 13 V DC. This one looks almost like
new, and works the same. With manual for $ 115.

TenTec 560 Corsair
160 thru 10 meters, including WARC bands.
CW and SSB transceiver. Great audio, and QSK
on CW. Some people consider it the best rig made.
All solid state, with 100 Watts output. This particular
one looks like new. No scratches that I can find. It
has the 8 pole SSB filter added, so is really like a
Corsair II. Includes manual for $450.

TenTec 263 remote VFO for use with 560 Corsair.
The remote VFO allows split operation, and also permits
dual receive. The VFO has a control to vary how much
signal from each VFO frequency is received. Frequency
is read out on the digital readout of the Corsair, but also
has an LED bar graph for rough frequency. This one is
in good shape, does NOT need a PTO rebuild, and appears
to be very stable. With the paper work for $ 150.

TenTec 960 power supply.
Produces 13 V DC at up to 20 amps. It is made to match the
Corsair II in color. Has two heavy duty pass transistors.
With manual for $ 130.

TenTec KR-50 keyer.
Iambic, with dit and dah memories, if desired (they
can be turned on or off). Built in Iambic paddles,
12 V DC or 110 V AC power, and reed relay output
to key most any rig. $ 60

TenTec 234 speech processor.
This one is effective. It changes the audio into RF,
processes it at RF, so that the distortion is removed,
and then changes it back to audio. I have found that
adding this processor is about the same as turning an
amplifier on. It really helps the talk power, without
introducing distortion like most speech processors.
This one is in good shape, with the paper work, for $100.

Hand Microphone.
This is a "generic" hand mic, but it has the Heil HC-4
"ragchew" element in it. It presently has a 4 pin connector
wired for TenTec, but that could be changed.
Nice shape for $ 45.

TenTec 248 noise blanker. This is the noise blanker
that goes in the Omni 546, Series A and Series B, xcvrs.
This one has all the paper work with it, for $50.

Prices do not include shipping from Florida.

Thanks.

Topic: 60 Message: 60

For Sale:

Accessory items for ADI AT-600 dual band HT

SLC-600-L soft case for the "High Power"
HTs with the longer batteries $ 17

RBP-612 "High Power" 12 volt battery
600 mahr NiCad $ 25

RBP-612 "High Power"`12 volt battery
with a NiMH, 1000 mahr "rebuild"
Only charged 4 or 5 times. $ 50

ADI-600x, by Batteries America
Aftermarket 12 V, 1100 mahr NiMH battery.
Charged 3 or 4 times. $ 55

Accessory items for ADI AT-200/201/400/401

RBP-1200 NiMH battery
12 Volt (for high power) at 1000 mahr
like new condition $ 50

NiCad battery
12 Volt at 1000 mahr $ 30

PCA-145 DC Cord $ 12

Note: The batteries for the AT-200 series can
also be used on the AT-600. The polarity of the
"plug in, wall wort" charger is different, but if you
use the desk charger, it would not matter.

Prices do not include shipping from Florida.

Thanks.

61. Kenwood HT and accessories FS

Yahoo group: ham
Date: 2001-09-28 16:43:41 UTC
From: Ken Simpson, W8EK
Topic: 61 Message: 61

Kenwood BC-6 fast desk charger. Charges PB-21
and PB-21 H battery packs, as used on the Kenwood
TH-21 / 31 / 41 series of HTs. Holds two batteries,
charging one and then the other. Takes about an hour
to charge. It can also be used to power the radio
for base station use. With manual for $ 50.

Kenwood SMC-30 speaker mic for use with TH-21 /
31 / 41 series of HTs and other Kenwood HTs.
Good shape for $25.

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

Kenwood "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood full size rubber duck antenna for the
TH-21 two meter HT. $ 10

Kenwood "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Kenwood MC-46 touch tone microphone
Has 16 digit TT Pad on the back. Up and
down switches for changing the frequency.
It presently has a 6 pin connector, but that
can be changed to an 8 pin if needed, and it
becomes an MC-48 mic. This one is in great
shape, in its box, with paper work for $ 50.

Prices do not include shipping from Florida.

Thanks.

68. Very rare Yaesu FT-DX100

Yahoo group: ham
Date: 2001-10-08 18:36:16 UTC
From: Brian Carling
Topic: 63 Message: 68

Yaesu FT-DX100 for sale.

NEAT little vintage solid state HF transceiver.

One of Yaesu Company's earliest models. This is an extremely rare item.
It was never sold in the U.S.A. The unit here was brought back to the
states by
someone serving in Japan.

Produced around 1967 before the FT-401 and FT-101 series. This compact
unit
will run on 120V AC OR on 12V DC. The 120V AC power cord is supplied with
it.

Frequency Range is 3.5 to 28 MHz amateur bands.
Modes CW, AM and SSB at 120 W PEP for SSB/CW, 50 W for AM.

Carrier Suppression -40dB
Unwanted sideband suppression -40dB

All solid state, except for three tubes:
12BY7A driver, 6JM6 x 2 finals

Dimensions:
334mm x 153mm x 262mm (W x H x D)

Weight is 14 kg = 31 pounds.

This unit comes with the ORIGINAL BOX and a copy of the schematic. It is
very similar to
model FT-150.

Great addition to any collection!

Pictures and details:

http://homepage1.nifty.com/kurisu/FT-DX100.html
http://www.alphalink.com.au/~gfs/yaesu/Yaesu10.htm
http://member.nifty.ne.jp/hanazawa/radio/ftdx100.html

Will sell for $300.00 plus shipping

Brian, AF4K

Yahoo group: ham
Date: 2001-10-11 23:20:13 UTC
From: Ken Simpson, W8EK
Topic: 70 Message: 70

Desk Microphones For Sale:

Kenwood MC-80 desk microphone
This desk mic has the 8 pin plug, and is made to work
with most all of the Kenwood rigs that take the 8 pin
plug. It is a very nice "gooseneck" type mic. This
particular unit is like new in its box with the paper
work included for $80.

Turner 253 desk microphone.
This is a low Z model, so it will work with most of
the new modern rigs. It is a brushed chrome styling
with nice PTT switch. $35

Icom SM-6 desk microphone
This is the "gooseneck" type desk mic that
goes with most of the Icom rigs with 8 pin
plugs. This particular one is in nice shape. $ 70

Shure 444 D dynamic desk microphone.
The 444 has voice shaping built in to it. with PTT switch
on the base. This mic is the black color, and is in good
shape for $ 60.

Speaker microphone / boom headsets:

Icom HS-10 and HS-10 SB, boom headset
with the microphone and switch box. Gain
control in the switch box. Fits most Icom, ADI,
Alinco, some Yaesu, and other HTs that take the
same plugs. New these are $110 for the combo, but
this one is in great shape for only $ 55.

Kenpro Speaker Mic.
Fits the same HTs as listed
above. Almost like new for $20.

Daiwa Boom mic and headset. Similar to the Icom
HS-10 listed above. Great shape for $ 50.

Yaesu YM-24 A speaker mic.
It has the odd little round connector on it like Yaesu,
Wilson, and others used in the 1970s and 80s.
This particular unit is almost like new, in the
box, with paper work. $ 20

Prices do not include shipping from Florida.

Thanks.

71. TenTec 248 noise blanker FS

Yahoo group: ham
Date: 2001-10-16 00:26:53 UTC
From: Ken Simpson, W8EK
Topic: 71 Message: 71

For Sale:

TenTec 248 noise blanker. This is the noise blanker
that goes in the Omni 546, Series A and Series B,
xcvrs. Like many noise blankers, it is quite effective
on some noise, and not effective at all on other types
of noise. It includes an extra xtal filter on the noise
blanker board, so that the bandpass is not
"broadened out" as much as most noise blankers.

It does not go in the Omni series C, as they came with
a different blanker installed as a standard item from the
factory.

This one has all the paper work with it, for $50 plus
shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2001-10-18 13:57:40 UTC
From: Ken Simpson, W8EK
Topic: 72 Message: 72

For Sale:

All are in good condition, unless noted otherwise.

ARRL Handbooks For Sale:
1968 - lousy condition - back cover missing - $ 6
1982 - $ 8
1985 - looks almost like new - $ 10

Other ARRL books:
ARRL Ham Radio Operating Guide - first edition
1976 - $ 8

Solid State Design for the Radio Amateur
ARRL - First Edition - 1977 - $ 12

ARRL antenna book - 1974 - 13th edition - $ 10

Old Engineering books:

Sylvania Electronic Products "Technical Manual"
1953 edition, in binder. This is a tube manual,
similar to the RCA HB-3, but is slightly taller than the
RCA HB-3. Starts with 0A3, and goes thru 27NP4.
There appear to be updates added, but no dates on the
updates that I can find. This is not quite as comprehensive
as the RCA HB-3, but it really includes a lot. $ 85

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $ 15

Electric Power Transmission and Distribution by Woodruff
Second Edition - 1938
Includes some wire charts. 257 pages.
Book is in good shape, as is the binding, but there is a fair
amount of writing inside. $ 12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Manuals for the following:

Jansky and Bailey Division of Atlantic Research Corp
Loran-C System of Navigation
Feb 1962 $ 10

AN/USM-16 Signal Generator (Byron Jackson)
T O 33A1-8-23-1 Operating Instructions
Sept 1955, with update to Sept 1971 $ 8

AN/USM-16 Signal Generator
T O 33A1-8-23-4 Illustrated Parts Breakdown
June 1955 with Nov 62 updates $ 10

Prices do not include shipping from Florida.

Thanks.

76. Daiwa "Cross Needle" Wattmeter SWR FS

Yahoo group: ham
Date: 2001-10-27 20:50:38 UTC
From: Ken Simpson, W8EK
Topic: 76 Message: 76

For Sale:

Daiwa CN-540 "Cross Needle" Wattmeter / SWR bridge
It reads forward and reflected power at the same
time, on the same meter. The two needles cross,
and you can read SWR from that. It is rated at 200
Watts full scale, and also has a 20 W position. Good
shape electrically and cosmetically. It is good for a
freq of 50 to 150 MHz. $ 65 plus shipping from Florida.

Thanks.

77. Larsen VHF and UHF antennas FS

Yahoo group: ham
Date: 2001-11-06 14:22:02 UTC
From: Ken Simpson, W8EK
Topic: 77 Message: 77

Larsen VHF and UHF mobile antennas For Sale:

(LA and LM are 5/16 inch stud, NMO is "Motorola" mount)

Mounts:
LM-MM Mag mount - PL-259 connector - used, but good shape - $ 18
LM-MM Mag Mount - BNC connector - used, good shape - $ 20
NLA-TLM Trunk lip mount - PL-259 connector - new - $ 12

UHF antennas:
LA-450 coil and 5 db gain whip - used, but good condition - $18
LM-450 coil and whip - 5 db gain - new - $ 22

Two meter (VHF) antennas:
NMO-150 coil only - new $ 20
LM-150 coil only - new $ 20
NLA-150 coil only - new - $20
Add a 49 inch whip available from Radio Shack. It is too hard
to ship the 4 foot long whip.

Parts:
HP-34 - Hole Plug for 3/4 inch hole (Black) - $ 1
LM-Cap (to protect mount, if no antenna is in use) - new - $ 3
NMO-Cap - new - $ 4

Generic 2 meter mag mount, 1/4 wave - used but good
BNC connector - $ 15

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2001-11-09 14:10:22 UTC
From: Ken Simpson, W8EK
Topic: 78 Message: 78

For Sale:

Autek QF-1
This is an audio filter that goes between
your rig and speaker. It runs off of 110 V AC,
and will peak, notch, or become a low pass
filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. The input
is a 1/4 inch phone plug, and the output is a 1/4
inch jack on the front panel. This particular
unit looks very close to new, and works the same.
$ 35 plus shipping from Florida.

Thanks.

82. Tape back up unites FS

Yahoo group: ham
Date: 2001-11-13 22:12:07 UTC
From: Ken Simpson, W8EK
Topic: 82 Message: 82

Is everyone doing like they should and backing up their
computer properly, and doing it often? If you are like
most hams (and I include myself in that category), you
are not doing it often enough, if at all. It seems that all
of us put it off, usually until it is too late.

Part of the reason we put it off is that it is too difficult to
do. After all, we are just human, and take the easy way out.

Here is an item that will make it easier to back up your
computer. That includes all your e-mail, all of the good
information that comes off of these great mailing lists,
your ham log book, and everything else you might want
to back up.

I have an Irwin 250 Meg tape back up available.
This unit is in great shape. It is an internal drive that
takes a 3 1/2 inch bay. It hooks up to the floppy drive,
and includes the cable to accomplish this purpose.
I realize that 250 M is not very large to back up an entire
hard drive, but if you want to do a daily backup of your
data, it should be adequate. $20

I also have an IOmega Ditto 420 tape back up, similar
to the above, but larger (420 Megs). $30

Prices do not include shipping from Florida.

Before someone asks, I have switched to a different
media for my backups, but I AM backing it up.

Thanks.

83. Reduced Again: 4-125 Tube (New)

Yahoo group: ham
Date: 2001-11-15 15:10:56 UTC
From: Brian Carling
Topic: 82 Message: 83

Surely someone would like to build a cool tube transmitter out of this 4-125!

New old stock, in the original box 4-125 transmitting tube.

Will sell for $35.00 plus shipping

84. ADI AT-200 two meter HT and accessories FS

Yahoo group: ham
Date: 2001-12-06 22:26:54 UTC
From: Ken Simpson, W8EK
Topic: 84 Message: 84

For Sale:

ADI AT-200, 2 meter HT
Covers 2 m ham band, but also 130 to 164 MHz
receive. Sub-audible tone encode and decode is
included. It has the high power battery included,
so power output can be 5 W, 2 1/2 W, or 1/2 W.
This is a "medium" size HT -- it is small enough to
be easy to carry, but it is large enough that one can
easily push the buttons, and see the display. This
particular unit is in close to new condition both
electrically and cosmetically. I can not find a scratch
on it. Original box and manual, as well as a good
battery, charger, and rubber duck, all included for $100.

RBP-1200 NiMH battery
12 Volt (for high power) at 1000 mahr
like new condition $ 50

NiCad battery
12 Volt at 1000 mahr $ 30

For any ADI HT:
ADI CBC-145 "Empty" battery case
Hold four AA cells for emergency use. $15

Note: The batteries for the AT-200 series can
also be used on the AT-600. The polarity of the
"plug in, wall wort" charger is different, but if you
use the desk charger, you can use any of the
battery packs on either series of HT.

Prices do not include shipping from Florida.

Thanks.

85. TVI filters for the transmitter FS

Yahoo group: ham
Date: 2001-12-08 18:36:48 UTC
From: Ken Simpson, W8EK
Topic: 85 Message: 85

TVI filters (for the transmitter) For Sale:

B & W TVI filter, model FL 10 / 1500 (also known as
model 425). Translated, this means that it cuts off just
above 10 meters, and will handle 1500 Watts. SO-239
connector on each end. Looks and works just like new. $ 30

Drake TV-1000-LP
This is the copper colored filter that may also be used on
the low end of six meters. It is good for 1000 W below 30
MHz, and about 200 W up to 52 MHz. SO-239 connector
on each end. This particular one looks very close to new.
Copper is still very bright and shiny. $ 30

Ameco Model LN-2
It says it is designed for 50 to 72 ohm coax. This is a smaller
filter, good only for about 100 watts. It could be used between
an exciter and amplifier, if desired. SO-239 connector on
each end. Good shape. $ 12

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says
right on it that it is for 52 ohm systems. It looks like it will
easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

86. TenTec items FS

Yahoo group: ham
Date: 2001-12-13 13:59:07 UTC
From: Ken Simpson, W8EK
Topic: 86 Message: 86

Misc. TenTec items For Sale

TenTec 234 speech processor.
This one is effective. It changes the audio into RF,
processes it at RF, so that the distortion is removed,
and then changes it back to audio. I have found that
adding this processor is about the same as turning an
amplifier on. It really helps the talk power, without
introducing distortion like most speech processors.
This one is in great shape. I can not find a scratch
on it, and it works 100 %. With the paper work, for $100.

TenTec 214 desk microphone.
This is the electrolet mic that is banana shaped,
that will slip in an out of a separate base. It is NOT
the 705 gooseneck mic. Has 4 pin plug for TenTec
gear, and requires a polarizing voltage from the rig,
to make the electrolet mic element work.
With the paper work for $65.

TenTec 248 noise blanker. This is the noise blanker
that goes in the Omni 546, Series A and Series B, xcvrs.
It is quite effective on some noise, and not effective
at all on other types of noise. It does not go in the Omni
series C, as they came with a blanker installed as a
standard item from the factory. This one has all the paper
work with it, for $50.

TenTec 249 Noise Blanker
This is the one for the Triton series of rigs (Model 540
and 544). Like the 248 for the Omni series, it is quite
effective on some noise, and not on other noise, depending
on the characteristics of the noise. Paper work included
for $50.

Prices do not include shipping from Florida.

Thanks.

87. Misc ham publications FS

Yahoo group: ham
Date: 2001-12-19 23:15:21 UTC
From: Ken Simpson, W8EK
Topic: 87 Message: 87

I found some more older ARRL publications.
Many are in the older, small (6 x 9 inch) format.
All are in good shape, unless listed otherwise.

1974 - 29th edition - How to Become a Radio Amateur
Like new condition, with some yellowing of the paper. $ 12

Radio Amateur's License Manual
1975 - 74th edition - almost like new. $8
1976 - 75th edition - like new $ 10
1979 Radio Amateur's License Manual - 77th edition - $ 4

Radio Amateur's Operating Manual
1972 - 3rd edition - $ 6

Radio Amateur's Handbook
1976 - 53rd Edition - crinkle on back cover - $ 9
1968 - lousy condition - back cover missing - $ 6

ARRL Ham Radio Operating Guide - first edition - 1976 - $ 8

Older tube manuals:
Sylvania Electronic Products "Technical Manual"
1953 edition, in binder. This is a tube manual,
similar to the RCA HB-3, but is slightly taller than the
RCA HB-3. It covers gas regulator tubes (the 0's),
thru receiving tubes, and into picture tubes.
There appear to be updates added, but no dates on the
updates that I can find. This is not quite as comprehensive
as the RCA HB-3, but it really includes a lot.
Book is in nice shape. $ 60

RCA Receiving Tube Manual RC-23
1964 edition. In addition to plain receiving tubes,
it also includes rectifiers, and some other tubes.
Paper bound book, in pretty good shape. One corner
slightly bent on cover. $ 20

Related book:
Howard Sams "Dial Cord Stinging Guide" DC-1
To quote the cover of the book, "Dial Cord
Diagrams covering most 1938 to 1947 receivers."
Copyright date of 1947. It includes Hallicrafters,
National, Knight, and Lafayette, among many,
many others. This book is paperback, about
3/8 of an inch thick, and although there is a
very slight yellowing of the paper, it appears to be

almost like new. Definitely collectible, as well as
valuable for the information it contains. $ 25

1976 Tune in the World with Ham Radio - First Edition - $ 5
1981 Tune in the World with Ham Radio - 3rd edition - $ 5
1986 Tune in the World with Ham Radio - 6th edition - $ 5
1991 Now You're Talking - First Edition - $ 7
1993 Now You're Talking - 2nd edition - $ 8
1995 Now You're Talking - 3rd edition - $ 8

ARRL Technician Class License Manual
First Edition - 1989 - small size $ 4

ARRL General Class License Manual
First Edition - 1989 - small size - $ 4

ARRL Advanced Class License Manual
First Edition - 1985 - small size - $ 4
3rd edition - 1990 - small size - $ 4
4th edition - 1995 - medium size - $ 6

73 General Class License Study Guide - 1978 - $ 3

ARRL Technician Class Exam Course - 1993
First Edition - first printing
This is the course material to go along with
the video tape series. $ 10

1989 FCC Rule Book - 8th edition - $ 4
1987 FCC Rule Book - 7th edition - $ 4

Net Directories - $ 2 each
1978-79
1984-85
1989

Emergency Communications - 1968 - $ 4

Public Service Communications - $ 2 each
no date, but prior to 1970
1970
1985

Operating an Amateur Radio Station - $ 2 each
1968 - 51st edition
1969 - 52nd edition
1980 - 59th edition
1983 - 61st edition
1984 - 62nd edition

Prices do not include shipping from Florida.

89. Waters (B & W) phone patch /coupler FS

Yahoo group: ham
Date: 2001-12-31 23:32:12 UTC
From: Ken Simpson, W8EK
Topic: 89 Message: 89

For Sale:

Waters (same as B & W) "Universal Hybrid Coupler II"

Most of us would likely call this a phone patch, but it is really much more than that. It does work as a phone patch, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. It will also play the tape recording in to the phone line. This one is Model 3002, and also includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position. It is presently in the horizontal position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins. Of course it will still do the job it did then.

This particular unit is not mint, but it is much better than good condition. $ 125 plus shipping from Florida.

Thanks.

90. Spectrum Analyzer FS

Yahoo group: ham
Date: 2002-01-21 15:51:51 UTC
From: Ken Simpson, W8EK
Topic: 90 Message: 90

Spectrum Analyzer For Sale

Lavoie Labs LA-18 M spectrum analyzer
It goes from 10 MHz thru 1 GHz, and is in two units --
one for the receiver portion, and the other for the display
portion. It looks like it can be rack mounted, but is in its
own rack with both pieces in one "box" with handles on it.

This is a very heavy unit, so shipping is not practical. I would
guess that it weights somewhere between 150 and 200 pounds.
I am located in North Central Florida. Pickup would be best. I
am only a few miles off of I-75, so someone coming south for
the winter could easily pick it up.

I am asking $500 for it. I think this is much more than fair. At a
recent hamfest, I saw a similar unit that was sold for $650, and
it did not have near the frequency coverage, and was in much
worse physical condition.

Thanks.

91. heavy duty power supply FS

Yahoo group: ham
Date: 2002-01-29 00:08:30 UTC
From: Ken Simpson, W8EK
Topic: 91 Message: 91

For Sale:

NJE Model QR-15-20 heavy duty lab type power supply

This power supply is fully adjustable from 0 to 15 Volts DC. It is capable of up to 20 amps. The voltage is adjustable with a precision 10 turn pot (which is lockable). There is also a current limit adjustment. A large voltmeter and large ammeter is also included on the front. There are voltage and current sensing pins located on the terminal strip on the back. It is very well regulated. Adding a 20 amp
load does not cause any movement of the voltmeter. This is a very, very nice power supply. It is also quite heavy. I would guess about 70 pounds. It is made to mount in a standard 19 inch rack and is 5 1/4 inches high and about 20 inches deep, counting knobs, handles, etc.

My preference would be to not ship this item, but instead have it picked up. I am located just off of I-75, in north central Florida. Someone making a winter trip to Florida might want to pick it up.
$ 125

Thanks.

Well here i am again with some great deals for those repeater buffs.

Well here i am again with some great deals for those repeater buffs. But before i spread the news. I would like to spread a little news and talk about talking about news. Yes, i could always use a boost or a jump start in advertizing Ham Radio News.
WEB SITE LOCATION: http://www.YahooGroups.com/group/HamRadioNews
CLICK THE FOLLOWING LINK TO SUBSCRIBE: Mailto:HamRadioNews-subscribe@...
DIRECT ALL QUESTIONS TO THE FOLLOWING LINK: Mailto:HamRadioNews-owner@...
Hopefully we will see some of you in Forsyth at the Ga.State ARES Meeting, Saturday Feb.9TH, 2002. I will have to leave out headed south directly after the ARES Meeting. I have an appointment to deliver the 220 Machine that i listed last week for sale, sold it to the President of the Georgia, Camden County A.R.C.. Delivering it to the Orlando Fla.HamVention and Computer Show at 8pm Saturday Feb.9TH, 2002.
I would like to thank everyone for spreading the word on the sale of the 220 machine. I had 46 inquiries and several still waiting in line as i await a check, in case anyones deal fell through. I never realized that so many would be intetrested in 220.
Well here i am again with some great deals for those repeater buffs. I have several complete VHF LoBand 156 Split Motorola Micor Compa-Station Base/Repeater Stations. These are Micor Compa Stations with 100 Watt Pa's, the ones with the hugh original Motorola Commercial Contioious Duty 19' rack mount heat sinks on the pa's. Comes with the original Motorola Continious Duty Power Supplies, mounted in nice clean origional motorola rack mount cabinets.
[With the origional Motorola Test Kits and motorola hand mikes while they last] NOTE: I will not part with the test kits seperately. These test kits are as near perfect as any i have ever seen. Not mint, but extra clean. Matter of fact some of the test kits are still in plastic covering.]
These Micor Compa-Station Base/Repeater Stations all started off life as real compa stations not converted micor mobiles. No keys for the locks [you muat have your own Motorola Lock Key and also no casters on the cabinets. These were all removed from working service at their origional location. The Macon Medical Center of Central Georgia's Ambulance Service.
All transmitter icons, squelch gate cards and time out timer cards were removed prior to units being removed from service on contract. They all contain station control cards. When converting to ham radio repeater use you have no need for the time out timer cards, nor the squelch gate cards as long as you are installing a full blown ham radio controller. Transmitter icons are plentiful at most all large ham fest for $5.00 to $10.00 each. For complete information on the Comprehensive Modification of a Micor Compa-Station Base/Repeater Station by Kevin K.Custer W3KKC (http://www.repeater-builder.com/rbtip/stationmod.html), please visit th repeater-builder tip site @ http://www.repeater-builder.com/rbtip/stationmod.html
For those interested in these Motorola Micor Compa-Station Base/Repeater Stations (http://www.repeater-builder.com/rbtip/stationmod.html). You can contact me direct e-mail: or Mailto:w3lap@... My advance price of $700.00 each is firm. No haggling. I will always consider trades as long as you have good clean ham or repeater gear. I don't trade for junk

so please don't waste my time.
I will deliver as far north as Chattanooga Tenn or the Dalton Ham Fest or the Dayton Ham Vention. I will deliver as far south as the Orlando Ham Vention and Computer Show. I will deliver for the cost of fuel. If you have been wanting a clean Micor Compa-Station Base/Repeater Station send me an e-mail. They won't last long.
Also to the first three buyers that purchase these Micor Compa-Station Base/Repeater Station i will part with three used CAT-500 controllers. These CAT-500 controllers are in perfect working condition. If for any reason that you purchase a controller and you find a problem before it is interfaced. I will personally pay shipping both ways and pay Ron the repair bill or return your origional purchase price [unconditional] no questions asked.
CAT-500 controllers (http://www.catauto.com/pdf/c500manual.pdf) $300.00 firm.
Also at buyers choice, to the first buyer that purchase a Micor Compa-Station Base/Repeater Station i will part with one new in the shipping carton with complete set of manuals and Rackmount Cabinet one S-COM 7K Repeater Controller (http://www.scomcontrollers.com/ds7kbx.html). This new S-COM 7K Repeater Controller is the flagship of mid-priced repeater controllers. With Autopatch, Reverse Patch, Link/Remote Base Ports, Scheduler, and Synthesized Speech. The top-of-the-line S-COM 7K Repeater Controller consists of a Main Board and Rackmount Cabinet. The cabinet accomodates two optional boards mounted in the chassis. The Telephone Interface Module (for Autopatch, Reverse Path, and Control by Phone Line), and the Speech Synthesizer Module. It also contains one optional Digital Audio Delay Module (http://www.scomcontrollers.com/dsdadm.html) (one each for repeater and link/remote base audio are available) one Digital Audio Delay Module (http://www.scomcontrollers.com/dsdadm.html) is mounted in the cover. Contains 7K Firmware Upgrade V2.03 (http://www.scomcontrollers.com/7k203.shtml) provides a number of new features for the 7K including access to the autopatch from all ports.
Retail if you ordered directly from S-Com today would be over $700.00 plus dollars.
You can own this new S-COM 7K Repeater Controller with all the bells and whistles for $450.00 firm with the purchase of one Micor Compa-Station Base/Repeater Station.
I will also cut someone a real red hot deal on all 5 Micor Compa-Station Base/Repeater Stations, with test sets and microphones, the S-COM 7K Repeater Controller, and the three CAT-500 Controlers as a complete package deal and split the fuel bill while delivering to your door anywhere in the lower 48 states.

93. B & W low pass filters FS

Yahoo group: ham
Date: 2002-02-12 20:55:54 UTC
From: Ken Simpson, W8EK
Topic: 93 Message: 93

For Sale:

B & W TVI filter, model FL 10 / 1500 (also known as
model 425). Translated, this means that it cuts off just
above 10 meters, and will handle 1500 Watts. SO-239
connector on each end. Looks and works just like new. $ 30

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says
right on it that it is for 52 ohm systems. It looks like it will
easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

94. TenTec Argosy 525 D HF xcvr and accessories FS

Yahoo group: ham
Date: 2002-02-14 01:35:43 UTC
From: Ken Simpson, W8EK
Topic: 94 Message: 94

TenTec equipment for sale:

TenTec Argosy 525 D, Digital HF xcvr
This solid state transceiver covers 80 thru 10 meters, including
to 10 MHz WARC band. It is switchable for 50 Watts or 5 Watts
of output power, and will operate on either CW or SSB. It has
digital readout, and a notch filter. This one is like it just came
out of the box from the factory. I can not find a scratch on it.
Of course the manual is included. $ 375

TenTec 225 power supply
This supply is made to match the Argosy transceiver. It supplies
13.8 volts at up to 9 amps. This one is in very nice shape. I found
one very small scratch on it. Paper work included for $100.

TenTec 234 speech processor.
This one is effective. It changes the audio into RF, processes it
at RF, so that the distortion is removed, and then changes it back
to audio. I have found that adding this processor is about the same
as turning an amplifier on. It really helps the talk power, without
introducing distortion like most speech processors. This one is in
good shape, with the paper work, for $100.

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546, Series A and
Series B, xcvrs. This one has all the paper work with it, including
warranty card, in its box, for $50.

Prices do not include shipping from Florida.

Thanks.

This one is effective. It changes the audio into RF, processes it at RF, so that the distortion is removed, and then changes it back to audio. I have found that adding this processor is about the same as turning an amplifier on. It really helps the talk power, without introducing distortion like most speech processors. This one is in very nice shape, with the paper work, for $100.

TenTec 214 desk microphone.
This is the electrolet mic that is banana shaped, that will slip in and out of a separate base. It is NOT the 705 gooseneck mic. It has a 4 pin plug for TenTec gear, and requires a polarizing voltage from the rig, to make the electrolet mic element work. This particular mic is one of the best I have ever seen. It looks very close to new. With the paper work for $65.

Buy both of the above together for $155.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 97 Message: 97

I have too many speaker mics -- especially for HTs I
no longer have, so they should go to others who can
use them.

Yaesu YM-24 A
This one has the little round (about 3/8 inch diameter),
strange 6 pin connector that Yaesu, Wilson, Santec,
and some others used. $ 20

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the
palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Prices do not include shipping from Florida.

Thanks.

98. Icom Phone Patch / Speaker Combo FS

Yahoo group: ham
Date: 2002-02-27 22:39:44 UTC
From: Ken Simpson, W8EK
Topic: 98 Message: 98

Icom Phone Patch / Speaker Combo For Sale:

This unit has a phone patch installed above the speaker, in an enclosure that looks like some of the speakers that Icom has made. I would say that it matches the Icom 745 and 751 and that series of rigs, but it looks "like Icom" all the way. It has a round 8 pin mic connector on the back, with a cord also coming out the back (with a round 8 pin plug on it) to plug into the rig. There is also a place to plug in the speaker, and phone cord with a module plug coming out the rear.

This particular unit is in nice shape. It has a very light scratch on the top, and there is a very slight wear on the bottom corner, if you look at it from the rear. The front looks great. $ 100 plus shipping from Florida.

Thanks.

100. Mirage 2 meter amplfier FS

Yahoo group: ham
Date: 2002-03-05 14:40:34 UTC
From: Ken Simpson, W8EK
Topic: 100 Message: 100

For Sale:

Mirage B-3016 amplifier (and pre-amp) for 2 meters
This amplifier is designed to be used with a 2 meter rig that has
about 30 watts output, and amplify it to about 160 watts. It also
has a preamp to help on the receive end. It requires 13 V DC
at about 25 amps. Input and output connectors are standard
SO-239. It can be used on SSB as well as FM, and has a switch
on the front panel to select SSB to include a "delay time".

This particular unit works 100%, as best I can tell. Cosmetically,
it look very, very nice. $ 190 plus shipping from Florida.

From: Ken Simpson, W8EK
Topic: 107 Message: 107

Desk Microphones For Sale:

Shure 450 controlled magnetic desk microphone.
It looks just like the 444 and has voice shaping built in to it,
with PTT switch on the base. High or Low Z selectable.
This mic is the gray color, and is in good shape for $ 50.

TenTec 214 desk microphone.
This is the electrolet mic that is banana shaped. It is NOT
the 705 gooseneck mic. Has 4 pin plug for TenTec gear,
and requires a polarizing voltage from the rig, to make the
electrolet mic element work. This one looks like it just came
out of its box. Like new, with the paper work for $60.

Turner 253 desk microphone.
This is a low Z model, so it will work with most of
the new modern rigs. It is a brushed chrome styling
with nice PTT switch. $35

ElectroVoice 729 Ceramic microphone.
This is the microphone that was made by EV, but used
by Drake for the "4 line", and then produced by TenTec
as their model 215 mic. It is a High Z ceramic. This one
works great, but looks a bit rough. $ 25

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

AMECO TX-86 Classic HF AM and CW transmitter. Lovely copper chassis
and front panel. Covers 80 thru 6m ham bands. This one looks
clean and nice. It's all there including the 6146 final but I have
not tested it. Will sell for $79.00 plus shipping.

Pictures at web site (see below)

Hallicrafters SX-99 receiver
Has new power cord, case is excellent. Has some interior rust but
all dials work OK. One main knob has a chip out of it.
It is all there and these defects can be easily fixed.
No returns, no warranty - Unit is sold as-is untested.
Will sell for $109.00 plus shipping

National NC-190 Receiver
This is nifty old receiver with that classic space age blue finish.
Front panel looks very nice, but some of the knobs look crusty and
need cleaning. Appears to be all original with no modifications.
Receiver is non working but it is all there, and will clean up nicely. Will sell for
$125.00 plus shipping

Harvey Wells Bandmaster Senior TBS-50C all band AM-CW transmitter In
very good condition, complete and untested. Reported to be working
when last used. No VFO or power supply. Front panel shows really
nicely. Will sell for $135.00

Heath VF-1 vfo with cables and repro manual. Looks very nice.
Will sell for $60.00

Heath HD-15 Phone Patch. Unit is in excellent condition with all
original knobs etc. Will sell for $22.00

Heath AM-2 SWR meter. Nice condition. Matches the DX-20, DX-35, DX-40
and DX-100 line of transmitters. This one is excess to my needs and I
will sell it for $18.00 plus shipping

Midland 13-510A 2m FM transceiver with original microphone and
original manual.
Needs cleaning. I have not tested this unit but it is all there. Will
sell for $39.00 plus shipping

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line. Unit is in excellent shape but
needs two scratches touched up on the top. Front looks great,
including the original knobs, meter etc. Will sell for $45.00 plus

shipping

Several more command sets:
ARC-5 series military receiver Model R-27. Unit is complete and in good shape. Will sell for $35.00 plus shipping

Modified ARC-5 receiver. Inside looks original - front panel has been tidied up and painted. Has BNC connectors. Will sell for $27.00 plus shipping.

Homebrew transmitter made from a nicely modified ARC-5 transmitter - conversion job. Will sell for $25.00 plus shipping.

BC-459A Transmitter
covers 7.0 - 9.1 Mc. Black case. Rotary coil etc. are in good shape. One small cover is missing - Bottom cover and case are both present and in good condition. Otherwise looks to be complete and in very good condition. Will sell for $35.00 plus shipping

BC-459A Transmitter - covers 7.0 - 9.1 Mc. silver case. Rotary coil etc. are in good shape. One small cover is missing - Bottom cover and case are both present and in good condition. Otherwise looks to be complete and in very good condition. Will sell for $35.00 plus shipping

WW2 British Mark 2 straight key. Missing two screws, but otherwise clean and in nice shape. Contacts are still in very good shape. A few imperfections, but will polish up and restore nicely. Will sell it for $42.00 plus shipping

NYE CO. Paddles for CW - very smooth feeling long-handle black paddles, in near mint condition. Will sell for $45.00

Straight Key - for the CW buff who wants to be ready for straight key night. Also useful for beginners learning the code. This has locking bar for tuning and is an adjustable key with nickel silver finish. Will sell for $25.00 plus shipping

TS-175 Frequency Counter - exceptionally nice military unit in near mint condition with original chart. covers 125 kHz to 20 MHz.
 Will sell for $95.00 plus shipping

LM-10 frequency counter - 'Type CRR-7402B crystal calibrated frequency indicating equipment' with original chart book, in very good condition. Will sell for $55.00 plus shipping

MFJ 204B Antenna noise bridge with original manual.
Will sell for $45.00 plus shipping

Daiwa two position Low-loss antenna switch Model CS-201. Will sell for $19.00 plus shipping

MFJ-941D Versatuner II antenna tuner in excellent shape. Matches about any antenna to your HF rig. 300 Watt antenna tuner that covers everything from 1.8 - 30 MHz and includes meter, antenna switch and a 4:1 balun. Meter shows SWR, forward and reflected power - antenna switch lets you select 2 coax lines, random wire/balanced line or dummy load (direct or through). Efficient 12 position airwound inductor gives lower losses and more power out. Has 4:1 balun, 1000 Volt capacitors, and a beautiful aluminum cabinet. Will sell for $59.00 plus shipping

Knight TR-106 with V-107 VFO
Excellent looking Knight 6m AM transceiver with the matching VFO. Also comes with the original, blue 'Knight' labelled Shure hand microphone. This radio can operate on either 12V DC or 115V AC. Comes with 115V AC cable. Otherwise complete and has very nice appearance. Sold as-is. Comes with a copy of the manual.

Aerotron 600 VHF FM base radio transceiver. Includes original Shure microphone, built in 115V AC and 12V DC power supplies. Comes with AC cable. Uses venerable 6360 driver and 6360 tetrode final tubes for a power output of 10 watts. Sold untested, as-is with no warranty and no return. Will sell this complete set for $25.00 plus shipping

- 70 cm power amplifier, with GI7B triode, gain about 12 dB
output power max 250-300 W. Compact construction, L=270 mm, H=130 mm, W=120
mm, weight=2.65 kg, aluminium box.
Input on PL plug, output on N plug, bias circuit inside, one tube included.
Some parts are silvered.
No heathing or anodic source inside.
- 23 cm power amplifier with GI7B triode. Cooper and brass construction, some
parts are silvered. Input and output are on N plugs.
Gain it is about 11-12 dB, and output power in 250-300 W range for
stable service.
- 13 cm power amplifier with 2C39 triode. Cooper and brass construction, RF
parts are silvered.
Gain it is about 10-11 dB, max 25-30 W output power with air cooling and 60
W with water cooling. Input and output are on N plugs.
- special air radiators for GI7/GS9 tubes for better air cooling.
- water jackets for GI7/GS9 and 2C39.
- 4 ports antenna splitter for 70 cm, brass and cooper, N plugs.
- quad hybrid coupler for 23 cm, all parts silvered, N plugs.
- coax relays, 26 V, N plugs, made by Radiall.
- DC/DC static convertor, 12V-600/750/800 V also -120 V and 500 V.
- QBL 5/3500 tetrodes, used but seems to be in good shape.
- GU40B tetrode with socket, seems to be in good shape.
- pair of 70cm FM cristal controled transceivers, used for packet radio.
Details available at request, regards, 73.

Subject: [MilwAres] NEW UHF REPEATER

Reply-to: MilwAres@yahoogroups.com

over the past weekend Chad WX9CMN and myself just installed a UHF
repeater this repeater is in the approximate area of 35th st. and
Wisconsin ave. the antenna is about 50' up and the repeater should
be on the air 24/7 baring no unexpected problems the coverage seems
to be real good especially to the south and west of the site
location the frequency for the repeater is 442.475+ with no P.L.
required at this time this could be a good back up repeater for
various events and other times when you want another repeater to
turn too the callsign of the repeater is WX9CMN/R please come and
check it out Chad and myself would like to see it get used by anyone
who wants to use it we have other plans in the works including a
possible weekly net so if you have 440 please come join us on
442.475+ we are looking for signal reports from all over town and
would like to put together a coverage map thanks a lot and 73 to all
on the list David KB9EWG cotrol op for the WX9CMN repeater

117. RIGS FOR SALE

Yahoo group: ham
Date: 2002-05-25 12:14:14 UTC
From: Brian Carling
Topic: 116 Message: 117

FOR SALE:

Heathkit HW-17 classic 2m AM transceiver with microphone.
Dial glass is missing but otherwise very clean.
Pictures available on request.
Selling for $45.00 plus shipping.

Harvey Wells Bandmaster Senior TBS-50C all band AM-CW transmitter
In very good condition. Reported to be working when last used.
Front panel shows really nicely. Comes with a repro manual.
E-mail me for photos. Will sell for $135.00

CLASSIC 1940s-50s HOMEBREW TUNER.
What a beauty! Like a Johnson only better. You should see the components and
the dials. This jewel has all heavy duty components including a
dandy of a roller inductor with turns counter, The variable capacitors are
pretty large and looks like it would handle a kilowatt with ease.
The versatile circuit is configurable for either series or parallel 'T'
configuration. Has jumpers in front to change set-up easily.
Has built-in SWR bridge utilizing an E.F. Johnson meter with
controls for FWD, REV and gain. Case is made of hammertone finish steel
with a removable lid. There is a small chip out of one of the knobs.
Otherwise it's excellent. E-mail me for photos.
Will sell this gem for $175.00 firm plus shipping

Heath HW-202
Classic Heath 2m FM mobile transceiver with plenty of chrome.
Comes with the microphone. Comes with the ORIGINAL (thick!) manual,
original Heath microphone, cables etc.
Has crystals in it for:
146.07 / 146.67
146.16 / 146.76
146.22 / 146.82
146.34 / 146.94
146.94 Simplex
Pictures available on request.
Untested - selling for $39.00 plus shipping

Heath HD-15 Phone Patch. Unit is in top condition
with all original knobs etc. Pictures available on request.
Reduced to $19.00

Yaesu SP-901P Phone patch / Speaker Accessory
Perfect to round out your FT-901 line.
Unit is in excellent shape but needs two small scratches touched up
on the top. Front looks great, including the original knobs, meter etc.

Pictures available on request.
Will sell for $45.00 plus shipping

Homebrew AM transmitter with 1625 final plate modulated by a pair of
5881 tubes. Good iron inside.
Made from a nicely modified ARC-5 transmitter conversion job.
Has an older style 4-pin mic input, gain control etc. etc.
Appears to be made for 40m band and it has final tank of 17 turns
silver plated copper 16-18 gauge wire on a 2" diameter ceramic form.
Pictures available on request.
Available for $25.00 without the two 5881 tubes or for $35.00 with them.
Shipping additional.

118. RIGS FOR SALE - Reduced!

Yahoo group: ham
Date: 2002-05-28 12:31:38 UTC
From: Brian Carling

transmitter In very good condition, complete and untested.
Previous owner reported it to be working when last used.
Requires carbon mic or pre-amplifer for crystal/dynamic types.
No VFO or power supply. Front panel shows really nicely.
Send for pictures.
Reduced to $115.00 plus shipping

James Millen Company SWR Bridge
Type 90671
Beautiful black crackle finish. No scratches or dents.
Serial Number 812. Has SO-239 connectors.
Has phono type output for 0-1mA meter.
Dial scale not original but looks appropriate.
Reduced to $35.00

Clegg 22'er classic 2m FM transceiver with mic and manual.
Great looking rig. Same as used by Jeff Duntemann and others
Picture available on request.
Reduced to $45.00 plus shipping

Heath HD-15 Phone Patch. Unit is in excellent condition with all original knobs etc.
Picture available on request.
Reduced to $19.00 plus ship

Hammarlund Transmitting Variable Capacitor
Model CHC-482369
Brand new and unused 0 - 140 pF variable.
Looks like about 2 Kv rating.
(Has 0.1 inch spacing between plates)
Measurements 4" X 3.2" X 2.2" high. Has the normal 1/4" shaft.
Picture available...
Will sell for $20.00 plus shipping

BC-459A Transmitter
covers 7.0 - 9.1 Mc. silver case. Rotary coil etc. are in good shape.
One small cover is missing - Bottom cover and top cover/case are
both present and in good condition. Otherwise looks to be complete
and in very good condition. Picture available.
Reduced to $25.00 plus shipping

From: coolrigger7
Topic: 121 Message: 121

Dear Member,

Radio Modifications is a group dedicated to the repair maintenance and modification of radio related equipment. I found this group, which is extremely helpful for ham radio operators who need information about their equipment. Whether you are a novice or experienced, this group will benefit all aspects of ham radio.

If you would like to join, please email the following RadioModifications-subscribe@yahoogroups.com or go to the website http://groups.yahoo.com/group/RadioModifications

122. AEA PK-232 MBX digital controller FS

Yahoo group: ham
Date: 2002-07-11 17:26:39 UTC
From: Ken Simpson, W8EK
Topic: 122 Message: 122

For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, PACTOR, etc. I think that it has the latest
firmware, other than the DSP option. It includes the big
thick manual, plus a cable made to go to an 8 pin Kenwood
microphone connector. $ 95

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the PK-232. $ 15

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

123. Kenwood 2 m and 440 MHz HTs FS

Yahoo group: ham
Date: 2002-07-12 23:13:20 UTC
From: Ken Simpson, W8EK
Topic: 123 Message: 123

For Sale:

Kenwood TH-21 AT HT for 2 meters.
Fully synthesized, small HT, about the size of a deck of
cards. Thumbwheel selection of frequency. Very easy
to use. About 1.3 W in high power and 1/3 W in low power.
This one is in very nice condition. It includes rubber duck
antenna, good battery, charger, and original manual for $65.

Kenwood TH-41 BT HT for 440 MHz.
Similar to the TH-21 above, but for 440 MHz.
SubAudible (PL) tones internal, with DIP switch selection.
Very good shape, with rubber duck, battery, charger and
original manual for $95.

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a
"cut out" for the DIP switches on the PL encoder, but will
protect the HT in great shape. $ 10

Kenwood speaker mic.
I can not find a model number on it, but it is the same spacing
on the plug as an SMC-30, but it has a right angle plug.
Good shape for $25.

Kenwood "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

124. FS: Collins KWM-2 Mobile Power Supply $49.00

Yahoo group: ham
Date: 2002-07-15 02:44:29 UTC
From: Brian Carling
Topic: 120 Message: 124

For Sale: Collins Power Supply for the KWM-2 HF Transceiver.
It runs on 28V DC. Appears to be complete and sold as-is,
untested.

Will sell for $49.00 plus shipping

E-mail me for a photo.

125. Desk charger, batteries, and accessories for ADI HTs FS

Yahoo group: ham
Date: 2002-07-26 15:24:38 UTC
From: Ken Simpson, W8EK
Topic: 125 Message: 125

Accessory items for ADI HTs:

Note: All of these batteries will fit the ADI AT-200 /
201 / 400 / 401 / 600 HTs. The polarity of the wall charger
is reversed on the AT-600, as compared to the others. This
makes no difference if the desk charger is used, as those
connections are all the same. It would make a difference
if the wall charger is used.

For any ADI HT:

ADI ARC-12 "smart" desk charger
This will work with any of the batteries below for any of the
ADI HTs. It charges in about 90 minutes, and also has a
discharge, or reconditioning, mode to revitalize batteries
that have a memory effect. In its box for $ 65.

For the AT-600 dual band HT:

RBP-612 "High Power"`12 volt battery with a NiMH,
1000 mahr "rebuild". Only charged 4 or 5 times. $ 35

ADI-600x, by Batteries America
Aftermarket 12 V, 1100 mahr NiMH battery. Charged 3
or 4 times. $ 35

RBP-612 pack. This one is dead, or close to it, and will need
a new "insert". Shell is in very good shape. $ 10

MFJ-1716 dual band rubber duck antenna
BNC connector. Works much better than most of the
antennas that come with the HTs. Like new. $15

For the AT-200 / 201 / 400 / 401 HT:

RBP-1200 NiMH pack. 12V high power at 1000 mahr
Has new insert. $ 40

Standard CNB244AB, 12 volt, 1000 mahr NiCad.
Although it has a Standard label, it is the same as used
on the ADIs. $ 30

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

126. REDUCED: Heath AG-9 Audio Generator

Yahoo group: ham
Date: 2002-08-02 13:19:37 UTC
From: Brian Carling
Topic: 126 Message: 126

REDUCED: Heath AG-9 Audio Generator
Frequency range 10Hz - 100kHz.
Distortion in the order of 0.05% or less...
Also features very versatile output attenuator with meter,
output can be adjusted from about 1mV to 10V RMS
continuously variable.
External or Internal 600 ohm load can be switched in.
- a useful piece of equipment.

Will sell for $25.00 plus shipping

127. FS: Tubes

Yahoo group: ham
Date: 2002-08-03 14:25:40 UTC
From: Brian Carling
Topic: 126 Message: 127

I have the following tubes available. All are new in the boxes.

12AT7 / ECC83 Amperex Bugle Boy
5751 RCA
5751 Sylvania
5751WA Hewlett Packard
12AU7 RCA - QTY 3
5814 General Electric

I would like to get $10 for the Bugle Boy tube and $8.00 each for
the others.

Shipping additional

128. FS: Crystal Sockets

Yahoo group: ham
Date: 2002-08-03 22:14:20 UTC
From: Brian Carling
Topic: 128 Message: 128

FOR SALE:

Crystal sockets for HC-6/U crystals.
If anyone would like some, I have about 10 or 20 of these available for $2.00 each plus shipping

These are new parts. They are teflon and anodized metal.
They have two hole side mounting, with a clip that nicely holds the crystal in place.

Great for repairing older rigs, or for homebrewing tube transmitters & receivers.

This is NOT the same as FT243. These are for the similar sized crystals that have thinner pins.

E-mail me if you would like some.

137. Autek QF-1 A audio filter FS

Yahoo group: ham
Date: 2002-08-26 22:04:25 UTC
From: Ken Simpson, W8EK
Topic: 137 Message: 137

For Sale:

Autek QF-1 A Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an RCA
phono plug, and the output is a 1/4 inch jack on the rear panel.
This particular unit looks very close to new (it has a very small
scratch on the top--the rest is perfect), and works the same.
With paper work for $ 45 plus shipping from Florida.

Thanks.

138. Kenwood HT and accessories FS

Yahoo group: ham
Date: 2002-08-28 11:51:05 UTC
From: Ken Simpson, W8EK
Topic: 61 Message: 138

For Sale:

Kenwood TH-21 HT for 2 meters.
Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. Very easy to use. About 1.3 W in high power and 1/3 W in low power. This one is in very nice condition. It includes rubber duck antenna, good battery, charger, and original manual for $65.

Kenwood BC-6 fast desk charger.
Charges PB-21 and PB-21 H battery packs, as used on the Kenwood TH-21 / 31 / 41 series of HTs. Holds two batteries, charging one and then the other. Takes about an hour or so to charge. It can also be used to power the radio for base station use. With manual for $ 50.

Kenwood SMC-30 speaker mic for use with TH-21 / 31 / 41 series of HTs and other Kenwood HTs.
Good shape for $25.

Kenwood SMC ?? Speaker mic.
It has the same connections as the SMC-30, but has an "L" connector, instead of the straight connector. $ 25

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a "cut out" for the DIP switches on the PL encoder, but will protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41 from 13 V DC. Includes cigarette lighter plug, and voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21, two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH - 21 / 31/ 41, and adapt it to standard PL-259 antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

Drake TV-300-HP
High Pass filter for the TV. 300 ohm twin lead.
This filter is collectable, in that it is unused as best I can
determine.
It is still in its original box, with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A
grounding strap is also attached. The case is no longer shiny,
but I am fairly certain it has never been used. $ 15

140. TenTec Digital Triton 544 HF xcvr FS

Yahoo group: ham

From: Ken Simpson, W8EK
Topic: 140 Message: 140

For Sale:

TenTec Triton IV, Model 544, digital HF xcvr
Covers 80 thru 10 meters (no WARC bands) with 100 W
output. SSB and CW, with full QSK on CW. This is
the model with the digital readout. This one is in nice
shape. It has a scratch on the heat sink, and some wear
around the mode switch, but in general is in very nice
condition. With manual for $ 275.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

Buy both of above together for $360.

Prices do not include shipping from Florida.

Thanks.

144. Heath SB-630 station console FS

Yahoo group: ham
Date: 2002-09-07 12:39:06 UTC
From: Ken Simpson, W8EK
Topic: 144 Message: 144

Heath SB-630 Station Console For Sale

This unit includes an SWR bridge, phone patch, station ID
timer (both visual and auditory), and digital mechanical clock.
Its styling is such to match the SB-100/101/102 xcvrs, and
the SB-300/301/303 and SB-400/401 combos.

This particular unit has a WORKING original digital mechanical
clock. Most of these have had the clock quit, but this one works,
and the big digits look fine as well. The seconds digits are
not as clear, but if I remember correctly, those digits
smeared when a new one was about a week old. It is all
original. The face is in nice shape. The case is not perfect,
but it is not as bad as most. A bit of dust, but no dings.

Paper work included for $ 100 plus shipping from Florida.

Thanks.

149. TenTec 229 B full power HF tuner and other TenTec items FS

Yahoo group: ham
Date: 2002-10-09 12:30:28 UTC
From: Ken Simpson, W8EK
Topic: 149 Message: 149

For Sale:

Ten-Tec 229 B antenna tuner. Has roller inductor,
so will match almost any antenna, 160 through 10
meters, including WARC bands. Good for full legal
power. Also has wattmeter, SWR bridge, and a 4
position antenna switch. Almost new condition.
This particular one is the color that matches the
Corsair II / Paragon series. With manual for $ 250.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks almost like new, and works
the same. With manual and original box for $ 145.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546 or 545,
but not the newer Omni V or VI. This one has all the paper
work with it, for $50.

TenTec 245 CW filter
Plugs in to the Triton (I, II, IV, 540 and 544).
Works great, with paper work for $50

Prices do not include shipping from Florida.

Thanks.

160. Greenlee Chassis Punches FS

Yahoo group: ham
Date: 2002-11-16 20:06:45 UTC
From: Ken Simpson, W8EK
Topic: 160 Message: 160

In digging thru some more "stuff", I found a box of Greenlee chassis punches that I am certain I will never use, so they might as well go to someone that can.

All of them are in very good shape, and all are in their original boxes. I have attempted to price them at about 1/2 to 2/3 of new price, which I think would be fair.

Here is what is available:

Round
1 3/8 inch - $ 23
7/8 inch - $ 21
5/8 inch - $ 20

Square
1/2 inch - $ 50
3/4 inch - $ 100 (appears to be new and never used)

"Conduit set"
These are sold as a set only, for two reasons. They came that way, and there are only 2 bolts for four punches. Greenlee has the size of the conduit marked on them, but of course the hole is larger than the conduit. Hole size, as best I can measure is in ( ).
1 inch (1 1/4)
1 1/4 inch (1 5/8)
1 1/2 inch (1 3/4)
2 inch (2 1/4)
These are not in boxes, and are used more, but still have a lot of life left, and are in good shape. $100 for the set.

Prices do not include shipping from Florida.

Thanks.

162. Low Pass Filters for TVI prevention FS

Yahoo group: ham
Date: 2002-11-24 16:38:12 UTC
From: Ken Simpson, W8EK
Topic: 162 Message: 162

For Sale:

E F Johnson low pass filter for sale.
52 ohms impedance, Catalog number 250-20. This is the
cylindrical filter, with an SO-239 connector on each end.
It even has its brackets for mounting it to the wall still with
it. $30

B & W TVI filter, model 425, (also known as model
FL 10 / 1500). Translated, this means that it cuts off just
above 10 meters, and will handle 1500 Watts. SO-239
connector on each end. $ 30

Ameco Model LN-2
It says it is designed for 50 to 72 ohm coax. This is a smaller
filter, good only for about 100 watts. It could be used between
an exciter and amplifier, if desired. SO-239 connector on
each end. Good shape. $ 12

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says
right on it that it is for 52 ohm systems. It looks like it will
easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

NyeViking 020-001
Cuts off just above 10 meters, and will take full legal
power. Nice shape. $ 30

Prices do not include shipping from Florida.

Thanks.

164. RadioShack -> Silent Key for HAM Radio

Yahoo group: ham
Date: 2002-11-28 03:49:52 UTC
From: James
Topic: 164 Message: 164

http://www.eham.net/articles/4317

RadioShack -> Silent Key for HAM Radio
Loren B. Cobb (KD7PLU) on November 27, 2002
Add a comment about this article!
After spending many, many dollars on IC Circuits, Resistors, Wire, Et al . . My the writing on the wall finally came clear when I asked some direct questions: 'You're out of Zeners and 2200uf Caps. When will they be re-stocked? And why don't you carry HAM stuff on the shelf anymore?'

I should have known when the HTX-252 went to 99 Dollars. Or when all the scanners were thrown under glass with big-red tags attached. But an open door revealed the 50 Ohm coax, packaged IC's and small transformers sitting in the back room collecting dust along with three full display panels of the like resting against the wall~ like tombstones of what used to be a Ham radio mecca.

'You got questions, we got blank stares . . .' This used to be the statement we all fondly remember after a trip to the shack. Now it's not so easy to live with. "We're not going to carry that stuff anymore. It's all been discontinued, and we'll probably start discounting it as closeout as soon as we have room."

No need to count the miles of register tape, but I'm positive my local RatShack has sold more loose components and parts to me alone to defend keeping the asile in-place and well-stocked! Now I'm thrown from the bus to make room for consumer electronics, cell phone accessories and DVD-VHS combo players! I'm mad. I feel my customer value and loyalty to the shop has been violated. They have taken a broadband selection of loyal patrons and spit them out like a watermelon seed on the sidewalk.

Why go back now? Catch a few deals? Hover over the 'bargin-bin of once loved, never-ending (Until now) flow of 8-pin dips and voltage reglators?! Why bother? Time to start going to national and other large, online electronic parts resellers that still know and love the considerable amount of money that hams pour into research, projects, PS & Amps . . even breadboards that do nothing but make good smoke-generators.

I'm sad to see what I feel is an end of an era. Another massive blow to our hobby, and a very clear indicator that the river of new hams will soon wither to a desert wash. We sat on our cans, we didn't go out and show-off the hobby, we didn't elmer the kid that asked if the HT was a scanner or phone. No- We just smirked and walked on. Too busy, to elite, too bothered by those who are green or un-aware of the complex, inter-workings of their own electronic world. We are the blame. The customers we could have programmed into buying things from our nook of the store are now going directly to the PILE of cheap RC-Cars and over-priced, plastic cell-phone covers with blue LEDs.

This infighting between old-school sparks and no-code techs; or the CW/No CW debate has got to end. We're standing by as 440 turns to liquid, our ATV channels are up for bid and everything above 800Mhz is a grab-bag for LD carriers to lay stake and slowly flood into our spectrum.

Go ahead and recon the sales coming up at your local shack. But do us all a favor- bring a young person with you. And when you get home, show them some very simple projects that will at least prime the well so we're not sitting on hill-tops using flashlights to communicate instead of radios in five years.

169. Kenwood MC-50 and other desk microphones FS

Yahoo group: ham
Date: 2002-12-05 23:41:40 UTC
From: Ken Simpson, W8EK
Topic: 169 Message: 169

For Sale:

Kenwood MC-50 desk microphone. This is the
popular mic that is made to match the TS-120,
TS-130, TS-180, TS-520, TS-820, TS-530, TS-830
and others of that vintage. It has both high and low
Z output. This one is in very nice shape. Someone
very tastefully added and "up" and a "down" pushbutton
switch to it, making it function like the $100 type of
desk mics. But this one is only $ 60.

Other microphones and related for sale:

Turner 253 desk microphone.
This is a low Z model, so it will work with most of
the new modern rigs. It is a brushed chrome styling
with nice PTT switch. It looks almost like new. $45

Shure 444 desk microphone.
The Shure has voice shaping built in to it, with PTT switch
on the base, and a switch for High or Low Z under the base.
This mic is the gray color, and is in good shape for $ 45.

Turner "Plus 3" desk microphone
It has an amplifier built in to the base, so will match
either Hi Z or Lo Z rigs. Nice shape for $50

Prices do not include shipping from Florida.

Thanks.

171. CW keyer and paddles FS

Yahoo group: ham
Date: 2002-12-09 19:10:51 UTC
From: Ken Simpson, W8EK
Topic: 171 Message: 171

For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ 422 (Not the "B" model)
Very similar to above, but older version. $55

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. Very nice condition. $65

I'll make you a deal if you want both a keyer and a paddle.
Either keyer will fit on either paddle.

Prices do not include shipping from Florida.

Thanks.

Accessories for Kenwood TH-21 / 31 / 41 HTs For Sale:

Kenwood PB-21 H
This is the heavy duty battery for the TH-21 / 31 /41 series
of HTs. It is 450 mahr, instead of the standard 180 mahr of
the regular PB-21. With paperwork for $ 25.

Kenwood W09-0393
"Wall wort" charger to use with the PB-21 H battery pack
(above), if you do not use the desk charger. This is NOT
the standard charger for the regular PB-21, but a special
one for the PB-21 H. $10

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a
"cut out" for the DIP switches on the PL encoder, but will
protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 139 Message: 186

I have a variety of TVI filters For Sale:

Drake TV-42-LP
Low pass filter for the transmitter.
Rated for 100 W thru 30 MHz. It looks like
new, except for slight wear on the label. $ 15

Ameco Model LN-2 low pass filter
It says it is designed for 50 to 72 ohm coax.
Good for about 100 watts. It could be used between
an exciter and amplifier, if desired. SO-239 connector on
each end. Good shape. $ 12

B & W 425 "antique" low pass filter
I know most people are not going to think that a B & W 425
low pass filter is that old, but this one is. I never saw one
like it before. It appears that the case is made of copper,
or at least copper plated, and then painted. There are just
enough of the paint flakes coming off to see the copper
underneath. The weight of this filter is about twice that of
the more modern B & W 425 filters. In case any one does
not know, the 425 is rated to take full legal power, and cuts
off just above 10 meters. This one is $ 30.

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

198. FS: Triplett Frequency Meter

Yahoo group: ham
Date: 2003-01-22 01:31:54 UTC
From: Brian Carling
Topic: 196 Message: 198

FOR SALE:
Triplett Model 3256 Frequency Meter.
This appears to be an absorption wave meter.
Shaped very much like a grid dip meter.
Has two ranges. One band covers 80 and 40m and has
the calibration markings for these two bands.
Other band covers 14 through 30 Mc with markings for
20m, 15m and 10m bands.
Has a switch to select between the two ranges.
Neat little gadget measures 5-1/4" long X 2-1/4" X 2-1/4"
plus a coil extends 2-1/2" out the top.

Has a very nice Triplett 0-1 mA meter built in.
There is a headphone jack on the front for monitoring detected
signals. Signals are coupled into the unit by inductive coupling to the coil. Can be used for identifying, monitoring and tracing RF signals along transmission lines, in tank circuits etc.

Condition of the unit is very good. Gray hammertone finish over copper plated
steel chassis-cabinet.

Will sell for $18.00 plus shipping

Date: 2003-01-31 13:34:25 UTC
From: Ken Simpson, W8EK
Topic: 206 Message: 206

For Sale:

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Both of the above for $100.

Prices do not include shipping from Florida.

Thanks.

Date: 2003-02-20 20:32:11 UTC
From: Brian Carling
Topic: 210 Message: 210

FOR SALE:
Swan 250 with 117C power supply/speaker cabinet. Comes with all cables
The Swan 250 is a 6 meter transceiver which was first introduced in the spring of 1965.
With two 6146B tubes as the PA, this radio is rated at 240 watts PEP on SSB, 180 watts CW, and 75 watts on AM.
Band coverage is 50 to 54 Mc, and the pi network coupling provides for a wide range of antenna impedances.
The original selling price of the 250 was shown as $325.00 US.
A review of the 250 appears in the July 1967 issue of CQ.
All in good operating condition with manual. Cabinets look excellent.
The 117C power supply has two small holes in the front, easily filled.
Swan 250 available for $225.00
Swan 117C available for $75.00
Will sell for $275.00 plus shipping

Also have VX-2 VOX unit possibly available for additional $35.00
(Sale is pending with the 350 at present)

219. FS: Rare Globe Electronics VHF-62 Transmitter

Yahoo group: ham
Date: 2003-03-01 14:48:14 UTC
From: Brian Carling
Topic: 219 Message: 219

FOR SALE:

Globe Electronics Hi-Bander model VHF-62 Transmitter.
RARELY seen. This rig runs 60 watts AM and CW on both
6 meters and 2 meters.
Equipment is in fairly good shape. The inside looks
VERY good.
Tubes: 6146 P.A. final and modulator type 6L6GB.
Has a built-in 120V AC power supply, modulator etc.
Provision is made for VFO input or crystal control.
Pilot lamps for power & plate.
Front panel controls are: AC off-Mic Gain,
Function switch for: AM/STBY/TUNE/STBY/CW,
Osc. Tune, Buffer Tune, Band selector 2m/6m,
Final Grid Tune, Antenna load, Final plate tune,
Meter switch for Osc./Buffer/PA Grid/PA Plate.
On the rear panel there are two fuses, Mic input,
Accessory plug, and SO-239 connectors
for 2m and 6m antennas.

This is a really cool piece of equipment and
they only sold a small number of them.
Must be one of a handful still in existence.
Will sell for $159.00 plus shipping

Picture and details at:
http://www.gizba.com/x/sidevalve/radios.htm

220. Yaesu FNB-38 battery for FT-51 HT FS

Yahoo group: ham
Date: 2003-03-05 00:00:21 UTC
From: Ken Simpson, W8EK
Topic: 220 Message: 220

For Sale:

Yaesu FNB-38 Battery Pack for FT-51 dual band HT

This is the "5 Watt" pack; 9.6 volts at 600 mahr.
Works fine (I think it has been charged 2 or 3 times),
but I no longer have the HT.

$45 plus shipping from Florida.

Thanks.

227. Keithley 168 lab quality autoranging DMM FS

Yahoo group: ham
Date: 2003-03-15 17:03:00 UTC
From: Ken Simpson, W8EK
Topic: 227 Message: 227

For Sale:

Keithley 168 autoranging lab quality DMM

This unit is being sold for parts only. It includes the
standard Keithley case that fits many Keithley meters.
It measures AC and DC voltage, AC and DC current,
and resistance. This particular unit comes on, the LEDs
light up, and it looks like it should work. However,
when a voltage is applied, nothing changes. It would
appear that the AC power supply is working, but some
part of the metering circuitry is not functioning.

$10 plus shipping from Florida.

Thanks.

For Sale:

Bencher BY-2 Iambic CW Paddle.
True Bencher, and not the MFJ clone. This has the
chrome base, with chrome parts, in other words --
all chrome. Very nice condition, in its box, with
paperwork for $95.

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

Both of the above for $145.

Prices do not include shipping from Florida.

Thanks.

248. Midland SWR bridge FS

Yahoo group: ham
Date: 2003-04-19 22:00:20 UTC
From: Ken Simpson, W8EK
Topic: 248 Message: 248

For Sale:

Midland 23-126 SWR bridge.

This is a nice standard SWR bridge to check the SWR
on your antennas. It has a meter that is switched
between forward and reverse power.

The paper work (included with it) says it covers from
3.5 to 150 MHz, so that means it can be used on 6
and 2 meters as well as the HF bands.

This particular meter works 100% and looks like it
just came out of the box.

$20 plus shipping from Florida.

Thanks.

digital mode controllers For Sale:

AEA/Heath HK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY,
Amtor, ASCII, CW, etc. This is the version that includes
the internal mailbox. I think the firmware is the latest,
although I never know when they might come out with
an upgrade. I can not find a scratch on it. With paper
work for $ 85

AEA PK-88, with the mailbox.
This unit will only do packet, and not all of the other
exotic modes, but it does packet really well. This one
also works 100%, and looks the same. $ 50

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88. $ 20

Prices do not include shipping from Florida.

260. CW key FS

Yahoo group: ham
Date: 2003-05-27 18:24:56 UTC
From: Ken Simpson, W8EK
Topic: 260 Message: 260

CW Key For Sale:

This CW key is sort of a Japanese copy of J-38 key.
Not exactly, but sort of! There is no shorting switch,
as if we need that anyhow. But it has an oval base
that is brass colored. The key is mounted on a wood
base, that I think is cedar. Under the wood base is a
piece of lead to add weight, so the key will not "walk
around". There are also four fairly large rubber feet
to keep it from slipping.

$30 plus shipping from Florida.

Thanks.

280. FS: Cantenna style dummy load

Yahoo group: ham
Date: 2003-07-19 11:45:26 UTC
From: Brian Carling
Topic: 280 Message: 280

FOR SALE:

52 ohm at 1 KW dummy load. Looks just like the
Heath Cantenna but can't say for sure as the label is gone.

Can has a small dent but this does not affect performance.
Has SO-239 connector on top for standard co-ax to attach.

Comes with "Tee" adapter for sampling RF.

Will ship without oil and you add mineral oil.

Available for $10.00 plus shipping.

281. REDUCED: Two Hammarlund Super Pros

Yahoo group: ham
Date: 2003-07-19 12:51:21 UTC
From: Brian Carling
Topic: 281 Message: 281

REDUCED:

Hammarlund Super Pro receivers needing restoration.
I have two of these. Both are missing several tubes, but the dials, transformers, meters etc. all look good.

You might put tubes into one or both and find that they play OK.

Great for "parts rigs."
No covers.
You will need a power supply for these receivers.

eHam reviews:
Considering the 1938 design, the designer was brilliant. It is almost unbelievable radios like this existed 65 years ago. The radio has a so-so xtal filter, however the mechanical coupled I.F. bandwidth control actually works! The 15 watts of high-end quality PP audio using triode connected 6F6s driven by a 6F6 could 'fly' in a modern high-end tube type stereo system. Good sensitivity with a good audio amps equals picking out the signal you want to hear out of the three on top of one another. Some AMers swear by this radio. A SP-400 would perform about the same - N8FVJ

I am one of the AMers who swears by this radio... it has the rich, creamy smooth AM sound and warm tube overtones that you just don't get from most communications receivers. In terms of pleasant audio, I have put it up against an SX28 - and the Hammarlund won. - W1GFH

There were a lot of tire kickers, therefore:
Now reduced to only $65.00 each, plus shipping.

I am told that the models are as follows:
The first one appears to be either an SP-110X or SP-210X.

The second one is a military version of the SPR-210X, a.k.a. BC779.
It has been modifed to use miniature tubes in the RF section
100 kHz to 20 MHz in 5 ranges.

E-mail me for pictures.

283. Kenwood TU-6 subaudible tone encoder and associated items FS

Yahoo group: ham
Date: 2003-07-24 15:56:52 UTC
From: Ken Simpson, W8EK
Topic: 283 Message: 283

For Sale:

Kenwood TU-6 sub-audible tone encoder
for use in the TH-21 / 31 / 41 series of HTs.
With paper work, in great shape, for $40.

Other associated items:

Kenwood TH-21 AT 2 meter HT.
Fully synthesized, small HT, about the size of a deck of
cards. Thumbwheel selection of frequency. Very easy
to use. About 1.3 W in high power and 1/3 W in low power.
This one is in very nice condition. It includes rubber duck
antenna, good battery, charger, and original manual for $65.

Kenwood PB-21 battery pack.
As used on the TH-21 / 31 /41. Very good shape,
in its box, with paper work. $25

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs.
This will protect the HT in great shape. $ 10

DC adapter used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug. $20

Kenwood BH-2 belt clip for the TH-21 / 31/ 41. $ 5

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

ARRL books For Sale (new list July 28, 2003):

"Understanding Amateur Radio"
1971 - 2nd edition - $ 7
1963 - First edition - some stains in book - $ 8

"ARRL Antenna Book"
1964 - 10th edition - $ 8

"A Course in the Radio Fundamentals"
1973 - 5th edition - $ 6

"Your VHF Companion"
1992 - First edition. $8

"FM and Repeaters for the Radio Amateur"
1972 - First Edition - close to new condition - $ 10

"Radio Amateur's License Manual"
1961 - 46th edition - $ 6
1969 - 62nd edition - $ 4

"How to Become a Radio Amateur"
1960 - 19th edition - $ 6

The above books are in the smaller 6 x 9 inch format.
The books below are in the larger 8 1/2 x 11 format.

"ARRL Satellite Anthology"
1999 - 5th edition - like new - $12

"ARRL Spread Spectrum Sourcebook"
1997 - first edition - like new - $15

"Radio Amateur's Operating Manual"
1985 - 2nd edition - $8
Large, inch plus thick book - 1987 - 3rd edition - $ 12

Ham Radio Operating Guide - first edition - 1976 - $ 8

Antenna Compendium - Volume 1 - 1985 - Edition - $8

1976 Tune in the World with Ham Radio - First Edition - $ 4
1981 Tune in the World with Ham Radio - 3rd edition - $ 4
1991 Now You're Talking - First Edition - $ 5
1993 Now You're Talking - 2nd edition - $ 6
1995 Now You're Talking - 3rd edition - $ 6

1981 Foreign Call book - Good condition - $ 5

Prices do not include shipping from Florida.

Thanks.

ADVERTISEMENT

Just thought I'd let the group know that as from tomorrow (Friday), the UK has
decided to drop the Morse Requirement for access to the HF bands, so now
everyone can get on HF in this country - which can only be good for the hobby
so expect a surge of activity and some unfamiliar prefixes to be emanating from
these shores over the next few days. As for 6m, well 10w and an indoor dipole
has got me to the States many times this month alone but unfortunatley you can
never rely on the propagation meter to have enough credit left to open up 6m!
Tuesday the band was banging all over the place, Yesterday was open all over
Eu, today not a sausage (so far!). Guess that's what keeps us interested - the
great unknown that is the ionosphere!

286. FS: Terminal Boards

Yahoo group: ham
Date: 2003-08-06 11:36:35 UTC
From: Brian Carling
Topic: 104 Message: 286

FOR SALE:

TERMINAL BOARDS - Tube type building parts:

Brand new terminal boards with turrets - 13.1" X 1.5"
Two rows of five turrets on each section. Five sections.
NOTE: The longer boards can easily be broken down into
smaller sections. QTY of these 5-way units at $5.00 each

GOOD QTY of Brand new terminal boards with turrets -
Dimensions 2.6" X 1.5" with two rows of five turrets.
Will sell for $1.00 each
These are bakelite/phenolic, and are perfect for building
guitar amps, tube receivers and transmitters,
or for repairing/building amplifiers and hi-fi audio amplifiers.

Shipping additional.

Yahoo group: ham
Date: 2003-08-13 15:14:29 UTC
From: Ken Simpson, W8EK
Topic: 289 Message: 289

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands,
and also has a general coverage receiver. Modes include SSB,
CW, FM, and AM. The narrow SSB filter is in it. Of course it
has memories, scan, dual VFOs, etc. It is a small unit, ideal for
mobile or use in a motor home, but its performance is fine for
a base station as well. A 13 V DC power supply at about 20
amps is needed in that situation.

This particular unit works 100% as best I can tell, and looks
close
to the same. It is in its original box, and includes all of the
things
that it came with originally -- hand microphone, power cord,
manual, etc.

$495 plus shipping from Florida.

Thanks.

Date: 2003-08-24 01:26:13 UTC
From: Ken Simpson, W8EK
Topic: 293 Message: 293

Accessory items for ADI HTs:

RBP-612 "High Power" 12 volt battery with a NiMH,
1000 mahr "rebuild". Like new, only charged 4 or
5 times. $ 40

Battery that fits ADI HTs.
It says "Standard" on it but is the same connections
as the ADI. 12 V 1000 mahr NiCad pack. $20

MFJ-1716 dual band rubber duck antenna
BNC connector. Works much better than most of the
antennas that come with the HTs. Like new. $15

Daiwa Boom mic and headset. Includes the boom mic and the
headphone, with a PTT switch. It has a 3.5 mm and a 2.5 mm plug,
so it fits many HTs. In great shape for $ 40.

Archer 20-210 A
These are smaller, and look like the kind the kids wear with a
boom box, but they are mono with a mono 1/8 inch connector.
Almost like new $ 12

Prices do not include shipping from Florida.

Thanks.

From: Brian Carling
Topic: 294 Message: 295

John,

You are apparently lamenting the small number of radio
discussion message sin this group. The fact is we only
have 47 members here.
There are many other more active yahoo groups that discuss
ham radio issues back and forth in great detail.

Instead of picking on others why don't you post something POSITIVE
that you think SHOULD be sent to this group?

There is NOTHING in the groups description that says NOT to post
ads for ham gear. Do you run the group? Did you write its charter?
Then if so, by all means try to enforce it. Otherwise I think your bullying may be
unwelcome. If it continues, then I expect more
people will leave the group. Thankfully, there are many other
ham radio groups where hostilitioes are not allowed.

If the ads upset you SO much why don't you start your OWN group that
specifically BANS ads?! Or at least learn to use the delete key (grin!)

If you read carefully at:
http://groups.yahoo.com/group/ham/?yguid=3841672

You will find that it is a group for "ham related messages."
That would include the sharing, swapping and selling of
equipment, I believe. I have seen nothing offensive in here.

Brian Carling, AF4K

296. An interesting article about NVIS antennas !!

Yahoo group: ham
Date: 2003-08-26 15:11:58 UTC
From: John Kirckof
Topic: 294 Message: 296

Hi All,
It is refreshing when we can enjoy a good article from time to time to get away from the din of the salesman. Below is an interesting article sent to me from a friend, Loring, W3QA. It was originally written as useful info for our Honduras mission group. However, the principles he explains about short range HF comm is very interesting to many of us.
John

_____

Band Usage, Propagation, and Antenna Considerations for Local Use

Some radio volunteers for the Honduras Project have asked questions about to the operating conditions during the typical mission. What kind of antenna is best? What frequencies should we use? And why? For over twenty years amateur operators have assisted IHS missions and some things have become clear. This is why we encourages a simple, standard HF antenna setup that has proven itself year after year, and offers the virtues of economy, ease of transport and installation, ease of repair, frequency agility, and adequate performance. Ninety-nine percent of the time a knowledgeable operator using a good transceiver properly connected and tuned to a good dipole or G5RV Jr. antenna will have good communications with all other local stations that are part of the mission. What follows is a discussion of some principles that play during our missions, and why the antenna designs of choice work well. Hopefully, you will get some additional insight about installing and using them successfully.
The info below is very useful for us back home, too. We often hear "Higher is Better" from the DX folks. For them it is usually true but there are times when you want to talk with those "near by". If this interests you, read on.

For our Honduras mission, the first thing to identify is our communications goal. We need all our stations in scattered villages across Honduras to hear and be heard by each other, morning, mid-day, and late afternoon. Each station should be able to communicate with stations in the USA. Both voice and digital modes are to be supported. Frequency agility in our station will help us meet these goals, particularly in the tropics, where HF propagation is different than in the US.

When it comes to a choice of band, 40 meters is a great band for IHS voice and digital applications in Honduras. We should follow the lead of the tropical broadcasters and use their techniques. 40M is low enough in frequency to allow true reflection of high-takeoff-angle waves off the F-layer and high enough not to be overly affected by d-layer absorption during the day. Most of the propagation we experience in February is a combination of high-angle f-layer reflection and groundwave. Moreover, there is the so-called equatorial anomaly, which is an ionization enhancement of the f-layer from about 5 to 15 degrees of latitude above and below the geomagnetic equator. This charged cloud sits over Honduras during the day and is a fine reflector of signals beamed up at high angles. Unlike the f-layer at mid-latitudes, the anomaly persists well into the evenings. No other band possesses characteristics so good for reliable local communications out to about 300 miles. Usually, it is not the
band to use for a contact with the states, except late at night.

Following the techniques used by the military and the tropical broadcasters, we should use NVIS (Near Vertical Incident Skywave) antenna techniques. Also known as "cloud warmers," these antennas fire most of their energy up rather than at low angles and out. They are typically not DX antennas so if you want to use the same antenna for ?local? net use and also for contacts back to the U.S, you will have to compromise on how you set up your antenna, or use the high bands and a tuner for long-range contacts. It is not uncommon to actually have more than one antenna so each can be optimized for desired coverage. Luckily NVIS antennas are among the simplest to erect in the field. Good examples are a 40M dipole (mounted 3-30 feet high and parallel to the ground) or a horizontal full-wave loop (mounted 3-30 feet off the ground). The emphasis is on the low mounting height, with respect to wavelength, as this is what causes these antennas to develop large vertical lobes to their radiating
pattern. This not only gets more transmitted energy up where it will reflect and come back down strongly, but it also rejects interfering signals arriving at low angles. So receiving is quieter, too. It is a very good antenna for both mountainous and flat terrain, particularly in the tropics, for distances out to about 300 miles. Since all our net stations are between 20 and 225 miles distance with each other, all fit into this range.

In my emergency work, we keep a 40M dipole in our County HF go-kit to string between traffic cones--barely 3' high! It works like gangbusters. Another, even better technique is to string the dipole only 8-10' high and immediately beneath it, on the ground, lay out a wire reflector that is 5% longer than the dipole. This gets even more of the power into the air with fewer ground losses, and strongly rejects distant stations. It is a 2-element beam pointed straight up!

When the NVIS technique is used, there is little reason to all orient our antennas in the same N-S direction because the effective region of coverage is largely omni-directional. NVIS seems counter to the traditional wisdom that "higher is better," and for that reason might be ignored. But it works very well. And none other than Mr. Beverege has proved it. He was hired to set up radio communications for the Normandy invasion of WWII. He told the Army radio operators to put their antennas low and parallel to the ground.

G5RV Jr. antenna considerations - To achieve good efficiency with a G5RV Jr. antenna (we?ll call it Jr.) at all frequencies, you should use a balun. You might not notice a 3 dB loss (half your transmit power) because it looks on the receive end like only a single s-unit loss. Thus it still "works" without a balun. In Honduras, the practical distinction is therefore minimal. The Jr. antenna works well enough when mounted high. It will take on some NVIS characteristics when mounted low, but it is likely that its NVIS performance will not be as good as a dipole cut for the desired frequency. At some frequencies there is radiation from the twinlead that might affect it's NVIS performance. I suspect that ground losses would be higher than a resonant dipole, too.

Here is how NVIS applies to the Jr. on 40M. As you decrease height of a Jr. from a half wavelength (about 65 feet at 40M) above ground, the radiation pattern changes from broadside lobes to a hemisphere. The same happens with a dipole. This is complicated by the radiation a Jr. issues from its twinlead, and the closer it gets to ground, the more ways the twinlead is likely to end up going. So the pattern of a Jr. is, in practice, skewed at low levels. This is not a factor with a low dipole. The bottom line thought for the Jr. antenna is it will perform better at a low heights (8 ? 12 feet) then higher up for our close distance net but a dipole would perform even better. Almost always, and usually without knowing it, anyone using a dipole, a Jr., or similar wire antenna on 40 or 80M is using NVIS propagation and high-angle radiation. This is because the antennas are rarely

installed above a half- or quarter wavelength above ground (65' for 40M--or over 122' for 75M)!

For a dipole antenna, a reflector wire below it can be somewhat effective. However, the Jr. is less likely to achieve the same results when placing a reflector wire under the antenna. It may help or hinder results, mainly because of the unpredictable pattern mentioned above. A half-wave-plus 5% reflector laid on the ground below a 40M dipole that is 10-12' above ground will increase vertical radiation by 2 or 3db (almost double the power). What does this do? Practically, it will increase the received signal 250 miles away by one s-unit. This is not critical unless conditions are marginal.

Sloping a low antenna will theoretically favor lower-angle propagation in the direction of the slope. The lower the average antenna height, however, the more hemispherical the pattern, and the less slope will affect any favored direction.

All this NVIS propagation information will only work if the frequency you use is LOWER than the "critical frequency", a term used to define the frequency at which vertically directed signals reflect back off the ionosphere. At higher frequencies, they penetrate it and only a little gets scattered back. Ideally, for our Honduran network, we want the signals to go straight up, bounce back and rain down on the receiving stations from above. In the tropics, near Honduras, conditions favor this mode because the critical frequency of the overhead ionosphere is almost always above 8 MHz during the day. 20M signals that go straight up, for instance, keep on going. Only signals arriving from lower angles will be heard, and these will be distant signals arriving from refractive and other types of propagation.

Much of the benefit from using low NVIS antennas comes from the attenuation of noise and interference of distant signals arriving at low angles. High signal-to-noise factors do more to enhance good communications than actual signal strength.

In summary, we come to some basic conclusions about antennas for the typical February mission:

For a station that will ONLY operate on 40M, the most simple, cheap, and best-performing antenna is a resonant 40M, coax-fed dipole that is cut for the net frequency. Erected no higher than 10-15' high, in any direction, it will provide reliable communications within a radius of 300 miles. Placing a single wire that is 5% longer than the antenna on the ground below it may enhance received (and transmitted) signal strength. Benefits: simplicity; performance is not affected by the orientation of available supports; no tuner is required if operated near the design frequency.

For a station that must change bands, two options for good performance are recommended. 1) A 40 meter dipole set for NVIS operation as described above plus a second dipole mounted higher for 20 or 15 meters. No tuner is usually required, but switching coax connections is necessary to switch antennas for band changes. 2) A G5RV Jr. is a good compromise. Strung at any height at which the twinlead can be pulled straight out its? full length (sideways is fine), it will work in NVIS mode on 40M. If it is at least 24-30' or so high and strung roughly east-west, it will also perform very well on 20 and 15 meters for long range hops back to the US and Winlink MBOs. It needs a tuner and allows a simple setup if the transceiver with which it is used has one built-in. The operator needs to know how to tune properly. The Jr. antenna is standard equipment in nearly all of the Comm boxes that IHS has in storage in LaCeiba and Puerta Lempira, Honduras.

About the only thing to avoid when setting up an antenna in the back country is getting antenna elements too close to metal roofs, rain gutters, or any other metal objects that may affect the resonance of the antenna. Keeping the antenna element ends out of reach of people is important for safety, too.

Loring Kutchins, W3QA

From: Ken Simpson, W8EK
Topic: 298 Message: 298

Heath HN-31 "Cantenna" RF Dummy Load For Sale:

This is the traditional Heath dummy load that will handle
up to 1000 Watts. It has a derating curve which is included.

I measured the resistor and it is about 48 ohms, so obviously
it is not fried, and is a good match for 50 ohms.

Paper work included for $40 plus shipping from Florida.

Thanks.

FOR SALE:

HUSTLER 6BTV Vertical Antenna

Six Band coverage from 80 through 6m with excellent performance.
Covers 80, 40, 30, 20, 15, 10 and 6 meter bands.
VSWR 2:1 or better at band edges on 10-40 meters.
Up to 100 kHz. on 75/80 meters. Solid one inch fiberglass trap forms for optimum electrical and
mechanical stability. All sections 1.25" heavy wall, high strength aluminum.
Extra heavy duty aluminum mounting bracket with low loss, high strength insulators.
Easiest assembly and tuning of any multi-band vertical.
Feed with any length 50 ohm coax.

This antenna has only been used once to test it out and
circumstances have changed so that I can't use it.
Comes with the instructions. Read the full reviews on Eham at:
http://www.eham.net/reviews/detail/248

Complete details and pictures on Hustler's site:
http://www.new-tronics.com/main/html/base_hf_6_band.html

Comes with new instruction manual for $129.00 plus shipping

Is anyone interested in going on an exciting and meaningful mission trip and use your radio skills as well?

I just came from a meeting of our group that does volunteer medical care in Honduras and we are in vital need ham operators who can use pactor mode through the Winlink system. This is in addition to the normal HF voice ops we do. The trip is next February and we sure could use your help !! If you can not go this time, pass this along to friends? we really need all the help we can get.

The main signup is from now until the 15th of October. We like a long lead time to get all the provided gear and supplies ready for you and the teams. Late applicants will be taken until all teams (10 or so) have enough radio operators. The sad issue is we are financially able to send many teams to the many needy villages but the number of teams are limited by the number of people who sign up to go. Please help us to provide care to many who need our help. I have gone 8 times, so far, and I can not tell you how rewarding this mission trip is!

For more info, e-mail me or better yet call me direct at my home phone: 320-634-4386 Some good info and pics are on our e-mail site at: http://groups.yahoo.com/group/ham/ From there take a look at the PHOTO section and the FILES section for our Honduras information. Our group, International Health Services, also has a web site: www.IHSOFMN.org

If this might be something you want to try, give me a call and I will let you know more about this great mission work.

Thanks!

John Kirckof, KB0UUP

301. 1.8 to 525 MHz Wattmeter and SWR bridge FS

Yahoo group: ham
Date: 2003-09-16 13:52:36 UTC
From: Ken Simpson, W8EK
Topic: 301 Message: 301

For Sale:

Revex W-560 SWR and Power Meter

I know Revex is not a common name on a wattmeter, but this is a really great meter. It seems to be very similar to the Diamond SX-600. It covers from 1.8 to 525 MHz, so it will basically cover any band you would want to use it on. It will also measure average or PEP power. The ranges are a bit odd -- 3 W, 20 W, and 200 W -- so it would be good for QRP use also. It measures forward or reverse power, but also has a direct SWR measurement on it. There are 2 sets of connectors. Regular SO-239 connectors are used with a frequency range of 1.8 to 160 MHz. There is also a set of "N" connectors for use from 140 to 525 MHz. It is really a very nice versatile meter.

This particular meter looks very close to new. I can not find any scratches or imperfections. Of course it works 100%.

$100 plus shipping from Florida.
Thanks.

From: Ken Simpson, W8EK
Topic: 302 Message: 302

Electronic Keyer and Bencher Paddle For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 50

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It works 100 %, and
looks like new. $65

Both keyer and paddle above, purchased as one unit
for $105.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 306 Message: 306

Santec HTs and accessories For Sale:

Santec ST-144
Covers 142 to 150 MHz, with 3 power levels.
Approx 3.5 W, 1 W, and 0.1 W. It has 10
memories, including ability to program odd
offsets. 24 hour clock built in to the LCD
display. This unit also has the SS-32 sub-
audible tone encoder in it. Works fine, but
shows its use cosmetically. With both operating
and service manuals for $ 50.

Santec ST-7 T
This HT covers 440 to 450 MHz with thumbwheel
selection of operating frequency. It has 3 power
levels, and includes the SS-32 subaudible tone
encoder. Touchtone pad on front. $ 40

Santec speaker microphone
It has the small round plug (about 3/8 inch)
with 6 pins, as used on most Santec HTs, and
many Wilson and Yaesu HTs. $25

Leather case for most Santec HTs, including ST-7,
ST-142, ST-144, and HT-1200 and maybe others.
This is real Bianci (spelling) leather -- not vinyl. $ 20

DC cord for Santec HTs.
Cigarette lighter plug on one end has special voltage
dropping circuitry. $ 12

Prices do not include shipping from Florida.

Thanks.

310. Larsen VHF and UHF mobile antennas For Sale

Yahoo group: ham
Date: 2003-09-27 15:15:10 UTC
From: Ken Simpson, W8EK
Topic: 310 Message: 310

Larsen VHF and UHF mobile antennas For Sale:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas:
NMO-150 coil only - Gray color - new $ 16
NMO-150 coil only - Black color - new $ 16
MFJ NMO-150 equivalent - Black - like new - $12
LM-150 coil only - new $ 16
NLA-150 coil only - new - $16
"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30
NLA-TLM - Trunk Lip Mount for any NLA antennas - $15

Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

(LM is 5/16 inch stud, NMO is "Motorola" mount)

Parts:
HP-34 - Hole Plug for 3/4 inch hole (Black) - $ 1

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

Use with internal 3 X AA batteries or external 4.5V power
(Not supplied)
Very good condition - $45.00

Heathkit HS-24 speaker
This is the later version of this external speaker
with nice wrinlkle paint. The earlier ones were plain paint
and were not as pretty.
The HS-24 was used with a number of the mobile
transceivers such as the HW-12, HW-101, SB-101 etc.
With cable and is in excellent condition - $35.00

Heathkit SB-600 Speaker
Front looks nice. Case has a few paint chips and marks,
but will clean up nicely. Has a new speaker inside.
Available for $35.00

Heath HP-23 Power Supply
Works great with all of the old Heath radios such as HW-101,
SB-101 etc. Has a little surface rust on the top of transformer,
but otherwise in fairly decent shape. Works FB.
This may also work with some other radios like Collins etc.
Complete with all cables.
Will sell for $55.00

National Radio Company Model SOJ-1 Select-O-Ject
BOOSTS 38 db! REJECTS 38db! On any frequency.
Rare and hard-to-find accessory that is very desirable
for use with all models of National receivers.
http://www.io.com/~nielw/nat_list/selec.htm
(Picture and specifications)
Looks and works great with your National receiver.
A copy of the manual is included.
Available for $125.00 plus shipping

Barker and Williamson Model 426 Low Pass Filter.
Heavy duty construction like all of their equipment.
A top performer for your 1 KW class station with two SO-239 connectors.
Battleship gray color case.
Available for $25.00 plus shipping

Protax 5-position rotary antenna selector switch.
Also has grounding position.
Excellent condition - $45.00 plus shipping

National Radio Company SPP-3 ceramic tube plate caps.
Brand new in unopened bags.
QTY 2 available for $4.00 each

E.F. Johnson Low Pass Filter
This is the 1000 Watt in-line TVI filter. Great condition.
Ready to prevent all of those TVI headaches.
Available for $25.00 plus shipping.

Shipping additional on all items.

318. 13 Volt DC power supplies FS

Yahoo group: ham
Date: 2003-10-04 17:51:47 UTC
From: Ken Simpson, W8EK
Topic: 318 Message: 318

13 Volt DC power supplies For Sale:

TrippLite PR-10 a
This is a 10 amp regulated supply, so it is
good for most 2 meter rigs, etc. $30

DYN, 3 amp
This is a regulated 3 amp supply. It would
be fine for smaller 2 meter rigs, or to eliminate
that tangle of a dozen wall worts that you have
plugged in all over the place. $ 18

Generic 1.2 amp
This is only 1.2 amps, but it is regulated. It would
work for HTs requiring 13 V DC, or to replace the
wall worts. However, it is regulated, which most
wall worts are not. $12

Prices do not include shipping from Florida.

Thanks.

Wonderful old 2m AM transceiver, complete with AC cable.
This one really looks very good. All knobs original.
Comes with one crystal for 144.350 Megasickles.
Appears to be in good working condition. receives OK.
I have not tried transmitting, but should be fine too.
Available for $45.00 plus shipping

Picture available via e-mail or will post on web site
soon.

323. Kenwood MC-85 desk microphone FS

Yahoo group: ham
Date: 2003-10-08 00:29:16 UTC
From: Ken Simpson, W8EK
Topic: 323 Message: 323

For Sale:

Kenwood MC-85 desk microphone

This desk mic has the 8 pin plug, and is made to work
with most all of the Kenwood rigs that take the 8 pin
plug. It is a very nice "gooseneck" type mic. This
desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one is in good shape, no scratches that I can find,
with paper work, for $110 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

FOR SALE:

ICDI Military Speaker
For use with 600 ohm military radios.
This device is a powered speaker that has 600 ohm and
high impedance inputs. Has volume control to set level.
It was designed to be used with radios like the R-390 and other military sets.
Switchable input impedance for hi-z and 600 ohm lines.
Comes with AC adapter that provides the needed 48V DC to power
the built-in audio amplifier stage. Rack mountable design.
Tailored for voice communications. Excellent condition.
QTY 1 Available for $40.00 plus shipping

Footswitch
Heavy duty type. has cables attached for switching AC power line
but may be used with other arrangement for radio PTT line etc.
Switch is rated for 250V at 20 Amps.
Excellent coindition and top quality unit.
Qty 1 only available for $16.00 plus shipping.

Antenna Changeover relay 120V AC
Has SO-239 connector and two RCA connectors.
Good for up to 200 watts.
Available for $12.00 plus shippiing.

Radio Shack 12V DC power supply
OPerates on 120V AC line to power your 12v equipment
Rated for 2.5A continuous duty. Fused for protection
Binding posts terminals and fuse are in rear.
Has over-sized heatsink for trouble-free operation.
Will sell for $12.00 plus shipping

MARS SWR Meter
Has forward-reverse power meter that also shows percent.
reflected power. Switchable from 52 ohms and 75 ohms
Uses standard SO-239 connectors.
Very good condition
Will sell for $25.00 plus shipping

Antenna Elevation Rotator Motor
Satellite Ops take note!
This is a nice elevation rotor used for satellite operations.
I have used one of these before with 20 elements 435 MHz
and 10 elements on 144 MHz and they do a great job.
The cross-boom goes through the rotator to equally distribute
weight and support the balanced load.

I have NO CONTROLLER for this rotator.
It needs a Four (4) wire controller.
Appears to be in excellent shape.
Available for $6.00 plus shipping.

327. Hallicrafters Tuning Units For HT-4

Yahoo group: ham
Date: 2003-10-18 12:16:46 UTC
From: Brian Carling
Topic: 327 Message: 327

FOR SALE
Hallicrafters Tuning Units For HT-4 / BC-610 Transmitter
A complete set of QTY 7 available with the carrying case.
These were used with the WW2 era Hallicrafters HT-4A through HT-4F.
They are selected from the front panel to cover three frequencies.
Cover all tuning ranges TU-47 through TU-53 cover 160 through 30m bands.
TU-47 Tuning unit, 2.0 to 2.5 MHz
TU-48 Tuning unit, 2.5-3.2 MHz
TU-49 Tuning unit, 3.2-4 MHz
TU-50 Tuning unit, 4-5 MHz
TU-51 Tuning unit, 5-6.35
TU-52 Tuning unit, 6.35-8 MHz
TU-53 Tuning unit, 8-12 MHz

These all have the original, unusual smooth (cool) Hallicrafters black knobs that look like miniature tires.
They all appear to be complete and have not had any parts removed or any 'mods' done.
Will sell for $30.00 each or all seven for $175.00 plus shipping

Pictures & details at:
http://home.cfl.rr.com/happysurfer/radios.htm

328. FS: 1950s Novice Dream Station...

Yahoo group: ham
Date: 2003-10-22 19:39:10 UTC
From: Brian Carling
Topic: 328 Message: 328

FOR SALE:
Transmitter, Receiver & Keyer.

Classic Heathkit DX-20 Transmitter.
Great little nostalgic CW rig in very good condition.
Crystal controlled, or use with an external VFO.
Uses 5U4 rectifier, 6CL6 oscillator tube and 6DQ6 sweep tube final.
50 watts input on the 80, 40, 20, 15, 11 and 10 meter bands.
Specifications at:
http://www.heathkit-museum.com/ham/dx-20.shtml

All of the knobs are original AND the rare crystal access hole hole cover is here.
Very clean internally. Still has a good, original AC power cord.
The case has no dings or dents. A few minor marks and scratches
here and there, but overall not bad. Has only a few tiny
rust spots. For its age, this is one of the better DX-20s
that I have seen.
Comes with a copy of the manual.
Will sell for $95.00 plus shipping

Now the receiver:
Collins R-388. This is the military version of the 51J3
superheterodyne receiver. Has 18 tubes.
is a 30 band receiver that covers 540 khz to 30.500 MHz The receiver will readout
out to 1 khz for extremely good dial accuracy.
The filter bandwidth ranges from 200 Hz to 6 kHz in 5 steps. The unit is extremely
stable.
Linear tuning, divided into thirty 1 MHz tuning bands.
Built-in crystal calibrator (100 KHz)
Has convenient 4 ohm and 600 Ohm audio outputs.
Power: 85 W at 115 or 230 VAC, 45 to 70 Hz
This unit comes with the top cover and is in excellent condition.
Shipping weight 40 pounds.
Available for $525.00 plus shipping.

And finally a Hallicrafters TO-keyer for Boatanchor CW.
Hallicrafters HA-1 'TO Keyer'
Great for use with tube type transmitters.
Will also work fine with the newer radios.
Excellent working condition - $115.00 plus shipping

335. IHS needs radio & support gear

Yahoo group: ham
Date: 2003-11-03 16:44:03 UTC
From: John Kirckof
Topic: 335 Message: 335

Hi,

Hope all is going well in your neck(s) of the woods.

I have mentioned items in the past for misc. items that International Health Services (IHS) is looking for to add to their inventory of radio items kept in Honduras for future use. For several missions a year, we provide HF voice and digital messaging support on medical teams in remote villages that have no phones or electricity. Support here means volunteer hams and the radio equipment needed to do the job. Note all donations are tax deductible under our charity 503(c)3 status.

Some of our needs include: regular and low loss coax (50 to 100 foot lengths), manual coax switches with 6 foot coax. If there are any other items IN GOOD CONDITION that you think IHS can use, let me know and we will see if it will work.

Right now I am looking for a few more good deep cycle, gel cell type (or similar shippable type) batteries for the Feb mission and beyond. Do you know of any at a good price? Of course shipping needs to enter the equation. Jim Scott, KG6EFT, is helping in this effort, too, and has found 2 so far.

Also, I hear talk of places to get a solar panel charge controller (10 amps or more)at a good price ($30 or $40) but I have not found one yet. If you know of a place like that, I will need at least one and a couple would be nice. I have an account to make 'small' purchases like this so I would refund such items that are not donations. I need any items delivered to me by 3 or 4 December so I can get them packed and labelled for shipping before my own December trip to Honduras. If later, I would need to send you instructions so you could pack and label them to send direct to Larry our container shipping guy.

IHS is also looking to get rid of our older Kenwood TS-44AT radios with new or recent models of the Icom IC-706. They would have to be new enough to have the 40 or 50 watt 2 meter capability and digital capability for use with the IHS SCS controllers.

Note the below addendum that mentions the specs for the Puerto Lempira, Honduras tower. We will mount a multiband (2 meters) vertical antenna on it. I have that antenna ready to ship and can provide the specs if needed. We need a mounting 'arm' to put this antenna on the tower, at the prescribed distance out from the tower. Does anyone have the hardware and/or expertise in this area?

Tom Quinaln, W0GLG, has acquired for IHS, a new MFJ manual antenna tuner. Thanks Tom !! (note his article in WorldRadio magazine this summer) So far, we have collected a few items for the Feb mission so I have not had to use $$ out of the IHS account yet. That is great so we can use the $$ for other radio or medical items. Thanks everyone for this effort!!

Keep in touch,

John, KB0UUP
21594 Memorial Drive
Glenwood, MN 56334
Ph 320-634-4386

Addendum: PLP tower specs acquired by Drew Mathews.

The antenna tower in PLP at the catholic compound is 200 feet high and is triangular in a cement base with the supporting tubing being 1.75 inches in diameter. The three supporting legs of the tower are approximately 18-20 inches apart. The tower is made up of 10 foot sections, 20 in number therefore total 200 feet high.

340. TVI filters FS

Yahoo group: ham
Date: 2003-11-17 14:32:51 UTC
From: Ken Simpson, W8EK
Topic: 139 Message: 340

TVI filters For Sale:

Drake TV-1000-LP
Low pass filter for the transmitter
This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 W
below 30 MHz, and about 200 W up to 52 MHz. It is in
very nice shape, with the copper is still nice and shiny.
$ 35

E F Johnson low pass filter
52 ohms impedance, Catalog number 250-20. This is the
cylindrical filter, with an SO-239 connector on each end.
There is also a variable cap on each end, for precise adjustment
to cure your particular TVI problem. $30

B & W 425 "antique" low pass filter
I know most people are not going to think that a B & W 425
low pass filter is that old, but this one is. It appears that the
case is made of copper, or at least copper plated, and then
painted. There are just enough of the paint flakes coming
off to see the copper underneath. The weight of this filter
is about twice that of the more modern B & W 425 filters.
In case any one does not know, the 425 is rated to take full
legal power, and cuts off just above 10 meters. $30.

Drake TV-300-HP
High Pass filter for the TV. 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box, with an "RLD"
logo on it, and says "NEW TV-300 HP High Pass Filter,
Attenuates 0-52 MHz". A grounding strap is also
attached. $ 15

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

344. TenTec Paragon HF xcvr and accessory items FS

Yahoo group: ham
Date: 2003-11-27 15:48:52 UTC
From: Ken Simpson, W8EK
Topic: 344 Message: 344

For Sale:

TenTec model 585 Paragon

This rig covers 160 thru 10 meters, including the
WARC bands, and the new 5 MHz band. It has a
general coverage receiver, so also makes a great
short wave receiver. It transmits SSB and CW, and
also has an AM receive mode. The receiver is fantastic,
and the transmitter is great also, with terrific audio.

Of course it has memories, scanning, and all of the
"bells and whistles" one expects. A speech processor
is built in, and it has full QSK on CW.

This particular unit is immaculate. I can not find a scratch
on it, although there is some wear (not scratches) on a
couple of the push button keypad switches, from use.
Of course it works 100%.

The original box, and original manual (with service
information) is included for $700.

TenTec model 961 power supply
This is a 20 amp, 13 V DC power supply, with speaker,
that matches the Paragon (above), plus other TenTec
rigs. It works great, and looks great also. No scratches
or wear that I can find. With paper work for $150.

TenTec 288 SSB filter.
1800 Hz, used for narrow SSB, or wide CW, for the 6 MHz IF.
Used in the Paragon, newer Omnis, and others.
Like new, with paper work for $69.

TenTec hand microphone
I think it is model 700, although it is not written on the
mic. It is an electret condenser mic, with 4 pin plug
that matches any of the TenTec rigs using the 4 pin
plug. Works great, and looks like new. $ 30

Prices do not include shipping from Florida.

Thanks.

349. HF, VHF, and UHF mobile antennas FS

Yahoo group: ham
Date: 2003-12-26 15:30:35 UTC
From: Ken Simpson, W8EK
Topic: 349 Message: 349

Hustler HF and Larsen UHF and VHF mobile antennas For Sale:

Hustler 54 inch mast:
MO-2 (folds about 28 inches above ball) $22

"Standard" Hustler resonators:
12 meter resonator RM-12 $ 12
10 meter resonator RM-10 $ 12

80 meter "Super" high power resonator RM-80 S $ 38
can be used to convert 4 BTV vertical to 5BTV also

Larsen UHF and VHF mobile antennas:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas:
MFJ NMO-150 equivalent - Black - 3 db gain - like new - $12
LM-150 coil only - 3 db gain - new $ 16
Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

Coaxial antenna switches For Sale:

B & W Model 595 Coax Switch
This is the switch that is in a rectangular box about 9 inches long, with seven SO-239 connectors coming out of the back. It will switch 6 antennas, grounding the antennas that are not in use. It works 100% and is in nice shape. $ 45

B & W Model 593 Coax Switch
Similar to the 595 above, but switches only 3 antennas, and is only about 6 inches long. $30

Heath HD-1234 Coax Switch
Four position, with coax coming out like spokes of a wheel. It does ground unused antennas, and also has a switch position to ground all antennas. $ 25

Prices do not include shipping from Florida.

Thanks.

Date: 2004-03-20 12:32:55 UTC
From: Ken Simpson, W8EK
Topic: 354 Message: 354

For Sale:

KLM 2 meter amplifier

If you put 25 Watts in to this amp, you will see
about 160 watts out. This amp is the linear model,
so it can be used on SSB, FM, or any mode you
choose. It covers the entire 2 meter band with
no tuning. Completely solid state.

This is an actual KLM amplifier, so it is made better
than some of the ones after they were "bought out."

This particular unit works 100% and looks the same.
It is even in its original KLM box.

$185 plus shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2004-03-20 12:52:48 UTC
From: Ken Simpson, W8EK
Topic: 355 Message: 355

For Sale:

RCA WV-120 A meter

This is a fairly large (about 5.5 inch) analog meter
that is used to accurately read AC line voltage. It has
an expanded scale, so that the entire meter reads
from 100 to 140 volts AC, with a large red "120"
right in the middle. Being it is analog, it can show
line voltage variations when different pieces of
equipment (such as motors) are started.

This particular unit works 100%, and compares very
closely to my DMM for accuracy. It looks fine also.

$45 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 356 Message: 356

TenTec power supplies FS

TenTec 280 power supply
This supply will power most any of the TenTec rigs, or any other rig needing up to 20 amps at 13 V DC. It is quite heavy duty, and includes an ammeter on the front panel. It is the chocolate brown color that matches the early Omni or Delta rigs, but will work with most HF rigs. This one works 100%, and looks very nice as well. With paper work and original box for $130.

TenTec 262 G power supply
This supply is made to match the Triton IV series (Model 540 and 544) of rigs, but will work with most HF rigs. It will supply 13 V DC at up to 20 amps. It has a speaker built in, as well as VOX. It works fine and looks fine also. With paper work for $100.

Prices do not include shipping from Florida.

Thanks.

Kenwood Crystal filter For Sale:

Kenwood YG-455-S-1 For Sale
This is a "sharp" 2.4 KHz SSB plug in filter. It has
about a 1.3 to 1 shape factor, and is used to replace
the standard ceramic filter in rigs such as the TS-950
and others, with a filter that has much better skirts
(and therefore makes pass band tuning, etc. much
better).

Actual specs on it are
2.4 kHz at 6dB
3.0 kHz at 20dB
3.1 kHz at 60dB

With paper work and original box for $100
plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 358 Message: 358

For Sale:

Yaesu VX-5 R tri-band HT

The VX-5 will cover the 6m, 2m, and 440 MHz ham
bands, with receive almost from DC to light. Actually
receive starts at the AM broadcast band, and goes to
about 1000 MHz, so that means it includes all of the
public service bands outside of the ham bands, weather,
FM commercial, commercial TV, SW bands, and much
more. Power output is up to about 5 watts, in 4 steps.
Of course PL tones (encode and decode) are included,
plus much, much more.

This particular unit is almost like new. It is in its original
box, with all of the things that came with it originally,
including charger, Lithium Ion battery that seems to last
forever, belt clip, carrying strap, original manual, warranty
card, etc. All for $200 plus shipping from Florida.

Thanks.

359. Cushcraft 4 element, 2 meter beams FS

Yahoo group: ham
Date: 2004-04-10 11:32:30 UTC
From: Ken Simpson, W8EK
Topic: 359 Message: 359

For Sale:

Cushcraft 147-4, 4 element, 2 meter beam

This beam is relatively small (about a 4 foot boom),
but still has about 10 db gain. It is made so that it
can be attached to a tower by the back of the boom.
This method permits easy side mounting for a fixed
direction, if so desired. It is drilled so it can be
mounted either vertically, or horizontally. It is
wideband, and will cover most of 2 meter band
with acceptable SWR.

I have two of these beams available.

One is almost like new. It has been in the garage
and in the attic. It is $50.

The other has been outside, and is still in good shape,
but not quite as nice as the first one. It is $45.

Prices do not include shipping from Florida.

Note that these were spoken for when I listed them
before, but no follow thru.

Thanks.

367. Help needed for mission trip

Yahoo group: ham
Date: 2004-07-19 16:19:26 UTC
From: John Kirckof
Topic: 367 Message: 367

Help! I.H.S. (International Health Services)
needs ham radio operators (any license) plus many
engineers and general helpers to accompany medical and
dental teams to villages in Honduras. Most of these
villages have no electricity or phones and we often
are the only medical care these local people will ever
see. I.H.S. has been sending medical teams to remote
Honduras for over 20 years and are well equipped to
handle the logistics of getting supplies and people
directly to where they are needed. Also, they can
help arrange for some HF gear for any operator who
does not have his or her own portable rig. Women can
do this job, too. This past Feb. we had two lady
operators making calls from remote locations. During
our next mission we will use Pactor via the Winlink
system in some of the villages to try and link into
the internet ?E-mail? system.

The overall mission dates are the last two weeks in
Feb. with about 10 or 11 full days of actual medical
work in each village. Sign-up is now until about the
beginning of October (2 months away). Late signups
will only be taken if there are vacancies. Obviously,
earlier applications will have more of a selection on
which village to go to (all are great experiences!).
In all, I.H.S. will send about 100 volunteers to about
9 or 10 locations. Each operator will receive an
orientation booklet plus there will be an optional
orientation meeting about the first week of December.
For some basic info, visit our tiny Web site:
www.IHSOFMN.org We also have a radio e-mail group
at: www.groups.yahoo.com/group/IHSradio/

If you can't go, pass the word on to other hams and
medical folks. For more info from some great guys who
have gone before, contact any of the following:

368. Alinco DX-70, 160 thru 6 m xcvr FS

Yahoo group: ham
Date: 2004-07-24 11:03:24 UTC
From: Ken Simpson, W8EK
Topic: 289 Message: 368

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands,
and also has a general coverage receiver. Modes include SSB,
CW, FM, and AM. The narrow SSB filter is in it. Of course it
has memories, scan, dual VFOs, etc. It is a small unit, ideal for
mobile or use in a motor home, but its performance is fine for
a base station as well.

This particular unit works 100%, and looks close to the same.
It is in its original box, and includes all of the things that it
came with originally -- hand microphone, power cord, manual, etc.

$450 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

369. TenTec Paragon 585 HF xcvr and accessories FS

Yahoo group: ham
Date: 2004-07-31 15:58:22 UTC
From: Ken Simpson, W8EK
Topic: 369 Message: 369

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, and includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. 100 Watts output.
This particular unit works 100% and looks really great
also. Front panel is great. It does have a scratch on
the heat sink in the rear. Big inch thick manual is
included, as is the original box. TenTec sells these
used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the
585 Paragon to a Paragon II. $60

TenTec 961 Power Supply / Speaker
This matches the Paragon, and also the Corsair II
and other TenTec rigs. 13 V DC at 20 amps.
This one is in great shape, and includes manual
and original box. $160

TenTec 214 desk microphone with stand
This is the "banana" electret microphone with
4 pin connector. Good shape, with paper work,
for $70.

TenTec 288 crystal filter - 1800 Hertz
This is the narrow SSB filter used in the Paragon,
Corsairs, Omni V and VI, etc. With paper
work, like new, for $70.

TenTec 251 power supply
This is the power supply that was made to go with the
Argonaut when used with the 405 linear amp. It is
somewhat rare. The 251 will supply 13 V DC at up to
9 amps. It was also used with the Triton I (the 50 W
output model), and could be used with any rig needing
13 V DC at up to 9 amps. This styling matches the 505
or 509 Argonaut, the 405 amp, the Triton I and II and
others that are the walnut wood grain and eggshell white.
This particular one works fine and includes the paper
work for $65.

Prices do not include shipping from Florida.

Thanks.

371. Roller inductor antenna tuner / wattmeter / antenna switch FS

Yahoo group: ham
Date: 2004-08-21 13:21:27 UTC
From: Ken Simpson, W8EK
Topic: 371 Message: 371

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new, still in its box.
It was removed once from the box for testing
purposes. There is not a mark on it. Of course
the paper work is included. You can pay about
$200 from MFJ, or buy this one for $150 plus
shipping from Florida.

Thanks.

Topic: 374 Message: 374

10 meter beam For Sale:

Cushcraft Ten-3 beam

This is a 3 element, 10 meter single band beam.
The beam breaks down into a package just over
4 feet long, so it is UPS shippable.

All parts are either aluminum or stainless steel,
so obviously there is no rust. This antenna has
been up, and has some slight, normal oxidation.
Manual included for $75 plus shipping from Florida.

Thanks.

Hi guys,

Attached is a very intersting story written by my
friend, Lou Linden, KI5TD. It will appeart in QST in
about November but I thought you would enjoy it very
much. It is about a group of hams in the Jungle using
new technology communications.

It is a .pdf file but worth the effort to load it and
read. Pass it on of you want.

Good stuff.

John

381. MFJ 1786 Loop antenna for restricted space FS

Yahoo group: ham
Date: 2004-10-02 11:33:08 UTC
From: Ken Simpson, W8EK
Topic: 381 Message: 381

For Sale:

MFJ 1786 Super High-Q Loop Antenna

Ideal for restricted spaces. This antenna is a loop about
3 feet in diameter that can be mounted outside on a pole,
or put in an attic, or other restricted places. It works from
10 thru 30 MHz (that means it covers 30, 20, 18, 15, 12,
an 10 meter bands), and handles 150 watts. A "Super
Remote Control" (MFJ's name for it) is in the shack and
controls the antenna. This controller includes a cross
needle wattmeter/SWR bridge. It will not perform like a
big beam, but is fairly efficient for small spaces.

MFJ sells these for about $380. This one is in good shape
and includes both the loop and controller, and the paper
work for $280 plus shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2004-10-16 14:52:30 UTC
From: Ken Simpson, W8EK
Topic: 384 Message: 384

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig,
which is what it has been used for. All solid state
switching makes silent packet operation. Since it has
been used on packet, it does not have a mic or mobile
bracket with it, although it takes a standard 8 pin
round mic connector, like most Kenwood rigs. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically, although there are a
few scratches. Manual is included for $125 plus
shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2004-10-30 13:04:47 UTC
From: Ken Simpson, W8EK
Topic: 386 Message: 386

For Sale:

Vectronics PM-30 Wattmeter

This meter has the dual cross needle meter that
will read both forward and reverse power at the
same time. It covers from 1.8 to 60 MHz, so it
is great for the newer rigs that cover from 160 thru
6 meters. It will read either peak or average power
with 300 or 3000 Watts full scale, and is powered
by 12 V DC. Input and output connectors are
SO-239, with a 2.1 mm coaxial connector for the
12 V DC.

This particular meter works 100% and looks very
close to new.

Manual is included for $60 plus shipping from Florida.

Thanks.

387. TenTec Pegasus 550 HF xcvr FS

Yahoo group: ham
Date: 2004-10-31 21:36:56 UTC
From: Ken Simpson, W8EK
Topic: 387 Message: 387

For Sale:

TenTec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate.

$600 plus shipping from Florida.

Thanks.

Date: 2004-11-13 12:29:08 UTC
From: Ken Simpson, W8EK
Topic: 389 Message: 389

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC bands. It has a general coverage receiver, and includes SSB, CW, and AM. An optional FM adapter is available for it. Of course it has digital readout, memories, scan, dual VFOs, PBT, notch filter, etc. 100 Watts output. This particular unit works 100% and looks really great also. Front panel is great. It does have a scratch on the heat sink in the rear. Big inch thick manual is included, as is the original box. TenTec sells these used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the 585 Paragon to a Paragon II. $60

TenTec 251 power supply
This is the power supply that was made to go with the Argonaut when used with the 405 linear amp. It is somewhat rare. The 251 will supply 13 V DC at up to 9 amps. It was also used with the Triton I (the 50 W output model), and could be used with any rig needing 13 V DC at up to 9 amps. This styling matches the 505 or 509 Argonaut, the 405 amp, the Triton I and II and others that are the walnut wood grain and eggshell white. This particular one works fine and includes the paper work for $65.

Prices do not include shipping from Florida.

Thanks.

390. TenTec HF xcvr and accessories FS

Yahoo group: ham
Date: 2004-11-20 13:45:23 UTC
From: Ken Simpson, W8EK
Topic: 390 Message: 390

TenTec Items For Sale:

TenTec 546 Omni D, series C, HF CW / SSB xcvr.
This is the latest of the Omni D series rigs. It is all
solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters, including
the 10 MHz WARC band. The 18 and 24 MHz WARC
bands can be added with optional crystals (see below).
Full QSK on CW, and a fantastic receiver. Terrific
audio quality on SSB also. Built in audio CW filter.
Digital read out. This one is in very, very nice shape,
with manual and power cord for $335.

Optional crystals to add WARC bands to 546 Omni series C.
Simply plug in to the rig to add the bands.
Crystal for 18 MHz (17 meter) WARC band. $15
Crystal for 24.5 MHz (12 meter) WARC band $15

TenTec 705 desk microphone.
Four pin plug, matches most all of TenTec rigs.
This is the current desk microphone TenTec is
selling. It works 100% and looks very close to
new, with paper work for $79.

TenTec 251 power supply
This is the power supply that was made to go with the
Argonaut when used with the 405 linear amp. It is
somewhat rare. The 251 will supply 13 V DC at up to
9 amps. It was also used with the Triton I (the 50 W
output model), and could be used with any rig needing
13 V DC at up to 9 amps. This styling matches the 505
or 509 Argonaut, the 405 amp, the Triton I and II and
others that are the walnut wood grain and eggshell white.
This particular one works fine and includes the paper
work for $60.

Prices do not include shipping from Florida.

Thanks.

391. Antenna tuner FS

Yahoo group: ham
Date: 2004-11-21 16:44:28 UTC
From: Ken Simpson, W8EK
Topic: 56 Message: 391

Antenna tuner For Sale:

MFJ 949 E antenna tuner

This tuner has a "cross needle" SWR bridge built into it, so you can read both forward power and SWR at the same time. The meter has a back light. It will read either 30 W or 300 W full scale. It will also read either peak or average power. It needs 13 V DC for the backlight, and to read peak power.

An antenna switch will switch between either balanced line, two coax antennas, or a built in dummy load. All antennas can be operated thru the tuner, or the tuner can be bypassed for each.

This tuner will operate on 160 thru 10 meters, including the WARC bands.

This particular unit works 100%. It looks very close to new. Manual is included for $ 100 plus shipping from Florida.

Thanks.

392. Loop antenna for restricted space FS

Yahoo group: ham
Date: 2004-11-25 14:06:32 UTC
From: Ken Simpson, W8EK
Topic: 392 Message: 392

For Sale:

MFJ 1786 Super High-Q Loop Antenna

Ideal for restricted spaces. This antenna is a loop about
3 feet in diameter that can be mounted outside on a pole,
or put in an attic, or other restricted places. It works from
10 thru 30 MHz (that means it covers 30, 20, 18, 15, 12,
an 10 meter bands), and handles 150 watts. A "Super
Remote Control" (MFJ's name for it) is in the shack and
controls the antenna. This controller includes a cross
needle wattmeter/SWR bridge. It will not perform like a
big beam, but is fairly efficient for small spaces.

MFJ sells these for about $380. This one is in good shape
and includes both the loop and controller. The controller
looks close to new. The antenna itself shows some minor
weathering, but is really in quite good shape. The
aluminum even shines in places.

With the paper work for $280 plus shipping from Florida.
Of course pick up would be even better.

Thanks.

From: Ken Simpson, W8EK
Topic: 252 Message: 393

Shure 444 Desk Microphones For Sale:

Shure 444 desk microphone.
The Shure 444 has voice shaping built in to it, with PTT switch
on the base. Under the base is a switch for VOX or PTT. This
mic is the gray color, works fine, and is in very good shape.
It has paper work with it for $ 50.

Shure 444 D dynamic desk microphone.
The 444 D has voice shaping built in to it, with PTT switch
on the base. Under the base are switches for High or Low Z,
and PTT or VOX. This mic is the black color, and is in very
nice shape for $ 65.

Prices do not include shipping from Florida.

Thanks.

394. Misc Kenwood items FS

Yahoo group: ham
Date: 2004-12-18 19:09:03 UTC
From: Ken Simpson, W8EK
Topic: 394 Message: 394

Misc Kenwood items for sale:

Kenwood SP-40 mobile speaker
This is a small (about 3 inch) speaker designed for
communications use, and ideal for mobile. It has a
magnet in the base, so it will stick to a metallic
dashboard. This one works fine, and looks like it
just came out of the box. $20

Kenwood MC-85 desk microphone
This desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one works 100% and looks very close to new.
With paper work, for $110.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood
rig taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often
used on the 2 m and 440 MHz rigs that do not have
touchtone built in, but can also be used on HF rigs for
TT on 10 m FM. It works fine and looks great also. $ 55

Kenwood PC-1 A phone patch.
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK. This particular
unit works fine, and looks very close to new, with original
paperwork, for $ 55.

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Prices do not include shipping from Florida.

Thanks.

W4EAL

Project Woodpecker
By Cal
1-9-5

In the Tulsa World (1-11-94), there was a small article entitled: "Weapons Designers Win Secret Award". It said this: "The Lawrence Livermore National Laboratory won an award. The staff is very proud. The award is on display. But, they can't say what the honor was for. It's a secret. .Its 21 member "Project Woodpecker" team was cited. It won the Intelligence Community Seal Medallion. That's an award from the CIA and National Security Agency. The citation says the award was for solving complex problems."

PROJECT WOODPECKER pertains to the "Electron Cyclotron Resonance Heating Method" now being used to alter the earth's magnetic field---inorder to modify weather, create or trigger earthquakes and volcanoes, spread viruses, create the phenomenom known as "electromagnetic pulse", and, to modify behavior control among the populous. The HAARP (i.e. High Frequency Active Auroral Research Program) transmitter site, that is located NE of Gakona, AK, is large enough to cover most of the Northern Hemisphere. It is however but one of other such sites (some of which are known as "Ionospheric Research Instruments") scattered around the world. And, many of them here in the U.S. are able to tie into the much smaller GWEN (i.e. Ground Wave Emergency Network) remotely controlled transmitter sites that have been built all over the U.S. in a grid pattern, with their antennas spaced about every 200 miles or so.

The original research concerning the "Electron Cyclotron Resonance Heating Method" was done by Nickola Tesla, and later expanded upon by not only Soviet scientists, but also by U.S. scientists, such as Bernard J. Eastland---a scientist who was associated with ARCO (Atlantic Richfield Oil Co.). ARCO has traditionally been controlled by members of the CFR (i.e. Council on Foreign Relations). Eastland, who was the "front man", now resides in TX. He transferred the patent rights to APTI, Inc. (i.e. ARCO Power Technologies Industry, Inc.) in the late 1980s, which was a Los Angeles, CA subsidiary of ARCO. APTI, Inc. then sold out to "E-Systems" on June 10, 1994, which company has pretty much, over the years, been under the control and influence of the CIA. On April 3, 1995, "E-Systems" sold out to the still larger Raytheon Corp. I don't know what has happened, by way of "transfers"

since that time.

The U.S. and the Soviet Union first began secret cooperation on world weather engineering in about 1971. On July 4, 1976, the Soviets began generating powerful electromagnetic transmissions, that were dubbed "The Russian Woodpecker" by western ham radio operators. On June 18, 1977, the US government OFFICIALLY became covert partners with the Soviets in these operations by sending them sophisticated scientific material and equipment for further research and development. The secret code name given US operations was Project Woodpecker. The Lawrence Livermore National Laboratory located at Livermore, CA was and is the main research center for US development of the Project. Covert funding for the Project was funneled through the CIA and the National Security Agency. The DOD and NASA have, of course, been cooperating in the Project from the beginning stages.

On Jan. 10, 1985 there was officially filed of record a Patent No. 4,686,605 entitled: a "Method and Apparatus for Altering a Region in the Earth's Atmosphere, Ionosphere, and/or Magnetosphere". The Patent was approved on Aug. 11, 1987. This Patent explains and describes the "Electron Cyclotron Resonance Heating" method that is presently being covertly and cooperatively used by the two super powers to help bring about their coveted NEW WORLD ORDER, which is a "One World Government".

In 1993, researchers announced that they had discovered (back as early as perhaps 1985) a never before seen network of rivers, some of which flow for thousands of miles ABOVE earths surface, that transport as much water in the form of vapor as the Amazon River. Apparently, these narrow streams of ATMOSPHERIC rivers are transient, but at any given time, there are at least a few of them in the atmosphere, typically around five in each Hemisphere. The longest of them runs for about 4800 miles. They are generally about 150 miles wide (the largest being almost 500 miles wide), and about a mile deep, with some 364 million pounds of vapor flowing past a given spot each SECOND---which is comparable to an average flow of the Amazon River. These atmospheric rivers are flowing at an altitude of no more than 1.9 miles above the earth's surface, which makes them readily reachable by low pressure weather cells. In general, the atmospheric rivers head for the poles, but on the way, they can get deflected by the earth's Jet Stream. Their flow originates from along the equator. These vapor rivers sometimes get sucked into low pressure systems, and are the major sources of the massive flows of water that rains out of the storms and into the sky river's counterparts on land. US and Soviet scientists are now cooperatively "tracking" these atmospheric rivers for use in covert activities of Project Woodpecker.

In order to fully understand how the conspirators are able to use high powered r.f. transmissions to trigger earthquakes and/or volcanoes, one must have some knowledge of the "principle of sympathetic vibratory resonance". Von Nostrand's SCIENTIFIC ENCYCLOPEDIA (Seventh Edition) defined RESONANCE: "Every physical system (i.e. all bodies,

structures, mediums, etc.) has one or more NATURAL (or Fundamental) VIBRATION FREQUENCIES, characteristic of the system itself and deterrmined by constants pertaining to the system.If such a system is given impulses with some arbitrary frequency, it will necessarily vibrate with that frequency, even though it is not one of those NATURAL to it." These "forced vibrations" may be very feeble, but if the impressed frequency is varied, the response becomes rapidly more vigorous whenever any one of the NATURAL (i.e. Fundamental or a harmonic of that Fundamental) frequencies is approached. Its amplitude often increasing many fold as an exact synchronism (i.e. or at a harmonic of the NATURAL) frequency is reached. This effect is known as RESONANCE. The greatest vibration will be induced in a system at its NATURAL or FUNDAMENTAL frequency (or at a harmonic thereof).

The Earth's NATURAL (or Fundamental) frequency (also sometimes referred to as the Schumann Resonance) is about 10 Hz. This appears to be the Resonant Frequency of our Galaxy, so, all bodies, structures, mediums, etc. within our particular Galaxy will be found to be RESONANT at either this Natural frequency or around 10 Hz, or at a harmonic thereof.

In the triggering of Earthquakes or Volcanoes, the trick is in determining the unique resonant frequency of the Earth's mantle AT THAT PARTICULAR SPOT (or target!) ON THE EARTH. Once the conspirators determine this, they can unleash an ELF carrier frequency through the earth, and then SUPERIMPOSE the harmonic frequency of the "target zone" using a second set of transmitters. This might be called: "Selective Targeting". Of course, the conspirators will also have predetermined that the target zone will have built up enough stress within the zone to be "ripe" for activation.

This system of using ELF radio waves as a technique has many other applications. Not only is it being used to artificially trigger earthquakes and volcanoes, to develop high and low pressure weather cells that are used to steer the Jet Streams, to transport and deposit microscopic entities such as viruses and chemical agents, but, they are able to create a phenomenon known as an earth damaging "electromagnetic pulse" (EMP).

To understand how they do it, one must have at least some knowledge about the earth's magnetic field. The earth's magnetic field is comprised of atoms which are gyrating about a magnetic field line as its guiding center. The atoms are comprised of negatively charged electrons and positively charged protons. If you would look at a cross section of earth at the equator, you would see a solid core at the center, ringed by a liquid layer of molten iron, which is in turn surrounded by the solid mantle and crust. Within the liquid layer are several constantly circulating streams of iron called convection cells which work like oval conveyor belts. Driven by heat from the core, material in these cells rises towards the mantle, where it cools and sinks back down, until the heat pushes it up again. Geologists

believe, that after these cells formed, early in the earth's history, the weak magnetic field that permeates the galaxy generated in them an electric current which in turn generated the earth's "magnetic field".

Now, inorder for you to understand how the magnetic field lines of our earth work, you must understand the basic principal of how a simple "magnet" works. And, the way that most of us learned it back in our earlier school years, was WRONG WRONG WRONG! There is a "old concept" and, a "new concept" of the laws of magnetism. In the "new concept", you will note that there is a "NEGATIVELY charged NORTH MAGNETIC POLE, and, a POSITIVELY charged SOUTH MAGNETIC POLE. (Draw it out on a piece of paper). The atom leaves the South Magnetic Pole spinning to the right (or clockwise). It then dips to the surface of the earth (at its Equator), and changes its spin (or phase relationship) by 180 degrees. When it leaves the Magnetic Equator of the Earth, it travels with a left (or counterclockwise) spin to re-enter the earth at the North Magnetic Pole. The negatively charged electrons and positively charged protons both follow helical paths around a field line, but they rotate at a certain gyromagnetic or 'CYCLOTRON FREQUENCY' in opposite directions. There is therefore linear movement along the earth's magnetic field lines. Thus, one can see, that this change in phase relationship between electrons and protons creates a different potential of magnetic energy in the Northern as compared to the Southern Hemisphere. By way of analogy, winds in low pressure weather cells circulate counterclockwise in the Northern Hemisphere, but they circulate clockwise in the Southern Hemisphere.

When side-by-side earth magnetic field lines are "altered" by speeding up one line's flow of negatively charged electrons, the magnetic field strength will combine to form a larger and stronger field. If the electron flow around one line is reversed or slowed down, the magnetic field strength between any two lines can be made to oppose each other and tend to cancel or lessen the magnetic field strength. The "force of gravity" in that particular local can thus be made to increase or decrease.

The atmospheric media that is being crossed by the earth's magnetic field lines is itself comprised of various molecules whose elements have different energy levels and which gyrate at different frequencies. Relatively recent discoveries have established that there are naturally occurring radiation belts (sometimes referred to as the Van Allen belts) of trapped ionized particles, which particles bounce or oscillate back and forth at a specific cyclotron frequency, between so-called magnetic mirrowed boundaries, along the earth';s magnetic field lines. The scientific conspirators have also discovered that they can artificially increase the density of the charged particles within these radiation belts, and even create a radiation belt where none had existed, by injecting large clouds of gases---such as lithium, barium, hydrogen, etc.---from orbiting satellites or from earth launched rockets. These injected gases become ionized by the ultraviolet light of the sun, and by injecting them at a certain

critical velocity. The procedure is enhanced when they are injected during periods of so-called "high tidal forces"---such as at New or Full Moon. And, when the Moon is at "perigee" and/or when it is over the "Equator". Also, when the Sun is directing large Solar Flares and/or Coronal Ejections towards the Earth.

By using extremely high powered radio transmitters to transmit a "tuned circular polarized ELF radio wave along or parallel to selected earth magnetic field lines, the charged electrons within that radiation belt will become "excited" or "heated". This causes the charged particles to move outward in a "plum" out of their mirrowed boundaries. The plume of heated rising plasma is replaced by new plasma within the radiation belt. The aforementioned Patent states that temperature within the target radiation belt can be raised by hundreds of degrees, which incidentally is sufficient to cause an air glow or a phenomenon known as aurela boralis. This might be the only way that you might know that such covert operations are taking place. There may also be a sonic boom or noise that might occur from the rf bombardment. To continue: The kinetic energy of the moving particles so developed is on the same order of magnitude as the total kinetic energy of stratospheric winds known to exist. These changes in temperature and winds aloft gives rise to the creation of high and/or low pressure weather cells that can alter the paths of the earth's Jet Streams. By using multiple transmitters, these weather cells can be made to move or hover over selective locations on earth, thus causing torrential damaging moisture to occur in some areas, while devastating droughts are made to occur in other areas. When the electromagnetic energy is suddenly released (by DECREASING the earth's magnetic field strength along that specific earth magnetic field line), the low pressure cell with its rising plume of air can be made to collapse---thus dumping the high winds and moisture that was present in that particular cell. This would be called a microburst by the weather guys reporting on your local TVs. These damaging hurricane strength winds would be "straight line winds".

When the rf bombardment of a target radiation belt is extremely powerful, the negatively charged electrons and positively charged protons can be forceably made to separate. This will cause an earth damaging electromagnetic pulse to occur, that is similar to lightning. This EMP will couple to surface antennas and power transmission lines, which will destroy sensitive electronic equipment. Thus, power outages can be so induced over selective targets.

That is basically as best that I can explain to you, the capability of this technique for world conquest. Sorry it took so long to read. But, as you can see, it aint easy

Regards,

Cal

Help,We need more members! This group is for all owners and future
owners of the Yaseu VX-5R. Not sure which HT to get? Get the VX-5R!
Learn more by joining this group! The VX-5R is a miniature tri band FM
transceiver with extensive receive frequency coverage, providing
leading-edge features for 2M, 440MHz and 50MHz amateur communications
along with unmatched monitoring capability. The VX-5R's super thin
profile and durable lightweight design allows you to take it
anywhere-hiking, skiing, or while walking around town, and its
operation flexibility brings the user many avenues of operating
enjoyment. Besides the 50, 144, and 430 MHz transmit operation, the
VX-5R provides receive coverage of the AM and FM broadcast bands, HF
short-wave bands up to 16 MHz, VHF and UHF TV bands, the VHF AM
aircraft band, and a wide range of commercial and public safety
frequencies! With its unique optional Barometer pressure sensor unit
provides readout of barometric pressure and altitude while mountain
climbing and hiking.

399. TenTec power supplies FS

Yahoo group: ham
Date: 2005-01-29 12:08:14 UTC
From: Ken Simpson, W8EK
Topic: 356 Message: 399

TenTec Power Supplies For Sale:

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it, but is usually used where the supply is put on the floor,
out of the way. This one works fine, and looks very nice as
well. With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

400. Antenna Baluns FS

Yahoo group: ham
Date: 2005-02-13 23:20:10 UTC
From: Ken Simpson, W8EK
Topic: 400 Message: 400

Antenna Baluns For Sale:

A Balun is designed to match an unbalanced coaxial
cable, to a balanced antenna, such as a beam or dipole.

Hy-Gain BN-86 (1 to 1 ratio)
It is a broadband 50 Ohm ferrite balun, and is usable
from 3 to 30 MHz. It is recommended for all HF Yagi beam
antennas and provides improved front-to-back ratio. It can
also be used as the center insulator for a dipole. It uses an
SO-239 connector. This one is "pre-MFJ", made by HyGain,
and is in nice shape. These cost $80 new, but you can have
this one for only $45.

Bencher ZA-1 A
This is a 1 to 1 balun that can be used as the center insulator
for a dipole, or can be attached to a beam. It is in very
nice condition. $30

W2AU Balun (1 to 1 ratio)
Information from their web site:
The W2AU is the preferred Balun of Amateurs worldwide.
W2AU's operate at 1.1:1 or less VSWR from 1.8 to 40 mHz,
and handle powers up to 2 KW PEP (at SWRs of less than 3:1).
W2AU Baluns are transformer designs with ferrite cores to
provide 95% minimum coupling efficiency. Each has a built-in
lightning arrestor, hang up hook, and 600 lbs of pull-apart
strength in a weatherized, rugged package using only stainless
steel hardware and quality materials. The 1:1 matches 50 or 75
ohm unbalanced coax to 50 or 75 ohm balanced dipoles.
This one is new, in its box, with paper work for $20.

Hi-Q Balun (4 to 1 ratio)
Similar to above, but with 4 to 1 ratio, so 75 ohm coax is
matched to 300 ohm balanced line. This one has not been
Used. $18

Prices do not include shipping from Florida.

Thanks.

401. AEA PK-232 MBX digital controller and other AEA items FS

Yahoo group: ham
Date: 2005-02-19 13:18:34 UTC
From: Ken Simpson, W8EK
Topic: 401 Message: 401

AEA items For Sale:

AEA PK-232 MBX, multi-mode digital controller,
with the mailbox. More than just a TNC. It will
handle packet, RTTY, Amtor, ASCII, CW, etc.
It includes a big thick manual, computer cable,
power cable, speaker cable, and radio cable.
It also has a plastic bag of misc connectors
that came with it when new. This is the newer
unit with the multicolored LEDs.
It works fine and looks fine also. $ 95

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 20

AEA "HTM"
This is a microphone to use with the AEA
series of HTs. Nice shape for $30.

Prices do not include shipping from Florida.

Thanks.

Astatic D-104 desk microphone for sale

This is the nice chrome "lollipop" microphone that
has been used with many rigs over the years. This
one has the T-UG8 gray hammertone base with it.

It works fine and is in very nice shape.

$60 plus shipping from Florida.

Thanks.

403. Kenwood dual band xvcr FS

Yahoo group: ham
Date: 2005-03-05 12:24:34 UTC
From: Ken Simpson, W8EK
Topic: 403 Message: 403

For Sale:
-
Kenwood TW-4000 dual band mobile FM transceiver
-
Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically, although there is
some wear. Manual is included for $135 plus
shipping from Florida.
-
Thanks. 73,
Ken Simpson, W8EK

404. Coaxial antenna switches FS

Yahoo group: ham
Date: 2005-03-13 18:56:54 UTC
From: Ken Simpson, W8EK
Topic: 404 Message: 404

Coaxial antenna switches for sale:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 30

B & W 593 coax switch
This one switches 3 antennas, and is in a rectangular
Box with all 4 SO-239 connectors coming out the
back of the box. Unused antennas ARE grounded.
This one works fine and is in very nice condition. $30

Generic 3 position Coax Switch
This is in a small rectangular box, with the
3 switched SO-239 connectors coming out
the rear, and the common coming out the front. Unused
positions are NOT grounded. It is in very nice condition
for $ 14.

Coaxial antenna transfer relay for sale:

This is not the normal SPDT DowKey antenna transfer relay,
but it serves the same function. This is an Allied Controls
relay. It says 55476 K-101 on it, and has a 24 Volt DC
coil, although it picks up fine at 18 Volts. It will not pick
up at 12 V DC. It is relatively small, so I doubt it would
handle a KW, but would be fine for 100 or 200 watts.
Its construction looks like it should be good at VHF.

This relay has two SO-239 connections (one is the
common), and a length of RG-58 for the third connection.
It is a bit different than the DowKey relays, but if you
need an antenna transfer relay for the separate transmitter
and receiver in your vintage station, this should do the
job nicely. $30

Prices do not include shipping from Florida.

Thanks.

Topic: 405 Message: 405

TenTec items for sale:

TenTec 555 Scout transceiver
This is a 50 watt HF transceiver, primarily designed
for mobile use, but also nice inside the house. It
has the TenTec variable bandwidth "Jones filter" in
it that is really effective. CW keyer is built in.
This one has the 40 and 20 meter modules with it,
along with power cord and manual. It works fine, and
looks like it just came out of the box. I can not find a
scratch any where on it. $320

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $79

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it. This one works fine, and looks very nice as well.
With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2005-03-19 17:21:18 UTC
From: Ken Simpson, W8EK
Topic: 406 Message: 406

For Sale:

Bird Model 43 wattmeter elements and leather cases

All work fine and are in very nice condition.

Element 10 B - 10 Watts - 50 to 125 MHz
Element 5 C - 5 watts - 100 to 250 MHz
Element 25 C - 25 watts - 100 to 250 MHz
Element 50 C - 50 watts - 100 to 250 MHz
Element 100 C - 100 watts - 100 to 250 MHz
All of the above are $55 each.

Element 430-107 - 100 mW - 800 to 900 MHz
Element 800-1 - 1 Watt - 800 to 950 MHz
These elements are $80 each

CC-1 BLACK (or Dark Gray, if your prefer)
leather case holds Model 43 wattmeter
and 6 slugs - nice silver lettering - $105

RFDC - Dummy Load with "N" connector
I can not find specs on these, but basically they
are terminations. They look to be good for
maybe 3 watts, but look like they should be
good up into the UHF frequencies. $18

Prices do not include shipping from Florida.

Thanks.

407. Low Pass TVI filters FS

Yahoo group: ham
Date: 2005-04-23 21:49:09 UTC
From: Ken Simpson, W8EK
Topic: 407 Message: 407

Low Pass (TVI) filters For Sale:

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

Para Dynamics Corp PDC-98 low pass filter
This filter is a really heavy duty, high power filter.
It starts to cut off just above 10 meters, and
has a notch about 90 db deep on TV channel 2
and 3, and then about 80 db above that. SO-239
connectors on each end. Great condition for $40.

Prices do not include shipping from Florida.

Thanks.

TenTec Pegasus HF transceiver and many misc TenTec
accessories For Sale:

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $79

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it. This one works fine, and looks very nice as well.

With paper work for $125.

409. Kenwood accessory items FS

Yahoo group: ham
Date: 2005-05-08 11:26:17 UTC
From: Ken Simpson, W8EK
Topic: 409 Message: 409

Accessories for Kenwood transceivers For Sale:

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. It has a four pin plug on it to match these rigs.
Good shape for $40

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $35

YK-88 C, CW filter for Kenwood TS-120/130/430/440, and
many others.
This is a 500 hertz CW filter for the 8.8 MHz IF used in many
of the Kenwood rigs. Actual center frequency is 8830.7 MHz.
It is the solder in type filter, with steep skirts. $70

Kenwood heavy DC power cord for HF rigs
This is the actual Kenwood cord, and not a third party
make over. It fits all of the Kenwood (and Icom and Yaesu
and Alinco) rigs that take the standard 6 pin "Molex"
power plug. $ 20

I have a cable that is used to go between a Kenwood
transceiver, and a linear amplifier, to switch the amp
from transmit to receive. One end has a DIN connector
on it, as is used with most Kenwood rigs. The other end
has an RCA phono plug on it, as used by most linear
amplifiers. Before using this cable, please check to be
certain that the voltages and currents needed by your
amplifier match the switching capabilities of your transceiver.
This cable has only one coax between the rig and amp.
It provides only the relay control, and NOT the ALC control.
Many amps do not need the ALC, so this cable would
work fine. $ 12

Prices do not include shipping from Florida.

Thanks.

412. Roller inductor antenna tuner FS

Yahoo group: ham
Date: 2005-05-21 13:17:36 UTC
From: Ken Simpson, W8EK
Topic: 412 Message: 412

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145 plus shipping from Florida.

Thanks.

Yaesu items For Sale:

Yaesu "Landliner" speaker and phone patch
This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as
well as controls for both transmit and receive gain.
This particular unit works fine, and looks very nice
as well. $75

Yaesu HT accessories:

All of these items fit the Yaesu FT-23/73/411/470/530/811
series of HTs and many others as well.

Yaesu MH19A2B ear bud and mini-mic.
This can be used with the above HTs, plus most any of the
HTs that take a 3.5 mm and a 2.5 mm for the speaker
mic plug. It works fine and looks fine. $18

Yaesu Boom Microphone and single headset
I can not find a model number on this, but it works with the
above listed HTs, and most that take the 2.5 mm and 3.5
mm speaker mic connections. It works fine, but the single
"speaker" portion of the headset could use a new foam
pad. $18

Speaker microphone for HT
It says Densei SM-505 on it, but it will work with the
Yaesu HTs that need the 3.5 mm and 2.5 mm plug.
Very nice condition for $18.

Yaesu NC-28 B wall charger
This unit produces 8.7 V DC at 60 ma. It has a 2.5
mm plug on it. This is the charger for the Yaesu
FT-23/33/73, FT-411, FT-470, FT-530, FT-811,
and probably others. This one works and looks fine.
$10

Prices do not include shipping from Florida.

Thanks.

Topic: 414 Message: 414

Manuals For Sale:

RCA Solid State Hobby Circuits Manual
RCA Technical series HM-91 - 1970
368 pages of electronics circuits useful to hams
and others. A section on theory is also included.
$6

Zener Diode Handbook by Motorola
First edition - 1967
Everything you wanted to know about zener diodes
and their use. A large number of specs of various
zeners is also included. $ 6

Semiconductor Power Circuits Handbook by Motorola
First edition - 1968
Theory plus practical circuits for using higher power
transistors. Circuits for inverters, power amps,
regulated power supplies, etc. $6

Silicon Rectifier Handbook by Motorola
1966
Theory and construction of various circuits. It has
a fairly comprehensive listing of specs of various
silicon rectifiers, plus cross references. $ 6

Practical Transistor Servicing
1968 - 2nd edition - Sams Book
191 pages of good information for servicing
solid state devices. $ 5

Linear Integrated Circuits by RCA
Technical Series IC-42 - 1970 - 416 pages
Specs, theory, and practical circuits.
Binding is loose. $ 5

SCR Experimenter's Manual by RCA
1967 - 136 pages
Theory and circuits. $ 4

GE SCR Manual
4th edition - 1967 - 513 pages
Theory, circuits, and specs. $ 7

Semiconductor Diode Laser
First edition - 1972 - Sams Book
192 pages $ 4

Calculator Decision Making Sourcebook
1977 - Texas Instruments book
Facts, examples, and information $3

All books are in good shape unless noted otherwise.
Prices do not include shipping from Florida, but
shipping via "Media Mail", is cheap, and should be
about $2 for one book, and $3 for 2 or 3 books,
depending upon the weight of the book.

Thanks.

415. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: ham
Date: 2005-05-29 13:18:04 UTC
From: Ken Simpson, W8EK
Topic: 415 Message: 415

Larsen Mobile Antennas For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $14
Used, but in very good shape - $12
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $18
Used, but nice shape - $16
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

HyGain TLM
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Prices do not include shipping from Florida.

Thanks.

The following Texas Instrument Data Books are available.
All are in very nice condition, with very little use.

Analog/Mixed Signal Products - Aug 2000 - $ 3

Amplifier and Comparators - 2000 - $ 3

High-Speed Amplifiers (Analog and Mixed Signal)
2000 - $ 3

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

CBT (5 V) and CBTLV (3.3 V) Bus Switches
Dec 1998 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

Audio Power Amplifiers (huge book) - 2000 - $ 6

Analog/Mixed Signal Products Designer's Guide
June 2001 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

All of the above are by Texas Instruments, and all are
in very nice condition.
Prices do not include shipping from Florida, but
shipping via "Media Mail", is cheap, and should be
about $2 for one book, and $3 for 2 or 3 books,
depending upon the weight of the book.

Thanks.

417. TenTec Pegasus HF xcvr FS

Yahoo group: ham
Date: 2005-06-04 11:43:14 UTC
From: Ken Simpson, W8EK
Topic: 417 Message: 417

For Sale:

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75

Prices do not include shipping from Florida.

Thanks.

418. Low Pass TVI filters FS

Yahoo group: ham
Date: 2005-06-04 12:06:48 UTC
From: Ken Simpson, W8EK
Topic: 407 Message: 418

Low Pass (TVI) filters For Sale:

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

Para Dynamics Corp PDC-98 low pass filter
This filter is a really heavy duty, high power filter.
It starts to cut off just above 10 meters, and
has a notch about 90 db deep on TV channel 2
and 3, and then about 80 db above that. SO-239
connectors on each end. Great condition for $40.

Prices do not include shipping from Florida.

Thanks.

420. Diawa Automatic antenna tuner FS

Yahoo group: ham
Date: 2005-06-11 12:39:47 UTC
From: Ken Simpson, W8EK
Topic: 420 Message: 420

Diawa CNA-1001 automatic antenna tuner for sale.

This is an automatic antenna tuner that covers the HF bands from 80 thru 10 meters, including the WARC bands. Although it is completely automatic (push a button, and it tunes), there are also "fine tuning" controls if you want to touch up what the automatic part does for you. It says on the front panel that it is rated at 500 Watts PEP. There is a built in dummy load (although I would not want to put 500 watts in to it), plus an antenna switch for two antennas. A large cross needle wattmeter reads both forward and reflected power simultaneously. This is a very rugged unit.

This particular tuner works fine, and looks close to perfect. I can not find a scratch on it. Power cord and paper work are both included for $195 plus shipping from Florida.

Thanks.

421. Large 2 m beam antenna FS

Yahoo group: ham
Date: 2005-06-12 11:15:40 UTC
From: Ken Simpson, W8EK
Topic: 421 Message: 421

Large 2 meter beam antenna for sale:

Cushcraft 147-22 beam

This is a pair of 11 element 2 meter beams stacked
to give a total of 22 elements.

Each 11 element beam is about 12 feet long, and the
two are separated by a 5 foot boom. To put it another
way, the antenna occupies a 12 by 5 foot rectangle.

Because of the size, this is pickup only in the Ocala, FL
area. For transportation, it can easily be disassembled
into each beam by itself, and the boom, and then easily
carried on top of a minivan, or whatever.

Paper work and all hardware, coax phasing lines, etc.
are included for $200.

Thanks.

424. EBC 144 Jr, 2 m FM xcvr FS

Yahoo group: ham
Date: 2005-06-25 13:20:37 UTC
From: Ken Simpson, W8EK
Topic: 424 Message: 424

For Sale:

EBC 144 Jr., 2 meter FM transceiver

This Emergency Beacon Corporation 2 meter FM transceiver was considered to be the "Cadillac" of 2 meter rigs in the 1970 and 80's. It has two sets of thumbwheel switches for frequency selection, covering the entire 2 meter band. There are provisions for odd splits, although the rig automatically selects the correct offset for repeaters. Of course it can be used on simplex also. Scan provisions are included, along with a priority channel watch. The receiver sensitivity is exceptional. Power output is rated at 20 watts, and it uses real transistors, instead of a "module."

This particular unit works fine, and looks very, very good. Along with the regular paper work, an advertising brochure is included. These sold for about $500 in the 70's, so you know they were the real "Cadillac." $75 plus shipping from Florida.

Thanks.

425. AEA PK-88 Packet TNC FS

Yahoo group: ham
Date: 2005-07-04 23:12:05 UTC
From: Ken Simpson, W8EK
Topic: 425 Message: 425

For Sale:

AEA PK-88, with the mailbox.
Packet Terminal Node Controller
This unit is a hardware interface between your computer
and your rig. It has actual hardware, instead of using
computer software to generate and decode the signal.
Using the PK-88 is like using a real modem, as opposed
to a "WinModem" for internet access.
This one works fine. With manual for $ 50.

AEA "Wall cube" 12 V DC power supply at 1 amp.
It can be used with the PK-232, PK-88, or others. $ 20

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $12

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 426 Message: 426

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

It covers 2 m and 440 MHz FM.
I has about 25 Watts output, or 5 W in low power.
Of course there are memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically. Manual is included
for $130 plus shipping from Florida.

428. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: ham
Date: 2005-07-09 12:01:22 UTC
From: Ken Simpson, W8EK
Topic: 415 Message: 428

Larsen Mobile Antennas For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $14
Used, but in very good shape - $12
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip combination
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $18
Used, but nice shape - $16
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

Larsen LM-TLM
This trunk lip mount has a 5/16 inch stud and
takes the Larsen LM series of antennas. It is
in very, very good condition. With coax for $20

HyGain TLM
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Prices do not include shipping from Florida.

Thanks.

434. Antenna tuner FS

Yahoo group: ham
Date: 2005-07-16 16:00:22 UTC
From: Ken Simpson, W8EK
Topic: 56 Message: 434

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145

Other MFJ items For Sale:

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used
to power such things as keyers, lights on tuners, and
many other misc. applications. Of course it can power
many things other than MFJ items, but this one is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2005-07-23 17:35:40 UTC
From: Ken Simpson, W8EK
Topic: 436 Message: 436

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $100 plus shipping from Florida.

Thanks.

438. Hams needed for medical mission to Honduras !

Yahoo group: ham
Date: 2005-08-09 15:47:51 UTC
From: John Kirckof
Topic: 438 Message: 438

We need your help!
We are in need of ham radio operators to support several clinic teams. IHS (International Health Services) is sending a large medical mission group to Honduras from 10 Feb to 26 Feb, 2006. This year we plan to have medical clinics, eye glasses, dentists, and surgery teams.

We will send several different types of teams (around 100 people total) but typically we will need each clinic team to have a doctor, two nurses, pharmacist, dentist, dental helper, radio operator, engineer, translator, and several general helpers. Many folks go with their spouses or friends.

Our sign up is going on now for the next 4 to 6 weeks. We do this far in advance so we know who is going and then purchase all the food, supplies, and medications that each team will need and ship it all in a container to Honduras before the mission. We have done this for over 20 years so the plan works well.

So far we have had a good showing of volunteers from some professions but we are still in need of radio folks. It would be sad to see several impoverished villages have no team there to help them simply from the lack of having a radio guy to complete a team.

Contact me for an application form or for a super CD with many photos, stories, and Power Point presentations showing our work. We also have a tiny web sight with basic info at: www.IHSOFMN.org
You can go to: www.groups.yahoo.com/group/ihsradio/ and check out the PHOTO and/or FILES area, too.

Call me any time? I love to talk about the mission. I have gone 12 times and my wife has gone with me 10 times.
*** Phone: 320-634-4386

If you can, print out copies of this and give it to others or post it on bulletin boards.

440. TVI filters FS

Yahoo group: ham
Date: 2005-08-20 13:22:12 UTC
From: Ken Simpson, W8EK
Topic: 139 Message: 440

TVI filters For Sale:

Low Pass filters for the transmitter:

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

B & W 415 low pass filter
This is a very heavy duty filter. It is almost twice the size of
most 1500 Watt low pass filters. It appears to be an older
filter, in a copper enclosure that has been painted at the
factory. $30

B & W Low Pass filter
Designed for 75 ohm systems. Very heavy duty. $30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition, with paper work for $35.

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

441. Yaesu FT-747 GX, HF xcvr FS

Yahoo group: ham
Date: 2005-08-21 19:54:08 UTC
From: Ken Simpson, W8EK
Topic: 441 Message: 441

For Sale:

Yaesu FT-747 GX, HF transceiver

Covers 160 thru 10 meters, including the WARC bands,
with general coverage receiver. 100 Watt output, with a
nice amber LCD display. This rig is an all solid state
modern rig, but is easier to operate that most. A CW
filter is included. Two VFOs, plus memories are there
if you want to use them.

This particular unit looks like it just came out of the box,
and works the same. Both operator and service manuals
are included on a CD ROM. $300 plus shipping from Florida.

Thanks.

442. Desk microphones FS

Yahoo group: ham
Date: 2005-08-27 11:31:49 UTC
From: Ken Simpson, W8EK
Topic: 442 Message: 442

Desk Microphones For Sale:

Shure 450 desk microphone
This desk mic looks like a Shure 444, and functions
basically the same. There is a switch on the bottom
for high or low impedance, so it can be used with most
any rig. This one works fine and looks fine also. $50

Heath Desk Microphone
This is the brown Heath desk microphone that was
sold with the later Heath rigs, which is an HDP-121.
It has the black Heathkit label, and a PTT bar. The
actual stand is 100% OK, and is in almost perfect
condition. No scratches, dings, or even paint wear on
it. There is very slight wear on the Heathkit name
plate. The mic works great. $70

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone (above), but it does not have the Heath
name on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. It works fine. $65

Dynamic Desk Microphone
This microphone is still in its original box, and unused
as far as I can tell. It is 600 ohm impedance, and is
the "gooseneck" type mic. It looks very similar to the
Icom SM-6, although the head is just a bit bigger. It has
unidirectional pickup, so background noise is reduced.
In its original box, with paperwork, for $55.

Prices do not include shipping from Florida.

Thanks.

443. CW items FS

Yahoo group: ham
Date: 2005-08-27 13:42:42 UTC
From: Ken Simpson, W8EK
Topic: 443 Message: 443

CW items for sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the
ability to link the last two to make a larger memory. The
speed and the volume of the sidetone are controlled
from the front panel. It can be power by either 120 V AC
or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 40

Bencher BY-1 Paddle
Standard Bencher with black base, with chrome parts.
In very nice condition for $ 65.

Generic straight key
This is a generic CW straight key with a plastic
base. The key is nothing fancy, however, it is
mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $30.

"Knock off" J-38 key on nice base
This is one of the J-38 "clones". It really looks great
on a nice plexiglass base, complete with cable. $40

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

444. Roller inductor antenna tuner FS

Yahoo group: ham
Date: 2005-08-28 11:30:07 UTC
From: Ken Simpson, W8EK
Topic: 412 Message: 444

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145

Other MFJ items For Sale:

MFJ 285 speaker microphone
This speaker mic is the smaller "slim line", and
has the 2.5 mm and 3.5 mm plugs on it, so it fits
most Icom and Yaesu HTs that have the 2 plugs,
plus some others. It works fine and is in nice
shape. $17

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used
to power such things as keyers, lights on tuners, and
many other misc. applications. Of course it can power
many things other than MFJ items, but this one is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

445. Kenwood dual band xcvr FS

Yahoo group: ham
Date: 2005-09-03 13:50:56 UTC
From: Ken Simpson, W8EK
Topic: 445 Message: 445

For sale:

Kenwood TW-4000 dual band mobile FM transceiver

It covers 2 m and 440 MHz FM.
It has about 25 Watts output, or 5 W in low power.
Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine. Manual is included for $110 plus shipping from
Florida.

Thanks.

446. Coaxial antenna relay and antenna switches FS

Yahoo group: ham
Date: 2005-09-04 00:25:44 UTC
From: Ken Simpson, W8EK
Topic: 446 Message: 446

Coaxial antenna switches For Sale:

Dow Key type antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. It is not
DowKey, but functions the same. It seems slightly
heavier than a Dow Key. $35

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $25 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Goldline 2 position Coax Switch
Small rectangular box, with SO-239 connectors on the
end and the back. Rated at 1000 watts. $10

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 448 Message: 448

For Sale:

MFJ 422 B electronic keyer complete with Bencher Paddle

This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.

Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.

The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.

This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $110 plus
shipping from Florida.

Thanks.

449. HT accessories FS

Yahoo group: ham
Date: 2005-09-05 18:48:10 UTC
From: Ken Simpson, W8EK
Topic: 449 Message: 449

HT accessories For Sale:

These items fit the HTs that use a 2.5 mm and a
3.5 mm plug for the speaker mic, which is most HTs,
including Icom, Yaesu, Alinco, and some Kenwood.

Yaesu MH19A2B ear bud and mini-mic.
It works fine and looks fine. $ 18

Densei SM-505 Speaker microphone
Very nice condition for $ 18.

Yaesu Boom Microphone and single headset
It works fine. $ 18

MFJ 285 speaker microphone
"Slim" size. Nice shape. $ 18

Cable to connect audio to HT
This is a cable that has a 2.5 mm and a 3.5 mm plug
together in a molded plug. This fits most of the HTs
that take this sort of plug -- Icom, Yaesu, and many
others. The other end has bare wires. This would be
useful if you needed a cable to make your HT function
on packet, APRS, Echolink, or whatever.
It is in nice condition for $8.

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the sub-miniature types. It has not been used.
With paper work for $15.

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2005-09-06 12:07:05 UTC
From: Ken Simpson, W8EK
Topic: 450 Message: 450

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $100 plus shipping from Florida.

Thanks.

452. Wattmeters FS

Yahoo group: ham
Date: 2005-09-10 14:47:01 UTC
From: Ken Simpson, W8EK
Topic: 452 Message: 452

Wattmeters For Sale:

MFJ 815 B HF wattmeter
This wattmeter covers the entire HF bands, plus 6 meters
with coverage from 1.8 to 60 MHz. This means it is great
for some of the newer HF rigs where 6 meters is included.
It has a large 3 inch cross needle meter that reads
200/2000 Watts forward and 50/500 Watts reverse. It will
read either peak or average power.
This particular meter works fine, and looks great. The
manual is included, if one can call a single sheet of paper
a manual. $60

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it
covers the 6 and 2 meter bands. It is 200W or 20 W for
forward power, and 40 W or 4 W on reflected. It is in
very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

Prices do not include shipping from Florida.

Thanks.

453. Heath items FS

Yahoo group: ham
Date: 2005-09-11 18:00:37 UTC
From: Ken Simpson, W8EK
Topic: 453 Message: 453

Heath items For Sale:

Heath HDP-21 desk microphone
This is the older style with more chrome and no
brown on it, like was used with the earlier SB line
(SB-100, 101, 400, 401). Of course it can be used
any place a high impedance microphone is needed.
With paper work for $65.

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone, but it does not have the Heath name
on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. Works fine. $65

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to
500 ma. The voltage is variable down to about half a
volt. It has current limiting that is adjustable as well.
It is really a very versatile power supply. It is in the
Heath blue color scheme. This one works fine, looks
great, and includes paper work for $45.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

Kenwood HT accessories For Sale:

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Antenna adapter to fit the connector on the TH -
21 / 31 / 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $6

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

460. Larsen mobile antennas and mounts FS

Yahoo group: ham
Date: 2005-09-18 12:28:14 UTC
From: Ken Simpson, W8EK
Topic: 460 Message: 460

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

Need a repeater enclosure? Need a cabinet at the base of your tower for remote systems?

Rittal outdoor weatherproof equipment housing, "CS" series, BRAND NEW, double walled, cooling fans, battery heater, Joslyn Load Center with surge suppressors, 8 breakers, GFI outlet, battery compartment, rack mounting flanges, exterior connector for generator, etc., etc.

This cabinet is used for remote commercial repeaters, cell phone repeaters, etc., etc.

Has 3 doors for access to equipment, load center and battery compartment. Very secure locking system, eyes on top for lifting if need be... weighs about 200 lbs.

This unit has NEVER had any equipment installed in it... 36" wide x 48" high x 24" deep.

I have photos (setting in bed of my truck) that I can e-mail.

Will deliver locally in metro Atlanta otherwise, you come & I'll help you load it. Setting on pallet in my p/u truck!

Here is a link to the literature for this series of cabinet... this is a 5.5meg file!

http://www.rittal-corp.com/literature/download.cfm?id=51&action=view

Cost, if purchased from Rittal would blow your mind - but all I want is enough to buy a Yaesu FT-857D with remote mounting kit and ATS120 antenna.

Paul - K4BET

TenTec items for sale:

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks fine, and works the same.
With manual for $ 145.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on it, and either #12 or #14 wire,
and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

TenTec items For Sale:

TenTec 1202 combination HF and VHF wattmeter
This wattmeter will permit a ham to connect both an HF rig
and a VHF rig to the wattmeter at the same time. A switch
on the front of the meter selects whether HF or VHF is being
measured. HF covers 1.8 to 54 MHz, so it includes 6 meters
as well as HF. VHF is really the 2 meter band, covering 140
to 150 MHz. Full scale reading is 200 W or 20 W. It can be
powered from an internal 9 V battery, or from external 9 to
14 volts DC. Of course one can measure SWR as well as
forward and reflected power.
This particular unit looks very close to new. I can not find a
scratch on it. Of course it works fine also. Paper work is
included for $60.

TenTec 546 Omni D, series B, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters. This one also
includes transmit and receive on the 10 MHz band. Full
QSK on CW, and a fantastic receiver. Terrific audio
quality on SSB also. Built in audio CW filter. Digital
read out. This one is in very nice shape, both electrically
and cosmetically. With manual for $235.

TenTec 218, 1800 Hz crystal filter
This crystal filter is for the 9 MHz IF in TenTec rigs.
This includes the Omnis and Argosy, and maybe others.
It can also be used as a roofing filter in the Orion. It is in
good condition, and includes paper work with it for $69.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes speaker,
ammeter, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. It is good for 20
amps at 13 V DC, and includes over voltage protection.
This one looks fine, and works the same.
With manual for $ 135.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Has ammeter on front. Matches the Omni series, but of
course can be used with any rig needing a 20 amp
power supply, which includes most TenTec rigs. This unit
has the optional over voltage protection unit mounted
inside. It is in great condition, with manual for $ 110.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on both ends, and either #12 or #14
wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

Low Pass filters for the transmitter:

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer

blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

Keyers and other CW items For Sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the
ability to link the last two to make a larger memory. The
speed and the volume of the sidetone are controlled
from the front panel. It can be power by either 120 V AC
or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 B electronic keyer complete with Bencher Paddle
This is the keyer that uses the Curtis chip as the keyer,
includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.
Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.
The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.
This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $105.

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

469. Coax antenna switches FS

Yahoo group: ham
Date: 2005-10-22 11:31:49 UTC
From: Ken Simpson, W8EK
Topic: 350 Message: 469

Coaxial antenna switches For Sale:

Waters 335 Coax switch
This is basically the same as the B & W Model 375
coax switch, except the unused antennas are NOT
grounded. This will switch up to 6 antennas, with
SO-239 connectors, with the coax going out the back.
This one is good condition, and works fine. $ 40

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $22 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Prices do not include shipping from Florida.

Thanks.

TVI filters For Sale:

Low Pass filters for the transmitter:

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can

determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

474. 2 m and 440 MHz mobile antennas and antenna mounts FS

Yahoo group: ham
Date: 2005-11-12 13:35:59 UTC
From: Ken Simpson, W8EK
Topic: 474 Message: 474

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2005-11-13 12:33:27 UTC
From: Ken Simpson, W8EK
Topic: 453 Message: 476

Heath items For Sale:

Heath AM-2 SWR bridge
This unit was made to match the older transmitters such
as the DX-35 and DX-40. Everything is original. There
are a few scratches on it. It works fine. A schematic is
included for $18.

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to 500
ma. The voltage is variable down to about half a volt. It
has current limiting that is adjustable as well. It is really a
very versatile power supply. It is in the Heath blue color
scheme. This one works fine, looks great, and includes
paper work for $45.

Heath parts For Sale:

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units. It is
in nice shape, however, it has been painted black to
match Drake gear. It is no longer Heath Green. $12

Lever type knob used on many units of the SB line,
often to switch CW and SSB filters, or for loading
control. $10

Heath SSB Crystal Filter
This came from an SB-400, but it can be used in
any of the SB line. It is part number 404-200 and
is 2.1 KHz wide. $20

Mu Metal shield for 3 inch CRT
>From the SB-614, but the same one is used for
the SB-610, and other units. It should fit most
3 inch CRTs. $10

I still have a fair number of parts from an SB-614
monitor scope, including focus controls, position
controls, and the main circuit board. Please let
me know what you might need.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

For Sale:

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

Sylvania ECG - 1976 - 241 pages - $ 8

Sylvania ECG - 1979 - 352 pages - $10

EGC Industrial MRO - 1980 - 207 pages - $8

ECG Master Replacement Guide - 1987 -
700 pages - $12

NTE Technical Guide and Cross Reference
1988 - 604 pages - $10

480. Drake items FS

Yahoo group: ham
Date: 2005-11-24 13:48:54 UTC
From: Ken Simpson, W8EK
Topic: 480 Message: 480

Drake items For Sale:

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units. It is
in nice shape. It has been painted black to match
Drake gear. It is no longer Heath Green. $12

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. No model
number on it, but it looks close to new, and works fine. $30

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four pin
mic plug. This particular unit has been used, but is in
good shape and includes paper work. $ 40

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.

This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

481. Kenwood SP-820 and other Kenwood items FS

Yahoo group: ham
Date: 2005-12-11 01:35:03 UTC
From: Ken Simpson, W8EK
Topic: 481 Message: 481

Kenwood Items For Sale:

Kenwood SP-820 speaker with filters
This speaker will take an input from up to two rigs,
and has a built in filter in it. It can be set for low, high,
High 2, or combinations. If desired, the bandpass of
the speaker can be narrowed to about 500 to 1000 hz,
which means that it is in effect a CW filter. Of course
it can be broader, if desired.
Although this speaker was designed to physically match
the TS-820, it can be used any place an 8 ohm speaker
is desired. Electrically, it is the same as the SP-230,
SP-930, SP-950, and others with the filters built in.
This particular speaker is in excellent shape. It works
fine, and I can not find a scratch on it. $ 75

Kenwood MC-47 Hand Microphone
This is the microphone that came with the TS-50, but can
be used on other rigs.. It has a round 8 pin connector, has
up and down buttons, plus 4 "extra" buttons on the front.
This one works fine, and is very nice shape for $45.

Kenwood MB-13 mobile bracket
This is the "quick disconnect" mobile bracket used for the
TS-50 transceiver and also the AT-50 antenna tuner.
This one is in nice shape for $35.

Kenwood MC-30 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This is a noise canceling mic. It has a four pin
plug on it to match these rigs. Good shape for $35

Small hand mic that came with the Drake TR-72
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Kenwood SMC-25 speaker mic
Fits TR-2500 series of HTs, and maybe others. $20

Kenwood DC-21
This unit is used on the TH-21 / 31 / 41 series of HTs. It has
an adapter that slides on in place of the battery, plus a
conversion unit that plugs into the cigarette lighter on one end

and the battery adapter on the other. $25

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Kenwood full size 2 meter rubber duck antenna
BNC connector $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

482. Palomar R X noise bridge FS

Yahoo group: ham
Date: 2005-12-11 20:54:24 UTC
From: Ken Simpson, W8EK
Topic: 482 Message: 482

For Sale:

Palomar R - X Noise Bridge

This unit is used to find the resistance and reactance of
your antenna. It measures from 1 to 100 MHz, so it is
good for HF and six meter measurements, but not 2
meters. The resistive component will measure between
0 and 250 ohms, and reactance from 0 to 70 ohms. It
will also show if the reactance is inductive or capacitive.
You can also determine the length of feedline, and many
other things. It is powered by a 9 volt battery.

This particular unit works fine and appears to never
have been used. It is in its original box, and has the
paper work with it.

$50 plus shipping from Florida.

Thanks.

484. TVI filters FS

Yahoo group: ham
Date: 2005-12-17 16:26:07 UTC
From: Ken Simpson, W8EK
Topic: 139 Message: 484

Low Pass filters for the transmitter for sale:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $25

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,

as I would guess it must be 30 years old, but still works fine. Basically it is the same as the TV-1000-LP above, but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power. This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead. This filter is collectable, and is unused as best I can determine. It is still in its original box (not the newer blister pack), with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached.
$ 12

Date: 2005-12-31 14:44:30 UTC
From: Ken Simpson, W8EK
Topic: 485 Message: 485

Microphones with touchtone (DTMF) pad for sale:

Kenwood MC-53
This mic has the touchtone pad, but also has an additional
four buttons for tasks such as VFO or memory selection,
memory recall, calling a priority frequency, and a programmable
button, along with up and down buttons. It has the modular
connector similar to a LAN cable or phone line. This one
is in very nice shape, and works fine. $50

Icom HM-14
This mic has the 16 digit touchtone pad, but also has the
up and down switches. It has the round 8 pin connector,
and is in good shape, and works fine. $45

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone pad on it, plus a normal
low impedance microphone. Like new. $40

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone
pad to a lot of rigs in the 70s and 80s. Normal
hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug.
This particular unit has been used, but is in good
shape and includes paper work. $ 40

486. Wattmeters and SWR Bridges FS

Yahoo group: ham
Date: 2005-12-31 16:47:48 UTC
From: Ken Simpson, W8EK
Topic: 486 Message: 486

Wattmeters For Sale:

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridges For Sale:

Dual meter SWR Bridge:
Swan SWR-1
This unit has two meters on it. The meter on the left
reads forward power and the meter on the right reads
reflected power. It is in a heavy metal enclosure with
two SO-239 connectors. It works fine and looks great. $ 20

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

487. Coaxial antenna switches FS

Yahoo group: ham
Date: 2005-12-31 20:03:44 UTC
From: Ken Simpson, W8EK
Topic: 404 Message: 487

Coaxial antenna switches for sale:

B & W Model CS-6 G (595) coax switch
This is the switch that is in a rectangular box about 9 inches long, with seven SO-239 connectors coming out of the back. It will switch 6 antennas, grounding the antennas that are not in use. It works fine and is in good shape. $ 40

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel. It is in good condition and works fine. Mounting bracket is included for $ 30.

Waters (B&W) 335 coax switch
This is basically the same as the B & W Model 375 coax switch, except the unused antennas are NOT grounded. This will switch up to 6 antennas, has 7 SO-239 connectors, with the coax going out the back. This one is good condition, and works fine. $ 38

MFJ 1702, Two position Coax switch
Actually, the switch has 3 positions. One for each of the 2 antennas, and a third to ground both antennas. Constant impedance type design in heavy die cast enclosure for low loss, even into VHF and UHF frequencies. Like new. $20

2 position coax switch
These are a bit odd. They look close to what a Dow Key antenna relay looks like, but no relay coil to switch. It is a manual switch instead. There is a SO-239 connector at the top coming out of each side, with the common at the bottom. In the middle is a bar that slides back and forth to select the antenna. It is in a very rugged sealed metal box. Two switches available for $18 each.

B & W 551 A "Transfer" Coax Switch
This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors. It is still in its original box, with the original paper work, and appears unused. $45

Prices do not include shipping from Florida.

Thanks.

Topic: 490 Message: 490

Kenwood items for sale:

Kenwood MC-47 Hand Microphone
This is the microphone that came with the TS-50, but can
be used on other rigs.. It has a round 8 pin connector, has
up and down buttons, plus 4 "extra" buttons on the front.
This one works fine, and is very nice shape for $45.

Kenwood Extender feet
These are the extra feet that can be used on the front of
most Kenwood rigs to tilt the unit so that it is raised in the
front. They screw in to the standard feet. These are in
very nice shape. $15

Small hand mic that came with the Kenwood TR-7200
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Kenwood DC-1
This is the unit that slides on to the HT in place of a battery.
It permits one to operate off of 12 Volt DC, such as from a
car. It is used with the TH-75, TH-77, TH-25, TH-26 and
maybe others. Still in its original box with paper work, NOS $20

Kenwood PG-2 V
This is a cable that is used with many Kenwood HTs to charge,
operate off of 12 V DC, etc. Still sealed in its bag, NOS $ 12

Special Rubber Duck antennas for Kenwood TH-21 / 31 / 41
series HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $10
Kenwood regular, 6.6 inches long $10

Kenwood full size 2 meter rubber duck antenna
BNC connector $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Antenna adapter to fit the connector on the TH -
21 / 31 / 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

Drake items for sale:

Case for Drake TR-22 C
This is the black case that fits the Drake TR-22 C, and
has a pocket for the microphone, plus cutouts in the
back for antenna, power, etc. It is good shape, except
that the Drake Logo is not near as brilliant as it once
was. $12

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad
to a lot of rigs in the 70s and 80s. Normal hand mic
from the front, but had a touchtone pad on the back.
Four pin mic plug. This particular unit has been used,
but is in good shape and includes paper work. $ 40

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. No model
number on it, but it looks close to new, and works fine. $30

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units. It is
in nice shape. It has been painted black to match
Drake gear. It is no longer Heath Green. $12

I have a NOS 6JB6 available. I only have one, but that
may be enough to help someone. $20

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. If anyone has any
additional information on it, I would appreciate hearing. $30

Drake TV-300-HP high pass filter
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says

"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

492. Wattmeters and SWR Bridge FS

Yahoo group: ham
Date: 2006-02-04 12:58:47 UTC
From: Ken Simpson, W8EK
Topic: 492 Message: 492

Wattmeters and SWR Bridge For Sale:

Heath HM-102 wattmeter
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
is in nice shape, with no scratches. Paper work
included for $40.

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 493 Message: 493

Hand Microphones For Sale:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. $30

Heath hand microphone
This mic says "Heath" on the front of it. The most
important part is that it is high impedance, and that
it has the 2 pin Amphenol connector on it, as used
by the HW and SB lines, and most other Heath rigs.
To put it another way, it is ready to use by plugging
it in to your HW-100, SB-100, or whatever. It works
fine, although its original white color is somewhat
faded in some places. $ 30

ElectroVoice 210 E
Hi Z mic for the older rigs. It is in nice shape. $30

Kenwood MC-53
This mic has the touchtone pad, but also has an additional
four buttons for tasks such as VFO or memory selection,
memory recall, calling a priority frequency, and a programmable
button, along with up and down buttons. It has the modular
connector. This one is in very nice shape, and works fine. $50

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone pad on it, plus a normal
low impedance microphone. Like new. $40

Prices do not include shipping from Florida.

Thanks.

494. TenTec Triton IV HF xcvr and 228 antenna tuner FS

Yahoo group: ham
Date: 2006-02-04 17:13:46 UTC
From: Ken Simpson, W8EK
Topic: 494 Message: 494

TenTec items for sale:

TenTec Triton IV (Model 540) HF transceiver
Covers 80 thru 10 meters, but not the WARC bands.
Fully solid state, with approximately 100 Watts output power.
Of course it has the great QSK on CW that TenTec is famous
for, along with really great audio. This one is in good shape.
It works 100%. Cosmetically, it is very, very good. No
scratches that I can find. All original knobs, as well as the tilt
up front feet. With paper work for $ 190.

TenTec 228 antenna tuner, switch and SWR Bridge
This tuner is a 200 watt tuner that includes an antenna switch,
and SWR bridge. The tuner itself is the "T" type tuner with two
capacitors, and a 47 turn inductor, with taps at each turn. This
gives about the same flexibility as a roller inductor, without the
associated problems. The antenna switch will switch between
"Dummy Load", Antenna 1, 2, and 3. In other words it could
switch up to four antennas. A balun is also included. The meter
can be switched between forward and reflected power.
This unit works fine, and looks very nice. Paper work is
included for $100.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on both ends, and either #12 or #14
wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

495. Coaxial antenna switches FS

Yahoo group: ham
Date: 2006-02-12 14:09:16 UTC
From: Ken Simpson, W8EK
Topic: 404 Message: 495

Coaxial antenna switches for sale:

Waters (B & W) 336 "transfer" coax switch
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It has four SO-239
connectors. It is in nice shape. $40

Heath HD-1234 Coax Switch
Four position, with coax coming out like spokes of a
wheel. It does ground unused antennas, and also
has a switch position to ground all antennas. $ 25

Diawa CS-201 Coax Switch
Switches 2 antennas. Unused position IS grounded.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 22

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. $20

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 496 Message: 496

Audio Filter For Sale:

Autek QF-1 A Audio Filter
This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.
This particular unit looks very close to new, and works 100%.
With paper work for $ 50 plus shipping from Florida.

Thanks.

498. TenTec items FS

Yahoo group: ham
Date: 2006-02-18 22:11:53 UTC
From: Ken Simpson, W8EK
Topic: 86 Message: 498

TenTec items For Sale:

TenTec 546 Omni D, series C, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters, including the
10 MHz WARC band. Full QSK on CW, and a fantastic
receiver. Terrific audio quality on SSB also. Built in audio
CW filter. Digital read out. This one is in good shape,
but has some wear around the audio gain control. With
manual for $275.

25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. I am not positive if TenTec made this, or if it
is homebrew to look like TenTec. If it is homebrew, it
certainly is very professionally done. $120

TenTec 299 Voice synthesized frequency counter
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some slight wear, especially close to the button that is
Pushed to activate it. $ 190

WARC band crystal for 24.5 MHz for Omni C $20

TenTec 289 noise blanker for the Delta 580 transceiver
This very effective noise blanker can be added the 580 Delta

to help get rid of ignition noise, and is especially effective for mobile use. It is a rare item! $100

TenTec 225 power supply
This supply is made to match the Argosy transceiver. It supplies 13.8 volts at up to 9 amps. This one is in very nice shape. I can not find a scratch on it. Paper work included for $95.

Prices do not include shipping from Florida.

Thanks.

499. TVI filters FS

Yahoo group: ham
Date: 2006-02-19 13:49:12 UTC
From: Ken Simpson, W8EK
Topic: 139 Message: 499

Low Pass TVI filters For Sale:

B & W 425 low pass filter
B & W TVI filter, 52 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the older 425, which is much heavier, and has
the copper case. This one has just enough of the paint
coming off to show the copper case underneath.
With paper work for $ 30.

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz. $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

High Pass TVI filter for the TV set:
Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

From: Ken Simpson, W8EK
Topic: 508 Message: 508

AEA items For Sale:

AEA DL-1500 "dry" dummy load
This dummy load is rated to work from 1 to 650 MHz,
and handle up to 1500 watts. It has a derating curve
right on the load itself, so one can't loose it that way!
Since it will cover virtually all of the ham bands, it is
very useful.
This one has never had over 100 watts to it (well,
maybe 105 watts) as far as I can remember. It looks
very good as well. These sold for about $90 new.
This one is only $60.

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 18

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $10

Cable to connect AEA packet interface to computer
I think this cable was originally used with the AEA CP-1,
to interface it to a Commodore computer. One end has
the 5 pin plug on it that AEA uses. The other end has an
edge connector with 12 position on each side, although
only 6 of these are in use. It is in close to new condition. $10

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $140

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $95

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $60

Prices do not include shipping from Florida.

Thanks.

510. Hustler antennas FS

Yahoo group: ham
Date: 2006-03-26 20:44:31 UTC
From: Ken Simpson, W8EK
Topic: 510 Message: 510

Hustler HF mobile antennas for sale:

80 meter "Super" high power resonator RM-80 S
This is the "high power" resonator for 80 meters that
can be used mobile to give larger bandwidth, or can
also be used on top of a Hustler 4BTV to make it in
to a 5BTV vertical. Almost like new for $ 38

"Standard" Hustler resonators:
40 meter resonator RM-40, still in original packaging $22
20 meter resonator RM-20 $ 15
.......RM-20 still in the original packaging $20
15 meter resonator RM-15 $ 14

"Super" Hustler resonators (high power version):
80 meter RM-80 S $ 38
40 meter RM-40 S $ 25
20 meter RM-20 S $ 20
15 meter RM-15 S $ 18
10 meter RM-10 S $ 16

Hustler mobile mast:
MO-3 straight, 54 inch long standard length mast $ 20
MO-4 Short mast (22 inches) $15

Prices do not include shipping from Florida.

Thanks.

511. MFJ antenna tuner and other items FS

Yahoo group: ham
Date: 2006-04-01 11:49:03 UTC
From: Ken Simpson, W8EK
Topic: 511 Message: 511

For Sale:

MFJ 949 B antenna tuner

This antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. This unit has an SWR bridge built in,
along with a wattmeter that reads 300 W and 30 W full
scale. It also will handle two coax antennas, which can
be used direct, or thru the tuner. It also includes a balun
and separate antenna switch position for use with open
wire line. It has an internal dummy load that MFJ rates
at 300 Watts, but again, 100 W is the practical limit.

This particular unit works fine, and looks good, although
it does have scratches around the ground post on the rear,
plus a small barely visible scratch under the meter. $65

Tuning capacitors for MFJ tuners
These are exact replacement tuning capacitors as used
in the 949 antenna tuner. I think most of the MFJ antenna
tuners in the 300 watt class use the same capacitor. As
far as I know, these are unused. Two are available for $15 each.

Other MFJ items:

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the sub-miniature types. It has not been used.
With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

512. 20 meter dipole antenna with coax FS

Yahoo group: ham
Date: 2006-04-01 21:37:39 UTC
From: Ken Simpson, W8EK
Topic: 512 Message: 512

Dipole antenna for 20 meters for sale:

This is a standard 20 meter dipole (about 33 feet long),
complete with the heavy duty HyGain center insulator,
which is worth about $20 in itself, the wire making up
the dipole, and end insulators. Also included is about
50 feet of RG-58 coax cable, with a PL-259 attached
to the radio end. It is in good shape. $35 plus shipping
from Florida.

Thanks.

513. 2 meter base station antennas FS

Yahoo group: ham
Date: 2006-04-08 11:24:31 UTC
From: Ken Simpson, W8EK
Topic: 513 Message: 513

For Sale:

Antenna Engineering 6 element 2 meter beam
This is a relatively small 2 meter antenna on an 8 foot
boom. It is presently tuned for about 146.5 MHz. It is
in good shape for $50.

Cushcraft AR-2 Ringo Vertical Omni Directional Antenna
For 2 meters, although it can be tuned to cover commercial
frequencies either side of the amateur 2 meter band (about
130 to 170 MHz). It is rated to have 3.75 db gain.
This one is in very good shape. No weathering or corrosion
that I can find. Of course the paper work is included. $40

Shakespeare Model 4616 omni directional antenna,
suitable for use on a 2 meter repeater. This is equivalent
to a super station master. It is large -- about 22 feet long,
and very, very heavy duty. Gain is rated at 9 db, and it has
an internal choke. It has an "N" connector, but I also have
a 6 foot pigtail to go from the "N" connector to a SO-239.
This antenna is NEW. It has never been in the air, and
has been stored inside. Because of its size, this must be
pick up only in the Ocala, FL area, close to I-75. $ 250

Cushcraft 147-22 beam
This is a pair of 11 element 2 meter beams stacked to
give a total of 22 elements.
Each 11 element beam is about 12 feet long, and the
two are separated by a 5 foot boom. To put it another
way, the antenna occupies a 12 by 5 foot rectangle.
Because of the size, this is pickup only in the Ocala, FL
area. For transportation, it can easily be disassembled
into each beam by itself, and the boom, and then easily
carried on top of a minivan, pickup truck, or whatever.
Paper work and all hardware, coax phasing lines, etc.
are included for $200.

Prices do not include shipping from Florida.

Thanks.

Topic: 514 Message: 514

Magnetic and trunk lip antenna mounts for sale:

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter,
and black in color. Suitable for 2 meter, 440 MHz, or 6
meter antenna. Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
OM-450 - For 70 cm band - includes "stacked" whip for
5 db gain - Very good condition for $20

Prices do not include shipping from Florida.

Thanks.

516. Johnson microphone and phone patch FS

Yahoo group: ham
Date: 2006-04-29 11:28:58 UTC
From: Ken Simpson, W8EK
Topic: 516 Message: 516

For Sale:

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson and many others in that era.

Cosmetically, it is extremely good. Paint is nice and lettering close to perfect. There is a very minor scratch by the switch that switches between microphone and phone patch. $45

Johnson High Impedance hand microphone

This hand mic is dark gray in color, and has the Johnson Logo in the middle on the front, with Johnson written out toward the bottom of the front. It is a high Z crystal mic, like was used on most of the Johnson boat anchor rigs. Stripped leads on the end of the coiled cord. It has very good output, and looks nice as well. $30

Prices do not include shipping from Florida.

Thanks.

517. Several CW keys FS

Yahoo group: ham
Date: 2006-04-29 13:55:10 UTC
From: Ken Simpson, W8EK
Topic: 517 Message: 517

CW keys for sale:

Birnal Electric Manufacturing Co. solid brass key
This key has a rectangular base, similar to the Nye
Viking Speed-X 320-001, but somewhat larger, thicker,
and heavier duty. It is all brass, in every part, except for
the nice Navy Knob. The contacts are about 3/16 inches
in diameter, instead of just points as some keys have.
The action on this key is the finest I have ever used.
Really superb. Cosmetically, I have not cleaned it, as I
do not want to destroy the "patina" of the brass. It is in
nice, 100% working condition. $100

Speed-X chrome key with rectangular base
I can not find the Nye Viking model number for this one.
It looks like the Nye Viking 320-001, except it is chrome
plated, instead of black crinkle. It might be the 320C-003
as shown at http://www.goofus.org/kk4dw3.html#MASTER
except this one does not have a shorting switch. It is
similar to the key at the extreme right shown at
http://hedspeth.home.mindspring.com/cwkey.jpg except it
is chrome on both the base and mechanism. It has a nice
Navy knob, and very nice action. Being chrome plated, it
looks very nice. $75

Military J-38 key
This is the "standard" straight key that has been used by
the military for years and years. Shorting switch is included,
along with many adjustments, so it can suit your fist. The
black bakelite base is in good shape, as is the key itself.
Everything works fine for $38.

Speed-X Nye-Viking 310-003
The Speed-X 310-003 is the classic oval design (similar
to a J-38), in black crinkle. It has a shorting switch. It
looks really great, and of course works fine. $35

Generic straight key
This is a generic CW straight key with a plastic
base. The key is nothing fancy, however, it is
mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $30.

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is
a Japanese copy. It is brass colored, but is not real brass.

No shorting switch. It works fine and looks fine. $15

Other CW items:

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

MFJ 422 B-X electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

518. Human-buttons

Yahoo group: ham
Date: 2006-05-02 10:03:08 UTC
From: digitalnimb6@unhcr.umacr.net
Topic: 518 Message: 518

This campaign is about Human beings, Democracy, UNHCR, Refugees, The Iraqis, Islam, Kurds, Human rights, Respect, Money, Donations, Angelina Jolie, Pavarotti, Giorgio Armani, Donors, Peace, History, Campaigns and about you if you care about these words.

Hi there,

I am SAM, an Iraqi refugee living in Lebanon at the moment; I have spent the last 10 years of my life as a refugee registered with the UNHCR in Beirut. The last 4 years, I have spent as an activist for peace and human rights (especially refugees and asylum seekers) on the Internet; I'm also books author and ebooks publisher. I have launched many campaigns to improve our situation as refugees in Lebanon and hopefully bring more understanding to our problems worldwide. I helped make many changes and improvements at the UNHCR office in Beirut; I used the Internet as the field for my activities (you can read more about that in my free ebook 'MY CAMPAIGNS'). All my ebooks are free and could be download from my sites.

This is my newest campaign, it's about the illegal and humiliating actions of the UNHCR, who using photos of refugees as banners and human-buttons to collect money. This is an abuse of the dignity and humanity of the refugees and must stop immediately and a clear public apology present by The United Nations High Commissioner for Refugees. My friends, I am talking about the pictures you can see here:
http://www.net4free.org/Arts/unhcr-lebanon/human-buttons.htm

Also you can read my new campaign 'Urgent, we need smile' here:
http://lebanon.100free.com/email_me.htm

For more info about UNHCR and life of refugees you can read my free ebooks. I invite you as fellow humans and members of the world community to support my campaign by reading my article on my site and see the human-buttons. The campaign is to support and improve the UNHCR http://www.unhcr.org especially after the last scandals in the UN and UNHCR, just for example: http://www.mizzima.com/archives/news-in-2005/news-in-april/12-April05-22.htm

"We make demonstration and fast because the UNHCR office in Cairo did nothing for our problem..." http://news.bbc.co.uk/2/hi/africa/4440730.stm

Together we will build better world.

You could reach me fast via this form: http://lebanon.freeweb-hosting.org/email_me.htm
and if you like to know more about me, you can google for my name 'osam altaee'.

Thanks

519. HT speaker microphones FS

Yahoo group: ham
Date: 2006-05-06 11:27:55 UTC
From: Ken Simpson, W8EK
Topic: 501 Message: 519

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for most HTs
It says Densei SM-505 on it, but appears to be the same
as the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and
others that take the 2.5 mm and 3.5 mm connectors.
Very nice condition for $18.

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Santec SM-3 speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins,
as used on most Santec HTs, and many Wilson and
Yaesu HTs. $20

Santec ST-HA-1 boom mic / headset
Can be used with ST-144 and most other Santec HTs.
It uses the small 6 pin plug. Separate PTT switch will
mount on your belt, if desired. $22

Prices do not include shipping from Florida.

Thanks.

520. Wattmeter / SWR Bridges FS

Yahoo group: ham
Date: 2006-05-07 18:29:50 UTC
From: Ken Simpson, W8EK
Topic: 520 Message: 520

Wattmeter / SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works fine, and looks fine also. With paper work for $65.

Dual meter SWR Bridge:
Calrad 65-287 (same as Swan SWR-1 A)
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the ends. It covers all HF frequencies, plus six meters, and also 2 meters with reduced accuracy and power. It works fine and looks like new. Not a scratch on it. It even still has the protective caps on the coax connectors. $ 25

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $135

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

525. ITEMS FOR SALE - CLEANING OUT. MAKING PREPARATIONS FOR RETIREMENT

Yahoo group: ham
Date: 2006-05-15 01:23:35 UTC
From: Paul McInnish - Home
Topic: 525 Message: 525

List is 5 pages long... too long to list in an e-mail. If you would like to see the list, drop me a reply & I'll e-mail it as an attachment. I have it in Word or Adobe format... your choice.

This list is still "evolving", more items being added weekly... will re-post every 1-3 weeks as I add 'stuff' & 'stuff' is sold.

I am very serious... starting the 'down sizing process' to get ready for retirement in a few months.

If you are interested in any item and you think it is priced too high... heck, you ain't gonna hurt my feelings... make an offer!

Thanks!

Paul - K4BET

PS: Contact info is on the list.

Also, if you are looking for a nice larger home (4000 sq. ft.) in the metro Atlanta area & you have a small 2-3 BR low maintenance home WAY out of the Atlanta area (mountains, country, small town, with or without acreage, etc.) and it is paid for & want to trade your home for a healthy equity, contact me off line.

526. TenTec items FS

Yahoo group: ham
Date: 2006-05-20 12:18:50 UTC
From: Ken Simpson, W8EK
Topic: 86 Message: 526

TenTec Items For Sale:

TenTec Delta 580 HF transceiver
This transceiver will cover from 160 thru 10 meters with 100
Watts output. It has a nice red LED digital readout. Notch
filter is built in. Of course it has the CW QSK that TenTec is
famous for. It needs 13 V DC at about 20 amps to operate.
This particular Delta works 100%, and looks very good also.
The PTO has been rebuilt in the last couple years, so it works
really great. Original manual is included for $300.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some minor wear. $ 190

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. I am not positive if TenTec made this, or if it
is homebrew to look like TenTec. If it is homebrew, it
certainly is very professionally done. $150

Prices do not include shipping from Florida.

Thanks.

527. Heath items FS

Yahoo group: ham
Date: 2006-05-27 11:47:44 UTC
From: Ken Simpson, W8EK
Topic: 453 Message: 527

Heath items for sale:

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface to your sound card for PSK31, etc. It is in good
shape. Paper work included for $ 25.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 "Cantenna" Dummy Load
No check marks in book. $8

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Heath parts For Sale:

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102 and
HM-2102 wattmeters, and maybe other units. No scratches,
dents, or dings that I can find. $12

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: These parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

SB-400 meter switch - $5

Mu Metal shield for 3 inch CRT
>From the SB-614, but the same one is used for the SB-610,

and other units. It should fit most 3 inch CRTs. $10

I still have a few parts from an SB-614 monitor scope,
including focus controls, position controls, etc. I do NOT
have the power transformer or high voltage caps.
Please let me know what you might need.

Prices do not include shipping from Florida.

Thanks.

528. Wattmeter / SWR Bridges FS

Yahoo group: ham
Date: 2006-05-29 12:01:48 UTC
From: Ken Simpson, W8EK
Topic: 520 Message: 528

Wattmeter / SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works fine, and looks fine also. With paper work for $65.

Dual meter SWR Bridge:
Calrad 65-287 (same as Swan SWR-1 A)
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the ends. It covers all HF frequencies, plus six meters, and also 2 meters with reduced accuracy and power. It works fine and looks like new. Not a scratch on it. It even still has the protective caps on the coax connectors. $ 25

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 529 Message: 529

Phone patches For Sale:

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson and many others in that era.

Cosmetically, it is extremely good. Paint is nice and lettering close to perfect. The only scratch is a very, very minor scratch near the switch that switches between mic and phone patch. $45

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to your sound card for PSK31, etc. It is in very good shape. Paper work included for $ 25.

Prices do not include shipping from Florida.

Thanks.

Tubes and sockets For Sale:

Note: All tubes are NOS (New, but Old Stock),
unless listed otherwise.

Transmitting Tubes
2E26 - several available - $5 each
6360 - several available - $7 each
811 A - very good, used - US - $15
811 A - good used - China - $12

Rectifier tubes:
1B3 - $ 2
5U4 - $10
5V4 - $ 8
5Y3 - $ 9
866 Jr. - $18

Loctal tubes:
Several of each available.
7C7 - $ 5 each
7F7 - $ 8 each
7N7 - $ 9 each
7Q7 - $ 5 each

Amperite Ballast tubes: $8 each
Several of each available.
1H46
3 - 16
3 - 38
3 - 38 A

Regulator tubes: $5 each
Several of each available.
0 A 2
0 B 2
0 Z 4

Ceramic tube sockets for sale:

Ceramic Octal Sockets
These are NOS, and have mounting ears with a
captive 6-32 nut in the ear for mounting. There
are also 4 ground lugs around the perimeter - $6 each
Similar to above, but slightly used - $4 each
Used, without mounting ears - $3 each

Ceramic 5 pin socket - used - $3

Ceramic 7 pin socket, for tubes such as 6AU6, etc. - used - $1 each

Crystal sockets for HC-6 U crystals For Sale:

Ceramic crystal sockets for a single HC-6 U crystal.
Single #4 mounting screw. Six NOS available. $1 each

Phenolic strip for mounting eight HC-6 U crystals on
a single strip. $ 4

Prices do not include shipping from Florida.

Thanks.

531. VHF and UHF mobile antennas and mounts FS

Yahoo group: ham
Date: 2006-06-10 14:49:19 UTC
From: Ken Simpson, W8EK
Topic: 531 Message: 531

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna
(about 19 inches on 2 meters, but can be cut for 220 or 440
MHz). Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NLA-MM
Magnetic mount for use with Larsen NLA mount antennas, such
as the NLA-Q, NLA-150, and NLA-450. It includes coax with a
PL-259 connector, and is in good shape. $22

Larsen NMO-MM
Magnetic mount for use with MNO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 509 Message: 538

Astron power supplies For Sale:

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter is not
original. Of course it works fine. Cosmetically, I can not
find any scratches. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps.
It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2006-06-24 17:35:11 UTC
From: Ken Simpson, W8EK
Topic: 539 Message: 539

For Sale:

Preamp / Preselector for 40 thru 10 meters

This is a preamp / preselector using a dual gate MOSFET,
and requiring about 9 V DC to operate. It has a tuned
circuit in it that can select 40 thru 10 meters, and tune out
some of the "crud" from images, strong broadcast stations,
etc., as well as giving additional amplification for receivers that
have marginal gain, especially on the higher HF bands, such
as many of the older receivers. It is housed in a very nice
enclosure about 5 1/4 inches wide, 3 inches high, and 6
inches deep. The on-off switch will also bypass the unit,
when turned off.

It is in nice shape for $20 plus shipping from Florida.

Thanks.

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for most HTs
It says Densei SM-505 on it, but appears to be the same
as the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and
others that take the 2.5 mm and 3.5 mm connectors.
Very nice condition for $18.

Wilson speaker-microphone
The color matches the Mark II and Mark IV Wilson HTs, but
it can be used on others as well. Stripped and tinned leads.
It works fine, and looks very, very nice. $18

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Prices do not include shipping from Florida.

542. 2 meter crystals FS

Yahoo group: ham
Date: 2006-07-08 22:01:07 UTC
From: Ken Simpson, W8EK
Topic: 542 Message: 542

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter xtals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 xtals, like were used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig.

I also have 224.94 xmt for Midland 13-509 and most other xtal rigs

440 MHz for SBE-450, and maybe others:
444.20 receive
449.20 xmt

Crystals are $5 each, plus shipping from Florida.

I have special crystals that are used in the Kenwood TS-700
to give crystal control when needed (more stability than the VFO)
146.19
146.64
These are special cut crystals, so they are $10 each.

Thanks.

545. TenTec remote VFO and other items FS

Yahoo group: ham
Date: 2006-07-22 14:58:28 UTC
From: Ken Simpson, W8EK
Topic: 545 Message: 545

TenTec items for sale:

TenTec 243 remote VFO for Omni 545 and 546
This remote VFO is designed to operate with the early
Omni series to provide a second VFO for operating "split".
In addition to offering the normal split operations, it also
permits one to receive on two frequencies simultaneously.
Its styling matches the Omni, including the extruded ring
around the bezel.

This particular VFO looks like it just came out of the box
from TenTec. There is not a scratch, dent, ding, or wear
mark on it. It looks perfect. All bulbs work as well, and
the PTO is nice and smooth. Of course it operates fine
also.

Manual is included for $140.

Other TenTec items:

TenTec 217 narrow CW 500 hz Crystal Filter
It can be used in the Omni 546 (series B and C), Omni V, VI,
Argosy, or as roofing filters in the Orion I. It is for the 9 MHz IF.
Like new with paper work for $75.

TenTec 218 narrow SSB / wide CW filter
1800 Hz, for the 9 MHz IF. Will work in the older Omni
546 (series B and C), the newer Omnis in the 9 MHz IF,
and in the Argosy, and can also be used as a roofing
filter in the Orion I. Like new, with the paper work
for $75.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a

volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some very minor wear. $ 190 plus shipping from Florida.

Thanks.

Topic: 547 Message: 547

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have
PL-259 connectors on each end. Most are either 50 or 100
feet long. The coax is mainly Belden 8214, which is RG-8
low loss foam. Some lengths may be other equivalent brands.
All will be checked for loss before shipping, and will be within
10% of published specs (that is as close as I can check).

100 feet, with PL-259 on each end - $44

50 feet with PL-259 on each end - $ 24

Other lengths may be available, and I have a few with a PL-259
on only one end. Most of the shorter lengths are now gone, but I
do have a few left. Please let me know what you need, and I will
see what I can do.

Coaxial cable jumpers with N connectors

These jumper cables are made with solid (not foam)
dielectric RG-213 type cable, and were intended to be
used at the top of the tower to connect the antenna.

Two feet long, Male N to Female N. Female end has a
weatherproof rain boot. $8

Ten feet long, with Male N connector on each end. $10

Eight feet long, with Male N on one end, and an SO-239
connector on the other end, with rain boot. $12

Prices do not include shipping from Florida.

Thanks.

548. Ham rotors and accessories FS

Yahoo group: ham
Date: 2006-08-19 11:18:30 UTC
From: Ken Simpson, W8EK
Topic: 548 Message: 548

Ham Rotors and accessories For Sale:

Ham IV Rotor and Control Box
The Ham IV is rated for 15 square feet of antenna, up to a 40 foot boom, and has a newer, heavier duty brake. It has a turning power of 800 lbs and a brake power of 5000 pounds. There are 96 dual race ball bearings. It has the newer black control box. This one is in very nice shape, and includes all of the stainless steel hardware, along with the paper work. These go for about $550 new. Get this one for half price -- $275.

Ham III Rotor and Control Box
The Ham III is similar to the Ham IV, but an earlier version. It is for up to a 30 foot boom on the antenna. Other specs are similar to the Ham IV. The control box has a metal enclosure. This one is in good shape, with all of the stainless steel hardware, for $ 200.

Ham M Rotor and Control Box
The Ham M is a bit older than the Ham IV, but still a very healthy rotor. It is rated for up to a 24 foot boom antenna. This one is in good shape, but has had a couple modifications to the control box, to make it similar to the Ham II and Ham III control box. Two knobs have been added at the lower left and lower right, below the meter. One is an on-off switch, and the other is the calibration control, brought out to the front so one does not need to reach behind the control box, as was done originally. In addition, a zener diode has been added to stabilize the voltage for the position indicator. With paper work and stainless steel hardware for $185.

Ham M control box only
This is a series 4 control box only, and is in nice condition. Paper work is included for $70.

Lower mast support
Heavy duty type, made to go with the Ham IV. I do not think this one has been used, as it is still in the plastic. It includes all of The stainless steel hardware. New, these go for about $90. Get this one for $50.

Lower mast support
This is also the heavy duty type, as used on a Tail Twister rotor. It is heavier duty than the Ham IV lower mast bracket. This one has been used. It includes the clamps to clamp to the mast, and one stainless steel U bolt and hardware. One U bolt is

missing, but can easily be obtained locally. $45

Prices do not include shipping from Florida.

Thanks.

550. Astron power supplies FS

Yahoo group: ham
Date: 2006-08-30 12:51:16 UTC
From: Ken Simpson, W8EK
Topic: 509 Message: 550

Astron power supplies For Sale:

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

551. 2m and 440 MHz mobile antennas and mounts FS

Yahoo group: ham
Date: 2006-09-02 12:57:34 UTC
From: Ken Simpson, W8EK
Topic: 551 Message: 551

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NMO-MM
Magnetic mount for use with NMO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

552. TenTec 585 Paragon HF xcvr FS

Yahoo group: ham
Date: 2006-09-04 14:54:00 UTC
From: Ken Simpson, W8EK
Topic: 552 Message: 552

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, and includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to mw. This particular unit works
100% and looks fine also. Big inch thick manual is included.
TenTec sells these used for $795. This one is $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

Hand Microphones For Sale:

All work 100%, have coiled cords with stripped leads, and are low impedance (500 to 600 ohms) unless stated otherwise.

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a normal low impedance microphone. Like new. $40

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch. $35

Kenwood hand microphone
This mic originally came with the TR-7400. It is a nice small Kenwood hand mic. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Prices do not include shipping from Florida.

Thanks.

555. Preparing for retirement; Major downsizing For Sale list

Yahoo group: ham
Date: 2006-09-16 15:45:49 UTC
From: Paul McInnish - Home
Topic: 555 Message: 555

OK, some of you had seen my earlier list... of a few months ago... that sucker has grown to 13 pages! I know, some of you wanted the updated list & I promised to send it to you but in the interim, I have had some serious hospital stays and just did not have the drive or energy to update the list... pls accept my apologies!

The stuff that was sold or traded has been removed and tons of other stuff added... includes ham gear, antennas, tower, collectables, tools, misc. and so on and so on.

I am very serious about "down sizing"; have started the process to get myself retired, sell the house, buy a much, smaller one, etc. so I have got to rid myself of a lot of "stuff".

Entirely too much to list here (13 pages)... send me an e-mail, off line, with your e-mail address and I'll send you the list. Please specify which version you want... Word (doc) or Adobe PDF (the PDF is a much smaller file but looks exactly the same as the Word document).

This list is still "evolving", more items being added constantly... will re-post periodically as I add 'stuff' & 'stuff' is sold.

If you are interested in any item and you think it is priced too high... heck, you ain't gonna hurt my feelings... make an offer!

My detailed contact info is on the list.

Paul McInnish
K4BET
k4bet@...

PS: Also, if you are looking for a nice larger home (4000 sq. ft.; realtors call it a mid-level executive home) in the metro Atlanta area & you have a small 2-3 BR low maintenance home WAY out of the Atlanta area (mountains, country, small town, with or without acreage, etc.) and it is paid for & want to trade your home for a healthy equity, contact me off line.

Believe it or not... I am in the market for a few things... but very few! Please see the last pages of the list for the items I am looking for. BUT, it you have something that you think there is no way I can survive without it... heck, lets take a look see!

556. Misc Kenwood accessories FS

Yahoo group: ham
Date: 2006-09-16 21:46:26 UTC
From: Ken Simpson, W8EK
Topic: 556 Message: 556

For Sale:

Misc. small accessory items for Kenwood rigs

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Kenwood 2 meter BNC rubber duck, as originally furnished with
TR-2500 or TR-2600 HTs - $12

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

557. Many Misc Kenwood accessory items FS

Yahoo group: ham
Date: 2006-09-23 12:27:07 UTC
From: Ken Simpson, W8EK
Topic: 557 Message: 557

Many misc Kenwood accessory items for sale:

Kenwood MC-48, touch tone microphone
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector (TM-201, TM-211, TM-221,
TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440,
TS-570, TS-850, TS-870,TS-930, TS-940, TS-950,
TW-4000, etc.). Has UP and DOWN switches and PTT,
along with 16 digit touch tone pad. $ 50

Kenwood MC-46, touch tone microphone
Round, 6 pin connector, will go with any Kenwood rig
taking this kind of connector (TR-7600, TR-7730, TR-7800,
TR-7900, TR-8400, TR-9000, TR-9130,and others). Has
UP and DOWN switches and PTT, along with 16 digit
touch tone pad. $ 45

Kenwood MC-42 S hand microphone
This is the "standard" microphone that came with many
of the rigs such as the TS-430, TS-440, TS-930, and others
that take the round 8 pin mic connector that this one has
on it. It has "up" and "down" switches, as well as the
normal PTT switch. This particular MC-42 is in very nice
condition. $ 35

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood MA-4000 duplexer
Combines (or splits) 2 meter and 440 MHz signals into a
single coax cable. 2 m and 440 MHz connections are
about 8 inches of coax with a PL-259 on the end. The
common connection is an SO-239. In nice shape for $25.

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000

to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Service manual for Kenwood TW-4000 - $15

Operators manual for Kenwood TW-4000 - $15

Prices do not include shipping from Florida.

Thanks.

558. Kenwood TR-2400, 2 m HT FS

Yahoo group: ham
Date: 2006-09-30 11:43:35 UTC
From: Ken Simpson, W8EK
Topic: 558 Message: 558

For Sale:

Kenwood TR-2400, 2 meter FM HT

The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, etc. Compared
to some of the newer HTs, this one is very easy to operate.

This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine, although
one never knows when they may need to be replaced.
The LCD display is clear, with no defects.

The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.

Charger, rubber duck antenna, and paper work are included
for $60 plus shipping from Florida.

Thanks.

559. Vectronics VC-300 DLP antenna tuner FS

Yahoo group: ham
Date: 2006-09-30 11:51:05 UTC
From: Ken Simpson, W8EK
Topic: 559 Message: 559

For Sale:

Vectronics VC-300 DLP HF antenna tuner

This is NOT the Viewstar VS-300 antenna tuner, but is a much more sophisticated unit. The VC-300 DLP has a fairly large cross needle meter for reading both forward and reverse power simultaneously, and hence the SWR. It will read either average or peak power, with scales of 30 Watts and 300 Watts. In addition, a dummy load is included inside, as is a 4 to 1 balun. The meter can be back lighted if you apply 12 V DC. The tuner also has an antenna switch built in, that will switch between "tuned" and "straight thru" operation, in addition to various antennas. It will tune 160 thru 10 meters.

These units sell for about $170 new. This one is in extremely nice condition, both electrically and cosmetically. The manual is included for $135, plus shipping from Florida.

Thanks.

561. IHS still needs a couple radio operators for the Feb medical mission to Honduras

Yahoo group: ham
Date: 2006-10-06 13:15:59 UTC
From: John Kirckof
Topic: 561 Message: 561

We still need your help! I sent out a similar notice a while back and we have had 2 new hams sign up. However, we still need 2 or 3 more new guys to go on this important trip. If this seems right for you or you have questions, call me right away or reply directly to my e-mail address.

Mission Info: Right now IHS (International Health Services) is in dire need of radio operators, medical folks, Spanish translators, and others to go on a 2 week medical mission trip to Honduras. It is a large undertaking with about 10 teams planned to go at the same time for the 16 Feb to 4 March, 2007 trip. It will have medical and dental clinic teams plus several eye glasses and surgical teams planned. This means about 100 people will go counting all the support and worker people who go also (many spouses and friends go in this way). We have done this for 25 years so we have all the logistics planned out. This includes a container shipment to send supplies, meds, radio gear, and personal items ahead of time. We are a totally volunteer group but IHS does help cover some of the expenses in going.

The radio operator duties will vary some depending on the team they are giving radio support to. In all locations we will have HF voice capability with a check in net 2 or 3 times a day. Some of the 10 or so locations will also have 2 meter ops? often using a repeater. Also, many of the locations may have e-mail capability through the HF Winlink system. So, whatever your skill level, we likely can use you as a lead person on a team or a support person to help them and to do Engineer tasks. We will have a ?training? session in about early or mid December for those who what to brush up their skills on any of the above modes so we do not go unprepared. We (IHS) also do have some gear to help out in items that you may be lacking. We have a storage location in Honduras where we keep a lot of items such as antennas, generators, power supplies, etc.

How many teams of each type we will have totally depends on how many people sign up and what their profession is. We do the sign up early so that a small group can go to Honduras the end of October and line up the team locations based on who has signed up. We want to get applications by 1 October to do this so call me ASAP if interested. We have had a fairly good turn out so far for docs and nurses, and most medical folks. However, I only know of seven (of the ten or so needed) radio people signed up. Our purpose is to go to the poor remote locations of Honduras where there are no medical or dental services for the local people. It would be a sad thing if a team did not go to a very needy village simply because we lacked a radio person to complete a team.

FYI, our typical clinic team will have one or two docs, an RN and one other nurse or EMT, a pharmacist, a dentist (usually), one or two Spanish translators, an engineer, one or two radio operators, and several helpers. It is a well rounded team and this also helps when a spouse or friend wants to be on the same team (note our application has a place to note your desire to be on a team with some one else). A parent can take a MATURE son or daughter also if they are able to be a productive member of the team.

I have a CD plus a lot of other information I can pass on to you if you or someone you know has an interest in going! Also, there are several other IHS Directors who can answer more technical questions about the medical side of things, etc. So let me know if you have questions in that regard, as well. Note that the CD is also good for those signed up as it has a lot of photos & info about most of the sites we go to. This includes radio set up info from the past. There also is a web site with GENERAL info and applications at: www.IHSOFMN.org

Call me any time or write back. A call is best so I can fill you in on basic expenses and the variety of work conditions we encounter.

I and the needy of Honduras thank you for your interest in this very rewarding work!

Best regards,

John Kirckof

562. Icom R-71 A communications receiver FS

Yahoo group: ham
Date: 2006-10-07 15:51:45 UTC
From: Ken Simpson, W8EK
Topic: 562 Message: 562

For Sale:

Icom R-71 A communications receiver

The R-71 A is a deluxe communications receiver covering
100 KHz to 30 MHz. Of course it is all solid state, and has
a 6 digit digital read out. The power supply is built in. It has
a 10 key pad for entering frequency, if you do not want to use
the normal knob. There are 32 memories that can be scanned
if desired. It will also scan the entire band, and has wide and
narrow filters, Pass Band Tuning, and many other features.

This particular R-71 A works 100% and looks very close to
new. No scratches, dent, or dings.

Paper work and the original box are included for $350 plus
shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 563 Message: 563

Code practice oscillators for sale:

Nye Viking code practice oscillator
This includes the Nye 310-001 oval key on a nice base,
with a tone oscillator mounted on the same base. It is
powered by a 9 volt battery. Suggestion: Get the entire
code practice oscillator, then when you get your code
speed up, and need a nice key, remove the key from the
base (2 screws), and use it on the air.
This one works 100%, and looks really great. Not a scratch
on it. Just the key normally sells for $40 used, but get the
entire unit for only $50.

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with
adjustable volume and tone. It includes a straight key
on a nice base. Just like new. It operates from a 9 volt
battery. With paper work for $ 25.

Prices do not include shipping from Florida.

Thanks.

Phone patches for sale:

Kenwood PC-1 A phone patch.
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK. This particular
unit works fine, and looks fine also, with paperwork. $45.

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface for PSK31, etc. It is in very nice shape. I can
not find a scratch on it. Paper work included for $ 25.

Prices do not include shipping from Florida.

Thanks.

565. Heath SB-200 HF linear amplifier and other Heath items FS

Yahoo group: ham
Date: 2006-10-21 17:30:29 UTC
From: Ken Simpson, W8EK
Topic: 565 Message: 565

For Sale:

Heath SB-200 HF linear amplifier

The SB-200 uses a pair of 572B tubes, and operates on
80 thru 10 meters. It may be used on SSB, CW, or digital
modes.

This particular amplifier puts out about 750 watts on 20 meters,
and has been tested for operation on all bands. Info on power
output on each band is available.

Cosmetically, it is in extremely nice condition. I can not find a
scratch on the case, although there is some very slight wear
near the on-off switch. Paper work is included for $370.

Other Heath items:

Heath HM-102 HF wattmeter.
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has
a remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
is in very good shape. Paper work is included for $40.

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface for PSK31, etc. It is in very nice shape. I can
not find a scratch on it. Paper work included for $ 25.

Heath Parts:

Heath Knobs for SB line
These are the knobs used on most all of the SB line, and
are the size with the 1 1/8 inch skirt. They are close to perfect,
with no defects that I can find. Five available for $5 each.

Heath outer cabinet for SB-600, SB-610, SB-630, etc.
This is the outer cabinet that matches the SB line that is about
10 inches wide, and 10 1/2 inches deep, with the rounded
corners. This one is in very nice shape, with no scratches,
dents, or dings. $20

Heath "Riser" Feet for SB line
This is a set of four feet for the SB line. It includes the two

"riser" feet to raise the front, plus the two regular feet for the
back. Hardware, including the long screws, is included.
Original Heath. $15

Parts for any of the SB line
LMO dial hardware - This is the hardware that goes above
the LMO. It includes the black "background" and the white
dial pointer, along with the dial lights at each end, plus the
bracket that holds all of this together. Bulbs included. $8

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: Some of these parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

I still have a few parts from an SB-614 monitor scope,
including position and other controls. I do NOT have
the power transformer, high voltage caps, or chassis
parts. Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

567. MFJ switches and other misc items FS

Yahoo group: ham
Date: 2006-10-28 13:16:44 UTC
From: Ken Simpson, W8EK
Topic: 567 Message: 567

MFJ items for sale:

MFJ 1272 switches to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-232, or the Kantronics KAM, etc. The small box has
a socket to plug your microphone into on the front, along with a
switch to switch between mic or TNC. There are two cables
coming out of the back, with one going to the mic jack on your
rig, and other going to your TNC. There is also provisions for
receive audio in, and an external speaker. No power is required.
Inside the box is a series of jumpers, so that it can be configured
for any rig. Paper work is included that shows how to set the
jumpers for most of the common rigs (Kenwood, Yaesu, Icom,
Alinco, etc.).

I have three of these boxes available. All are in A-1 shape, and
work 100%. They are $30 each.

MFJ 1272 MX - Designed for the newer 8 pin RJ-45 mic
connectors (like on a computer network) and the AEA PK-232

MFJ 1272 BX - Designed for the round 8 pin microphone connector
and the AEA PK-232

MFJ 1272 BYV - Designed for the round 8 pin microphone connector
and the Kantronics TNCs (with DB-9 connector)

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery. Just like new, with paper
work for $ 25.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to
power such things as keyers, lights on tuners, and many
other misc. applications. Of course it can power many
things other than MFJ items, but this one is an actual MFJ. $10

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get
rid of TVI and harmonic interference. It is rated at 1500
Watts, even with a 2:1 SWR, and is in a very study black
metal case with SO-239 connectors on each end. Operating
frequency is listed as 1.5 to 30 MHz. It is a 50 ohm filter.
This one works fine, includes paper work, and looks very

close to new. These are $50 new, but you can have this one
for $35.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 568 Message: 568

CW keys for sale:

Military J-37 "Mae West" key with cord
This J-37 key is mounted on an "I" shaped bakelite board,
such that the approximate 8 foot long cord can be wrapped
around the middle of the key. This particular key looks as
perfect as can be. The only "defect" is the fact that some
of the knurled nuts are not as shinny as they were 60 years
ago. There is no paint missing. $50

Military J-37 "Leg Key"
This J-37 leg key has the hinge on it so that it can be used
on a regular table, or on the leg. The actual key is a Winslow
Tele-tronics, Inc., 64150. Although this seems hard to believe,
it looks very close to new. There are no defects. All paint
looks like new. $75

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the black
base, with chrome parts. It looks like new (no scratches or
blemishes of any sort), and works the same. $65

J-38 Japanese copy
This is not the real thing, but is a Japanese copy.
The metal is simply brass colored , but it does
have a shorting switch and ball bearings. $20

Prices do not include shipping from Florida.

Thanks.

569. Low Pass TVI filters FS

Yahoo group: ham
Date: 2006-11-04 13:42:58 UTC
From: Ken Simpson, W8EK
Topic: 407 Message: 569

Low Pass TVI filters For Sale:

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. These are $65 new; get
this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 25.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is

rated at 1500 Watts, even with a 2:1 SWR, and is in a very study black metal case with SO-239 connectors on each end. Operating frequency is listed as 1.5 to 30 MHz. It is a 50 ohm filter. This one works fine and looks very close to new. These are $50 new, but you can have this one for $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power. This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

570. TenTec Paragon HF xcvr FS

Yahoo group: ham
Date: 2006-11-11 12:35:47 UTC
From: Ken Simpson, W8EK
Topic: 570 Message: 570

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to mw. This particular unit works
100% and looks fine also. Big inch thick manual is included.
TenTec sells these used for $795. This one is $650.

TenTec 299 voice synthesized frequency read out/counter

This unit is used as a voice read out of operating frequency
with the TenTec Omni 545 or 546 series A, B, C, some
Argonauts, Corsair, and others. It will work with other rigs,
with minor mods to get the right connections.

The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. Volume control on
the front panel.

It can also be used as a frequency counter. Of course it can
be used to give a "voice digital readout" to a rig with an analog
dial.

This particular unit works 100%. Cosmetically it has slight
minor wear. $190

Prices do not include shipping from Florida.

Thanks.

571. Many Kenwood items FS

Yahoo group: ham
Date: 2006-11-11 15:10:58 UTC
From: Ken Simpson, W8EK
Topic: 571 Message: 571

Kenwood items For Sale:

Kenwood TH-225 HT for 2 meters
This HT includes DTMF touch tone pad, multiple memories,
scan, and sub-audible (PL) tone encode. Power output is
about 5 watts in high power, or .7 W in low. It will receive up
in to the weather frequencies (162 MHz). It includes the
Kenwood PB-12 high capacity 12 volt battery, which is in
good condition.
This particular unit works 100% and looks extremely nice.
Paper work is included, along with charger and rubber
duck antenna for $80

Kenwood TR-2400, 2 meter FM HT
The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, DTMF Touch tone
pad, etc. Compared to some of the newer HTs, this one
is very easy to operate.
This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine.
The LCD display is clear, with no defects.
The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.
Charger, rubber duck antenna, and paper work are included
for $60.

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.

This one is in its original box with paper work, hardware, etc.
$60

Kenwood SMC-25 speaker microphone
Fits TR-2500 HT and others. This one looks fine and works
fine. $20

Power cord for TR-9000, and other rigs that have the 2 pin
connector that looks a bit like a TV set cheater cord. It is
a rectangular connector about 1/2 inch long and 1/4 inch
wide, with a notch on one side. $8

Power cord for many of the newer 2 meter and 440 MHz rigs
that take the "T" 2 pin connector. This fits many rigs other
than Kenwood rigs. $12

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Service manual for Kenwood TW-4000 dual band transceiver - $15

Operators manual for Kenwood TW-4000 - $15

Prices do not include shipping from Florida.

Thanks.

573. Coaxial cable FS

Yahoo group: ham
Date: 2006-11-27 00:22:21 UTC
From: Ken Simpson, W8EK
Topic: 547 Message: 573

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have PL-259 connectors on each end. The coax is mainly Belden 8214, which is RG-8 low loss foam, slightly under 1/2 inch in diameter. Some lengths may be other equivalent brands.

All lengths over 25 feet will be checked for loss before shipping, and will be within 10% of published specs (that is as close as I can check). Lengths shorter than 25 feet are almost impossible to measure loss accurately, but they will be checked with an ohmmeter.

Lengths vary from a couple feet to about 100 feet. Although most have a PL-259 on each end, I have a few with a PL-259 on only one end, and some with no connectors. Please let me know what you need, and I will see what I can do.

Belden 8214 is presently selling for about $1.35 a foot in 500 foot coils. My price is basically 40 cents a foot, plus $2 per installed PL-259 connector.

Coaxial cable jumpers with N connectors

These jumper cables are made with solid (not foam) dielectric RG-213 type cable.

Two feet long, Male N to Female N. Female end has a weatherproof rain boot. $8

Two feet long, with Male N connector on each end, with rain boot. $10

Four feet long, with Male N on one end, and nothing on the other end. $5

Prices do not include shipping from Florida.

Thanks.

574. Batteries, gear and support vitally needed for Honduras mission

Yahoo group: ham
Date: 2006-11-29 15:38:53 UTC
From: John Kirckof
Topic: 574 Message: 574

Dear Hams,

This is an important appeal to all fellow hams. The radio crew of the International Health Services are in need of some equipment items very soon for their Feb. medical mission to Honduras. That mission will have about 10 teams in remote locations where the only contact with each other and the outside world is via our ham radio setup. You can see more about us at: www.IHSOFMN.org (see the NewsBreak newsletters) and radio info at: www.groups.yahoo.com/group/IHSradio/

Our most important need is for about 3 AGM or deep cycle 12 volt batteries. We have a repeater in Puerto Lempira and a voice net controller in LaCeiba, Honduras. Due to commercial power going out DAILY, we need to have a battery backup system to keep these two site on the air. Among other things, we provide important comm support for patient referrals from our medical clinic teams to our surgery team so we have to be on the air 24/7. We have the donated services of a small bush plane to make it happen, we just need to have our comm on line to keep it going.

If there is any way you can help us with batteries? We also need chargers and misc. HF antenna items. PLEASE contact me or an IHS ham ASAP. We are sending a container of supplies and gear from Minnesota in late December so we need to get these items or funding very soon.

Also note, we have a long term commitment to doing this mission so we are now eagerly seeking long term, individual or corporate sponsorship for this mission. This can be for ham radio support or for the medical part of the mission. There are several on the IHS Board of Directors that I can get you in contact with, depending on the nature of your support.

73s,

John Kirckof
KB0UUP
IHS Comm Co-Director

575. Coaxial antenna switches FS

Yahoo group: ham
Date: 2006-12-03 13:23:59 UTC
From: Ken Simpson, W8EK
Topic: 404 Message: 575

Coaxial antenna switches for sale:

B & W 595 coax switch
This one switches 5 antennas, and is in a rectangular box with all 6 SO-239 connectors coming out the back of the box. Unused antennas ARE grounded. It works fine. With paper work for $40

B & W ??? Coax switch
This coax switch will switch up to 5 antenna. It is round, and has six SO-239 connectors on the back, so the coax comes out the back in a large bundle. Unused connections are not grounded. Face plate is missing, and I do not remember the model number. It is in a round sealed can for excellent shielding, with a very large black knob. It is in great condition, for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors, with the coax coming out like spokes of a wheel. It is in good condition and works fine. $ 35

Heath HD-1234 coaxial switch
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. It works fine and looks fine also. With mounting bracket for $ 25.

HD-1234 coax switch
As above, but has an "N" connector instead of an SO-239 for the common input connector. The remaining connectors are SO-239. $25

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in a nice black rectangular box about 4 x 3 x 3 inches in size. Very nice condition. $25

B & W 591 A Coax "Transfer" Switch
This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors. It works fine and is in great shape for $ 35.

Prices do not include shipping from Florida.

Thanks.

576. ARRL Handbooks FS

Yahoo group: ham
Date: 2006-12-10 12:17:47 UTC
From: Ken Simpson, W8EK
Topic: 40 Message: 576

ARRL Handbooks for sale:

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed,
cover and spine are in great shape, and all pages are intact. $35

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $18

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover.
Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1988 - 65th edition - Hardbound
Like new, with a very slight yellowing of some pages. $20

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.

Thanks.

577. HT speaker mics and ear buds FS

Yahoo group: ham
Date: 2006-12-17 18:43:49 UTC
From: Ken Simpson, W8EK
Topic: 577 Message: 577

HT speaker microphones / ear buds For Sale:

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HT, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. It works fine and looks
good also. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Yaesu "Ear-Mic"
Fits Yaesu VX-1, VX-2, VX-5, VX-6, VX-7, and others
that take the 3.5 mm 4 conductor plug. It has a little
earphone, plus a built in microphone. There is a PTT
switch that can clip on. Works and looks like new. $20

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections, which fits most
HTs. It works fine and looks fine. $18

Kenwood SMC-24 speaker microphone
Fits the Kenwood TR-2400, and maybe others.
It works fine and looks fine. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

MFJ 287 speaker microphone
Small compact, efficient speaker mic that fits the
Kenwood TH-225 HT, plus many others that take
the 2.5 mm and 3.5 mm plug. This one works fine,
and looks like new. $18

Santec speaker microphone
It has the small round plug (about 3/8 inch)
with 6 pins, as used on most Santec HTs, and
many Wilson and Yaesu HTs. Works and looks
great.$20

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $20

Prices do not include shipping from Florida.

Thanks.

578. Heath items FS

Yahoo group: ham
Date: 2006-12-23 16:26:24 UTC
From: Ken Simpson, W8EK
Topic: 453 Message: 578

Heath items for sale:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter
works great, looks great and includes paper work for $ 40.

Heath HM-2102 VHF Wattmeter
As above, but cover has been painted black, and is no
longer Heath green on the top and sides. Front panel
is original. $ 40

Heath Amateur Radio Novice License Training Course
This is really great for nostalgia. Course includes study
material and code tapes to get up to 5 WPM.
All in a large 2 inch notebook. $15

Astatic 527 High Impedance hand microphone
This hand mic is Hi Z and has the 2 pin Amphenol connector
on it, as used by the Heath SB and HW line, Hallicrafters,
Johnson, and others. $30

Heath Parts:

Power cord for Heath HP-23 power supply
This is the cord that goes between the HP-23 power
supply, and the transceiver. It has an 11 pin connector
on each end, with the protective shells. This one is heavy
duty, using a size larger wire than most I have seen. It is
in nice shape for $20.

Meter from SB-630
This is the same size meter that is used on almost all of the
SB line, including the SB-100, 300, 400, etc. The scale on
this meter reads "VU" and "SWR", but the scale could be
changed with your present meter if you have one that is
burned out. The meter works fine, and it fine cosmetically
as well. $10

I have other SB-630 parts as well. Most of the chassis
parts are available, but no clock. Please let me know
what you need.

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: Some of these parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

579. Telescoping and Rubber Duck antennas for your HT FS

Yahoo group: ham
Date: 2006-12-30 14:37:09 UTC
From: Ken Simpson, W8EK
Topic: 579 Message: 579

For Sale:

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

Telescoping 1/4 wave whip
Telescopes to 5 inches long, and extends to full 19
inches. $10

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna. It has a very good SWR, and
really appreciable gain. $18

AEA "Hot Rod" as above for 440 MHz. $18

VoComm 5/8 wave gain telescoping antenna
4 + feet long when extended, but does have
considerable gain when you need it. $18

BNC stubby for 440 MHz - 3 inches long - $10

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

580. Icom HT and many accessories FS

Yahoo group: ham
Date: 2006-12-30 15:43:38 UTC
From: Ken Simpson, W8EK
Topic: 580 Message: 580

For Sale:

Icom IC-04 AT, 2 meter HT
The IC-04 AT covers the 440 MHz band.
It includes a DTMF touch tone pad, and subaudible (PL)
tones. Of course it has memories, scan, and all of the
normal bells and whistles. It transmits with about 5 Watts
in high power and about 1/2 watt in low power. It can be
powered with 13 V DC for about 5 W power output, or
used with various batteries for slightly lower power output.
This particular unit includes a good BP-8 battery, which is
standard power, but high capacity. It includes rubber duck
antenna, belt clip, and both operating and service manuals
on CD. $70

BP-8 battery pack
These are used on the Icom IC-2AT, 3 AT, 4 AT, 02AT,
03AT, 04AT, 32, and many other of the earlier Icom HTs.
It is the larger, heavy duty NiCad pack, and can be charged
with the BC-30 or BC-35 desk charger, a wall wart charger,
or 13 V DC.
This one is in very good shape. It holds a charge well,
seems to have full capacity, and looks great. $40

BP-7 Battery pack
This pack is used on the Icom IC-02AT, 03AT, 04AT, 32,
and many other of the earlier Icom HTs. It is the larger size,
heavy duty NiCad pack, that produces about 13 V DC, so
can give the HTs the same power output as if they were
plugged in to 13 V DC. It can be charged with the BC-30
or BC-35 desk charger, a wall wart charger, or 13 V DC.
This one is in very good shape. It holds a charge well,
seems to have full capacity, and looks great. $40

"Dead" BP-7 battery
This battery is basically dead, although you might be able to
get a bit more life from it. It is being sold so that you can put
a new "insert" in to it, to give a fresh battery. $12

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HT, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. It works fine and looks
good also. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; it will work fine with the Icom IC-2AT, 02 AT, other Icom HTs, Radio Shack HTs, plus many other HTs. $18

Yaesu MH19A2B ear bud and mini-mic.
I know it says Yaesu, but it has 2.5 mm and 3.5 mm connections, which works fine with the Icom HTs above. $18

Prices do not include shipping from Florida.

Thanks.

581. 2 meter power amplifier FS

Yahoo group: ham
Date: 2006-12-31 18:37:59 UTC
From: Ken Simpson, W8EK
Topic: 581 Message: 581

VoComm 2C 100 - 25 amplifier for 2 meters for sale:

This is an amplifer made to give you additional power on
2 meter FM. It will take a rig with about 25 Watts, and
produce an output of about 100 watts. Of course it is
completely solid state, and has automatic RF switching
built in. The frequency range is 140 to 150 MHz, with
the center frequency tuned for 146 MHz. It runs off of
13.6 V DC, and needs about 10 to 12 amps of current.

This particular amp works fine, and looks fine as well.

Paper work is included for $75 plus shipping from Florida.

Thanks.

582. Low Pass TVI Filters

Yahoo group: ham
Date: 2007-01-01 16:03:47 UTC
From: Ken Simpson, W8EK
Topic: 582 Message: 582

Low Pass TVI filters For Sale:

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end.
I have two of these available. One is a fairly new model and
is in nice condition for $25.
The second is a much older model that seems much heavier
duty. It weighs almost twice as much, and looks like it would
take more power. It likely was made in the days that plate
modulated AM was the rule. $35

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. These are $65 new; get
this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is
rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. These
are $50 new, but you can have this one for $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 583 Message: 583

MFJ items for sale:

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get rid of TVI and harmonic interference. It is rated at 1500 Watts. It is a 50 ohm filter. This one works fine, includes paper work, and looks very close to new. $35.

Cables to connect transceiver to TNC

MFJ 5024 - connects Icom, Yaesu, and other HTs that use the 3.5 mm and 2.5 mm plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as TNC-2s. This one is still in its original plastic bag, with paper work, for $12.

MFJ-5084 - connects most Icom radios that use the round 8 pin mic plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as the TNC-2s. With paper work for $12.

MFJ 287 speaker microphone
This was used on a Kenwood TH-225 HT, but will fit many others as well. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to power such things as keyers, lights on tuners, and many other misc. applications. Of course it can power many things other than MFJ items, but this one is an actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

584. TenTec HF xcvr FS

Yahoo group: ham
Date: 2007-01-13 22:42:35 UTC
From: Ken Simpson, W8EK
Topic: 584 Message: 584

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. It has an extremely
effective "Jones filter" to allow varying the passband,
and its location in the spectrum. It has up to 100 Watts
output, that can be adjusted down to milliwatts for QRP
use, if desired. This particular unit works 100% and looks
really great. Big inch thick manual is included. TenTec
sells these used for $795. This one is just as nice, but
is only $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

585. Radio theory, reference, and other books FS

Yahoo group: ham
Date: 2007-01-21 14:31:24 UTC
From: Ken Simpson, W8EK
Topic: 585 Message: 585

Radio Communications theory and reference books, antenna book, and VHF manuals for sale:

Radio Communication Handbook by Radio Society of Great Britain (RSGB) - Fifth edition - both Volume 1 and 2
Two hardback books. This is basically equivalent to the ARRL Handbook, but published by RSGB, with some ideas not found in the ARRL book.
These books are in close to new condition, complete with their dust covers. $20

Electronic Communication by Robert Shrader - 3rd edition
This text book is used in many community colleges, and is an exceptionally thorough, yet easy to understand book covering all aspects of communications, from Ohm's Law on up. 800 page hardback in close to new condition. $20

Modern Electronic Communication by Gary Miller
Similar to Shrader (above), but slightly more advanced.
578 page hardback. $18

Building and using Baluns and Ununs
Practical Designs for the Experimenter
By Jerry Sevick, W2FMI - 1996 - CQ Publishing
The title explains it all! Like new condition. $12

1974 ARRL Antenna book
13th edition of this classic antenna book includes chapters on antenna fundamentals, transmission lines, long wire antennas, multiband antennas, dipoles, and beams for HF and VHF/UHF, along with a lot of other information -- some of it not found in the newer antenna books.
This particular book is in very nice condition, with no torn pages, fading, etc. The covers are nice and are intact. $7

Six Meters - A Guide to the Magic Band
By Ken Neubeck, WB2AMU - 1998 by Worldradio Books
It covers most every aspect of 6 meters, and includes pictures of various 6 meter rigs, as well as a band chart.
Like new. $8

The VHF Amateur by Robert Brown, K2ZSQ/W9HBF
First Edition - 1968 by Editors and Engineers
A lot a information, including scjematics and details for

making rigs, and many antenna projects. $4

ARRL "FM and Repeaters for the Radio Amateur"
1972 - First Edition - $ 5

Ham Notebook Volume 1 by Jim Fisk, W1DTY
Many practical hints and projects published by Ham
Radio Magazine. $7

Prices do not include shipping from Florida.

Thanks.

586. Kenwood 2 m mobile, HT and many accessories FS

Yahoo group: ham
Date: 2007-01-27 14:39:57 UTC
From: Ken Simpson, W8EK
Topic: 586 Message: 586

Kenwood 2 meter rigs, plus other Kenwood accessories for sale:

Kenwood TM-241 A, 2 meter FM transceiver
This 2 meter FM rig will receive from about 138 to
174 MHz, while transmitting on the entire 2 meter
band. It has memories, as well as VFO and "Call"
channel, with scan, and the normal bells and whistles.
Subaudible tone (PL) encoder is built in.
Output power is up to about 50 Watts, or about 5 watts
in low power.
This particular unit works 100%, and looks fine as well.
It was used for packet so I no longer have the microphone
or mobile bracket for it. It includes the rig, power cord,
and paper work for $75.

Kenwood TR-2400, 2 meter FM HT
The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, DTMF Touch tone
pad, etc. Compared to some of the newer HTs, this one
is very easy to operate.
This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine.
The LCD display is clear, with no defects.
The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.
Charger, rubber duck antenna, and paper work are included
for $60.

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the older
Kenwood rigs - TS-120, TS-180, TS-520, TS-820, etc.
It has 50 K ohm impedance, and is a noise canceling
mic. It has a four pin plug on it to match these rigs, and
is in good shape for $35.

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion

and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Prices do not include shipping from Florida.

Thanks.

587. Hand microphones, HT speaker microphones and touchtone mics FS

Yahoo group: ham
Date: 2007-02-03 14:45:55 UTC
From: Ken Simpson, W8EK
Topic: 587 Message: 587

Hand microphones for sale:

All work 100%, and look very nice.

Touchtone (DTMF) mics

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad
to a lot of rigs in the 70s and 80s. Normal hand mic
from the front, but has a touchtone pad on the back.
Four pin mic plug. It is in good shape and includes
paper work. $ 40

KDK TM-2 touchtone microphone
12 digit DTMF pad on the front, with up and down switches
I think this came from a KDK 2033, but am fairly certain it
will work with all of the KDK rigs with a 6 pin mic plug,
which is on this microphone. $40

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touchtone microphone
With 8 pin plug wired for Kenwood. $40

Regular hand microphones for sale:

Yaesu hand microphone
I don't know the number on this one, but it is the microphone
that was used with the FT-101 series of HF transceivers. It
has a 4 pin connector on it, works fine, and looks extremely
good. $35

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $20

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

588. ARRL Handbooks FS

Yahoo group: ham
Date: 2007-02-17 13:22:20 UTC
From: Ken Simpson, W8EK
Topic: 40 Message: 588

ARRL Handbooks for sale:

Condition varies, and is described as accurately as possible.

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine is taped, and the cover is partially loose from the binding. This is a very good, usable handbook, but it is not collector quality. There are 150 pages of ads in the back, which show a lot of vintage equipment, tubes, parts, etc. $20

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed, cover and spine are in great shape, and all pages are intact. Collectable quality for sure. $35

1968 - 45th edition
Spine is taped, and cover is worn. It shows use, but all pages are intact and good. $10

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $15

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some pages have yellowed, and some have not. $ 14

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 14

1977 - 54th edition
Nice condition. Slight crease on cover $ 10

1978 - 55th edition
Extremely nice condition. $ 12

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover. Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.
Shipping via "Media Mail" is inexpensive.

Thanks.

589. HT Rubber duck and telescoping antennas FS

Yahoo group: ham
Date: 2007-02-17 14:15:05 UTC
From: Ken Simpson, W8EK
Topic: 589 Message: 589

For Sale:

Rubber Duck and telescoping antennas for your HT.

All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna for 440 MHz. It has a very good
SWR, and really appreciable gain. $18

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

590. Icom IC-229 H, 2 m FM xcvr FS

Yahoo group: ham
Date: 2007-03-03 13:06:16 UTC
From: Ken Simpson, W8EK
Topic: 590 Message: 590

Icom IC-229 H, 2 meter FM transceiver For Sale:

The IC-229 H has about 50 Watts output, down to about 5 W
in 4 steps, and a good receiver. Of course it has memories,
scan, and all sorts of bells and whistles, including a subaudible
tone (PL) encoder built in. It uses the same heavy duty power
cord with the 6 pin molex connector that is used on many HF rigs.

This particular unit works 100%, and looks really great. It was
used on packet, so no longer has a mic or mobile bracket with
it. The display lights are out. Both operating and service
manuals are included on CD. If you need a high power 2 meter
rig, this one would do the job for you.

$95 plus shipping from Florida.

Thanks.

591. TenTec HF xcvr and other TenTec gear FS

Yahoo group: ham
Date: 2007-03-10 20:09:07 UTC
From: Ken Simpson, W8EK
Topic: 591 Message: 591

TenTec items for sale:

TenTec 561 Corsair II, HF transceiver
Some people consider the Corsair II to be the best rig that
TenTec made, prior to the Orion. It is not a synthesized rig,
so phase noise is basically nonexistent. This means that it
has a really superb receiver that is far better than most of the
Japanese rigs. It covers 160 thru 10 meters, including the
WARC bands, and features such things as pass band tuning,
Jones filter, variable band pass filtering, notch filter, etc. A
keyer is built in for CW, and of course it has the great QSK
that TenTec is famous for.
This particular unit is about as nice as you will find. Electrically,
everything works 100%. It had the PTO rebuilt about a year ago.
It was back to the factory for a complete health check up about
a year ago as well. Cosmetically, it is close to perfect. There
is a very small scratch on the top near the plastic end trim. No
other scratches that I can find. Manual is included for $550.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

TenTec hand microphone
There is no model number on this mic, but I think it is a model
700 C; at least that is what the paper work says. It has the 4 pin
connector on it, works fine, and looks like new. $35

Prices do not include shipping from Florida.

Thanks.

592. Kenwood TM-G707 dual band xcvr and many other Kenwood items FS

Yahoo group: ham
Date: 2007-03-17 12:42:28 UTC
From: Ken Simpson, W8EK
Topic: 592 Message: 592

Kenwood TM G707 A dual band FM transceiver for sale:

The G707 is a very sophisticated dual band rig. It covers
both the 2 meter and 440 MHz bands (plus receives outside
the ham bands, so it is useful for weather frequencies, etc.),
and has three power levels, of about 50, 20, or 5 watts. It
has almost 200 memories, so you won't run out! Of course
subaudible tones, and scan features are included, as is a
cross band repeater (this means you can transmit on one
band and receive on the other at the same time). To put it
another way, this radio will do about anything one can think
of, and probably a whole lot more. It also features a very
large LCD display with a nice amber color back light. It is
also possible to separate the main unit from the "control
head" for remote mounting.

This particular rig has had almost no use. It is in its original
box, with manual, mobile bracket, microphone, power cord,
and even the little bag of screws and extra fuse that it came
with originally. There is not a scratch on the rig, and everything
works 100%. It is a really terrific rig! $195

Other Kenwood items:

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

Original Operators manual for Kenwood TR-2400 - $15

Accessory items for Kenwood TW-4000 For Sale:

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. With paper work, hardware,
etc. $55

Kenwood MC-48, touchtone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often
used on 2 m / 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs on 10 m
FM. It works fine and looks great also. $ 55

Original Operators manual for Kenwood TW-4000 $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert". $12

PB-21 H
As above, but heavy duty pack; needs insert. $14

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby $22

Prices do not include shipping from Florida.

Thanks.

593. Coaxial antenna switches FS

Yahoo group: ham
Date: 2007-03-17 16:58:42 UTC
From: Ken Simpson, W8EK
Topic: 404 Message: 593

Coaxial antenna switches for sale:

MFJ 1704 Coax Switch
This coax switch will switch 4 antennas, and also includes
a lightning protection "pill" in its heavy die cast housing. It
is very heavy duty, and features stripline construction for
good impedance matching at higher frequencies, and gives
50 db isolation, even up thru 500 MHz. Unused antennas
are grounded and a fifth position grounds all antennas.
This one works fine and looks like new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. Unused position IS grounded.
A third position grounds both antennas.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 20

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes of
a wheel. It works fine. $ 28.

B & W Model 550 A coax switch
As above, but includes a mounting bracket for $ 30.

B & W Model 55 A - 2
This is a 2 position coax switch, similar to the 550 A
(above), but only switches 2 antennas. The unused
position is not grounded. SO-239 connectors come
out like spokes of a wheel. It works fine and looks
fine also. $20

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in
a nice black rectangular box about 4 x 3 x 3 inches in
size. Very nice condition. $25

Pace 5621, 4 position Coax Switch
This is in a 4 x 3 x 2 rectangular box, with 4 switched SO-239
connectors. Unused positions are NOT grounded. It works
fine, but cosmetically is not as nice as some. $8

Prices do not include shipping from Florida.

Thanks.

594. Yaesu VX-2 compact dual band HT and accessories FS

Yahoo group: ham
Date: 2007-03-18 13:26:46 UTC
From: Ken Simpson, W8EK
Topic: 594 Message: 594

For Sale:

Yaesu VX-2 dual band HT
This is a very nice, small HT that will transmit on the 2 meter and 440 MHz bands, and receive almost "DC to light". Obviously there are a few holes in the DC to light receive coverage, but it will receive AM on the AM broadcast band, up thru 30 MHz (so it covers the short wave bands), 6 meters, aircraft, VHF and UHF TV bands, commercial FM band, and most everything else up to 999 MHz, with cell phone frequencies blocked. Transmit power can be up to 3 W, depending on power source. It is about 1.5 W with the internal Lithium Ion battery.

This HT also has lots of memories. It has 900 "standard" memories, 100 "Frequency skip memories", plus several other special types, for a total of something like 1200 memories. You will not run out of memories with this HT! Subaudible (PL) tones are included, as is several scan modes. This HT will do a lot, all in a very small package.

This particular unit is in very nice condition. I can not find a scratch on it, and all lettering is very nice, and LCD display is clear with no defects. Basically, it looks very close to new. Everything works 100%. I never received a belt clip with it, so it does not have one, but one is not needed, as it slips easily into your shirt pocket. Wrist strap is included.

It includes the rubber duck antenna, a good Lithium Ion battery, wall wart charger which charges the battery in about 2.5 hours, wrist strap, paper work, and of course the HT itself. $120

Accessory items for the VX-2:

Yaesu CSC-90 protective case - like new - $18

Yaesu FNB82LI - spare Lithium Ion battery pack
1000 mahr capacity. It holds a charge fine and works like new. $25

"Aftermarket" spare Lithium Ion battery pack
1000 mahr capacity. It also holds a charge fine and works like it was new. $15

"Aftermarket" desk charger
This permits one to charge a spare battery outside of the HT, while the HT is in use. It still takes about 2 hours to

charge a battery, but gives added flexibility. It includes a separate wall wart supply which plugs in to the desk charger. It works fine, and looks close to new. $20

Accessory for Yaesu VX-1 HT:

Yaesu FBA-20 "Battery case" for use with Yaesu VX-1 HT
This unit permits one to use a single AA battery (alkaline, NiCad, NiMH, or whatever) in the VX-1 HT. It has smart circuitry in it to increase the voltage to 3.8 V as required by the HT. It is idea for use as an emergency spare. This one has been tested, and then put back in to its blister package, so it is basically new. $18

Prices do not include shipping from Florida.

Thanks.

595. Kenwood TH-21 2 meter HT plus many accessories FS

Yahoo group: ham
Date: 2007-03-30 22:07:06 UTC
From: Ken Simpson, W8EK
Topic: 595 Message: 595

For Sale:

Kenwood TH-21 AT, 2 meter HT

Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. The + or - offset is selected by a switch on the back, as is high and low power. It is very easy to use, and has about 2 W output in high power and 1/2 W in low power. Touch tone (DTMF) pad is on the front.

This one is in good condition. It includes rubber duck antenna, good PB-21 H high capacity battery (about 3 times the capacity of a standard PB-21 pack), charge cord, and manual for $40.

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood DC-21 DC adapter
Converts 13 V DC to 7.2 V DC that can be used by the HT. It includes an adapter pack that slides on to the HT and the actual converter unit that plugs into a cigarette lighter. It works fine. Paper work is included for $22.

Kenwood BT-2 "empty" battery pack
This is the "shell" battery pack that will take six AAA cells. You can fill it with alkalines, NiCads, or whatever. It is almost like new. $25

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

PB-21 H
As above, but heavy duty pack; needs insert.
Includes paper work for $14.

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Special Rubber Duck antennas for Kenwood TH-21 series 2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10

Kenwood RA-6 regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby $22

Prices do not include shipping from Florida.

Thanks.

598. Mounted CW key and cables FS

Yahoo group: ham
Date: 2007-04-21 17:32:59 UTC
From: Ken Simpson, W8EK
Topic: 598 Message: 598

CW key for sale:

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is real Oak, and not particle board that has been covered. The Oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table. It really looks extremely nice. $55

Other CW items:

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

599. Larsen 2m and 440 MHz mobile antennas FS

Yahoo group: ham
Date: 2007-04-21 20:54:38 UTC
From: Ken Simpson, W8EK
Topic: 599 Message: 599

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $11
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

600. CW keyer, paddles, and other items FS

Yahoo group: ham
Date: 2007-04-28 17:53:04 UTC
From: Ken Simpson, W8EK
Topic: 600 Message: 600

CW items for sale:

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%. With paper work for $45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It looks like new
(no scratches or blemishes of any sort), and works
the same. $65

MFJ 564 B Iambic Paddle
This is MFJ's "clone" on the Bencher BY-1. It has the
black base with chrome parts, works great, and looks
like new. $45

Buy either Iambic Paddle with the 422 keyer, and take $5 off.

Mounted straight key
This is a clone of a J-38 straight key complete with ball
bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is
real Oak, and not particle board that has been covered.
The Oak has been finished, and has a bevel around the
sides of it on the top. The bottom is finished, and has
rubber feet to prevent it from walking across the table.
It looks extremely nice. $55

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

601. Microphones FS - several different types

Yahoo group: ham
Date: 2007-05-05 16:20:58 UTC
From: Ken Simpson, W8EK
Topic: 601 Message: 601

Microphones for sale:

All work 100% and look very nice unless stated otherwise.

Touchtone (DTMF) mics

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Regular hand microphones:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:
All work 100% and look fine also.

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.

It has a 2.5 mm and 3.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

602. Antenna rotor control boxes FS

Yahoo group: ham
Date: 2007-05-05 19:27:43 UTC
From: Ken Simpson, W8EK
Topic: 602 Message: 602

For Sale:

Rotor control box for CDE TR-44

This control box looks just like the one designed for the
Ham M rotor (black squarish box, with large meter in the
middle, and control lever at the bottom), but is made for
the TR-44 lighter duty rotor. This is the control box that
uses only 7 wires, since it has no electrical brake.

This particular control box works fine, and looks very nice.

Paper work is included for $45

Control Box for 8 wire CDE and HyGain "Ham" rotors:

This is the control box only that can be used on any of the 8 wire
Ham M, Ham II, Ham III, Ham IV, Ham V, or Tailtwister rotors. It
can also be used on the smaller CD-44, etc. This particular box
is the one with the meter on the left, and three buttons on the right
for rotor control. It has a metallic colored front panel with a light
goldish or bronze cast to it. The top of the box is black, and the
bottom is off white.

This particular control box works fine, and looks fine as well.

Paper work is included for $75

Prices do not include shipping from Florida.

Thanks.

603. ARRL Handbooks and many other ham publications

Yahoo group: ham
Date: 2007-05-12 13:06:33 UTC
From: Ken Simpson, W8EK
Topic: 603 Message: 603

Many Ham Publications For Sale:

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They are vintage, and contain tube tables and other
vintage information not in the newer handbooks.

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine
is taped, and the cover is partially loose from the binding. This is
a very good, usable handbook, but it is not collector quality. There
are 150 pages of ads in the back, which show a lot of vintage
equipment, tubes, parts, etc. $20

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

Other publications:

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $11

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $11

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL Operating an Amateur Radio Station
1983 - 61st edition - $3

FCC "Interference Handbook"
1986 edition - $4

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new - $10

ARRL Public Service Communications
1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 8

FCC "Interference Handbook"
1986 edition - $4

Nostalgic ham licensing materials for sale:
All books are in very good, or better, condition.

General Class Amateur License Study Guide
By W0XI; published by Sams
First Edition - 1979 - $ 3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $ 3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

ARRL License Manuals
1979 - 77th edition - $3
1984 - 79th edition - $3
1984 - 80th edition - $3
Technician - 1989 - First edition - $3
General - 1989 - First edition - $3
General - 1997 - Second edition - $6
Advanced - 1985 - First edition - $3
Extra - 1988 - Third edition - $3

ARRL Technician Class Exam course
1993 - First Edition - $5

1981 Foreign Callbook - Good condition - $ 4

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

RCA SK Series - Spring 1972 - 96 pages - $9

Semiconductors by GE - 1974 - 74 pages - $ 5

Sylvania ECG - 1976 - 241 pages - $ 7

Sylvania ECG - 1979 - 352 pages - $9

EGC Industrial MRO - 1980 - 207 pages - $7

RCA SK series - 1981 - 409 pages - $9

ECG Master Replacement Guide - 1987 -
700 pages - $11

NTE Technical Guide and Cross Reference
1988 - 604 pages - $9

Archer Semiconductor Reference Guide
1988 - 290 pages - $6

The following Texas Instrument Data Books are available.

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

Prices do not include shipping from Florida.
"Media Mail" is inexpensive.

Thanks.

604. Low Pass TVI filters FS

Yahoo group: ham
Date: 2007-05-19 19:44:18 UTC
From: Ken Simpson, W8EK
Topic: 407 Message: 604

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

605. AEA PK-232 MBX and other AEA items FS

Yahoo group: ham
Date: 2007-06-15 22:00:47 UTC
From: Ken Simpson, W8EK
Topic: 605 Message: 605

AEA items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. This is a late one with the multi-colored
LEDs, and newer circuit board. I think it has the latest
firmware, as it includes Pactor in it. It works fine, and
looks very close to new. The large, inch plus thick
manual is included for $120.

AEA AC-4 "Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 18

Cable to connect AEA packet interface to computer
Originally used with the AEA CP-1, to interface it to a
Commodore computer. One end has the 5 pin plug on
it that AEA uses. The other end has an edge connector
with 12 positions on each side. It is in close to new
condition. $10

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

606. Wattmeters / SWR Bridges FS

Yahoo group: ham
Date: 2007-06-16 13:18:15 UTC
From: Ken Simpson, W8EK
Topic: 606 Message: 606

Wattmeters / SWR Bridges For Sale:

All have SO-239 connectors and are designed for 50 ohm systems.

Diawa CN-101 L cross needle wattmeter
It covers from 160 thru 2 meters, so band coverage is more
than many of them. It also reads either peak or average power,
switch selected. It has 3 scales of 15, 150, or 1500 watts. Of
course it reads SWR at the same time, since it has a cross
needle meter. It can be back lighted, if you apply 12 V to it.
This one works 100%, and looks like it just came out of the
box. Of course paper work is included. $80

This HF wattmeter will read either average or peak power.
Full scale readings are 20, 200, and 2000 watts. Of course
it will also read SWR.
It works fine, and looks close to new, with no scratches or
blemishes. $40

Micronta 21-520 A HF wattmeter with large dual meters
LARGE dual meters read both forward and reflected power.
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can
be used with any HF transmitter. It is about 8 inches
wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in very good shape. The front panel
has no defects, but there are a few small scratches on
the top and sides. Paper work is included for $20.

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

607. Antenna Baluns FS

Yahoo group: ham
Date: 2007-06-17 13:16:13 UTC
From: Ken Simpson, W8EK
Topic: 400 Message: 607

Antenna Baluns For Sale:

A balun is made to convert the unbalanced coaxial
cable to a balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer.
They will handle full legal power.

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it
to hang a dipole or inverted V, or a U-bolt can be added to
attach it to the boom of an HF beam antenna.
This particular balun is in nice shape.
It includes the paper work for $40.

Hi Q VanGorden Balun
This one is used primarily as a center insulator for a dipole
antenna. It has an eye to hang it.
Good condition for $15.

Prices do not include shipping from Florida.

Thanks.

609. CW Keyers, keys, and cables FS

Yahoo group: ham
Date: 2007-06-23 11:50:29 UTC
From: Ken Simpson, W8EK
Topic: 609 Message: 609

CW items for sale:

MFJ 492 Menu Keyer
This can function as a normal CW keyer, but it is so much more. It has multiple memories that can be linked. It also has special "serial number" provisions for automatically incrementing the number on each QSO. Many different functions can be changed from the CW key, or from the menu functions on the front panel. This keyer is ideal for a contester, but can be used by anyone. It is quite intuitive to use. This one works 100%, and looks very close to new. With paper work for $75.

MJF 484 "Grandmaster" keyer
This keyer has four memories that may be linked, or used separately. Front panel controls include speed, weight, tone, volume, delay, and memory select, all in a nice egg shell and wood grain case. With paper work for $60.

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of oak wood. This is real oak, and not particle board that has been covered. The oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table. It looks extremely nice. $55

LaPine straight key
This a relatively generic straight key on an aluminum base. Nothing fancy, but it works fine, and looks fine as well. $12

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

610. Low Pass TVI filters FS

Yahoo group: ham
Date: 2007-07-03 21:17:00 UTC
From: Ken Simpson, W8EK
Topic: 407 Message: 610

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.
All filters have an SO-239 connector for input and output, and are
designed for 50 ohm systems.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power, and has at least 80 db signal attenuation at
TV channel 2. It is also in a very sturdy metal case
with SO-239 connectors on each end, and is a 50
ohm filter.
This one works great, looks close to new, and is in
its original box for only $60.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

611. Antenna tuner, wattmeter, coax switch and dummy load in one box FS

Yahoo group: ham
Date: 2007-07-14 12:36:00 UTC
From: Ken Simpson, W8EK
Topic: 611 Message: 611

For Sale:

Vectronics VC-300 DLP HF antenna tuner, peak reading
wattmeter, coax switch and dummy load, all in one box

The VC-300 DLP has a fairly large cross needle meter
for reading both forward and reverse power simultaneously,
and hence the SWR. It will read either average or peak
power, with scales of 30 Watts and 300 Watts. In addition,
a dummy load is included inside, as is a 4 to 1 balun. The
meter can be back lighted if you apply 12 V DC. The tuner
also has an antenna switch built in, that will switch between
"tuned" and "straight thru" operation, in addition to various
antennas. It will tune 160 thru 10 meters. To put it another
way, this tuner will do everything!

This one is in extremely nice condition, both electrically
and cosmetically. The manual is included for $135, plus
shipping from Florida.

Thanks.

612. Kenwood Dual Band FM Transceiver FS

Yahoo group: ham
Date: 2007-07-21 14:07:09 UTC
From: Ken Simpson, W8EK
Topic: 612 Message: 612

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

614. Various hand microphones FS

Yahoo group: ham
Date: 2007-08-04 20:49:56 UTC
From: Ken Simpson, W8EK
Topic: 614 Message: 614

Regular hand microphones For Sale:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Touchtone (DTMF) microphones:

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

HT speaker microphones:

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 617 Message: 617

Radio Communications theory and reference books for sale:

Modern Electronic Communication by Gary Miller
This text book is used in many community colleges, and is an
exceptionally thorough, yet easy to understand book covering all
aspects of communications, from Ohm's Law on up.
Hardback in very nice condition. $18

ARRL "Single Sideband for the Radio Amateur"
1970 - Fifth edition - like new - $10

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $10

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new $10

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
The small format handbooks include tube charts
and tube data, plus vintage advertisements.

1969 - 46th edition
Cover is loose, but is there. All pages are intact, and all
data present. $10

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. $12

1973 - 50th edition
Very nice condition throughout. $13

1977 - 54th edition
Good condition. $10

1978 - 55th edition
Extremely nice condition. $13

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Nice shape. $14

1982 - 59th edition
Good condition. $12

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition. $18

1993 - 70th edition - Hardbound
Like new. $ 20

1981 Foreign Callbook
Very nice condition, with only slight wear. Back cover
features the Kenwood TS-830 and accessories. $5

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 618 Message: 618

Heath HN-31 "Cantenna" RF Dummy Load For Sale:

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is about 54 ohms, so obviously
it is not fried, and well within tolerance for a good match to 52
ohms. The cantenna itself is in extremely nice shape.

Paper work included for $40 plus shipping from Florida.

Thanks.

619. Rubber duck antennas for your HT FS

Yahoo group: ham
Date: 2007-09-08 11:55:53 UTC
From: Ken Simpson, W8EK
Topic: 619 Message: 619

For Sale:

Rubber Duck antennas for your HT.
All are for 2 meters and are in good condition, unless
stated otherwise.

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long, with BNC Connector. $14

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Larsen HQ "Kul Duck" gain antenna for 220 MHz
BNC connector. This antenna is supposed to have about
3 db gain over a "normal" rubber duck.
It is for 220 MHz and is about 8 inches long. $15

BNC stubby for 440 MHz - 3 inches long - $10

BNC Antenna cut for 27.1 MHz
About 10 inches long. $12

Prices do not include shipping from Florida.

Thanks.

620. 2m and 440 MHz mobile antennas and mounts FS

Yahoo group: ham
Date: 2007-09-10 16:31:54 UTC
From: Ken Simpson, W8EK
Topic: 551 Message: 620

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $9
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $12

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 623 Message: 623

Active Audio Filter For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very close to new, and works 100%.

With paper work for $ 55 plus shipping from Florida.

Thanks.

624. Santec ST-144, 2 meter HT and accessories FS

Yahoo group: ham
Date: 2007-10-20 12:36:47 UTC
From: Ken Simpson, W8EK
Topic: 624 Message: 624

For Sale:

Santec ST-144, 2 meter HT
This full featured 2 meter HT is capable of about 4 Watts,
1 Watt, or 0.1 W power output with a 3 position switch. It
covers the full 2 meter band in 5 KHz steps, like most
modern HTs. It also features a built in digital clock.

This particular unit also includes a PL encoder (which was
an optional extra), so you can access those repeaters
requiring subaudible tone. This one works 100% and
looks very, very nice. Its battery works, but is not holding
a charge for a long length of time. Of course it includes
a rubber duck antenna, carrying strap, and wall wart
battery charger, along with paper work for $65.

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $20

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $20

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6
pins, as used on most Santec HTs, and many
Wilson and Yaesu HTs. Works and looks great.$20

Prices do not include shipping from Florida.

Thanks.

Topic: 459 Message: 625

Kenwood HT accessory items For Sale:

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new battery "insert" in it. $12

Kenwood BH-2 belt clip for TH-21 / 31 / 41 series HTs
and maybe others as well. With hardware $5

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $3

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Original Operators manual for Kenwood TR-2400 - $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

632. HF Wattmeter / SWR Bridges FS

Yahoo group: ham
Date: 2007-11-10 13:33:41 UTC
From: Ken Simpson, W8EK
Topic: 632 Message: 632

HF wattmeter / SWR Bridges For Sale:

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Micronta 21-521 A, SWR Bridge, coax switch combination

This unit is a standard HF SWR Bridge, but in addition,
it also has a built in 2 position coax antenna switch.
If you only have two antennas, or one antenna and a
dummy load, this unit would be ideal for you, eliminating
the need for separate units.

This particular unit is in extremely nice condition.
It includes the paper work, and the original box, although
the box is not in as good condition as the meter.
Of course it works fine. $20

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish, and
works fine. $10

Prices do not include shipping from Florida.

Thanks.

Date: 2007-11-13 12:11:00 UTC
From: Ken Simpson, W8EK
Topic: 637 Message: 637

RF Dummy Loads For Sale:

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is 50.2 ohms, so obviously it
is not fried, and well within tolerance for a good match to 50
ohms. The cantenna itself is in good shape.

Paper work is included for $40.

Archer 21-628 Dummy Load
Rated at 5 watts, it is not high power, but is very precision.
Ideal if you need a good termination. It measures exactly 52.0 ohms
In like new condition. $10

Prices do not include shipping from Florida.

Thanks.

Vintage Electrical Books For Sale:

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
I know that is a long title, but that is what the book is called!
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although it certainly is not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $ 15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill
392 pages of "Modern" info, compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Prices do not include shipping from Florida.

Thanks.

641. 2 meter and 440 MHz mobile antennas FS

Yahoo group: ham
Date: 2007-11-18 23:06:06 UTC
From: Ken Simpson, W8EK
Topic: 641 Message: 641

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil and whip for 2 meters
This is a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $18

Deduct $6 if you do not need the whip, which is hard to ship.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.

Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

TO: FAMILY & FRIENDS

The BIG trip is here, it is moving time, the bags are packed and we are ready to go.
Starting on Monday November 26 2007 we will be leaving Phoenix, AZ, the finish line is Lavonia, GA
We will be taking I-40 East. I have set up a web page that you can watch and see right where we are, this way you don't run up our cell phone bill asking us all day long. :}

My Website Link: http://www.kb7tbt.com/aprs
{or look for the A.P.R.S. link on my home page}
Please feel free to play with all the buttons, if you mess something up just wait till the page refreshes.
There are weather maps, so if you see trouble, I wont mind the phone call.... lol

Without Steve's help and Findu.com my site would not work at all!
http://map.findu.com/kb7tbt-9

Another very cool page is http://aprs.fi/?call=KB7TBT-9
The information is VERY detailed and updated instantly.
{The folks at APRS.FI have done an outstanding job!}

Google Earth Users!
http://www.kb7tbt.com/aprs/kb7tbt-9.kml
{Courtesy of the folks at aprs.fl}

Tracker ID is KB7TBT-9

Any of these 4 links will display our position and telemetry, have some fun and pick the right one for you.

TO: "PROFESSIONAL" RADIO OPERATORS

As we travel we will be happy to work stations along the way.
If you see us close give a listen or a call.

Freqs:
7.200 {+ /-} TS-440 on the dash!

648. Kenwood Dual Band FM transceiver FS

Yahoo group: ham
Date: 2007-12-02 14:23:21 UTC
From: Ken Simpson, W8EK
Topic: 648 Message: 648

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

73,

Ken, W8EK

From: Ken Simpson, W8EK
Topic: 650 Message: 650

Icom IC-4 AT, 440 MHz HT for sale:

The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,

with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in low.

A stubby duck antenna (about 3 inches long), belt clip, and wrist
strap is included, along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
This particular unit works fine and looks like new. $ 30

Prices do not include shipping from Florida.

Thanks.

652. Wattmeters and SWR Bridges FS

Yahoo group: ham
Date: 2007-12-29 12:06:16 UTC
From: Ken Simpson, W8EK
Topic: 486 Message: 652

Wattmeters and SWR Bridges For Sale:

Vintage Wattmeter

This wattmeter is made by M.C. Jones Electronics Co. of
Bristol, Conn. It is called a MicroMatch, Model 261.1.

It is a wattmeter that covers frequencies from .5 to 225 Mcs.
Yes, it says Mcs, and not MHz. From the looks of it, I would
guess that it is slightly post WW II vintage. It has the same
type of styling as General Radio, Millen, Measurements Corp,
and similar test equipment of that era. The case itself is gray
crinkle, with a black meter bezel.

The unit is in two parts. There is a sensing unit that is
similar to the pick up unit that E.F.Johnson used as a remote
pick up for the Matchboxes, except this remote pick up is
a bit larger in diameter, and about half as long. The meter
portion says model 262, and has 10, 100, and 1000 Watt
scales in both forward and reverse. It is connected by a
cable about 3 feet long, that has a 1/4 inch plug that plugs
into the remote pick up.

Cosmetically, it is exceptionally good. The paint looks very
good. I can not find a scratch on it. I would say that is it
collectable quality.
Electrically it works fine. $60

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. $50

SWR Bridges

Both SWR Bridges are designed primarily for HF operation,
although they still function well on 6 and 2 meters. Both have
SO-239 connectors on each end, and are designed for 52
ohm antenna systems.

Quements SWB-3 (same meter also sometimes labeled Swan)
This meter has two separate meters. One is for forward power
and one for reverse. This particular unit has a crack on the face
of the SWR (reflected power) meter, although the meter still
functions fine. It is strictly a cosmetic issue. $15

Swan FS-2
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $12

Prices do not include shipping from Florida.

Thanks.

Touchtone (DTMF) microphones For Sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Prices do not include shipping from Florida.

Thanks.

654. need a qrp 20m cw transceiver to buy

Yahoo group: ham
Date: 2008-01-15 03:24:58 UTC
From: shubhamforme
Topic: 654 Message: 654

hello every1 i need a cw transceiver for 20m i.e 14mhz or even more if
available ......
it could be of any brand or even home brewed but working.....
it could be from 1to 50 watts.............
if any 1 has a cw transceiver to sell then i am there to purchase
it....
thanks
shubham tiwari.......

656. Antennas for your HT FS

Yahoo group: ham
Date: 2008-01-17 19:26:50 UTC
From: Ken Simpson, W8EK
Topic: 656 Message: 656

Two meter antennas for your HT for sale:

All antennas are for two meters, work fine, and are in good condition.

VoCom 5/8 wave gain antenna for 2 meters
This antenna is about 4 feet long when extended, so it is unwieldy
on an HT, but it really has gain when you need it. It has 3 db gain
over a quarter wave antenna which likely has about 6 db gain over
a rubber duck. To put it another way, this antenna likely has about
9 db gain over a rubber duck. It telescopes to about 9 inches long.
In that position it is still usable, with about the same gain as a
rubber
duck. This antenna is idea for parades, walk-a-thons, and other
events where you need a gain antenna on your HT. It has a BNC
connector on it. $18

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down to
about 4 inches. It has about 6 db gain over the typical rubber
duck antenna. It has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259 connector. $15

Standard rubber duck antenna
With BNC connector, about 7 inches long. $10

PL-259 connector - 6.5 inches long $10
HyGain 275, in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, in original package - $10

5/16 inch threaded, like used by Motorola and others
Regular - about 6 inches long - $10
Stubby - 4 inches long - $10

Type F connector - 6.5 inches long - $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Prices do not include shipping from Florida.

Thanks.

660. CW keyer, paddles, and cables FS

Yahoo group: ham
Date: 2008-01-19 17:43:57 UTC
From: Ken Simpson, W8EK
Topic: 660 Message: 660

CW keyer, paddles, and cables for sale:

Trac Electronics CMOS Memory Keyer
This CW keyer has two very large memories built in to it.
Either can be selected independently.
Of course it works fine as a plain CW keyer if you do not need
the memories.
It can be powered by a 9 Volt battery or wall wort.
This one works fine, and looks very good also. $45

Bencher BY-1 Iambic Paddles
Standard Bencher Paddles with black base and chrome parts.
In very nice condition for $65.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but with coiled cord. $10

As above (straight cord), but with 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Gordon West "Radio School" code tapes
This is a set of four cassette tapes to take a person
up thru 13 WPM. It was designed for use when the General
test was 13 WPM, to make one proficient at that speed.
This set is in nice shape, in its original "binder". $12

Prices do not include shipping from Florida.

Thanks.

661. Coaxial antenna switches and connectors FS

Yahoo group: ham
Date: 2008-01-26 23:53:35 UTC
From: Ken Simpson, W8EK
Topic: 661 Message: 661

Coaxial antenna switches For Sale:

All have SO-239 connectors.

Para Dynamics PDC 3HD
This is a high quality coax switch, with printed circuit board
stripline type of construction, to keep the impedance constant.
It has the common connector coming out of the bottom, with
the 3 switched connectors coming out of the top.
It looks very similar to the Diawa CS-201 or MFJ 1702, but
is made to switch three antennas. Unused positions are NOT
grounded. $20

Pace 3 position switch
This switch is in a rectangular box. It has the common connector
on the bottom and the three switched connections coming out
of the top. Unused positions are NOT grounded. $15

AmComm JV-104 coax switch
Switches 3 antennas. It is in a nice black rectangular box
Very nice condition. $18

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 35

Waters (B & W) 341 two position coax switch
This switch is very much like the B & W 375 five position
switch, except it only has two position. It has the coax
coming out the back, and it does NOT ground the unused
antenna. This one is in very nice electrical and mechanical
shape. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

662. Icom HT and accessories FS

Yahoo group: ham
Date: 2008-02-02 14:27:10 UTC
From: Ken Simpson, W8EK
Topic: 662 Message: 662

Icom HTs and related accessories For Sale:

Icom IC-2 AT, 2 meter HT
The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumbwheel
switches on the top, and has a 16 digit touchtone pad on the front.
As some may recall, the IC-2 AT originally came with a 12 digit
touch tone pad on it, but some people needed the 16 digit pad
for control operations, so they ordered a new "front" for the 220 or
440 versions of this HT, which had a 16 digit pad on it, and replaced
this front on the 2AT. This is what has been done with this unit. The
label says Icom IC-3AT but it is really an IC-2AT, with the changed
front. The rubber has deteriorated on the 16 digit pad, so it looks
ugly. Even though it looks ugly, all of the 16 digits work fine.
The HT has about 3 watts output in high power and just under a
watt in low. A rubber duck antenna, belt clip, and wrist strap are
included, along with a battery charger. This HT works fine. If you
want an inexpensive, easy to operate HT, this is it. Paper work
included for $35.

Icom IC-4 AT, 440 MHz HT
The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,
with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in
low. A stubby duck antenna, belt clip, and wrist strap is included,
along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

Icom BC-35 Desk Charger.
It will charge these batteries:
BP-2, BP-3, BP-4 (w/NiCads), BP-5, BP-5A, BP-7, BP-8, BP-70,
CM-2, CM-2G, CM-3, CM-3G, CM-5, CM-5G, CM-5A, CM-5AG,
CM-7, CM-7G, CM-8, CM-8G, CM-96. To put it another way, it
charges all of the batteries used on Icom HTs from about 20
years ago.
This one works fine and looks very close to new.
It is in its original box, with paper work for $25.

Icom DC-1, 13 V DC adapter for many Icom HTs
This adapter slides on the HT, in place of the battery pack. If
13 V DC is applied, it converts the voltage to the proper voltage
for the HT. It can be used with the IC-2, IC-3, IC-4, IC-02, IC-03,
IC-04, and others. This one works fine, and looks very nice.
With paper work for $12.

Icom BP-4 / CM-4 battery case
This is the "empty" battery case, that one may add six AA cells
for extra long battery life. It will take either rechargeable or
alkaline
AA batteries. When used with rechargeable batteries, it can be
charged on a BC-35 desk charger. This will work on the 2GAT,
02AT, 2AT, 4GAT, 04AT, 12GAT or 03AT, plus many of Icom's
commercial radios. This unit is in very nice condition. With
paper work for $15.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
It is similar to a DC-1 and a BP-4 in one unit.
This particular unit works fine and looks like new. $ 30

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them to the Icom
IC-2AT, 3AT, 4AT, and others of that series that lacked the tones
originally. It is a postage stamp size unit. This one has never been
used, and is still in its original plastic bag, with the instructions.
$20

Prices do not include shipping from Florida.

Thanks.

664. Shure 444 desk mic and other microphones FS

Yahoo group: ham
Date: 2008-02-14 16:04:10 UTC
From: Ken Simpson, W8EK
Topic: 664 Message: 664

Microphones For Sale:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the "sheen"
left on it. I no longer have a rig to test it on, but I did connect
it to a scope and get a nice pattern, indicating all is working
well. $35

High Impedance Heath Hand Microphone
Not a GH-12 mic, but similar. It is a white mic that came
with Heath gear, and says Heath on the front. It is Hi Z,
and has the 2 pin Amphenol connector on it, as used by
much of the older Heath gear. It would be ideal for the SB
and HW series, plus many others, including non-Heath rigs.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from

the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $40

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $40

HT speaker microphones:

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins, as used on most Santec HTs, and many Wilson and Yaesu HTs. Works and looks great.$20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses techniques that will boost your average talk power, without introducing large amounts of distortion. Some processors only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell white enclosures that are a perfect match for some of the earlier TenTec rigs like the Argonaut 505, 509, Triton I and II, and others. Of course it can be used with any rig you want, as it inserts in the microphone audio line. In other words, plug your mic into this unit, plug the unit into your rig, add 12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Prices do not include shipping from Florida.

Thanks.

667. Autek QF-1 audio filter FS

Yahoo group: ham
Date: 2008-02-18 15:02:57 UTC
From: Ken Simpson, W8EK
Topic: 667 Message: 667

For Sale:

Autek QF-1 audio filter

This is an audio filter that goes between your rig and
speaker. It runs off of 110 V AC, and will peak, notch,
or become a low pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel.
The input is a 1/4 inch phone plug, and the output is
a 1/4 inch jack on the front panel. This particular unit
looks very good, and works the same. Paper work
is included for $40 plus shipping from Florida.

Thanks.

669. Wattmeters and SWR Bridges FS

Yahoo group: ham
Date: 2008-02-23 00:33:45 UTC
From: Ken Simpson, W8EK
Topic: 486 Message: 669

Wattmeters and SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works great, and looks OK also. $50

Heath HM-102 HF wattmeter.
Covers 1.8 to 30 MHz, with 200 W and 2000 W full scale. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out. This particular meter works fine and is in good shape. With paper work included for $38.

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with full scale power readings of 10, 100, and 1000 watts. Two LARGE meters -- one reads forward power and one reads reflected power -- both at the same time. This gives the same info as some of the cross needle meters, but many people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect to the meter itself.
This particular meter works fine, and looks very, very nice. $50

Heath HM-15 SWR Bridge
This unit matches the Heath SB (and also HW) line in styling. It is an SWR Bridge that covers from 160 thru 6 meters, with SO-239 connectors on the back. The front has the meter on the left, and two knobs to the right. It is the same size as the HD-15 phone patch. This one is in very nice shape.
Paper work included for $20.

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can be used with any HF transmitter. It is about 8 inches

wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in good shape.
Paper work is included for $18.

Midland 23-126
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $15

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham
Date: 2008-02-29 20:51:51 UTC
From: Ken Simpson, W8EK
Topic: 672 Message: 672

For Sale:

KDK FM-2030, Two meter FM transceiver, with tones

This transceiver covers two meters with 26 W in high
power and 6 W in low power. A PL (CTCSS subaudible)
tone encoder is built in. The microphone has a touchtone
(DTMF) pad on it. Of course it has memories and scan
capabilities. It is very easy to operate.
This one looks fine, and works fine.

Included with the radio is the power cord, touchtone
microphone, mobile bracket and paperwork, all in the
original box for $75 plus shipping from Florida.

Thanks.

673. Many microphones and related items FS

Yahoo group: ham
Date: 2008-03-01 14:59:22 UTC
From: Ken Simpson, W8EK
Topic: 673 Message: 673

Microphones and related items for sale:

Desk Microphone:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear, and says Heath on the front
of it. It is Hi Z, and has the 2 pin Amphenol connector on it, as
used by much of the older Heath gear. Of course it can also
be used on Johnson, Hallicrafters, and other transmitters
needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to

a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

HT speaker microphone:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses
techniques that will boost your average talk power, without
introducing large amounts of distortion. Some processors
only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell
white enclosures that are a perfect match for some of the
earlier TenTec rigs like the Argonaut 505, 509, Triton I and
II, and others. Of course it can be used with any rig you want,
as it inserts in the microphone audio line. In other words,
plug your mic into this unit, plug the unit into your rig, add
12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the

same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Icom HM-8 hand mic with Touch Tone (DTMF) Pad

This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Prices do not include shipping from Florida.

Thanks.

674. Keithley 169 Lab Quality DMM FS

Yahoo group: ham
Date: 2008-03-01 21:02:09 UTC
From: Ken Simpson, W8EK
Topic: 674 Message: 674

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $90 plus shipping from Florida.

Thanks.

677. Low Pass TVI Filters FS

Yahoo group: ham
Date: 2008-03-08 15:26:45 UTC
From: Ken Simpson, W8EK
Topic: 677 Message: 677

Low Pass TVI filters For Sale:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $30

B & W FL-10/1500 Low Pass Filter
This is the more modern, current, latest version of the 425 filter
as listed above. Like new condition. With paper work $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
also has the single page "manual" with it. $ 33

Johnson Nye Viking 250-20 Low Pass Filter
This cylindrical low pass filter has a cut off frequency of
45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB.
Filter only $33
Filter with mounting bracket $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $25

Prices do not include shipping from Florida.

Thanks.

679. Alpha Delta Coax Switches FS

Yahoo group: ham
Date: 2008-03-21 16:40:53 UTC
From: Ken Simpson, W8EK
Topic: 679 Message: 679

For Sale:

Coax switches by Alpha Delta

Delta 4
This is a coax switch designed to switch four antennas.
It actually has a fifth position that will ground all antennas.
There is also a special lightning arrester "plug" built in
that can be changed if you get hit. The switch is of strip
line type construction so that it provides a good impedance
match at higher frequencies; it is rated for use through 450
MHz. Of course it will handle a full 1500 Watts. SO-239
connectors. This is a very high quality coax switch!
This particular switch works just like it should, and looks
very close to new. With paper work for $65 .

Delta 2
Same as Delta 4 above, except it will only switch two
antennas, and has a third position to ground all antennas.
This one also works great and looks great also.
With paper work for $40

Prices do not include shipping from Florida.

Thanks.

680. Several HTs (both 2 m, 440, and dual band) and accessories FS

Yahoo group: ham
Date: 2008-03-22 18:48:46 UTC
From: Ken Simpson, W8EK
Topic: 680 Message: 680

For Sale:

A variety of HTs (both 2 m and 440 MHz) and associated
accessories

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It
has an exceptional receiver on it, with extremely good
front end characteristics. Of course it has memories,
scan, and all the normal bells and whistles, including a
very readable LCD display. A touchtone DTMF pad is
included on it, as are PL (subaudible) tones.
This particular unit works fine, and looks very close to new.
It includes a good battery, charger, belt clip, carrying strap,
rubber duck antenna and paper work for $70.

Realistic HTX-404 for 440 MHz
Similar to the HTX-202 above, but for the 440 MHz band.
It also works fine, and looks really great. It includes a good
battery, charger, belt clip, rubber duck antenna and paper
work for $70.

Radio Shack 119-310 speaker microphone
Can be used on either of the above HTs, or on many others
such as Icom, Yaesu etc. It works fine, and looks good also.
$18

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT, IC-4 AT,
etc. This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a
good battery pack, belt clip, rubber duck, and paper work for $100.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.

It has a touchtone pad on it, and is very simple to operate. You likely

will not need to read to manual to use this one!
It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-G5 dual band 2 meter and 440 MHz HT
I said earlier that the Alinco DJ-191 2 meter HT has about everything except the kitchen sink in it. I think they must have included the kitchen sink in this one! It has all of the features of the DJ-191 above,
but also works on the 440 MHz band. It will even cross band repeat, if you talk to it right. But I am certain you will need to read the manual
on this one! It has three power levels of about 6, 3.5 and 1 watts. The receiver covers from 108 to 174 MHz, and then from 420 to 480 MHz. This means it covers the AM aircraft band, as well as the VHF public service, weather frequencies, and UHF public service. I can not think of anything a ham would want it to do that it will not do. This particular unit works fine, and looks extremely nice. It includes a good battery, belt clip, rubber duck antenna, and paper work for $250.

Speaker microphone for Alinco HTs above.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HTs. It looks OK also. $18

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC connector. It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Prices do not include shipping from Florida.

Thanks.

688. Extensive Ham Publications - Both Vintage and Modern

Yahoo group: ham
Date: 2008-04-05 10:25:55 UTC
From: Ken Simpson, W8EK
Topic: 688 Message: 688

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1958 - 35th edition - Actual book is in very good condition
.....Cover has been repaired by laminating. $15
1967 - 44th edition - Very nice condition $15
1973 - 50th edition - Very nice condition throughout $12
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1983 - 60th edition - Great condition; no problems $15
1985 - 62nd edition - Like new $17
1986 - 63rd edition - Close to new condition $17
1993 - 70th edition - Hardbound - Like new $20
2006 - 83rd edition - with CD, like new $35

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although certainly not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill - 392 pages of "Modern" info,
compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Modern Electronic Communication by Gary Miller
This text book is used in many community colleges, and is an
exceptionally thorough, yet easy to understand book covering all
aspects of communications, from Ohm's Law on up.
Hardback in very nice condition. $18

Books about Operating an Amateur Radio Station:

ARRL "Stealth Amateur Radio - Operate from Anywhere"
By Kirk Kleinschmidt, NT0Z - like new - $25

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "Practical Packet Radio"
By Stan Horzepa, WA1LOU
First Edition - 1998 - Like new - $10

"Digital Communications with Amateur Radio"
By Radio Shack, Jim Grubbs, K9EI
1988 - $4

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - 1978 - Second edition - $5

ARRL "Radio Frequency Interference"
1981 - 2nd edition - like new - $10

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "Your Ham Antenna Companion"
A guide to understanding and building antennas

1995 - First edition - $8

ARRL "Lightning Calculator"
Circular slide rule type to figure inductance,
resonance, etc.
1932 copyright date - good shape - $18

ARRL "Understanding Basic Electronics"
By WR1B - inch thick course - $12

ARRL "Weekend Projects for the Radio Amateur"
1979 - First Edition - $8

Sears "Simplified Electric Wiring Handbook"
1962 - Lots of diagrams - $3

Archer "Getting Started in Electronics"
By Forrest Mims - many diagrams - 9th edition - $4

Radio Shack "Basic Digital Electronics"
By Alvis Evans - water stain on back - 1996 - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published by Callbook - 12th edition - $8

Radio Amateur's World Atlas
Published in Germany - $8

National Geographic World Map
As seen from the satellites - $1

Time Selector
Round "circular slide rule" type of
device to select time in other areas.
By PanAm Airlines - no date I can find, but looks
about 1950 vintage $2

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

General and Technician License Study Material:

To the best of my knowledge, this is current material.

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes. Like new for $18

ARRL General Class License Manual - 5th edition
This book has not only the questions, but also an
explanation of the theory behind the questions.
Like new for $12

ARRL General Q & A Manual - 2nd edition
This book has the questions and a brief explanation. It
is not nearly as thorough as the actual License Manual
above. Like new for $10

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stone, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Radio Amateur License Guide" by Schwartz
Covers Novice, Tech, and General questions with diagrams
and tube info needed for the tests - 1956 - $5

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.........1997 - Second Edition
Advanced Class - 1985 - First edition
.........1990 - Third Edition
Extra Class - 1988 - Third edition

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Aug 1960 - Good condition - $8

Sams Tube Substitution Manual
1970 It looks like cover has been replaced, but it is in nice shape.

$4

Elements of Radio Servicing
By Marcus and Levy - 1955
Nice Hardback book - $12

"Basic Technology for the Amateur Radio Enthusiast"
By Alpha Delta Communications, Don Tyrrell, W8AD - $5

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Original Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are manuals
only. They are all originals, in exceptionally
good condition, and are not copies.

Heath CO-1 Code Practice Oscillator
1959 - Extremely nice condition, with NO check marks
in the book. Separate pictorials included. $7

HD-15 Hybrid Phone patch - 1965
Check marks in book,
Schematic is part of book. $8

Heath HM-2102 VHF Wattmeter Assembly Manual
1972 - Looks very close to new, but does have check
marks in the book. Schematic included. $10

Heath HN-31 A "Cantenna" Dummy Load
For the "A" model dated 1982
No check marks in book. $10

Heath HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks in book. $10

GD-600 Photoelectric Light Switch
Schematic is part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

709. 2 meter and 440 MHz HTs and accessory items FS

Yahoo group: ham
Date: 2008-05-10 12:27:05 UTC
From: Ken Simpson, W8EK
Topic: 709 Message: 709

For Sale:

A variety of HTs (2 meter and 440 MHz) and associated accessories:

I know this is a long list, but I have tried to group items.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating frequency. The HT has about 1.5 watts output, and a decent receiver. It has a touchtone pad on it, and is very simple to operate. You likely will not need to read to manual to use this one! It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It has a very large, readable LCD display that I can read without my glasses! It has about 7 watts max output, and the receiver is great. It covers from 136 to 174 MHz, so it covers all of the weather and VHF public service frequencies. Of course it has memories and all sorts of scan features. Touchtones (DTMF) and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a good battery pack, belt clip, rubber duck, and paper work for $100.

Speaker microphone for Alinco HT above, plus many others.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HT. It looks OK also. $18

Yaesu FT-26, 2 meter HT
This HT has a nice LCD display, with memories, scan, and subaudible tones. Basically, all the things one would expect in an HT. This unit comes with the desk charger, and not a wall charger. The battery seems to hold a charge OK, but seems somewhat weak, so it may need an "insert" soon. It works 100%, and looks very nice.
Rubber duck and paper work included for $75.

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It has an exceptional receiver on it, with extremely good front end characteristics. Of course it has memories, scan, and all the normal bells and whistles, including a very readable LCD display. A touchtone DTMF pad is included on it, as are PL (subaudible) tones.

This particular unit has a problem, however.
There is no transmit audio when using it strictly as an HT.
It does have audio when using it with a speaker mic,
which would indicate that the mic element in the HT itself
is bad. My eyesight is no longer good enough to work on
these small parts. Fix the mic element, and you should be
in great shape. As an alternative, use it with a speaker
mic, and don't worry about it! Subaudible tone, touchtone
pad, and all of those parts appear to work fine, as does the
receiver.
Cosmetically, the unit looks very close to new.
I am selling the HT only, with no accessories. $35

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 above, or any other HT with BNC connector.
It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Antenna adapter to fit the antenna connector on the TH-21/31/41
series of HTs and provide an SO-239 connector that will permit
a regular PL-259 to be attached. $5

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

HT speaker microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Speaker microphone for many different HTs
I think this is actually an Icom HM-9, but I can not find that
written on it any place. It has the 2.5 mm and 3.5mm connector
pins and will work on most Icom HTs including IC-02, 03, 04,
2/3/4SA/T, 24AT, P2/3/4, T21, T41, W21, 2GXA/T,and others.
It will also work on Radio Shack HTs like the HTX-202,
HTX-404, HTX-420, HTX-400, etc., plus many Alinco and
Yaesu HTs. $18

Belt Clips for various HTs:
Motorola, with hardware - $8
Kenwood TR-2400, with hardware - $8
Radio Shack HTX-202/404, with hardware - $10
Yaesu FT-209, with hardware - $8

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Yaesu FT-209:

Belt clip with mounting screws - $8

Carrying strap (likely fits other HTs as well) $4

Accessories for Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other)
HTs - $4

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

711. Mobile HF antennas and related items FS

Yahoo group: ham
Date: 2008-05-11 17:08:13 UTC
From: Ken Simpson, W8EK
Topic: 711 Message: 711

Mobile HF antennas and antenna related items for sale:

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $30 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
20 meter resonator RM-20 $15
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 27 inches above ball) $22

MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

Wattmeter/SWR Bridges:

Micronta 21-520 A wattmeter with large dual meters
This meter is designed primarily for HF operation, although
it still functions well on 6 and 2 meters. It has SO-239
connectors, and is designed for 52 ohm antenna systems.
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90.

Radio Works T-6 VHF Isolator
This unit is designed for VHF frequencies, and provides
isolation to keep RF where it belongs, and out of your
shack. The purpose of this device is to "decouple" the
feedline from all of the things in your shack, so that the
RF would not get in places it did not beyond. To put it
another way, this device might help keep RF out of your
computer, as an example.
This one is out of the package, but has never been on
the air. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3

screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

712. Antenna tuner and wattmeter/SWR Bridges FS

Yahoo group: ham
Date: 2008-05-17 12:59:35 UTC
From: Ken Simpson, W8EK
Topic: 712 Message: 712

Antenna tuner and wattmeter/SWR Bridges For Sale:

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $65

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Prices do not include shipping from Florida.

Thanks.

714. Extensive list of HF and related items FS

Yahoo group: ham
Date: 2008-05-24 12:09:53 UTC
From: Ken Simpson, W8EK
Topic: 714 Message: 714

Extensive list of HF related items for sale:

I realize that this list is long; I have attempted to group
items as much as possible.

CW related items:

Vibroplex "Blue Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Wattmeter/SWR Bridges:

These meters are designed primarily for HF operation, although
they still function well on 6 and 2 meters. They have SO-239
connectors, and are designed for 52 ohm antenna systems.

Micronta 21-520 A wattmeter with large dual meters
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some

of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $85

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $60

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $29 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 25 inches above ball) $22
MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton
covered cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the
same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.

This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter that has been optimized to
have more attenuation in the 40 MHz region, where many
TVs have their IF. According to the manual it is good for
1000 Watts "average", which would be about 2000 watts
PEP, and has over 80 db attenuation at 41 MHz. SO-239
connectors on each end. This one looks close to new, and
also has the single page "manual" with it. $ 40

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Heath IP-27 DC "lab type" power supply
This supply is capable of up to 50 V DC at up to 1 1/2
amps of current. It is set up in 5 volt ranges (0 to 5 V,
5 to 10 V, etc), with a bit of overlap on the ranges, and
then has a pot to set the fine voltage. Heath used a neat
design, where the power transformer has many taps,
and is switched as one changes ranges, keeping heat
and power dissipation to a minimum. The current
limit has 4 ranges (50, 150, 500 ma, and 1.5 amps),
with a pot to set the fine adjustment. It also has a very
large (approx 5 inch) meter to read the voltage and current.
This one works great, and looks fine also. It has had the
Heath recommended updates done to it.
With paper work for $85.

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,

to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

718. Extensive list of ham items FS - antenna tuner, HTs, many misc accessories

Yahoo group: ham
Date: 2008-06-14 15:15:07 UTC
From: Ken Simpson, W8EK
Topic: 718 Message: 718

For Sale:

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent
receiver. It has a touchtone pad on it, and is very simple to
operate. You likely will not need to read to manual to use this
one! It includes a good battery (new insert a couple months ago),
charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work

for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Dead Radio Shack 19-300 Battery pack for HT-202 and HTX-404
As above, except battery is dead. Use it to put new insert in,
or for other projects. $8

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $89

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Microphones:

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton covered
cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps

Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.

This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC
connector. It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

723. Many Ham items FS

Yahoo group: ham
Date: 2008-07-04 12:04:47 UTC
From: Ken Simpson, W8EK
Topic: 723 Message: 723

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
160 meters - 1.8 to 2.0 MHz
30 meters - 10 to 10.5 MHz
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Kenwood HS-5 headphones
These deluxe communications headphones are engineered
and tuned for radio communications to provide distinctive
voice sound (150-4000 Hz).
With ¼ inch mono plug; 8 ohms, and 6 foot cord.
In very nice shape. With paper work for $55.

Generic headphones
Similar to the HS-5 above, but with plastic ear pads.
"Made in USA" stamped on them. About 100 ohm impedance,
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable through the use of magnets. The Brass Racer Iambic is a convenient, keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base.
This one works great, is in very nice condition, and includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic has up-down switches, plus a row of four switches above the touch tone pad. They are used for "Call Button", VFO key, Memory recall key, and the fourth one is programmable. The back has a lock switch. It has an RJ-45 connector (like a computer LAN).
This particular mic works fine, and looks fine also. It is still in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector. Has UP and DOWN switches, along with 16 digit touchtone pad. It is often used on the 2 m and 440 MHz rigs that do not have touchtone built in, but can also be used on HF rigs for touchtone on 10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin

modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!

This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the
DJ-191 above, but many others). It will convert the BNC
connector on the HT, so that you can use a normal antenna
with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

Ham Items For Sale:

I know this is a long list; I have tried to group similar items
together.

Headphones:

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono
plug, and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Regular Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)

and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Prices do not include shipping from Florida.

Thanks.

728. Radio and support people are needed to assist medical teams in Honduras

Yahoo group: ham
Date: 2008-07-22 21:34:07 UTC
From: John Kirckof
Topic: 728 Message: 728
Attachments: 1 described; binary payloads are missing from this source WARC

If you are a ham, we need your help!

We will need 4 or 5 more hams to go to support an important medical mission trip. We plan to simultaneously send about 10 medical teams to rural sites in Honduras and each team will need a ham radio operator so the teams keep in contact with each other. If this seems right for you or you have questions, call me right away or reply directly to my e-mail address below.

Right now IHS (International Health Services) is in critical need of radio operators plus medical folks, Spanish translators, and others to go on a 2 week medical mission trip to Honduras. It is a large undertaking with about 10 teams planned to go at the same time for the 13 Feb to 1 March, 2009 trip. It will have about 6 or 7 medical/dental clinic teams plus several eye glasses and surgical teams planned. This means about 100 people will go counting all the support and worker people who go also (many spouses and friends go in this way). We have done this for 27 years so we have all the logistics planned out. This includes a container shipment to send supplies, meds, radio gear, and any personal items (if you want) ahead of time. We are a totally volunteer group but IHS does help cover a lot of the expenses in going.

The radio operator duties will vary some depending on the team they are giving radio support to but it is all relatively straight forward work. In all locations we will have basic HF voice capability with a check in net 2 or 3 times a day. Some of the 10 or so locations will also have 2 meter ops… often using a repeater. Also, many of the locations may have e-mail capability through the HF Winlink system. So, whatever your skill level, we likely can use you as a lead person on a team or a support person to help them and to do basic engineer type tasks. We get on the air in about early or mid December for those who what to brush up their radio skills on any of the above modes so we do not go unprepared. We (IHS) also do have some gear to help out in items that you may be lacking. Also, we have storage locations in Honduras where we keep a lot of items such as antennas, generators, power supplies, etc. So getting the right gear to set up at
a sight is usually not a big issue.

How many teams of each type we will have totally depends on how many people sign up and what their profession is. We do most the sign ups early so that a small group can go to Honduras the end of October and line up the team locations based on the skills of the medical folks that have signed up. We want to get applications by 1 October to do this so call me ASAP if interested. We have had a fairly good turn out so far for docs and nurses, dentists, and most medical folks. However, I only know of four (of the ten or so needed) radio people signed up. Our purpose is to go to the poor remote locations of Honduras where there are no medical or dental services for the local people. It would be a sad thing if a team did not go to a very needy village simply because we lacked a radio person to complete a team.

This past Feb. mission was a huge success. I have attached a map that shows the teams and where they went. My wife and I were on the PLP eye team.

FYI, our typical clinic team in a village will have one or two docs, an RN and one other nurse or EMT, a pharmacist, a dentist (usually), one or two Spanish translators, an engineer, one or two radio operators, and several helpers. It is a well rounded team and this also helps when a spouse or friend wants to be on the same team (note our application has a place to note your desire to be on a team with some one else). A parent can take a MATURE son or daughter also if they are able to be a productive member of the team.

I have a CD plus a lot of other information I can pass on to you if you or someone you know has an interest in going! Also, there are several other IHS Directors who can answer more technical questions about the medical side of things, etc. So let me know if you have questions in that regard, as well. Note that the CD is also good for those signed up as it has a lot of photos & info about most of the sites we go to. This includes radio set up info from the past. There also is a web site with GENERAL info and applications at: www.IHSOFMN.org A new, more informative IHS web site is under construction but is not on line yet.

Call me any time or write back. A call is best so I can fill you in on basic expenses and the variety of work conditions we encounter.

I and the needy of Honduras thank you for your interest in this very rewarding work!

Best regards,

John Kirckof

IHS Board of Directors

PS - Our most dire need is for Spanish translators. If you can help us find one or two, I will buy you a Grape Uba when we get to LaCeiba !

729. Extensive list of HT and HT related accessories FS

Yahoo group: ham
Date: 2008-07-26 13:00:50 UTC
From: Ken Simpson, W8EK
Topic: 729 Message: 729

Extensive list of HT and HT related accessories For Sale:

I know this is a long list; I have tried to group similar items
together.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, it would be ideal. $8 each

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Hustler SF-2 antenna for 2 meters
This is a 5/8 wave antenna with about 3 db gain over a
quarter wave antenna. It is about 4 feet long, and is made
to screw into a standard 3/8 inch 24 thread mount.
It works fine and looks fine. $15

Hustler RSS-2 stainless steel resonator spring
Recommended by Hustler to go at the top of the masts
used with HF resonators, and below the resonator, to
prevent breakage, in case the resonator hits a tree limb.
This one looks very close to new. $10

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5

mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the
DJ-191 above, but many others). It will convert the BNC
connector on the HT, so that you can use a normal antenna
with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Prices do not include shipping from Florida.

Thanks.

731. Antenna tuner, and other HF related items FS

Yahoo group: ham
Date: 2008-08-02 11:54:11 UTC
From: Ken Simpson, W8EK
Topic: 731 Message: 731

Antenna tuner and other HF related items For Sale:

I know this is a long list; I have tried to group similar items
together.

Antenna tuner For Sale:

MFJ 941 E antenna tuner for 160 thru 10 meters

This is the latest "E" version of this popular tuner.

This tuner has a "cross needle" SWR bridge built into it,
so you can read both forward power and SWR at the
same time. The meter has a back light, assuming 12
Volts is applied to the tuner. The wattmeter portion will
read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a dummy load. Antennas can be
operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including the
WARC bands.

This particular unit works 100%. It looks very close to new.
Almost like it just came out of its box; maybe that is because
it is still in its original box.

Manual is included for $100

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have a band module for 10 meters - 28 to 29 MHz.
It works fine. With paper work for $65.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work for $30.

TenTec 306 power adapter
The 555 Scout and several other TenTec rigs take a 2
pin power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector, so it can be used on
a radio with the 2 pin power plug. Like new, with paper
work (all half page of it!). $10

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Generic headphones
Similar to the Kenwood HS-5 headphones, but with plastic
ear pads. "Made in USA" stamped on them.
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Hamstick HF mobile antenna for 20 meters

This is the original honest to goodness Hamstick,
made by Lakeview, and are not one of the clones.

This antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so it fits
a standard ball mount.

This antennas is new, still in their original package, unused.
$27

Hustler RSS-2, Stainless steel resonator spring $10

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

LARGE Analog meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting

This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

736. Kenwood TS-440 HF xcvr, and other Kenwood items FS

Yahoo group: ham
Date: 2008-08-23 13:22:25 UTC
From: Ken Simpson, W8EK
Topic: 736 Message: 736

Kenwood Items For Sale:

Kenwood TS-440 S / AT, 100 Watt HF transceiver

The Kenwood TS-440S/AT was designed for superior
performance in the SSB, CW, AM, FM and AFSK modes.
An automatic antenna tuner is built in. Coverage is 160
through 10 meters including the WARC bands with 100
watts (40W AM). It includes such things as notch filter,
individual selection of optional crystal filters, digital readout,
memories, scan capabilities, IF shift, direct frequency entry
from a keyboard, and many other features. It requires 13
VDC at about 20 amps.

This particular TS-440 is about as perfect as you can find.
Electrically, it functions 100%. There are no problems with
the VCO and PLL like plagues some of these units. Likewise
the frequency entry from the keyboard is clean and definite.
Cosmetically, it looks like it just came from the factory. Not a
scratch on it. It is in its original double box with foam inserts,
with original manual that looks like it has not been used. You
simply will not find a more perfect TS-440! All of this for only $525.

Kenwood PS-50 heavy duty power supply

This power supply was designed for use with the TS-440
transceiver, but it can be used with any rig. It is capable of
supplying 13 V DC at up to 20 amps, continuously for an hour.
It has the standard 6 pin molex output connector, as used by
Kenwood, Icom, Yaesu, and others for their HF rigs. It also has
screw terminals on the back for use with a second rig, such as
a 2 meter rig.

This particular unit is immaculate. It functions 100%, and looks
like new. Not a scratch on it. It is in its original boxes, with the
foam inserts, and original manual that looks like it was never used.

The power supply by itself is $125, and will sell after the TS-440
above. If sold with the TS-440, the combination is only $625.

Other Kenwood items for sale:

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity. It includes the battery case, stubby rubber duck,
belt clip, and paper work for $60.

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a

standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Prices do not include shipping from Florida.

Thanks.

738. Many misc ham items FS

Yahoo group: ham
Date: 2008-08-24 17:36:29 UTC
From: Ken Simpson, W8EK
Topic: 738 Message: 738

Many miscellaneous ham items for sale:

Kenwood TH-41 AT HT for 440 MHz.

This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity.

It includes the battery case, stubby rubber duck, belt clip, and paper
work for $60.

Alinco DJ-191, 2 meter HT

This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so that means it covers
all of the weather and VHF public service frequencies, in
addition to the ham band.
Of course it has memories and all sorts of scan features.
Touchtones (DTMF) and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $99.

"CW using your HT"

This unit was made by a now silent key, following an article
in July 1997 QST and May 1997 World Radio. The idea is
to be able to send CW using your HT, so that code practice
over a repeater is possible, assuming you can hit the repeater
with your HT.

Powered by a 9 volt battery, it has a tone generator that can
be keyed, with the proper interface to go to the mic input on
your HT. All sorts of interfacing is provided, including deviation
and volume controls, transmitter keying, etc.

This unit is in a nice minibox, approximately 4.5 x 3.5 x 1.5 inches.
Most importantly, COMPLETE documentation is included,
showing his own layout, as well as both original articles. $15

120 Volt AC Line "Polarity checker" For Sale:

This device is designed so that one can check the 3 prong 120
V AC outlets, to see that they are wired correctly. It has bulbs
that light and indicate all is OK, or if there is a fault. If a fault
exists, the exact fault can be determined from the lights.

This unit was built by a silent key in a 4 x 2 x 2 inch minibox, with
a heavy 15 amp plug to plug into the 120 V AC outlet. Instructions
and light codes are on the outside of the box, with schematic and
the article it was built from on the inside. $10

Gonset ORIGINAL manual
Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

W7FG Manual reprint

These are W7FG reprints of the original manuals. As you likely
know, W7FG reprints are extremely good quality.

Hallicrafters S-20 R Receiver
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder. $14

Ironworks "Connect Quick" CQ-1 Antenna Mount

Connect Quick Antenna Mount is a mounting plate system
that provides a rapid and secure means of attaching items
such as antenna booms to masts, solar panels to posts,
sound and lighting installations, and other similarly mounted
devices. Installation and removal are accomplished in a snap!

It is designed primarily for use in emergency communications /
portable antenna systems. More details can be found at
http://www.connectquick.net/
The unit appears to be heavy aluminum and stainless steel.

This one is new, still sealed in the original packing. They are
$35 from the web site. This one is only $25.

Centronics Switch

This switch, made by Centronics, is made to switch up
to four separate devices to a single common line. The
front panel has a single rotary switch labeled "A B C D".
The rear panel has five Centronics connectors like are
on parallel port printers.

This particular unit works fine and looks very, very nice.
It is in a very heavy duty metal enclosure, with no scratches
or defects. $10

LARGE Analog Meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, square, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

General Electric Elapsed Time Meter

This elapsed time meter will measure the total time that
a piece of equipment has been turned on. It is designed
for 115 V AC, 60 hertz. It is ideal for equipment such as
a linear amplifier, or any other equipment where the time
that it has been used is important.

This particular meter reads in minutes (instead of hours).
It reads 000000.0 minutes, and has provisions for resetting
the time. It is a square meter, about 2 3/4 inches on a side.
Of course it works fine. $20

Meter movement from Heath RF Power Meter

This is a 200 ua meter movement, with a white scale from 0 to
10 on it. It is about 2 5/8 inches wide and 2 1/2 inches high. It
says "Ideal Precision Meter Co, Made in USA" on the back. My
memory says it is from an Heath SWR Bridge.

This one works fine and looks great also. $14

Battery charge adapter for Azden PCS-300 HT For Sale:
This is an adapter that permits one to charge the battery of the
Azden PCS-300, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Santec items

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

HT audio connector cable

Do you need a cable to connect audio from a sound card
to your HT? Or maybe connect some other digital "gadget"
to your HT? Or maybe just a switch box.

I have a cable that will connect to many HTs. It has a 3.5 mm
and a 2.5 mm connector, molded so that the two are separated
about 1/2 inch apart.

The cable is about 3 feet long, and is in good shape. $12

Kantronics Cable

This cable is made to plug in to the 9 pin DB-9 connector that
is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio. It is often used for APRS, and other interfacing.

The cable has a DB-9 connector on one end. The other end has
the connectors for two radios, and is labeled "1" and "2", with "1"
having a red 3.5 mm plug, a white 3.5 mm plug, and a black 2.5
mm plug. The "2" is as the same as "1" except it does not have
the white 3.5 mm plug. It is $18.

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one
looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware $8

Original Operators manual for Kenwood TR-2400 $15

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

"Dead" Icom Battery Pack

Icom BP-3 battery pack

I found a BP-3 battery pack that is dead.
This pack is used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and some others. It will also
fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.

This one is dead, but if you need a battery shell, to
put a new "insert" in to, or for some project, it would
be ideal. Adding one of the newer high capacity inserts
will give you a very inexpensive new battery, or build a
regulator in for use from 12 V DC. $8

Nye Viking "Master Key" Model 330-001 CW Straight Key

From their web page:
The perfect straight key. Complete with cord and plug --
ready to use! Isolated contact assembly separates keying
circuit from hardware. Includes gold-plated copper contacts,
adjustable key arm, Navy knob and heavy die-cast base.

This is a top of the line straight key. These are about $85 new.
This one works like new, and looks like new.
It is only $55.

Headphones

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Kenwood PC-1 phone patch / interface

Although this is a Kenwood phone patch, it can be used
with most any rig. It has separate receive and transmit
gain controls for setting the level to the phone line.
This is the model with the 4 pin microphone connectors,
but they can be changed, if needed. It includes a nice
meter for adjusting the null so VOX will work OK.

Although this was designed as a phone patch, it can also
be used as a digital interface to a sound card.

This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $40.

TenTec 306 power adapter For Sale:

The 555 Scout, 535 Argonaut, 536 Delta, 550 Pegasus,
556 Argo, and several other TenTec rigs take a 2 pin
power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector on the power supply,
so it can be used on a radio requiring the 2 pin power
plug.
Like new, with paper work (all half page of it!). $12

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

-
These were originally about $270. You can get this one with
the paper work for only $30

Kenwood Microphone and Antenna Adapters

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Antenna adapter to fit the BNC connector on an HT and
provide an SO-239 connector that will permit a regular
PL-259 to be attached. This can be used on any HT (not
just Kenwood) that has a BNC connector on it. $5

Antenna adapter to fit the antenna connector on the Kenwood
TH-21/31/41 series of HTs and provide an SO-239 connector
that will permit a regular PL-259 to be attached. $5
-

Coax Connectors and Adapters
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF Right angle connector - male to female
Takes PL-259 on one side and an SO-239 on the other $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.
Most are extremely nice, close to new condition.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Books about Operating an Amateur Radio Station:

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - Second edition - $5

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL US Call Area Map
Large, colorful map, Like new. $5

National Geographic World Map
As seen from the satellites - $1

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

The following books are often used as text books at the two
year community college level.

Electric Circuits Fundamentals and Electronics Fundamentals
Floyd - 3rd edition - Over 1000 pages, plus another 200 +
pages of answers to problems. This is often used as a text
book at Community and Technical Colleges.
Like new. $25

Digital Electronics by Uffenbeck
Large book with just under 700 pages. It includes answers
to the problems. Like new. $25

Computers by Long and Long
Large book with about 750 pages. Answers to problems
included. Like new. $25

Assembling and Repairing Personal Computers by Beeson
About 400 pages of extensive, thorough information. Like
new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750
pages, plus CD. Like new. $20

Computer Repair Toolkit by Bigelow
Over 400 pages of information and diagnostic programs.
Like new, with CD. $20

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes.
To the best of my knowledge, this is current material.
Like new for $18

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Radio Shack from 5 watts to 1000 watts
1974 - Spiral bound - $4

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Basic Technology for the Amateur Radio Enthusiast"
By Alpha Delta Communications, Don Tyrrell, W8AD - $5

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Hallicrafters manual for sale:
Hallicrafters S-20 R Receiver Manual
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder.
This is a W7FG reprint of the original manual. As you likely
know, W7FG reprints are extremely good quality. $14

Gonset ORIGINAL manuals

Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath CO-1 Code Practice Oscillator
1959, Extremely nice, with NO check marks
Pictorials included $6

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HD-1426 Relative Field Strength Meter
1977, Excellent $6

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

Heath "Kit Builders Guide"
included with many Heath kits. $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

750. 2 meter transceivers and VHF accessories FS

Yahoo group: ham
Date: 2008-09-06 14:02:51 UTC
From: Ken Simpson, W8EK
Topic: 750 Message: 750

Several 2 meter transceivers, plus many VHF accessories For Sale:

Kenwood TS-711, multimode 2 meter transceiver

This unit is an FM, SSB, and CW transceiver for 2 meters.
It has 40 memory channels, and up to 25 Watts of output power,
which is continuously variable (no Hi or Low switch, but a front
panel control to continuously vary power). Of course it will scan,
and do the things one expects in a 2 meter rig. It has a GASFET
in the front end for one of the best receivers I have ever used.
The 120 V AC power supply as well as 13 V DC, is built in. The
case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. There are a few very light
scratches,
but none on the front panel. It does have one very, very minor
problem. The MHz down button does not work. This is not a real
problem, as one can use the MHz up button a couple times, and get
to the same place. It is so minor, that I didn't feel that it was worth
bothering about. With paper work, including original multicolor
sales brochure, for $425.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the
things that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one
paint spot missing, about the size of a pin head. It includes
the touchtone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even
the mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $90

Other accessory items for sale:

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection, short circuit & thermal protection and features a pair of nice large edgewise meters to measure output voltage and output current. There is an internal fan. This is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$125

Larsen VHF and UHF Mobile Antennas:

These antennas are used, but are in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet of the special mounting glue that is furnished by Antenna Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs and maybe others. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable" This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Prices do not include shipping from Florida.

Thanks.

752. Large variety of Kenwood Accessories, plus TH-215 HT FS

Yahoo group: ham
Date: 2008-09-13 13:35:51 UTC
From: Ken Simpson, W8EK
Topic: 752 Message: 752

Large variety of accessories for Kenwood Radios plus TH-215 HT For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has
memories, scan features, and the things one expects in an HT.
Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A
16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E

cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
It works fine, and is in good condition. $25

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe other
Kenwood battery packs. It works fine and is in good shape. $50

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks
great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine
and holds a charge well. It is in its original box, with paper work for
$20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the
TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in,

and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4
battery packs. It can also be used with the smaller PB-2 and PB-3
battery
packs, by putting a filler in the case. Black color. In very nice
condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with
the
smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and
is
in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt
clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Prices do not include shipping from Florida.

Thanks.

761. Amazing radio operator trip to Honduras !

Yahoo group: ham
Date: 2008-09-27 14:15:50 UTC
From: John Kirckof
Topic: 761 Message: 761

Amazing Radio Operator Work In Honduras

- this letter was originally written to another radio guy and I reuse it to give people an idea of our annual February medical trip and radio support. It starts with typical daily work but is followed by details of the mission and the IHS organization plus contact info and the approaching signup deadline at the very bottom - John (KB0UUP, 320-634-4386) (see attached map !)

The Letter .... Since we finished our recent medical mission to Honduras the end of February, many amazing events are still fresh in our minds! Paul, K9PEP, was our radio net controller and once again he was in the thick of things. We had a medical emergency where several ham radio operators helped to get a severe burn patient out of the remote village of Auka and into a burn center in Tegucigalpa. That was in the middle of seeing the many hundreds of patients we see on a ‘normal’ basis.

Bill and I were providing radio and engineering support for a medical and dental team in the remote village of Uhi. We set up an Icom IC-706 radio for HF voice communications plus e-mails via a laptop. I also connected a Ringo Ranger antenna for 2 meter ops for 24/7 communications to our nearby surgery team in Puerto Lempira. We got up and running just in time for patient referrals and other critical messages.

One of the first mornings a woman showed up in a wheelbarrow because she could not walk on her own. This is not surprising since there are no roads or vehicles in this village (to get here we must travel by boat or use a small plane). We did not have any adaptive devices on hand, so Jim, our doctor, advised her to return the following week. We called in on the 2 meter radio to see if a walker could be brought by our small airplane. When the woman came back several days later, we had a walker waiting for her. We cleared out the waiting room and waited to witness this great event. Dr. Jim helped her out of the wheelbarrow and tremendous joy spread over her face and all of ours as she began to walk!! It was the greatest feeling in the world knowing that we made a big difference in her life.

Another time, a girl about 9 years old was brought into the clinic with a fever of 104 and was shaking terribly. She had been vomiting, had a poor appetite, and was not drinking anything. We immediately sprung into action, with Dr. Jim making a consult radio call to another IHS team doctor in another village. Dr. Jim determined she had malaria. Malaria is not very common here but it does happen on rare occasions. Jack, our pharmacist, gave the young girl a combination of chloroquine and primidone for the malaria. She was given liquid Tylenol and placed in a back room with cool wet towels to reduce her fever. Dr. Jim also started an IV to keep the girl well hydrated. In a few hours she was already improving. The next day we made a house call to the hut she lived in and she was amazingly better. Her fever had gone down, she was drinking water, and even eating a little. It is a good thing we can take chloroquine as a preventative.

About the same time we saw the girl, we also had a middle-aged woman come to the clinic with a deep cut on her forehead. She said it was from a large stick but it looked more

like a machete cut to us. Dr. Jim did a great job of cleaning the wound and stitching her up but the lady must have been tough as nails. She hardly flinched through the entire procedure.

Manuel was our team dentist. He is from LaCeiba, Honduras and has come with our Uhi team for 3 years now, due to our shortage of U.S. dentists signing up. He did great, pulling many teeth during our 10 days of work in the village. That is about all he had time to do since there is no dental care available in the village. The one village nurse (who is the entire medical care for the village) has her hands full delivering babies and all the other medical care needed. I also ended up being Manuel's dental assistant when a squirming kid needed to be held still plus I helped to sterilize his equipment. The kids had no idea what was happening when Manuel came with the lidocaine needle. Some teams do fillings when time permits. This year we even had a dentist who made a few dentures on the Yocon team.

We also had a young lady show up with her baby that was about a month old. The baby was not feeding properly, causing malnourishment and was in very grave condition. Bill immediately got on the radio and again talked to Jaime, our radio operator in Puerto Lempira to send the small airplane to get our patient. Within a couple hours we had the mother and the struggling baby flown to the hospital where she now has a chance at life.

A special thanks goes to Ruth our translator who is also a nurse and helped a lot to get the baby on to the plane. She also did a ton of good work to talk with the locals plus she helped a lot with other babies and children. Thanks Ruth !

By the end of the mission, we had flown about 10 referral surgery patients from Uhi to Puerto Lempira to see Dr. Tim, our surgeon with the IHS surgical team there. Other IHS village clinic teams did the same. It is a good thing we have a small plane available to do this and radios to make it happen. Dr.Tim performed many surgeries while he was there and no doubt saved lives. That makes our medical care in that part of Honduras able to handle most anything that we see from simple cuts to important surgical care.

Near the end of the mission we had a radio call asking if we had any spare reading glasses. We did so the small plane came in, got them, and took them to another village where IHS had an Eye Glasses team. They saw many hundreds of eye patients and distributed many prescription and reading glasses. It turns out no one had ever been in that location before to give out glasses. We also thank the Lions clubs that collect the many glasses for us!

…..I could go on and on with stories of our daily work but I must also tell you about International Health Services, the great organization that makes all this possible…..

Are you interested in volunteer radio or medical work or even translating for a team? Are you looking for a worthy place to give support or to donate medical or radio gear? If you are considering any of these, you certainly have come to the right place. Joining our mission next February is easier than you think. We are always in dire need of radio operators, translators, dentists, doctors, anesthetists, nurses, optometrists & eye specialists, and pharmacists… anyone with medical skills. We also need engineers and many helpers. Please consider this.

What we do... about 100 volunteers will go to Honduras. each year it is the last two weeks of February. This year the dates are 13 February through 1 March, 2009. Each year we usually have 2 surgery teams and about 6 or 7 medical/dental clinics. In addition, we usually send 2 or 3 eyeglasses clinic teams. (see the attached map.. it is also on the IHS

web site in the NewBreak newsletter)!) We would have more teams if enough people signed up. The village medical clinic teams typically have two doctors, one or two nurses, a pharmacist, a dentist, sometimes a dental assistant, a ham radio operator, an engineer, 1 or 2 translators, and 2 or 3 general helpers. Depending on the qualifications of those who apply, sometimes a person may do two positions. I am a ham radio operator but I usually do the engineer job and some general helper tasks as well. The engineer work is just a basic task of keeping the small generator full of gasoline and other
basic handy-man tasks. In that capacity I have repaired many things including door handles, installed shower curtains, put up a clothes lines, repaired LP cooksets, and other basic fix-it tasks besides keeping my own gear in good repair. For the general helpers and others there is a LOT of miscellaneous work to do to assist the doctors, dentists, and pharmacists to keep them going in a busy day. So, if you have someone who wants to go with you (spouse/friend) they can usually fit on to the same team as you. Once we get to a village, we all tend to share the work so we all get a hand in doing many different things. Each village is different but generally we will have a medical clinic open for about 10 full days plus at most sites we will also have a dental clinic. Most years we will also have two surgery sites. At those locations we will have one or two surgeons, two O.R. nurses, an anesthetist, a radio person, one or two general helpers
and in some locations, an engineer. For radio operators plus the doctors, nurses, and other medical folks, we do need to have copies of licenses in advance to give to officials in Honduras to get everyone certified for operations there. Normally, copies get sent in with applications and when the October logistics team travels to LaCeiba, Honduras, all the papers are filed. That is good, all we do is turn in the paperwork and the rest is taken care of. We also need many helpers so you do not have to have a license to go.

Where do we go... we have a variety of locations (see map!). We have a couple medical/dental clinic teams that go to the mountain areas of central Honduras. There, it is semi-modern (relatively speaking) usually with local electricity available some of the day. Other clinic teams are in small remote villages in the eastern 'LaMosquitia' region where there are very few roads and usually no phones or local electricity. In these places we bring our own generator and a radio for communications. We do use a few trucks and buses but our transportation is mostly by large and small airplanes. The Wings of Hope and other organizations donate the use of their small planes during the days of our mission. Because of this, we can bring all the supplies we need such as our food, gear, personal items, and medical supplies. We have been doing this for 27 years so we have a good idea what we need. We send out detailed Orientation information to give
you a lot of detailed info including what IHS provides each team and each team member. Do note that on the application, you can specify the area of Honduras you want to go to, if you want, plus you can put down who you want to be with.

Costs... the project fee is about $550. This is actually a bargain since this is less than half of the total average cost to IHS to send someone. With that fee, and many large and small donations from organizations (Lions, Rotary, churches) and friends, we are able to take care of all of your basic expenses for the entire two weeks you are on the mission. It also helps us to buy needed medical and pharmacy supplies. It is only logical to bring the necessary medications to treat what the doctors find with the patients they see. On the average, each of the clinic teams will receive over $4500 in medical supplies. From your project fee, you receive a lot. From the time you arrive in LaCeiba, all food, transportation, and basic housing are taken care of. When in small villages, it is obviously NOT in a Raddison Hotel but it is in a clean facility of some type. For example, many choose to stay with a host family while we are in LaCeiba, our
meeting point. They are VERY nice homes and are close to the Hotel Paris, our headquarters

and radio net control during the mission. The other expense to participants of the mission is transportation from our homes in the U.S (or wherever you live), to LaCeiba, Honduras and return. Some people choose to make their own plans because there are many great sites to see and places to go before or after the mission. Diving or checking out the beach on Roatan Island, visiting the Copan Mayan ruins, visiting a rain forest park, white water rafting, sightseeing in the mountains, or just shopping for bargains are some things people do. 90% of the IHS people do some little venture, usually after the mission. Obviously our main purpose is not to just go and have fun, we have very important work to do in the villages, etc. However, after 2 weeks of work it is nice to take a day or two and relax. Also note that flights to San Pedro Sula can go on Delta
via Atlanta, Continental via Houston, and on American via Miami so you have some options as to days to travel and getting a good price. I do have a handy "help" letter that describes how to get your airline tickets to and from Honduras.… just let me know if you want it and I can e-mail that to you. Karen and I lived in England for four years and did a lot of travelling, but I can honestly say, this is the best two week trip we ever do for the price, even though it is work.

What is happening right now. We are actively seeking applications right now. We only have about half of the 12 or so we will need! In a few weeks we will be putting applicant names on team rosters. From that we will start getting supplies for our December IHS container shipment to Honduras. The container will go with food, medical supplies & equipment, plus any radio and personal gear you want to send ahead. This is handy so you do not have to drag it all through the airport to Honduras. Many such things get done prior to February on a time line that is important to get all our gear, supplies, and participants to Honduras and get everyone well informed about the mission.

Shipping items to Honduras….. yes we can. Dole Fruit graciously lets us use several of their containers to send down our gear, personal items, purchased medical supplies, food, and lots of medical equipment (for hospitals and clinics). We will send down our IHS radio gear plus any donated and other replacement gear. Chris, our shipping guy, buys a lot of the food for each team. He will buy soups, and a lot of dehydrated type things that actually cook up pretty good, at least it is better than beans and rice every day. Most of that is shipped in the container although some beans and rice, plus a lot of other fruits and vegetables get purchased in LaCeiba on the first day down there. Each year we also get generators and such things purchased or donated and they get shipped as well. So, if you want to send some clothes or whatever, so you have less to drag through the airport, that is fine. Your personal box or tub needs to be sent to our
collection point in Minneapolis by the end of December. We have a simple inventory sheet to do this. Many people send clothes and other items that they just give to the local people when they leave, so their suitcase stays light coming home, too.

More info... IHS has a small web site with some basic info for all at: www.IHSOFMN.org I suggest looking at the Newsbreak newsletters for a lot of personal info and stories of past experiences. The 2005 Newsbreak also have VERY HANDY map that does a great job of showing the overall IHS mission and the types & locations of teams used. This site should give you some extra info plus application forms. I also have many materials for you including a great computer CD with lots of info on it for people signed up to go for the first time. The photos (hundreds of them) and journals on the CD show typical medical/dental teams in villages plus eye care and surgery teams. The CD is packed with other info including a Power Point presentation that gives a lot of detail in our work. I often use the CD as orientation materials for group presentations and for first time applicants. If you want any of these items, just let me know what to send and where

to mail them and I will send them to you right away. Do note the critical timeline we have for signing up. After, the first week of October, we will only take applications for empty spots on teams.

If you have any questions related to other jobs on a team, let me know and I can discuss them with you or I will get you in touch with another Director or someone who can get you all the latest info for that job.

I do ask that whether or not this mission works for you, consider passing the word along… we can always use a few extra folks and support to help us out. If it is not this year, we can plan ahead for next time. This is especially true for doctors, nurses, translators, dentists, and other medical folks who we have a tougher job in recruiting.
Most new folks have called me directly, before signing up for a mission. I highly recommend that you do that to start with. My phone number is: 320-634-4386. Write whatever questions you have, if you prefer that over a phone call.

I and the very poor of Honduras thank you so much for an interest in this very wonderful and rewarding work!

Best regards,

John Kirckof

762. VHF Wattmeters and antenna tuner FS

Yahoo group: ham
Date: 2008-09-28 12:37:32 UTC
From: Ken Simpson, W8EK
Topic: 762 Message: 762

VHF Wattmeters, and Antenna Tuner For Sale:

MFJ 921 antenna tuner for 2 meters and 220 MHz,
combined with a wattmeter and SWR bridge

This unit will match your 2 meter antenna so that most any
2 meter antenna will show a 1:1 SWR to the rig. Ditto for the
220 MHz band.

It is also a wattmeter with 30 Watt and 300 Watt scales,
although the tuner is only rated for 200 Watts. An SWR bridge
is also included. SO-239 connectors in and out.

This particular unit is in excellent condition. I can not find a
scratch on it, and of course it works fine.

With paper work for $50.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter
by about 3 feet. SO-239 connectors in and out. This
particular meter works great, looks fine and includes
paper work for $ 40.

Prices do not include shipping from Florida.

Thanks.

764. Icom HT and other Icom items FS

Yahoo group: ham
Date: 2008-10-18 12:32:02 UTC
From: Ken Simpson, W8EK
Topic: 764 Message: 764

Icom items For Sale:

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.

Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has adjustable PL (subaudible) tones
in it as well.

This particular unit works 100% and looks very good.
There is some slight wear, but it is minor.

Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so

that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-12 hand mic with up/down switches
This electret mic is used with most of the modern Icom rigs
that use a round 8 pin mic plug, including the Icom 25A, 28H,
38, 45A, 48, 77, 78, 120, 229H, 271, 275, 290, 375, 451,
471/A, 475, 505, 575, 707, 718, 725, 728, 729, 735, 736,
737/A, 745, 746, 751/A, 756/PRO, 761, 765, 775, 781, 820H,
821H, 900, 901, 970, 1201, 1271, 1275, 2400, 3200, 3210
and maybe others. It has an up and a down switch for changing
frequencies, changing memories, etc.
This one works 100% and looks like new. It has lived most of
its life in a drawer!
With paper work for $40.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works
with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400,
2410, 2500 and others. This mic also has an up and a down
switch on it. Basically, it is like an HM-12, but with DTMF pad
and memories added. These are about $170 new, so that
gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it
has ever been used. $95

Prices do not include shipping from Florida.

Thanks.

767. Many HF Accessory items FS

Yahoo group: ham
Date: 2008-10-25 12:18:26 UTC
From: Ken Simpson, W8EK
Topic: 767 Message: 767

Extensive list of HF and related accessories For Sale:

B & W Model 595 "Protax" Coax Switch
This is the switch that is in a rectangular box about 9
inches long, with seven SO-239 connectors coming out
of the back. It is B & W's top of the line "Protax" series,
which means that it grounds all unused antennas. It will
switch up to 6 antennas.
This one works 100% and looks really great -- close to
new condition.
With the paper work for $45.

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

Unadilla W2AU "ANsulator" For Sale:
The Unadilla W2AU ANsulator Antenna Center Insulator is
handy for building all sorts of dipoles, quads and yagi antennas.
It includes a built in lightning arrestor. Also included is a top
eye-bolt to support the antenna. There are strong eye bolts
and spade lugs on either side for the antenna wire. It has an
SO-239 connector, designed to accept a standard PL-259
for easy feedline connection.
This particular unit appears to have never been used, but since
it came from a silent key estate, I can not verify. It is in its
original
box, with paper work. Not a scratch on it. $12

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Heil "Traveler" Headset / Boom Microphone For Sale:
To quote the Heil Sound Web Site,
"The Heil Traveler is a unique, high-performance single-
sided headset that's ideal for portable and emergency
operation. Compatible with over 100 different radios,
the Traveler provides unmatched versatility for a wide
variety of Amateur Radio applications."
This is a combination of a headphone and a boom
microphone. Of course it is engineered to obtain
exceptional specs, as only Heil can do.
This particular unit has the Heil HC-5 mic element,
which is considered the "rag chew" high fidelity element.
The unit works fine and looks very close to new.
$65

Headphones:

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $23

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $16

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin

connector. $20

CW items:

Bencher BY-2 Paddle
This is the "All Chrome" Bencher, including the chrome
base. It is in nice shape, and of course has the nice
Bencher touch. $80

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Generic Code Key
This is a very generic code key. It is not fancy, but is adequate
to get the job done. It is mounted on a nice wood base that is
finished and looks very nice. $18

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

TenTec Accessories

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

TenTec 288, 1.8 KHz filter
1800 hz for narrow SSB or wide CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, 20, 17, 15, and 10 meters.
Non-WARC band modules are $65 each.
WARC band modules (30 and 17 meters) are $70 each.

TenTec 296 mobile mount for 555 Scout
Nice clam shell type of mount in extremely good condition.

$50

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

768. Data Logger

Yahoo group: ham
Date: 2008-11-07 14:47:13 UTC
From: Paul McInnish
Topic: 768 Message: 768

IoTech ChartScan/1400 Portable 16 channel data recorder. New... never been used commercially, used at one trade show to demo temperature changes and chart the changes on a notebook computer. Used a ham rig to demo the heat changes between transmit, standby and receive (very simplistic demo but it was neat). You can set it up to monitor over the internet!

Here is the link to the IoTech web site to review the recorder:
http://www.iotech.com/catalog/temp/chartscan.html

The one I have has different connectors than those shown on the IoTech web site... each channel has different connectors (BNC & two other styles for easy mating).

When you go to the web site, scroll down and look at the price on the logger and the modules!!! The first two modules listed under the basic unit is included. Make me a reasonable offer and its yours!

I have one thermal probe for one channel, software, etc. Updated software is free from IoTech and updated manuals also available from IoTech web site (free).

Had it sold but buyer backed out... no reasonable offer refused!

769. ARRL Handbooks for sale

Yahoo group: ham
Date: 2008-11-11 17:17:21 UTC
From: Paul McInnish
Topic: 769 Message: 769

37 ARRL Radio Amateurs Handbooks for sale! If out of metro Atlanta area, will ship from zip 30045... CAUTION: Would be a heavy shipment! Prefer pick-up!
Year: 48, 51, 54, 55, 56, 67 (hardbound), 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 85, 86, 87, 88 (hardbound), 99; condition from absolutely mint to used and average.

$150.00 + shipping and SELLING AS PACKAGE, ONLY! All or none! Downsizing & do not want to fool with one-two-three at a time!

Some of these are rare!!

Note that this is an average of $4.00 each!!!

TNX & 73,
Paul
K4BET
Cell: 678-429-2124 (If no answer, leave message...)

PS: You will also "acquire" some other ham radio books with this package! No list made... just will be a package that will be pulled from my book shelves and thrown in. For the price I am asking, please don't ask for a "freebie" list!

771. 2m, 440 MHz HTs, 2 m mobile and many accessories FS

Yahoo group: ham
Date: 2008-11-12 22:41:52 UTC
From: Ken Simpson, W8EK
Topic: 771 Message: 771

VHF & UHF HTs and mobile rig, plus many accessories For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has memories, scan features, and the things one expects in an HT. Subaudible (PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can be powered by the PG-3 E cord from 13 V DC to provide full 7 watt output. This one is in very nice condition. It includes a good PB-2 standard battery, rubber duck antenna, and paper work for $75.

Kenwood SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together. It works fine, and is in good condition. $23

Kenwood PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks great, and holds a charge fine. With paper work for $25

Kenwood PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine and holds a charge well. It is in its original box, with paper work for $20

Kenwood PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Kenwood BH-2 Belt Clip - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $20

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.
Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has PL (subaudible) tones adjustable
from the front keypad in it as well.
This particular unit works 100% and looks very good.
There is some slight wear, but it is quite minor.
Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so
that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works

with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it has ever been used. $95

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and about 7 watts in low power. The rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touchtone microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one paint spot missing, about the size of a pin head. It includes the touchtone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included, although the box looks much worse than the radio. Even the mic clip, and a bag of screws are included, as is the original multicolored sales brochure. $90

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter and 220 MHz VHF bands. A web site says it is the same as the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original package from when I bought it
20 or 25 years ago

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package from when I bought it
20 or 25 years ago

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Prices do not include shipping from Florida.

Thanks.

772. Kenwood SP-430 speaker, plus other Kenwood accessories FS

Yahoo group: ham
Date: 2008-11-22 18:41:45 UTC
From: Ken Simpson, W8EK
Topic: 772 Message: 772

Large variety of accessories for Kenwood Radios For Sale:

Kenwood SP-430 External Speaker
The Kenwood SP-430 external speaker provides low-distortion,
clear sound and high intelligibility in any mode. It is made
in an all metal cabinet that is tuned for best speech
intelligence. This is an 8 ohm speaker which has two screw
terminals on the back for input, although the original cord
with an 1/8 inch plug is also included. There is a snap-out
bail that will slightly slant the speaker upwards, if
desired. The SP-430 is physically 5 x 4 x 9.5 inches in size.
It is made to match the TS-430, TS-440, TS-711, TS-811, and
many other Kenwood rigs.
This on is in extremely nice condition. There is one very, very
slight scratch that can be seen if it is held just right.
Of course it works 100%.
Paper work is included for $75.

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has
memories, scan features, and the things one expects in an HT. Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E
cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
Two are available. Both look very nice and work 100%.
One has a cord that is slightly stretched. It is $18.
The other has a perfect cord, and is close to new condition.
It is $25.

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks
great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine
and holds a charge well. It is in its original box, with paper work for $20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Original Operating Manuals for Kenwood rigs For Sale:

All manuals are in very nice condition, for Kenwood
radios and accessories, unless stated otherwise.
All are original and are not copies.

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221 / 421 mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile
FM transceivers for 2 meters, 220 MHz, 440 MHz, and
1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $12

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $12

Operating manual for TR-2600, 2 meter HT $12

Service manual for TR-2600, 2 meter HT $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15

Service Manual for TW-4000 dual bander $20

These are Kenwood Original Manuals only.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 775 Message: 775

CW and related items For Sale:

Special Deluxe CW Key
This first key is extremely nice, and is special in its mounting. The key itself is a Nye Viking Speedex oval base 310-001 key, which sells new for $58 by itself, and has very nice action. What separates this key from any others is the base it is mounted on. It is solid metal about 6 inches long and 5 inches wide and 3/4 inch thick. It weighs about 6 pounds, so it will not move across the desk when you use it. There is a nice beveling around the top. To put it another way, this is a specially machined base, made for the key. The metal appears to be copper, although it is not shiny copper, but instead has a "patina" to it like antique items. A layer of cork covers the bottom to protect your operating table. There is a cable with a metallic shielded 1/4 inch plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5 and KR-20 A keyers, but does not have any electronics inside. It also has a small button on the top of the case that can be used as a straight key, but can also be used as an aid to tune up your rig.
It is designed to be used with your own keyer, but many people have put an electronic keyer inside the shielded aluminum case which is about 4 x 4 x 2 inches in size, plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color that matches the early Triton series of rigs, plus the Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8
As above, but 1/8 inch plug. $8

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

Code Tapes For Sale:

The following code tapes are from a silent key estate. They
are not original tapes. I have no idea where he got them from
-- if they came from the internet, off the air, or what. I do
know that they are code tapes that have good code practice on
them, as I have listened to portions of each tape. They all
appear to be 90 minute tapes. The names I am listing is what
is written on the tape.
I am selling them for basically the cost of the tape - $4 each.

Novice Class Prep - Random Runs

Novice Class Prep - Simulated Tests

10 WPM Plateau Buster

General Class 3 to 13 Speed Builder

General Class Speed Builder Tape - 13 WPM

Gordon West - 13 WPM

General Test

CW Related books:

Ameco "Mastering the Morse Code"
First Edition, 1957 $8

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code

practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

Two & Three Position Coaxial Antenna Switches:

B & W Model CS-3 G (formerly 593)
This switch is in a rectangular box, with four SO-239
connectors coming out of the back. It will switch 3
antennas, grounding the antennas that are not in use.
It works great, and looks very close to new.
With paper work for $40.

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions
NOT grounded. Rectangular with three connectors out the back,
and the common out the front.
It works fine and looks great. $15

SWR Bridges:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / black enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

TenTec Scout 555 and Argo 556 accessories:

TenTec Scout 555 / Argo 556 Band Modules
These are the modules that plug in to either the TenTec
Scout or Argo, to give additional band coverage.

Band modules are available for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70.

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Heavy duty power supply:
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt
range with a multi turn pot. It has crowbar over voltage
protection, short circuit & thermal protection and
features a pair of nice large edgewise meters to measure
output voltage and output current. There is an internal
fan. This is a very healthy, heavy duty, deluxe supply!
$135

Headphones:
Generic headset
Smaller ear pieces just over an inch in diameter, so they
do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Kenwood PC-1 A phone patch/digital interface
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
With paperwork for $40

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $28

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Prices do not include shipping from Florida.

Thanks.

Extensive list of HF and related accessories For Sale:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to check your
field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions
NOT grounded. Rectangular with three connectors out the back,
and the common out the front.
It works fine and looks great. $15

Heavy duty power supply Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range with
a multi turn pot. It has crowbar over voltage protection, short
circuit & thermal protection and features a pair of nice large
edgewise meters to measure output voltage and output current.
There is an internal fan. This is a very healthy, heavy duty
supply!
This particular unit works 100% and looks very close to new.
$125

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.

I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It

weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5
and KR-20 A keyers, but does not have any electronics inside.
It also has a small button on the top of the case that
can be used as a straight key, but can also be used as an
aid to tune up your rig.
It is designed to be used with your own keyer, but many
people have put an electronic keyer inside the shielded
aluminum case which is about 4 x 4 x 2 inches in size,
plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color
that matches the early Triton series of rigs, plus the
Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,

and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

TenTec Accessories:

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70 each.

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. These are about $60 new; this one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency
of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of
AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end. This is an
older model that seems much heavier duty. It weighs almost twice as
much as the newer model, and looks like it would take more power.
It likely was made in the days that plate modulated AM was the rule.

$30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will
handle 1500 Watts. SO-239 connector on each end. This is the latest
model B & W filter. It is in very nice condition; it looks very
close to new. $ 40.

Prices do not include shipping from Florida.

779. Orlando Hamcation info - Feb 12, 13, 14, 15,

Yahoo group: ham
Date: 2009-01-24 20:46:03 UTC
From: Ken Simpson, W8EK
Topic: 779 Message: 779

Information about the Orlando Hamcation, February 12, 13, 14, 15:

If you have never been to the Orlando Hamcation, you need to think about attending. It is now the second largest hamfest in the country, fast approaching the size of Dayton. While Hamcation is technically Friday, Saturday, and Sunday, the fun really gets started with most tailgaters moving in on Thursday. It seems you can find most anything you would want with 100's of vendors -- maybe even approaching 1000. Everything from the most ancient boatanchor to the most modern rig will be there.

In addition, Florida is the place to be in February, as opposed to the "Cold North". There are plenty of activities for the family as well, in the central Florida area.

Swap tables at the Orlando Hamcation are still available at the present time.

If you would like a table in the swap building, you can contact Mort, WA2ARS, or Roberta at hamcation@..., and make your reservation. Remember if it is cold or rainy outside in the tailgate section, it will be warm and dry inside the swap building.

More information is available at
http://www.hamcation.com/

See you there.

Thanks.

780. Many Ham Publications FS - Vintage and Modern

Yahoo group: ham
Date: 2009-01-29 14:55:26 UTC
From: Ken Simpson, W8EK
Topic: 780 Message: 780

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, published by ARRL,
unless listed otherwise.

Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

Understanding Amateur Radio
1977, no edition number listed, $8

How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

The Mobile Manual, 1955, First Edition,
part of spine binding missing, but otherwise is in good
condition, with all pages intact, and in binding properly,
contains a large number of very vintage equipment ads, $15

Antenna Related Books:

Antenna Anthology, 1978, First Edition, $8

Antenna Compendium, 1992, First Edition, like new, $15

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Satellite Anthology, 1999, 5th edition, like new, $10

Weather Satellite Handbook, 1990, 4th edition, like new, $10

Operating an Amateur Radio Station, 1983, 61st edition, $3

FCC "Interference Handbook", 1986 edition, $4

Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Ameco Code Course
This book might be made to go with the Ameco Code records.
There is general information about the code, but portions
of the book list what is being sent by the code records.
There is also a diagram about how to make a code practice
oscillator from a 50C5 and 35W4. $5

ARRL Code Kit Book, 1976
This is the booklet only, that originally went with a kit
of cassette tapes. This has the info contained on the
tapes listed in it. $2

Code Tapes:

All are original tapes in great condition, in their
original containers.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set to take one from 15 WPM up thru 20 WPM;
Paper work is included. $12

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $8

Vintage ARRL Licensing material:

781. 2 meter rigs and accessories FS

Yahoo group: ham
Date: 2009-01-31 15:00:21 UTC
From: Ken Simpson, W8EK
Topic: 781 Message: 781

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter
and 220 MHz VHF bands. A web site says it is the same as
the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can
be used on VHF rigs as well. It is rated for under 1.1 to 1

SWR to 30 MHz and usable up to 650 MHz with under 1.3 to 1
SWR. PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used
on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400,
TR-9000, TR-9130, and others. Up-down switch on top. Of
course the connector could be changed to an 8 pin connector
to use on other rigs. This one works 100%, and includes
paper work in the original box for $45.

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.

It works fine, and looks good also. $25

Icom charger and battery:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Rebuilt Battery for Icom IC-2AT, IC-02 AT, etc.
Equivalent to a BP-5 plus.
This battery will work on an Icom IC-2AT, 3AT, 4AT, 02AT,
03AT, 04AT, and probably other Icom HTs. It will also
work on many Radio Shack HTs (the ones that use the Icom
battery packs).
This pack was rebuilt about 6 weeks ago, and is a 7.2 Volt
pack with 1600 Mahr capacity NiMH batteries. That means
it will produce "normal" power with your HT, but lasts about
5 times as long as the original BP-3 battery pack. $30

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood SMC-32 Speaker Microphone
Fits TH-215, 225, 235, 425, and many others. It has a
right angle, "L" shaped connector on it.
This one works fine and looks really great. $25

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and
PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with the belt clip

$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Prices do not include shipping from Florida.

Thanks.

782. Antennas and many antenna related items FS

Yahoo group: ham
Date: 2009-02-21 12:25:40 UTC
From: Ken Simpson, W8EK
Topic: 782 Message: 782

Antennas and antenna related items for sale:

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on beam antennas or on dipoles. HyGain used it with the TH-6 Tribanders (plus many others), but it has many more uses on most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W average with less than 2:1 SWR. Power rating goes down with an increase in SWR.
It can be mounted directly to the boom of a beam with a U bolt, or it can be hung as an inverted V, or used as a straight dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper work, for $40.

Wattmeters and SWR Bridges:

Heath HM-15 SWR Bridge For Sale:
It is an HF SWR Bridge, with SO-239 connectors on the back. The front has the meter on the left, and two knobs to the right. It is the same size as the HD-15 phone patch,and is made to compliment the Heath SB line.
This one works fine and is in extremely nice cosmetic shape.
Paper work included for $20.

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read both forward and reverse power at the same time, and hence SWR also. It is for 1.8 thru 60 MHz, and has scales for 300 Watts and 30 Watts full scale. If 12 V is applied, the meter is back lighted.
This particular unit works fine, and looks fine also.
With paper work for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and reflected power in 2 ranges - 30 or 300 Watts. It also reads SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220 MHz. It has a binding post for the field strength antenna.
It is in a nice eggshell white and black case.
This one works fine and looks great also.
With paper work for $30.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large 3 inch Cross Needle Meter reads SWR and peak/average for forward and reflected power. Power ranges: 200/2 Watts forward and 50/5 Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors. There is a switch for dial illumination (requires 12 V DC). This one works fine and looks nice with its black face. These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel.
This particular switch has the optional B & W plate installed that has the antennas labeled with 28, 21, 14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which has a gain of about 3 db. The coil can be used with any of the NMO mounts (made by Motorola, Larsen, Cushcraft and many others). The antenna is approximately four feet long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet. Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and many others will fit on it. It includes coax, with an N connector on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Coax connectors and adapters:
Prices are per connector.
Several of each are available.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

784. 2 meter mobile, HT, and many accessories FS

Yahoo group: ham
Date: 2009-03-07 15:17:46 UTC
From: Ken Simpson, W8EK
Topic: 784 Message: 784

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters
This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touchtone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it
has memories, scan features, and the things one expects in an HT.
Subaudible (PL, CTCSS) tones are built in and can be adjusted from
the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can
be powered by the PG-3 E cord from 13 V DC to provide full 7 watt
output. This one is in very nice condition. It includes a battery
tray in which you can add six AA cells. This permits use of alkaline,
NiMH, or NiCad cells. Also included is a rubber duck antenna, and
paper work for $75.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large
3 inch Cross Needle Meter reads SWR and peak/average for forward
and reflected power. Power ranges: 200/2 Watts forward and 50/5
Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors.
There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.

This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and looks OK also.
$40

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Icom charger:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.

It is in good condition for $17.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Kantronics "Interface II" Terminal Unit
This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."
It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.
These were originally about $270. You can get this one with
the paper work for only $30.

Prices do not include shipping from Florida.

Thanks.

HF and related accessories For Sale:

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.
This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on
beam antennas or on dipoles. HyGain used it with the TH-6
Tribanders (plus many others), but it has many more uses on
most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W
average with less than 2:1 SWR. Power rating goes down with
an increase in SWR.
It can be mounted directly to the boom of a beam with a U
bolt, or it can be hung as an inverted V, or used as a straight
dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper
work, for $40.

Hallicrafters S-120 Shortwave receiver

Hallicrafters S-120 vintage shortwave radio receiver
from the 1960's. Four Bands covering 550 KHz to 30 MHz.
It has a built in speaker and antenna for the broadcast
band. An external wire antenna is needed for the short
wave bands.
The receiver is working fine.
Signals are picked up on all four bands.
Cosmetically, it looks very, very, very nice. I can not
find a scratch on it, and all of the chrome looks great.
Even the telescoping antenna that was included with it
originally is still with it, as well as the paper stickers
glued inside and on the bottom of the cabinet. Of course
the fiber board rear cover is also on it.
Paper work is included for $95

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek QF-1
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.

With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

Yaesu Log Book
Dark Red color, with picture of FT-1000 on inside.
International prefixes, and DXCC Country list also included,
along with about 50 double sided pages for logging.
Never used. $8

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

These were originally about $270. You can get this one with
the paper work for only $30.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off

frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. $40

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.

Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

HF and related accessories For Sale:

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge

This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.

The MFJ-812B also reads relative field strength from 1 to 220
MHz. It has a binding post for the field strength antenna.

It is in a nice eggshell white and black case.
This one works fine and looks great also.

With paper work for $30.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original code tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

HF mobile antennas:

Hustler "Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info

is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

790. 2 meter / 440 MHz Ham Rigs and many accessories FS

Yahoo group: ham
Date: 2009-04-18 14:46:35 UTC
From: Ken Simpson, W8EK
Topic: 790 Message: 790

For Sale:

VHF and UHF (2 meter and 440 MHz) transceivers and accessories

Dual Band HT:

Radio Shack HTX-420, 2 meter / 70 cm Dual Band FM Transceiver

Transmits on the 2 m and 440 MHz band, and receives on 137 to
174 and 420 to 512 MHz on FM, plus 108 to 137 MHz AM for the
aircraft band. It also has SAME alert for the weather radio
portion. A compass is built in. Power output is adjustable
with 3 levels of about 4 W, 1 W, and .2 W. Cross band operation
is also possible. Of course it has the normal memories, scan,
PL subaudible tones, and all the other things one expects in a
modern HT.

A 7.2 V, 1200 mahr Lithium Ion Battery is included, as is a
rubber duck, wall charger, and operating manual. In addition,
it has a nice desk stand to make it easier to use at home.
The HT works great, and looks very close to new. $200

Spare Battery for Radio Shack HTX-420 dual band HT:

W & W LC-343 L, Lithium Ion Battery for Radio Shack HTX-420 HT

This Lithium Battery is 7.2 volts at 1300 mahr, and is made to
fit the HTX-420 dual bander. It can be charged with either a
wall charger or desk charger.

This particular battery works great. My guess is that the now
silent key used it only a couple times. It holds a charge well,
and functions 100%. It looks very close to new. $32

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touch tone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. It includes
the touch tone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included.

Even the mic clip, and a bag of screws are included, as is
the original multicolored sales brochure. $89

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz.
This one works fine and looks great also.
With paper work for $30.

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery

packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Accessories for Kenwood TH-215, 225, 235, etc. HTs:

PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and others. It has a filter built in, and permits high power operation of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. Very nice condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessory items for Kenwood TR-2400 and other HTs:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware - $8

Original Operators manual for Kenwood TR-2400 - $15

Wrist strap - I think it fits most Kenwood (and likely other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This can be used with any HT that has a BNC connector. $5

Santec HT items:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather

shoulder strap has not been used. $22

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips and Wrist Straps for various HTs:

Belt Clips for various HTs - All include hardware.
$8 each
Kenwood BH-2 for TR-2500, TR-2600, TH-215, TH-225 and others
Kenwood TR-2400
Motorola

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

I have a Spanish version of the Operating Manual
for the Kenwood G-707 dual band transceiver available.
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

Yaesu Items:

Yaesu MH-12 A2B Speaker Microphone
This speaker microphone has a 3.5 mm and a 2.5 mm plug
on it, molded together, as is used on many, many HTs.
It will fit many Yaesu, Icom, Alinco, Radio Shack and
other HTs.
This one works fine, and looks very close to new.
I can not find any defects on it. $20

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Wrist Strap for Yaesu FT-209 - $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Antennas for 2 meters, 220 Mhz, or 440 MHz:

Larsen VHF and UHF Mobile Antennas

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.
It is in good condition. $17

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $22.

Avanti / Antenna Specialists "On Glass" mobile antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 7 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3

1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4

As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sams, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

Original Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

These are Kenwood Original Manuals only.

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

793. Feb. Honduras medical mission update - A huge success !!

Yahoo group: ham
Date: 2009-06-02 14:39:16 UTC
From: John Kirckof
Topic: 793 Message: 793

2 June Report

IHS (International Health Services) had another great year of medical mission work in Honduras! In February we sent about 120 medical and support people to 8 team locations. Most were in very poor villages where there is NO health care available. During the 2 weeks of work, we saw over 10,000 patients ! We also handed out about 1500 prescription and reading glasses plus many pharmacy items to those in need. The surgical sites did over 100 needed surgeries. Quite an accomplishment.

A large part of the huge succces we had in caring for the desperatley poor was the huge prepararion work done last summer and fall to recruit the many workers plus to gather all the needed supplies for each of the team sites. We are now starting this important prep work again for next February's medical trip. In future e-mail reports, we will mention the need for many medical professions plus quite a few support people (interpreters, engineers, radio operators and many general helpers). Watch for those e-mail updates.

This year, we ran 6 medical clinics, 6 dental clinics, 3 surgical sites, and 2 eye glasses clinics. The medical clinic teams were in LaEsperanza, Marcovia, Yocon, Lisangnipura, Uhi, and on the Kruta River. The dental clinics were in Raya, Uhi, Lisagnipura, LaEsperanza, Marcovia, and on the Kruta River. The surgical sites were in LaCeiba and Puerto lempira. The eye glasses teams were in Marcovia and Puerto Lempira.

If you want more info, email me at JMKKEK@Yahoo.com

General Mission Info: For those of you who may not have gone or read any past information on our medical trip, here are the basics. Each year, during the last 2 weeks of February, IHS will send 10 or more medical, dental, surgical, & eye glasses teams to Honduras. We will also send ahead 1 or 2 container shipments to get all the needed medical supplies, team food, and pharmacy supplies there. Each year, our hope is to have about 7 or 8 medical clinic teams to include a dentist on each team. We also hope to have 2 or 3 surgery teams and 2 or 3 eye glasses teams. We try to send several support people (interpreters, engineers, radio operators, and general helpers) on each team to help us provide quality care to all we see. Each year we see about 600 to 800 people (average) at EACH of the 8 or so clinic sites. So, we do touch many lives and most are people who have NO medical or dental care available to them except our once a year visit. NOTE that our biggest need right now (besides medical folks) is Spanish interpreters.

You can see a glimpse of what we do at: www.IHSofMN.org (check out the 2008 NewsBreak newsletter!) We are based in the Minneapolis metro area but participants are from all over the US and many other countries. There are IHS Board members and others who you can talk with to learn more.

Give me a call or send me an e-mail if you are interested or want more detailed info.

The needy of Honduras and I thank you.

794. Pharmacists, interpreters, radio operators and many others are needed for Feb medical mission

Yahoo group: ham
Date: 2009-07-06 16:27:32 UTC
From: John Kirckof
Topic: 794 Message: 794
Attachments: 1 described; binary payloads are missing from this source WARC

Are you a pharmacist, physician, radio operator, interpreter or a support helper and are willing to participate with a medical team going to Honduras? If so, we are in critical need of your help AND it is easier to go than you may think!

We will need at least 4 more pharmacists and as many radio operators to go to support this important medical mission trip to very needy villages in some poor areas of Honduras. We also needdoctors, dentists, nurses and MANY general helpers to complete our teams. We have made detailed plans to simultaneously send about 10 medical teams to these sites for our next medical mission. If this seems right for you or you have questions, call me right away or reply directly to my e-mail address (info below).

This past Feb. mission was a huge success. Check out the latest Newsbreak newsletters at: www.IHSofMN.org Note the attached team map that shows very well the types of teams and locations we went to. In Feb, over 120 people participated on our teams and the results were great..… literally thousands of people were helped!

Detailed Info: Right now IHS (International Health Services) is in critical need of medical folks, Spanish interpreters and other support people to go on a 2 week medical mission trip to Honduras. It is a large undertaking with about 10 teams planned to go at the same time for the 13 Feb to 28 Feb, 2010 trip. That may seem like quite a ways off but careful planning is essential for a successful mission. We have started to collect supplies and meds for about 6 or 7 medical/dental clinic teams plus several eyeglasses and surgical teams. This means about 100 people will go counting all the support and worker people who go also (many spouses and friends go in this way). We have done this for 28 years so we have all the logistics planned out. This includes a container shipment to send supplies, meds, radio gear, and any personal items of yours (if you want) ahead of time. We are a totally volunteer group but IHS does help cover many of the expenses in going.

The medical duties will vary some depending on the team location. How many teams of each type we will have totally depends on how many people sign up and what their profession is. We do most the sign ups early so that a small group can go to Honduras the end of October and line up the team locations based on the skills of the medical folks that have signed up. We get many applications during the summer, most well before 1 October. So call me ASAP if interested. We have had a fairly good turn out so far for dentists and most support (engineers, helpers, & radio) folks. However, I know of only 4 doctors and 3 nurses signed up so we need more folks with those skills. Our purpose is to go to the poor remote locations of Honduras where there are no medical or dental services for the local people. It would be a sad thing if a team did not go to a very needy village simply because we lacked a medical person to complete a team.

FYI, our typical clinic team in a village will have two docs, an RN and one other nurse or EMT, one or two pharmacists, a phamacy tech, a dentist (usually), one or two Spanish interpreters, an engineer, one or two radio operators, and several helpers. It is a well-rounded team and this also helps when a spouse or friend wants to be on the same team

(note our application has a place to note your desire to be on a team with some one else). A parent can take a MATURE son or daughter also if they are able to be a productive member of the team.

Important info and resources: Medical folks and helpers alike can go to the website www.MetroDoctors.com to see two articles written by docs who went with IHS in the past. On the left side of the Home page, click on Publications and then select the July/August issue. One article was written by Dr Don Asp and the other by Dr Ken Hodges. Also, as mentioned before, there are NewsBreak newsletters and many photos at the IHS website www.IHSofMN.org Radio operators can sign in to our yahoo radio site for more info at www.groups.yahoo.com/group/IHSradio/

I have a CD plus a lot of other information I can pass on to you if you or someone you know has an interest in going! It is packed with photos, daily journals, NewsBreak articles and a great Power Point presentation that shows our daily work. Also, there are several other IHS Directors who can answer more technical questions about the medical side of things, etc. So let me know if you have questions in that regard, as well. Note that the CD is also good for those signed up as it has a lot of photos & info about most of the sites we go to. This includes clinic and radio set up info from the past.

Call me any time or write back. A call is best so I can fill you in on basic expenses and the variety of work conditions we encounter. I can help you to get and fill out an easy application. Karen and I have gone over a dozen times so we know the value of this tremendous experience! We will be going again next Feb.

I and the needy of Honduras thank you for your interest in this very rewarding work!

Best regards,

John Kirckof

Phone: 320-634-4386
IHS Board of Directors

PS – One topic I do want to mention is the politics of Honduras. Not because it is a grave issue but because what we are seeing here in the USA is a VERY sensationalized view of things. It truly is NOTHING like what we see on TV… I have been there for 15 years so I KNOW. American TV (especially CNN) had been reporting the news, often via Venezuela news sources so take it from there. The vast majority of Honduran people are a quiet and warm people who peacefully support the new government which will not take away their freedoms like the past President was trying to do. I have no issues against going back again, any time to do our work in the villages. Karen and I plan to go again with the next Feb 2010 mission. Call me if you have concerns in this.

796. Interpreters, radio operators, and other support people urgently needed for medical mission trip !!

Yahoo group: ham
Date: 2009-08-18 17:04:35 UTC
From: John Kirckof
Topic: 796 Message: 796
Attachments: 2 described; binary payloads are missing from this source WARC

International Health Services News Update

Hi Everyone,

Great news ! The October 2009 and February 2010 IHS medical trips are a go. Thursday night we had an IHS board meeting and after discussing many topics we are proceeding with all Honduras medical projects as usual.

One thing we noticed is we are in critical need of support people to help the teams out! A pplications for the Feb, 2010 mission have started coming in but so far we have only one interpreter and one radio operator signed up for support. Please consider going AND talking with other medical and support folks to see if they can go, too. We are always in need engineers docs, nurses and such folks. The Feb, 2010 mission will be very similar to last Feb's trip. Note the attached 2009 Team Map does an excellent job of showing the details of the trip.

Other Important Info Items:

If you are planning to go, please get your application in as soon as possible. Applications are also online (www.ihsofmn.org) and in the NewsBreak, which will be out soon. The October team is pretty well set to go so I am talking about the Feb, 2010 mission.

Talk to friends If you know of anyone who may have an interest in going, please talk with them soon as we always need new people to fill open spots on the teams. As always, at this time of the year we need people in all medical professions and support/helper positions. As the map shows, we also take doctors, nurses, pharmacists, surgery folks, optometrists & eye care folks, plus many support/helper people. Many people go with spouses and friends.
Besides staffing our medical teams, we are looking for optometrists & eye care people as the need for eye care is great in Honduras and we wish to continue to improve our eye glasses teams.
To save on costs this year, as positions fill we will not be taking extra help in any positions. A waiting list will be created if needed.

Honduras - Elections for the new Honduran President will be in late November, so a lot of the news related activities should be over before the Feb. trip.

Official dates for the Feb trip are: 13 Feb – 28 Feb, 2010 - dates (days of the week) are a little different this year so take a close look at your calendars. These dates include your travel days at the beginning and end plus one free day after the mission. If you need to get home right after the medical mission work is done, you can actually leave on Saturday, 27 Feb but most will stay a day or two after to enjoy local sights.
From this you will see that if you want a 2 day side trip (Roatan or Utila Island, Copan Mayan Ruins, Tela, etc) at the end you will have to return home on Monday, 1 March (or after if you like). There are help sheets available on travel dates, side trips, airline tickets and related topics… just let me know & I will pass them on to you.

IHS Fundraiser - October 10, 2009 Every other year our fundraising event is a dinner with silent and live auctions - always a fun event! This year the fundraiser will be held Saturday, October 10, 2009 in Eden Prairie, Minnesota at a great facility. Everyone is encouraged to attend and we are actively looking for people to serve on the Fundraiser Committee to help us make it a great event! Watch for further announcements and ticket info. Important…. we are in need of many silent auction items to help raise funds. We also need a few large ticket items for our live auction including the use of a vacation cabin/home for a few days (somewhere nearby preferred) with a flexible use date. Contact Marcia Ernst: fundraising@... to sign up for the committee or to find out where to send your auction items.

Other Support The fundraiser will get us some financial support but it will not come close to providing the funds needed to handle our annual budget. We are a totally volunteer group so please consider a donation prior to the end of the year to help out. It is tax deductible due to our 501©3 status. Also consider giving a talk/presentation to organizations, churches, etc that you belong to. I have pictures & presentations I can send you if you need them. Make many copies and use the attached Team Map to explain all the types of medical work we do and to show all the needy locations we go to. You can talk about the IHS medical mission both to help get funds but also to help get new people to go. Obviously, that would be best if it happened BEFORE October. Do note we do take applications after October 1st for empty spots on teams.

The bottom line is the Feb. medical mission is a go. Please help in any way you can to make it a success. We hope to see your smiling face in LaCeiba !

Feel free to contact me or any of the other board members listed below with questions! That is what we are here for. The main IHS web site is still at www.ihsofmn.org

799. Coaxial Antenna Switches FS

Yahoo group: ham
Date: 2009-08-28 16:58:48 UTC
From: Ken Simpson, W8EK
Topic: 799 Message: 799

Coaxial Antenna Switches and Connectors For Sale:

All antenna switches have SO-239 connectors.

B & W Model 593 Coax Switch
This is the switch that is in a rectangular box about 6
inches long, with four SO-239 connectors coming out
of the back. It will switch 3 antennas, grounding the
antennas that are not in use. It works great.
In its original box, with paper work for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. $35

Five position Coax Switch
This switch looks to be the same as the B & W 550 A,
but it is not. Same styling, but the unused connectors
ARE grounded. Coax out the sides like spokes of a
wheel. $35

Unknown brand of four position antenna switch
This is in a large round copper container painted black,
about 5 inches in diameter, with a large (about 3 inch)
black knob. A heavy duty grounding bolt is included.
Unused positions are NOT grounded. Coax out the sides
like spokes of a wheel. $25

Heath HD-1234 Antenna Switch
This switch will transfer four antennas. The coax
comes out of the sides like spokes of a wheel. Unused
connectors ARE grounded. Mounting bracket and paper
work included for $25.

Dow Key antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

800. Microphones FS - Desk, Hand, DTMF, and Speaker-Mics,

Yahoo group: ham
Date: 2009-09-06 23:21:22 UTC
From: Ken Simpson, W8EK
Topic: 800 Message: 800

Microphones For Sale - Desk, Hand, DTMF Touch tone, and Speaker-Mics:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/FT-Library/Eighties/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Turner Hand Microphone
J 450 C, Ceramic Hand Microphone
Black/Dark Gray front, with brownish/light gray back.
Dark PTT button.
This is high impedance mic, presently with stripped and
tinned ends.
This particular mic works fine and looks like new. $30

Radio Shack Hand Mic with DTMF Tones, plus many extra buttons
This mic has the modular 8 conductor plug like a computer
LAN on it. The mic has a 16 digit touch tone pad on it,
along with buttons for up, down, VFO, MR, MHz, Call, and
of course PTT. It also has a lock switch. Lettering is
very clear, and coiled cord is in great shape. $45

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Azden PCM-463 hand microphone
This is a standard hand microphone with up and down
switches on it. It also has a "Memory 1 Call" button
on the top of the PTT switch. I think this was used
with the Azden PCS-5000. I know I used the PCS-5000
on packet, and have now found the mic that was once
with the rig. I also used packet on a PCS-4000 and
PCS-6000 at various times, so it is possible that

this mic might be used with either of those. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones For Sale:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones For Sale:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.

Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Prices do not include shipping from Florida.

Thanks.

801. Two meter rig, plus many ham accessory items FS

Yahoo group: ham
Date: 2009-09-12 15:35:50 UTC
From: Ken Simpson, W8EK
Topic: 801 Message: 801

Two meter FM Transceiver, plus many ham station accessory
items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Heath VHF Wattmeter

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

CMOS Iambic Keyer

This keyer features a build in set of HamKey Paddles.
The front has speed control, plus a volume control for
the sidetone volume. Of course that means that it can
also be used for code practice. Also on the front panel
is a 3 position switch that turns off the output to the
transmitter (for code practice), puts it in to "Keyer

mode", or locks it on for transmitter tune up.

The rear panel has provisions for an external speaker
(one is built in), external key, external paddles, plus
jacks for keying the transmitter. There is also a connector
for external 9 to 12 V DC power, although it can be powered
by a regular 9 V battery if desired.

It works fine and is in extremely nice condition. $50

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Vectronics VEC-212 Code Practice Oscillator For Sale:

This appears to be the same as the MFJ 557 code practice
oscillator, but with the VEC label on it.

A picture can be seen at http://www.n4mw.com/cp100tn.jpg

It is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery, or from a wall wort power
supply.

With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath Phone Patch and SWR Bridge:

Both of these units match the Heath SB series.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
good shape. Paper work included for $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will

handle 1500 watts.
In extremely nice condition for $35.

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

AEA Items For Sale:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone

into on the front, along with a switch to switch between mic or TNC. There are two cables coming out of the back, with one going to the mic jack on your rig, and other going to your TNC. There is also provision for receive audio in, and an external speaker. No power is required. Inside the box is a series of jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Icom Hand Microphones:

Icom HM-3
This low impedance hand microphone fits the Icom 22S, 224, 205S, 451A, 551D and likely others. It works fine, looks fine, and has a standard 4 pin connector on it. $20

Icom HM-4
This low impedance hand microphone fits the Icom 20, 21, 22, 30, 31, 60, 201, 202, 211, 215, 230, 245, 280, 402 and likely others. This one has a nice pattern on the scope, but presently does not have a connector on it, but of course one could be added. It looks fine. $20

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. Used, but in good shape. Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Yaesu Items:

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Yaesu FT-207
Yaesu FT-209

Wrist Strap for Yaesu FT-209 - $4

LARGE Analog Meters For Sale:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

802. 2 m HT, plus many HT accessories FS

Yahoo group: ham
Date: 2009-09-19 11:08:31 UTC
From: Ken Simpson, W8EK
Topic: 802 Message: 802

Kenwood TH-215 HT, plus many accessory items for many HTs For Sale:

Kenwood TH-215, 2 meter HT (plus public service band on receive)
Covers the 2 meter band with up to 7 W output power. Of course
it has memories, scan features, and the things one expects in
an HT. Subaudible (PL, CTCSS) tones are built in and can be
adjusted from the keypad. A 16 digit touchtone (DTMF) pad is
built in. It can be powered by the PG-3 E cord from 13 V DC
to provide full 7 watt output. It also has about 1 W output
in low power.
This one is in very nice condition. It includes a PB-2 battery,
rubber duck antenna, and paper work for $70.

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe
other Kenwood battery packs. It works fine and is in good
shape. $50

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V
DC to the TH-215, TH-225, TH-415, and other Kenwood HTs.
It has a filter built in, and permits high power operation
of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard
PB-2 and PB-3 battery packs. Black color. Very nice
condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Speaker Microphones:

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery
of the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. It is in good shape, and works
fine. $3

Wrist strap
I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This adapter can be used on any HT with a
BNC connector. $5

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

"Dead" Icom Battery Pack:

Icom BP-3 battery pack
I have the equivalent of the BP-3 battery pack that is dead. This is actually a pack from a Radio Shack HT that uses the same batteries as the Icom. It looks like it will hold 6 AA battery cells. This pack is used on the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others. It will also fit some of the Radio Shack / Realistic HTs such as the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new "insert" in to, or for some project, it would be ideal. Adding one of the newer high capacity inserts will give you a very inexpensive new battery, or build a regulator in for use from 12 V DC.
It looks very nice, and is not all scratched up. $10

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them
to the Icom IC-2AT, 3AT, 4AT, and others of that series
that lacked the tones originally. It is a postage stamp
size unit. This one has never been used, and is still
in its original plastic bag, with the instructions. $30

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the
battery of the Azden PCS-300, 2 meter HT, outside
of the HT itself. Usually, one must have the battery
inside the HT, but this lets you charge a second
battery outside of the HT. The original charger is
used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215, 2 meter HT
Good condition, but has some writing on the covers $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

All of the above are in English.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

804. Wattmeter and SWR Nridges FS

Yahoo group: ham
Date: 2009-09-27 11:36:58 UTC
From: Ken Simpson, W8EK
Topic: 804 Message: 804

Wattmeter and SWR Bridges For Sale:

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each.

Prices do not include shipping from Florida.

Thanks.

Antennas and antenna related accessories For Sale:

Multiband HF "doublet" antenna:

This antenna is basically an 80 meter dipole, fed with
"Window" twin lead. It is approximately 66 feet long on
each half, with a center insulator that it can be hung by,
and a length of window twin lead to go to your antenna
tuner. It does need to be used with an antenna tuner,
capable of feeding balanced line. With an antenna tuner,
it should be able to be used on most HF bands.

This antenna came from a silent key estate. I have no
paper work on it, and do not know the manufacturer.
It was in a drawer, and not in the air, so it is quite
possible that it has not been used. It is in good shape,
although the stranded copper antenna wire is no longer
shiny. $30

Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve the
impedance, instead of acting like a transformer. They will
handle full legal power.

HF 1 to 1 Baluns:

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Two Position Coax Switch w/Lightning Protection
Alpha Delta "Delta 2" two position switch
This is the switch that has a lot of lightning protection built
in, including a gas discharge tube. It also has a center
position of the switch that grounds both antennas.
You can read more about it at

http://www.universal-radio.com/CATALOG/switch/2415.html
This one is in nice condition.
Of course it works fine. $40

Antenna Traps for 17 meters (18.1 MHz)

Unadilla KW-17 Traps
17 Meter (18.118 MHz) Reyco Coils

W2VS traps are available for 80 meters and up. Rated for
2KW PEP. Built from stainless steel and aluminum hardware
to resist corrosion, these rugged traps have a pull strength
of over 600 lbs. Trap coils are waterproofed and condensers
are epoxy-sealed.

These are $46 from Unadilla. It appears that these have
never been used. Buy the pair for only $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Hustler HF mobile high power resonators

All work fine and are in great cosmetic condition.

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

7 pin DIN Cable
This cable has a 7 pin DIN plug on each end, and is about
18 inches long. I think it is used for Icom HF transceivers
to connect the HF rig to one of the automatic antenna tuners,
such as the AT-150. It could have other uses. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8

For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet. The center of the mag mount takes an NLA type antenna. It includes coax, with a PL-259 connector on it. It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center of the mag mount has an SO-239 connector, which means any antenna with a PL-259 can be used with it. It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz For Sale:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

Extensive List of Many Ham Items For Sale
Wattmeters, Speaker, Microphones, HT accessories,
Baluns, Filters, Phone Patches, Keyers, and much more

Wattmeter and SWR Bridges:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Communications Speaker:
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Yaesu MH-15a8
Has 16 digit DTMF pad on the back with an Up-Down
switch on the top in addition to the PTT button.
8 pin round connector. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6, VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think it also fits the FT-50 and FT-60, and maybe others. It has a single 4 conductor, 3.5 mm plug on it. This one is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, Santec, and others used in the 1970s and 80s. This particular unit works fine, and looks great also. $20

Other HT accessories:

Kenwood BT-13 Battery Case
This is a battery case for the Kenwood TH-F6A HT. A person can add 4 AA cells to it, and power the HT. Alkaline cells can be used, but so can NiMH cells, which have a very high capacity.
This BT-13 is new, never used. They list for $32, but you can have this one for $22.

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5
keyer. They are housed in a nice eggshell white and wood
grain cabinet. There is also a separate button on top that
can be used as a straight key, or to tune up a rig or
antenna tuner. $40

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine. With paper work for $25.

CW Items:

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5 keyer. They are housed in a nice eggshell white and wood grain cabinet. There is also a separate button on top that can be used as a straight key, or to tune up a rig or antenna tuner. $40

Buy the paddles with one of the keyers below, and take $10 off of the pair.

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone adjustable on the front panel. Speed and weighting are also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery to preserve memory contents during a power failure. It can be powered by either a 9 Volt battery, a 9 V DC wall wart, or your station 12 V DC power supply.
It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. $55

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It also will operate in either full automatic mode (like most keyers), or in semiautomatic mode (like a bug). The 9 Volt battery is external, so it can be changed easily. This one works great. $45

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters For Sale:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters For Sale:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

809. Antennas and antenna related items FS

Yahoo group: ham
Date: 2009-10-30 13:37:42 UTC
From: Ken Simpson, W8EK
Topic: 809 Message: 809

Antennas and antenna related accessories For Sale:

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.

Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

811. ARRL and many other ham publications, Original Manuals FS

Yahoo group: ham
Date: 2009-11-05 14:33:45 UTC
From: Ken Simpson, W8EK
Topic: 811 Message: 811

Electronic Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
1999, First Edition, Large 8 1/2 X 11 book, $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to work with Integrated Circuits
1977, First edition $12

ARRL Radio Frequency Interference
1978, First Edition, $10

ARRL The Satellite Experimenter's Handbook
1984, First Edition, $8
1990, Second Edition, $15

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

CQ The Packet Radio Operators Manual
By Buck Rogers, K4ABT, 1995
Close to new condition, $14

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab
Hardback Book, Like New, 208 pages, 1992, $12

Allied Dictionary of Electronic Terms
Fifth Edition, 1960, like new condition, $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

W5YI Books:
"Ham Operator Education Package" 1992, $4
W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sams, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Passport to World Band Radio, 2004
Detailed info about receivers, where to listen, etc. $8

WRTH - World Radio TV Handbook, 2004
Directory of Global Broadcasting, $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs and accessories:

All manuals are original, in very nice condition, for
Kenwood radios and accessories. They are originals and not
copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5

MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-230 speaker $4
SP-430 speaker $4
SP-520 speaker $4
SW-2000 SWR Bridge $5
YG-3395C CW Filter $3
YK-88SN Narrow SSB Filter $4

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition, unless noted otherwise.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

AM-2 Reflected Power Meter
(Also known as SWR Meter), 1960,
w/ schematic and pictorial, $8

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

Heath HDP-21 Desk Microphone
1969, Great condition, $4

HM-15 Reflected Power Meter and SWR Bridge
1968, Schematic is in book, $8

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

SB-102 HF Transceiver
Schematic Only, Large fold out page, $4

T-2 Signal Tracer
No date listed, but I would guess from the 1950's, $8

Brochure "Heathkit Specials" featuring the Twoer and Sixer,
SB series, HR-20, and others. $4

These are original manuals only.

Transistor Substitution Books For Sale:

All are in excellent condition.

Sams Transistor Substitution Handbook
Second Edition, 1961, 112 pages, $5

Sams Transistor Substitution Handbook No. 10
Tenth Edition, 1970, 160 pages, $6

Sams Transistor Substitution Handbook No. 14
14th Edition, 1974, Larger book, $8

Sylvania ECG Semiconductor replacement guide
1976, larger book, 276 pages, $8

Sylvania ECG Semiconductors Master Replacement Guide
1979, larger book, 360 pages, $10

Sylvania ECG Semiconductor Master Replacement Guide
1987, larger book, about 700 pages, $15

Archer Transistor Replacement Guide
62-1015, No date listed, 8000 substitutions, $5

Archer Transistor Substitution Guide
276-2000, 1972, 15,000 types, 96 pages, $5

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

812. Wattmeter/SWR Bridge, Baluns, Speaker, Mics, and many accessories FS

Yahoo group: ham
Date: 2009-11-07 16:39:54 UTC
From: Ken Simpson, W8EK
Topic: 812 Message: 812

Extensive List of Many Ham Items For Sale
Wattmeter, Baluns, Speaker, Microphones, HT accessories,
Filters, Phone Patches, Keyer, and much more

Wattmeter and SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch. This is a modern MH-1 B 8 mic.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25

As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think
it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Other HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

TenTec items:

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

CW Items:

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It also will operate in either full automatic mode (like most keyers), or in semiautomatic mode (like a bug). The 9 Volt battery is external, so it can be changed easily. This one works great. $45

Cables for CW Straight Key and for CW Paddles:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

Notice: Due to a high number of swapmeet listings, I have
been asked by QRZ to provide the following notification:
My swapmeet sales on QRZ are not-for-profit. As a service to
my friends and acquaintances, I help them and/or their survivors
dispose of equipment that is no longer needed. Because I realize
the difficulty relatives have disposing of equipment after one
becomes a silent key, I have decided to "thin the herd" of much
of my own 40+ year accumulation of equipment. This is not a
business venture for me, and I am not in the amateur radio
business.

From: Ken Simpson, W8EK
Topic: 813 Message: 813

Antennas and antenna related accessories For Sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 meters, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. For either 220 MHz or 450 MHz.
Please specify. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen Magnetic Antenna Mount:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks very close to
new and includes paper work for $45.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice

condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 6 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

814. Many Different Microphones FS

Yahoo group: ham
Date: 2009-12-11 18:55:38 UTC
From: Ken Simpson, W8EK
Topic: 814 Message: 814

Many Different Microphones For Sale:

Heath hand microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks OK cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends.
I have paper work for a Heath GH-12 A hand microphone with
it. $30

Yaesu MH-1 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any
Yaesu rig that uses the round 8 pin connector. It has
up, down, and fst switches, and well as a tone switch,
in addition to the PTT switch.
This particular unit works fie. The front of it looks
very good. The back has some minor defects, but nothing
that effects operation. $30

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-23 DTMF Touch Tone Hand Microphone
This mic has the 16 digit DTMF touchtone pad, but also has
the up and down switches. It was designed to be used with
the 27, 28, 37, and 47 that require a longer nut on the mic,
but can also be used with the 25A, 28H, 38, 45A, 48, 77, 78,
120, 229H, 271, 275, 290, 375, 451, 471/A, 475, 505, 575,
707, 718, 725, 728, 729, 735, 736, 737/A, 745, 746, 751/A,
756/PRO, 761, 765, 775, 781, 820H, 821H, 900, 901, 970,
1201, 1271, 1275, 2400, 3200, 3210 and maybe others.
It can also be used on an HF rig to give a mic with DTMF
Touch Tones.
Basically, it is the same as the HM-14, but with a larger nut
on the connector.
It has the round 8 pin connector, is in good shape, and
works fine. It looks close to new. $50

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, peak-limits each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter gives you extra punch that is equivalent to adding a linear amplifier.

This particular unit works fine, and is in its original box, complete with the wall wort power supply, although it can be powered by 12 V DC. It is quite possible that this unit was never used until I took it out of the box to test it. The instruction sheets look like they were never unfolded!

$95

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug for Drake TR-22
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Prices do not include shipping from Florida.

Thanks.

815. Antennas and related items FS

Yahoo group: ham
Date: 2009-12-12 21:51:32 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 815

Antennas and antenna related items for sale:

B & W Coaxial Antenna Switches:

Both switches will handle full legal limit, and have
SO-239 connectors.

B & W 375 "Protax" coax switch
This switch will switch up to 6 antennas, and DOES
ground the unused antennas. It has the coax coming
out the back in one large bundle. This one works 100%
electrically, and looks very nice. $45

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. This one has the optional
face place also.
This one works fine and looks fine as well. $40

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or
dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to
hang a dipole or inverted V, or a U-bolt can be added to attach
it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Hustler HF mobile resonators and masts:
All work fine and are in great cosmetic condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
17 meter resonator RM-17 $15

15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. Any of the NMO antennas made by Larsen, Motorola,
Cushcraft, and many others will fit on it. It includes coax,
with an PL-259 connector on it. It is in great condition
for $22.

Larsen NMO-2/70 antenna for 2 meters and 440 MHz combined
Single antenna screws in to any NMO mount, and covers the
2 meter band with about 2 db gain, and the 440 MHz band
with about 4 db gain. It is a very rugged antenna.
This one works fine, includes both the coil and the loaded
whip, and looks very close to new. $45

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

818. Baluns, Coax Switch, Microphones, Filters, and much more FS

Yahoo group: ham
Date: 2009-12-26 17:37:45 UTC
From: Ken Simpson, W8EK
Topic: 818 Message: 818

Extensive List of Many Ham Items For Sale
Speech Processor, Baluns, Coax Switch, 2 meter FM Rig, TenTec
Items, Hustler mobile resonators, Microphones, TVI filters,
Wattmeter, HT accessories, Speaker, Phone Patches, and
much more

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, processes each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter
gives you extra punch that is equivalent to adding a linear
amplifier.

This particular unit works fine, and is in its original box,
complete with the wall wort power supply, although it can be
powered by 12 V DC. It is quite possible that this unit was
never used until I took it out of the box to test it. The
instruction sheets look like they were never unfolded!
$95

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or
dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to
hang a dipole or inverted V, or a U-bolt can be added to attach
it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Coaxial Antenna Switch:
B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel. This one has the optional face place also. It will handle full legal limit.
This one works fine and looks fine as well. $40

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has

over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $80

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel

around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22

Microphones:

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for Kenwood TH-21/31/41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge. Physically it
is fine, but it needs a new "insert". Or use it to build
a DC pack, or other project. With paper work for $8

Kenwood PB-21 H battery pack
As above, but heavy duty pack; needs insert.
With paper work for $12.

Wall wort charger for use with the PB-21 H Battery pack
With the 2.1 mm coaxial connector to charge the larger
battery pack. $15

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Kenwood RA-6 Special 2 meter rubber duck antenna for Kenwood
TH-21 HT with threaded connector, standard 6.6 inches long. $15

Service manual for TH-21 AT, plus most of the TH-21/31/41
accessories such as DC-21, EP-2, TU-6, etc. $20

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
extremely good condition. No scratches or imperfections.
Paper work included for $25.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder,
etc. The large VU meter is in the middle. Below the
meter is a single conductor mic jack, two small chrome
knobs for xmtr and rcvr gain control, and a larger rotary
on-off switch with chrome knob on the right. There is a
terminal strip on the back for connections. Of course
it can be used as an interface to sound cards for digital
mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored

scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

821. 2 m rig, Speech Processor, Filters, Mics, and much more FS

Yahoo group: ham
Date: 2010-01-09 17:58:53 UTC
From: Ken Simpson, W8EK
Topic: 821 Message: 821

Extensive List of Many Ham Items For Sale
2 meter FM Rig, TenTec Items, Microphones, TVI filters,
Wattmeter, HT accessories, Speaker, Phone Patches, and
much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, processes each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter
gives you extra punch that is equivalent to adding a linear
amplifier. It is power by 12 V DC at about 100 ma.

This particular unit works fine, and looks very nice.
Paper work is included for $75.

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Microphones:

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking
this kind of connector (TM-201, TM-211, TM-221, TM-231,
TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN
switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. 16 digit touch
tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it

stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Hustler HF mobile antennas:

All work fine and are in good condition.

Standard" Hustler resonators (good for 400 Watts PEP):
75 meter resonator RM-75 $22

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

Heavy Duty Mobile/Portable Antenna Mount:

This is a very heavy duty antenna mount, designed to
take any standard 3/8-24 threaded antenna. which includes just
about any HF antenna and many other antennas as well.

The mount is made to be clamped around a vertical object, such
as a pipe, tubing, or even a square channel. It would be ideal
to attach to something like a chain link fence. It could also be
used as a mirror mount on trucks. It will take up to 1 1/2 inch
diameter objects. It has a very large screw type mechanism with
a large handle to tighten to the vertical object. It could be
placed in operation very quickly, so it is great for portable
and emergency operation, where one would want to set up a
mount quickly.

The bottom of it has an SO-239 connector, ready to take a
standard PL-259 connector.

This unit is in good condition. $20

HT accessories:

Icom BP-20 Battery Case For Sale:
The BP-20 is an "empty" battery pack designed to hold
regular AA cells. Of course a person can use regular
alkaline batteries, or NiCads, or NiMh batteries. This
pack will work with the Icom u2AT, u3AT, u4AT, and maybe
others. It is ideal if you have one of these HTs that
now has a dead battery.
This particular BP-20 is in its original box, and appears
to be new and never used. The box is labeled CM-20, which
is the same as the BP-20, except the commercial version.
$20

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be

used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,

voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TH-41 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

CW Items:

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code.
It is a very basic tape, with the assumption that one does
not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds! It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 822 Message: 822

Extensive List of Many Ham Items For Sale
2 meter FM Transceiver, Coax switch, SWR Bridge, Coax Relay,
Communications Speaker, TVI filters, Microphones, TenTec Items,
Hustler mobile resonator, Wattmeter, HT accessories, Phone
Patches, and much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

Heath HD-1234 Coaxial antenna switch
This coax switch has SO-239 connectors arranged so the
coax comes out like the spokes of a wheel. It will switch
up to 4 antennas, and also ground all of the antennas.
This particular switch works fine and looks fine also.
With paper work for $35.

SWR Bridge

CalComm #9856 SWR Meter

The included paper work says this meter is good for 3 to 150
MHz, so one can use it on 2 meters, and on 6 meters as well
as on the HF bands. It can also be used as a field strength
meter.

It has an SO-239 connector on each end, and it made to be mounted
in a vertical position, with the meter at the top, and the
adjustment knob at the bottom.

This meter includes the paper work (and even the warranty info),
and the original box, although the box has seen better days. The
meter itself works fine, and is in extremely nice condition. The
back of it has holes for mounting it to a wall. A former owner
removed some of the paint from around these mounting holes, so
that it would get a better electrical ground. $20

B & W 377 Coaxial Antenna Relay

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

MFJ CWF-2 CW filter
This audio filter can be powered by a 9 V battery or a 9 volt wall wart. It has a switch selectable bandwidth of 80, 110, or 180 hertz. Of course you can turn it off also!
It inserts in the audio line, and can really cut the QRM down. It is not a fancy DSP filter, but then, neither is the price. This one is in good shape but has wear around the switch that is used to select bandwidth. The top and sides are close to perfect. $15

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Microphones:

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Striped and tinned ends. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 DTMF touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, is in its original box, and includes paper work for $50.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $18

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle
The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code. It is a very basic tape, with the assumption that one does not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that

I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference. All will handle full legal power
at HF, have an SO-239 connector on each end, and are designed
for 50 ohm systems.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case.
This one works great, and looks close to new. Someone added some
felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425)
This filter cuts off just above 10 meters, and is the latest
model B & W filter. It is in very nice condition; it looks very

close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for about 200 W up to 52 MHz, but full power on HF. It works fine, and is in very nice shape. $35

Drake TV-3300-LP
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF (over 80 db attenuation at 41 MHz). This one looks great, and includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating. It works fine and looks like new. $ 15

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in

extremely good condition. No scratches or imperfections.
Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored
scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 823 Message: 823

Microphones For Sale:

All of these microphones have been tested and work well.

Shure 444 D Dual Impedance Desk Microphone
The 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z.
This mic is the black color, and is in very nice shape, with paper work for $75.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Indian on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome, but it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. With 4 pin connector. $25

With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451,
471A, plus other rigs.
This particular microphone has an 8 pin round connector, works
fine, looks like new, is in its original box, and includes
paper work for $50.

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a
switch to turn the pad on and off. I presently has a 4 pin
plug on it, and can be used on most any rig. It works fine,
and looks great. $35

KDK TM-2 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with up
and down switches. It presently has a 6 pin connector, as
used on the KDK FM-2030, FM-2033, and other KDKs using the
6 pin plug. Of course the plug could be changed, and it
could be used on any brand rig.
This one works fine and looks very close to new. $40

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Prices do not include shipping from Florida.

Thanks.

824. Antennas and related items FS

Yahoo group: ham
Date: 2010-01-23 13:08:06 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 824

Antennas and antenna related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-1234 Coaxial antenna switch:
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. This particular switch works fine and looks fine also. With paper work for $35.

CalComm #9856 SWR Meter
The included paper work says this meter is good for 3 to 150 MHz, so one can use it on 2 meters, and on 6 meters as well as on the HF bands. It can also be used as a field strength meter.
It has an SO-239 connector on each end, and is made to be mounted in a vertical position, with the meter at the top, and the adjustment knob at the bottom.
This meter includes the paper work (and even the warranty info), and the original box, although the box has seen better days. The meter itself works fine, and is in extremely nice condition. The back of it has holes for mounting it to a wall. A former owner removed some of the paint from around these mounting holes, so that it would get a better electrical ground. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-Q Quarter Wave Antenna, fits any NMO mount
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating.
It works fine and looks like new. $15

AEA "Hot Rod" Gain antenna for 2 meters:

This antenna has a BNC connector on it, and offers gain over
other HT antennas. It is telescoping, and about 3 feet long.

This is a half wave antenna with matching coil, so it does not
depend upon the ground plane (or lack thereof) on your HT.

It is rated to have 3 db gain over a quarter wave antenna.
However, the rubber duck used on most HTs is no where close
to being as efficient as a quarter wave antenna. Typically they
are 6 to 10 db lower. The result is that this antenna should
give you an easy 10 db gain over most HT antennas.

This one works fine, and looks good as well. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

Topic: 826 Message: 826

Orlando FL Hamcation Information:

The Orlando Hamcation is less than two weeks away. It will be
held from February 12 thru February 14, but much of the activity
starts on Thursday, February 11, when most of the tailgaters
set up. If you have not made your plans to attend, you need
to do so now. Florida is the place to be in February!

Info can be found at
http://hamcation.com/default.html
There is a lot of information at this web site, so be certain
to check all of the special areas.

At the present time, there are a few tables still available in
the swap building. All of the wall spaces and end caps have been
taken. If you want more than one table together, get your
reservation in NOW. Having a table inside the building, instead
of outside in the tailgate area, protects you (and your equipment)
from the weather, and only costs $10 more for the entire weekend.
Please e-mail hamcation@... to make reservations or get
more information.

Everyone knows that there are many other activities in the central
Florida area, so be certain to bring the XYL. Hamcation will also
have YL activities, and of course many are now hams, so will enjoy
Hamcation as well. The bottom line is "Bring the entire family."

Advance registrations are running considerably ahead of past years,
so this promises to be another large (10,000 plus hams) hamfest.
To put it another way, don't stay home because you think attendance
might be down due to the economy. It does not look that way.

See you there!

Thanks.

73,

Ken, W8EK

From: Ken Simpson, W8EK
Topic: 831 Message: 831

CW Paddle and Cables, Microphones, Speaker, Low Pass TVI Filters, Coaxial Antenna Relay, Power Supplies, and much more For sale:

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty

coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,

etc. $15

Prices do not include shipping from Florida.

Thanks.

HT accessories and related items for sale::

Protective cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.

It is in good shape, and works fine. $3

Accessories for the Azden PCS-300 HT:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications

frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

Many Ham Publications For Sale:

Vintage ARRL Licensing material:

All books are in very good, or better, condition.

ARRL Tune in the World with Amateur Radio
1976, First Edition $3

ARRL Now You're Talking
1993, 2nd edition $10

ARRL Tech Q & A, 1997, First Edition $8

ARRL Technician Class Computerized Exam Review
Complete with Disk and Book, still sealed in package, $10

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1979, 77th edition, All classes
1984, 79th edition, All classes
1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition
1997, Second Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

Tab Books: "Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new $15

ARRL "Radio Amateurs Operating Manual", 2nd edition, $8

RSGB "Amateur Radio Operating Manual", 2nd edition, $8

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1978 - 58th edition $3

1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL Amateur Radio Field Resources Directory
First edition, $7

FCC Rule Books and other ham publications:

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, $3

RSGB "Amateur Radio Operating Manual"
2nd edition, $8

ARRL How to Become a Radio Amateur, 1970, 26th edition,
This book is in extremely nice, close to new condition,
with many vintage ads in the back. It has a lot of good
information, and is collectible. $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing the
General Class questions and answers. Nice condition. $8

ARRL Handbooks:

The first one is in the smaller format (6 1/2 by 9 1/2 inch size).
It includes tube charts and ads for vintage equipment, which are
not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
58th edition - Nice shape $13

This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

Other Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Radio Amateurs Operating Manual
1985, 2nd edition, $8

Electronics Text Books:

The following books are often used as text books at the two
year community and technical college level.

Experiments in Electrical Circuit Analysis, Schuler
About 200 pages, including programs. $50

Study Guide for Electronics Fundamentals, McIntyre
Paper back with about 200 pages of study material
w/answers. $15

Understanding Electricity and Electronics Student Lab Guide
by Science Electronics, 135 page paper back $12

Computers by Long and Long
Large book with about 750 pages. Answers to problems
included. Like new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750
pages, plus CD. Like new. $30

Tab Publishing and Sams Vintage Licensing material:

Tab Books: "Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ - 1979, First Edition
Hardback, Like new $15

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975, 2nd edition $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975, 2nd edition $3

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition, 1979 $3

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993, Fourth Edition $3
2002, 17th Revised Edition $4

Ameco Ham Publications:

These are all Ameco Publications that are in
extremely nice condition.

Ameco "Novice License Radio Amateur FCC Test Manual"
1984, like new $4

Ameco "Amateur Radio Novice Class Theory Course"
Far more in depth than the test manual.
First Edition, 1978 $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Texas Instruments Data Books:

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal, $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide, June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD, January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference, August 1999 $3

Logic Selection Guide, August 1998 $4

BiCMOS Bus Logic Interface, 1988 $2

Prices do not include shipping from Flroida.

Thanks.

Many Ham Items For Sale
Multimode 2 meter transceiver, Power Supplies, SWR Bridge,
Microphones (Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communication Speaker, CW Paddles, Low Pass TVI Filters,

Kenwood TR-9130 Multimode 2 meter transceiver:

The Kenwood TR-9130 2 meter multimode transceiver provides 2
meter operation in FM, LSB, USB and CW modes. Power output may
be selected at 5 watts (FM/CW) or 25 watts (FM/SSB/CW). It
includes an RF gain, RIT, analog S/RF meter, noise blanker,
dual VFOs, all-mode squelch and memories. Both memory scan
and band scan are supported. It requires 13 VDC at about 5.5
amps.

This particular unit works fine and looks extremely nice. It
includes the mobile mounting bracket with hardware, DC cord,
chrome bail, and touch tone DTMF hand mic, all in the original
box. It even has the multi-color, multi-page sales brochure
with it, and a bag of hardware that came with it originally.

With paper work for $230.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Vanco SWR-1 SWR Bridge and Field Strength Meter
Covers from 3.5 thru 150 MHz with 5% accuracy, according to the
specs on the box, and is 6 inches by 2 inches by 2 7/8 inches
in size. If you need an SWR bridge that will cover both the
HF bands, plus 6 meters and 2 meters, this is it.
This particular meter works fine, and is in its original box,
complete with original instructions, and wrapped in its bubble
pack. $25

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the
Johnson logo with the Viking on it. It has a PTT switch and
coiled cord, and produces a nice pattern on the scope. It
looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might
have come from a HyGain rig. It has a PTT switch and black
coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444
Desk Mic, but this one is a hand mic. It is a controlled
magnetic mic, with frequency response tailored for voice
communications. It has a rugged case, and a heavy duty
coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come
from a Polycom rig. The mic is a good solid metal case with
chrome plating all around, with a black PTT switch and black
coiled cord. There are some pits on the chrome; it works
fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50

years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation

in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

839. Antennas and related items FS

Yahoo group: ham
Date: 2010-04-02 14:53:16 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 839

Antennas and related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a really heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus much more, and has at least 80 db signal
attenuation at TV channel 2.
It is in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks very close to new. It has felt
on the bottom, so that it protects better. It is in its original
box, with paper work.
Bencher currently sells these for about $90. This one is only
$65

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

841. Power Supplies, Microphones, Speaker, Filters, and more FS

Yahoo group: ham
Date: 2010-04-10 13:57:07 UTC
From: Ken Simpson, W8EK
Topic: 841 Message: 841

Many Ham Items For Sale
Power Supplies, Microphones (Hand Mics, DTMF Touch Tone
Mics, Speaker Mics), Communication Speaker, Low Pass TVI
Filters, and more

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same
styling, etc. In fact I thought it was an Astron until I
read the Motorola name tag.
This one works 100%, and looks very close to new. I can not
find a scratch on it. $40

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks extremely nice also. No scratches, and it even shines! It presently has a 1/4 inch stereo plug on it, which of course can be changed. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

Mobile Bracket for Icom IC-27:
This mobile bracket fits the Icom IC-27, 37, 47, and that series of Icom rigs. This mount goes completely around

the rig, so it would work with most any other rig that
is about 5 1/2 inches wide and 1 1/2 inches high.
This one is in very nice, close to new condition. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV Vertical to give 80/75 meter coverage (basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

843. Audio Filter, SWR Bridge, Keyer, and many more items FS

Yahoo group: ham
Date: 2010-04-24 20:41:00 UTC
From: Ken Simpson, W8EK
Topic: 843 Message: 843

Many Ham Items For Sale
Audio Filter, SWR Bridge, Keyer, Power Supplies, Microphones
(Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communications Speaker, Low Pass TVI Filters, etc.

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Dual Meter SWR Bridge

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and
80's, this meter was relabeled by many different manufacturers
with their own label, but is basically the same meter that was
made in Japan. It has two separate meters -- one for forward
power and one for reading the SWR. It works from 160 thru 2
meters, so is useful on most any frequency you would want.
The SWR-2 has SO-239 connectors on each end. It differs
from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward
power meter lens has a crack in it. The SWR meter is fine.
Since it is only necessary to set the forward meter to full
scale, this really does not detract from its usefulness.

With paper work for $18.

CW Items:

MFJ 422 C electronic keyer
This keyer uses the Curtis chip, and includes sidetone, has
adjustments for volume, tone frequency, and weighting, as well
as speed. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external 5 to
9 volt supply. It is made to go on the back of a Bencher
Paddle. It works 100%, and looks great also. With paper
work for $45.

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same
styling, etc. In fact I thought it was an Astron until I
read the Motorola name tag.
This one works 100%, and looks very close to new. I can not
find a scratch on it. $40

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in great shape. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

844. Antennas and related items FS

Yahoo group: ham
Date: 2010-05-01 12:56:44 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 844

Antennas and related items for sale:

Dual Meter SWR Bridge:

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and 80's, this meter was relabeled by many different manufacturers with their own label, but is basically the same meter that was made in Japan. It has two separate meters -- one for forward power and one for reading the SWR. It works from 160 thru 2 meters, so is useful on most any frequency you would want. The SWR-2 has SO-239 connectors on each end. It differs from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward power meter lens has a crack in it. The SWR meter is fine. Since it is only necessary to set the forward meter to full scale, this really does not detract from its usefulness.

With paper work for $18.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

853. Honduras Medical Mission Report ... a huge success !

Yahoo group: ham
Date: 2010-06-09 14:05:22 UTC
From: John Kirckof
Topic: 853 Message: 853
Attachments: 1 described; binary payloads are missing from this source WARC

IHS (International Health Services) had another fantastic year of medical mission work in Honduras!

This year we sent Physicians, Optometrists, RNs, LPNs, EMTs, Pharmacists, Dentists, dental assistants, Surgeons, and CRNAs. We also had many support people who went as Interpreters, Radio operators, team engineers, plus many general helpers. Quite a diverse group of volunteers !!

This February we sent about 110 medical and support people to 10 team locations. Most were in very poor villages where there is NO health care available. During the 2 weeks of work, we saw over 12,000 patients ! We also handed out about 1800 prescription and reading glasses plus many pharmacy items to those in need. The surgical sites did nearly 100 needed surgeries. Quite an accomplishment.

A large part of this huge succces we had in caring for the desperatley poor was the huge prepararion work done last summer and fall. Some was to recruit the many workers needed to go but also to gather all the needed supplies for each of the team sites. We are now starting this important prep work again for an October trip plus for next February's medical trip. In future e-mail reports, we will mention the need for many medical professions plus quite a few support people (interpreters, engineers, radio operators and many general helpers). Watch for those e-mail updates, too.

This year, we ran 5 dental clinics, 5 medical clinics, 2 surgical sites, and 2 eye care/glasses … all around the poor areas of Honduras. The medical and dental clinics were in Pranza, Yocon, Lisagnipura, LaEsperanza, and on the Kruta River. The surgical sites were in LaCeiba and Tocoa. The eye care/glasses teams were in Sulaco and Puerto Lempira.

If you want more info, email me at JMKKEK@...

General Mission Info: For those of you who may not have gone or read any past information on our medical trip, here are the basics. Each year, during the last 2 weeks of October we send a large medical team to the remote area of Honduras. Also, the last two weeks of February is our LARGE mission trip. (see the attached Team Map which does a great job of showing this!) IHS will send 10 or more medical, dental, surgical, & eye glasses teams to Honduras. We will also send ahead 1 or 2 container shipments to get all the needed medical supplies, team food, and pharmacy supplies there. Each year, our hope is to have about 7 or 8 medical clinic teams to include a dentist on each team. We also hope to have 2 or 3 surgery teams and 2 or 3 eye glasses teams. We try to send several support people (interpreters, engineers, radio operators, and general helpers) on each team to help us provide quality care to all we see. Each year we see about 800 people (average) at EACH of the clinic sites. So, we do touch many lives and most are people who have NO medical or dental care available to them except our once a year visit. NOTE that our biggest need right now (besides medical folks) is Spanish interpreters.

You can see a glimpse of what we do at: www.IHSMN.org (check out the photos and the latest NewsBreak newsletters!) We are based in the Minneapolis metro area but participants are

from all over the US and many other countries. There are IHS Board members and others who you can talk with to learn more about your professional or support area.

Give me a call or send me an e-mail if you are interested or want more detailed info.
The needy of Honduras and I thank you.

854. Wattmeters, SWR Bridges, Antenna Tuners and antenna related items FS

Yahoo group: ham
Date: 2010-06-10 21:51:53 UTC
From: Ken Simpson, W8EK
Topic: 854 Message: 854

Wattmeters, SWR Bridges, Antenna Tuners, and antenna related items For Sale:

Dentron W-1 HF Wattmeter / SWR Bridge:

This wattmeter is designed for use on the HF bands (1.8 to 30 MHz), and has full scale readings of 2000 Watts and 200 Watts. It is also a calibrated SWR Bridge. It is in a nice black enclosure that will match most ham gear.

This one works fine, and looks very close to new. No scratches, dents, or dings.

With paper work for $55.

MFJ-906 Antenna Tuner/Wattmeter/SWR Bridge for 6 meters:

The MFJ-906 6 Meter antenna tuner for the Magic Band gives you low SWR with practically any coax-fed antenna.

With low SWR, your rig will be more efficient; you will get more power out of your 6 meter transceiver and into your antenna for more DX, it will run cooler and last longer.

A lighted Cross-Needle SWR/Wattmeter shows SWR, forward and reflected power simultaneously in 300/60 forward and 30/6 reflected Watt ranges and has an ON/OFF lamp switch. With a built-in bypass switch, you can bypass your tuner and connect your transceiver directly to your antenna.

The MFJ-906 handles 100 Watts FM and 200 Watts SSB PEP. The MFJ-906 measures 8" x 2?" x 3". The meter lamp uses 12 Vdc.

This one works fine and looks very close to new. MFJ sells them for about $100. With paper work for $65.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Siltronix SWR-2
This one is in its original box, and appears that it has never been used. With original paper work for $50

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

B & W 551 A "Transfer" or "Bypass" Coax Switch:

This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors coming out the sides.

It is in good shape for $40 plus shipping from Florida.

B & W 377 Coaxial Antenna Relay:

Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box; probably the same as some of the B & W coax switches used. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC, at 15 ma. The instruction sheet says that it is a unique relay design permitting this large variation in voltage. It also says it is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

This unit is in extremely nice condition, looking close to new, other than dymo labels that have been added.
With the paper work for $50.

B & W VS-300 A Antenna Tuner:

Handles 300 watts, with a wattmeter for 300 W forward and 30 W reverse included. Antenna switch for 3 coax antennas, plus a balun for open wire line. Antenna switch also includes a "bypass" position.

This one is in good shape. It works fine and looks great also.

Paper work included for $70.

HF Antenna Balun:

HyGain BN-86 Balun

The case of the BN-86 is constructed so that one can use it to hang a dipole or inverted V, or a U-bolt can be added to attach it to the boom of an HF beam antenna. The specs say it is good for 3 to 30 MHz, and will handle 1500 watts.

This particular balun works fine, but does show some physical use.
It includes the paper work for $40.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. Both have SO-239 connectors.

B & W FL-10/1500 low pass filter
This 50 ohm filter cuts off just above 10 meters, and will handle 1500 Watts. This is the latest model B & W filter. It is in very nice condition; it looks very close to new.
With paper work $40.

B & W 425 low pass filter
It cuts off just above 10 meters, and will handle 1500+ Watts. Maximum attenuation is at 52 MHz, with at least 70 db across the band. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It even has a serial number on it, and "Patent applied for". Paper work included. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen NLA-MM Mag Mount
Can be used with any NLA type antenna, including those above. Includes the mag mount itself, plus coax with PL-259 connector. $20

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Prices do not include shipping from Florida.

Thanks.

855. Misc Ham Accessories FS

Yahoo group: ham
Date: 2010-06-13 13:30:35 UTC
From: Ken Simpson, W8EK
Topic: 855 Message: 855

Various Miscellaneous Accessory Items For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. All have SO-239
connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says
Siltronix on it. The original instruction sheet has both
Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 phone patch

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes.

It is in excellent condition. It has a couple of modifications that
are very professionally done. There is a modular jack added for the
phone line. Two RCA phono jacks have been added for speaker in and
out. In both cases, they are in parallel with the original terminal
strip, so either may be used. The actual meter movement has been
replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

As above, but without any modifications, with paper work. $25

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the

tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

859. Kenwood Items FS

Yahoo group: ham
Date: 2010-06-22 17:56:36 UTC
From: Ken Simpson, W8EK
Topic: 859 Message: 859

An assortment of various Kenwood items For Sale:

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes between a Kenwood transceiver and a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check to be certain that the voltages and currents needed by your amplifier match the switching capabilities of your transceiver. There is a second coax cable with RCA phono plug for ALC control, if desired. $18

As above, but without the ALC cable. Most modern amps do not need the ALC connection, so this cable has only one coax for switching the relay. $12

Kenwood Paper Items:

Kenwood Log Book
Completely unused, new condition. It has standard log book pages, with a world map on the inside cover, and a DXCC list (as of 1983) in the back. Cover is a brownish color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as of 1985. Obviously, it is not completely up to date, but still is a very nice map. Like new. $5

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. Ideal for the Kenwood "Hybrid" rigs such as the TS-520, 530, 820, 830, etc. $25

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily

monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Accessories for Kenwood TH-215, TH-225, TH-415, and other HTs in that series:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood PB-2 Battery pack
8.4 V at 500 mahr. Holds charge fine. $25

Kenwood Wall Wort Charger for PB-2 above. $12

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-1 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-1 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Original Operating Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original and are not copies.

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TH-21 HT for 2 meters $8
Operating manual for TH-225, 2 meter HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
..For 2 meters, 440 MHz, and 1200 MHz. $12
Operating manual for TR-2200, 2 meter "portable"
..This is very similar to the Drake TR-22. $15
Operating manual for TR-2400, 2 meter HT $12
Operating manual for TR-2500, 2 meter HT $14

These are original Kenwood manuals only.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood.

$10
Please note: All other manuals are in English.

Service Manuals:

These are service manuals (not operating manuals) in extremely
good condition.

Service Manual for Kenwood TR-9130 multimode 2 meter transceiver
This manual is a very good copy. $10

Service manual for Kenwood TW-4000 dual bander, $20

Service manual for TR-2600, 2 meter HT $12

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

Lightning Protection, Communications Headset,
Microphones and Heil "Shock Mount", DMM, SWR
Bridges, Cables, and Crystals For Sale:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower, or just as it enters your house.
This unit has two SO-239 connectors, and is rated to
take 750 Watts and operate from 50 to 300 MHz (VHF)
and from 380 to 550 MHz (UHF).

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded, although it appears that someone must have
measured the SWR, as it says "4.5 MHz to 54 MHz, 1.1 to
1.4" on the back.

These sell for about $75 new. Buy this one for $55.

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser above,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Communications Headset:

Telex A-610 Dual Headset

This is a pair of 600 ohm communications headphones.
Telex is commonly used in aviation circles, and is designed
for good voice communications from the ground to the plane.
Of course if they work good for the aircraft industry, they
should work well for hams. It also tells one something about
the ruggedness and reliability of these headphones.

They have a 1/4 inch mono plug.

This particular pair works fine, and looks extremely good.
No defects that I can find. $40

Heil SM-1 Microphone "Shock Mount"

The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console. It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.

This shock mount works with the GM-5 and similar body sizes.

This particular unit works fine, and looks very close to new.
$50

Micronta 21-194 Digital Multimeter For Sale:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2

meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Hand Microphones:

Icom HM-12 microphone:
The HM-12 has a round 8 pin connector on it, and includes up-down switches on the top and a lock switch on the back. It is used with most of the modern Icom rigs using a round 8 pin connector.
The mic works as it should, and the mic itself looks very, very good. The cord has seen some of the Florida sun and has some deterioration. $40

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Looks and works great. With 4 pin connector. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

HT Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $20

Communications Speaker:

This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear

amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Crystals - FT-243, HC-6, etc.:

1000.00 KHz for crystal calibrator (octal plug)

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7081 (HC-6), 7094 (HC-6), 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)
7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 30.75,
32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

All crystals are $8 each, plus shipping from Florida.

I also have many 2 meter crystals in HC-25 holders.
Please e-mail your needs.

Prices do not include shipping from Florida.

Thanks.

863. Johnson Desk Mic, other mics, SWR Bridges FS

Yahoo group: ham
Date: 2010-07-03 12:37:07 UTC
From: Ken Simpson, W8EK
Topic: 863 Message: 863

For Sale:

Johnson Desk Microphone
It looks like a Shure 444, except it says Johnson on the front instead of Shure, and has the Johnson logo on it. I am assuming that it is a Shure 444 that Johnson simply had their name and logo placed on it.
This one has a very nice pattern on the scope and looks extremely nice. $45

Heil SM-1 Microphone "Shock Mount":
The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console.
It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.
This shock mount works with the GM-5 and similar body sizes.
This particular unit works fine, and looks very close to new.
$50

Heil Microphone Cable:
Heil CC-1 K microphone cable
This has an 8 pin round female connector wired for Kenwood on one end and a 4 pin XLR female on the other end. It also has the 1/4 inch socket that can be used for a foot switch, or other PTT switch. It is about 8 feet long.
It can be used to connect a Heil GM-5 microphone to most Kenwood rigs that take the round 8 pin connector, although it probably could be used with other units as well.
This one works fine and looks very close to new. In fact I doubt you could tell it from new. $25

Hand Microphones:

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,

with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Prices do not include shipping from Florida.

Thanks.

864. HF Rig, Dual Band HT, PS, Ant Tuner, Wattmeters, and more FS

Yahoo group: ham
Date: 2010-07-10 11:50:44 UTC
From: Ken Simpson, W8EK
Topic: 864 Message: 864

TenTec 585 Paragon, Power supplies, Automatic Antenna Tuner,
Dual Band HT, Wattmeter / SWR Bridges, Cables, Lightning
Protection, and other items For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!).

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. There are a couple of very minor scratches on the heat
sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,

but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Icom AH-3 Automatic Antenna Tuner:

The Icom AH-3 automatic tuner will tune continuously from 1.8
MHz through 30 MHz, i.e. from the low end of the 160 meter band
to top of the 10 meter band, including 60 meters and all WARC
bands. The AH-3 is a full HF tuner. Note that the newer Icom AH-4
tuner is not listed to tune below 3.5 MHz, while the the AH-3 is.
It requires at least 5 watts to automatically tune, and will handle
up to 120 watts. It requires 13 V DC to operate.

The AH-3 works with any Icom radio with standard 4 pin rear tuner
connector, such as the Icom 703, 703+, 706 series, 718, 746, 746
Pro, 756 series (including Pros), 7000, 7200, and many others. It
can also be used with most any other radio with a simple interface
(information provided).

This AH-3 is in excellent condition. Paper work is included for
$200.

Yaesu VX-1 Dual Band HT:

This is a dual-band HT which provides small size combined
with wide frequency coverage while weighing about 4 ounces.

It can produce up to 1 Watt output power in the 2 meter &
440 MHz bands. The VX-1 provides extraordinarily wide
frequency receive coverage of 500-1700 kHz plus 76-999 MHz,
which includes AM BC, FM BC, public safety, and audio from
most TV channels. The operating mode (AM, FM-Narrow, FM-Wide)
can be automatically preset.

It includes an FNB-52LI High-Capacity Lithium-Ion battery.
The memory system includes two main channel groups, plus
additional memories bringing the memory total to 291 channels!

To put it another way, the VX-1 will do more than most hams need!

This one includes the HT, LIon Battery, Charger, Rubber Duck
antenna, and an extensive manual. It works fine, and looks
very close to new. $125

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu

logo. It has never been used. $6

Wattmeters and SWR Bridges:

HF Digital Peak and Average Reading Wattmeter

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

120 Volt AC Power cables:

These are power cables that plug in to the 120 V AC line.
They have the standard 3 prong plug on one end, and have the
"International" 3 slot socket on the other end, as is used
on most computers, plus many other pieces of electronic
equipment, such as ham gear and test equipment.

These all function fine, and look very good. Some have been
used, and some may not have been.

Buy one for $1, six for $5, or 14 for $10.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

TenTec 585 Paragon HF Transceiver, Power Supplies, HF Digital Wattmeter, HF Vertical Antennas, and Lightning Protection For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all of the "Updates" performed on it by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. There are a couple of very minor scratches on the heat sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel

basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Two HF Vertical Antennas for pick up near Ocala Florida:

These two HF Vertical antennas are located near Ocala, Florida, near I-75. They are disassembled, on the ground, ready for pickup, and reassembly at your QTH. Paper work is included, as are all parts, to the best of my knowledge. I was careful with disassembly, so it should be easy to reassemble them. Due to their size, it is just not practical to ship them.

HyGain HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning. Total height is about 50 feet.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10/15 Meters.

This particular antenna is in extremely good condition. As far as I know, all hardware is included. The galvanizing on the tower sections is very good. The hardware is all stainless and still shines, with the exception of the galvanized bolts that Rohn uses on most all of their tower to hold the sections together. I do not find any rust.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny. If I were putting it up myself, I would clean the connections with a Scotchbrite sponge, but it is in great condition. I will even furnish the sponge!

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take 750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

876. TenTec HF Rig, Ant Tuners, interface, PSs, and more FS

Yahoo group: ham
Date: 2010-08-06 13:58:20 UTC
From: Ken Simpson, W8EK
Topic: 876 Message: 876

TenTec and related Items For Sale:

HF Transceiver, Antenna Tuners, Interface, Tuning Pod, Wattmeters,
Power Supplies, Microphone, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage
from 1.8 to 30 MHz, with a peak and average reading cross-needle

SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load. It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

TenTec Model 258 RS-232 interface board w/258-IBM Software
This accessory will add a computer interface to TenTec HF transceivers. I know for sure it works with the 585 Paragon, and my memory says it also works with the Omni V, and I think the Omni VI, although I think certain interations of the Omni VI included it as standard. It consists of a plug in board, plus cabling to a DB-25 connector.
In addition to the hardware, I also have the software, for use on a standard PC.
It is in good shape and works fine.
$135 for both the hardware and software

TenTec 301 "Tuning Pod"
This unit can be used with an Omni V and Omni VI, and I think most of the TenTec rigs that use an optical encoder. It permits one to tune the rig from a semi-remote location. This one works fine and looks very close to new. With paper work for $125.

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

TenTec Power Supplies:

TenTec 961 power supply with speaker
Produces 20+ amps at 13.8 Volts DC.
This supply matches the Corsair II, Paragon, and Omni V/VI series.
A nice speaker is included. This particular unit works 100% and
looks very good. Paper work is included for $150.

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass
transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

Prices do not include shipping from Florida.

Thanks.

881. HF Antennas, Tuners, Wattmeters, and other Antenna related items FS

Yahoo group: ham
Date: 2010-08-13 11:43:16 UTC
From: Ken Simpson, W8EK
Topic: 881 Message: 881

For Sale:
HF Antennas and related items such as Antenna Tuners,
Wattmeters, SWR Bridges, Lightning Protectors, Low Pass
Filters, Mobile Antennas, Rubber Duck Antennas, and
Connectors

HyGain 18 HT HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10
meters. The WARC bands (and 160 meters) can be added, but
are not a part of this antenna at present. This is an extremely
rugged antenna, consisting of about 30 feet of actual tower,
with additional stubs for tuning.

Automatic band selection is achieved through a unique stub
decoupling system so that an electrical 1/4 wavelength (or
odd multiple) exists on all bands. Unity gain on 20, 40, 80;
2 dB on 10 and 15 Meters.

This particular antenna is in extremely good condition. It has
stainless steel hardware. The galvanizing on the tower is very
good. As far as I know all hardware is included. The base
insulators are new.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80
thru 10 meters, including the WARC bands. It covers the
entire band on 40 thru 10, and about 100 KHz on 75/80 meters.
It is about 25 feet tall, and includes a counterpoise, so
that no radials are required.

One of the primary virtues of the Titan is the GAP center
feed. By elevating the feed the earth loss is dramatically
decreased, which means the RF is going out to make the contact
instead of into the ground to warm the earth. Reducing the
earth loss eliminates the need for a radial system. The
Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no
corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new,
with paper work for $250. Pick up only near Ocala FL.

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner:

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage from 1.8 to 30 MHz, with a peak and average reading cross-needle SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load.
This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and

power ranges of 200/2000 watts forward and 50/500 watts
reflected. Frequency coverage is 1.8 to 60 MHz, so it covers
6 meters in addition to the HF bands, making it ideal for
some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Midland 23-126 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it; it may not have ever been used. In its
original box with original instructions and small telescoping
antenna. $32

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the

bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

882. Interfaces for computer/digital modes FS

Yahoo group: ham
Date: 2010-08-14 12:58:58 UTC
From: Ken Simpson, W8EK
Topic: 882 Message: 882

Various Interfaces for computer control, digital modes,
etc. For Sale:

Kenwood IF-232c Interface / Converter

The IF-232c is the interface adapter for connection between
the RS-232C terminal of a personal computer and the interface
terminals of transceivers capable of computer control, such
as the TS-440S, TS-940S, the TS-811/711 series, and others.

The interface acts as a voltage converter between the RS-232C
port (-12 to + 12V) and the TTL levels of the transceiver
(0 to +5V), and as a noise-suppressor.

This one includes a wall wart power supply, DIN plug, and
paper work for $60.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes.
It is in excellent condition. It has a couple of modifications
that are very professionally done. The actual meter movement
has been replaced with a slightly larger, and more professional
looking meter. Knobs are original. There is a modular jack
added for the phone line. Two RCA phono jacks have been added
for speaker in and out. In both cases, they are in parallel
with the original terminal strip, so either may be used.
It works fine and looks close to new. A terrific unit.
Paper work included for $30.

Heath HD-15 Phone Patch
As above, but with no modifications, in extremely good condition.
No scratches or imperfections. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $65

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check the switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Books about Digital subjects:

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Hardback Book Published by Tab
Like New, 208 pages, $12

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

Computers by Long and Long
Large book with about 750 pages. Answers to problems included. Like new. $20

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Ken Simpson

885. 2 meter HT, many HT accessories, etc. FS

Yahoo group: ham
Date: 2010-08-22 11:38:14 UTC
From: Ken Simpson, W8EK
Topic: 885 Message: 885

Two meter HT, HT Accessories, and VHF/UHF related equipment for sale,
such as Protective Cases, GPS for APRS, Speaker Microphones,
Batteries, Belt Clips, Wrist Straps, Rubber Ducks, Wattmeters,
Power Cables, DMM, and much more:

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, rubber duck antenna,
belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

FNB-52 LI Lithium Battery for VX-1 HT
Fits VX-1 dual band HT. It works fine. Holds a good charge
and is in good health. $25

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH,
etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer.
DeLorme Street Atlas Software is included, so plan your
route, and also let the GPS tell you where you are, and
give you voice directions, if desired. You can even ask
it questions!

It will calculate your route and tell you exactly where
and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no
additional power supply is needed.

This particular unit is in close to new condition, in its
original box, with the GPS unit, and the software. I would
think that it could be used with APRS. $65

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. Coiled cord is somewhat stretched, but works
fine. $12

Dead PB-2 Battery for rebuilding, or use the case to adapt
other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Kenwood Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for

Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Dead Battery Packs:

Please note that all of these battery packs are dead. There
is no voltage from them. They are being sold for the purpose
of rebuilding, or to be used to build a regulator in them,
or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24,
and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly
deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call
sign scratched in case, $5
Buy all four of the above for $20.

Dead Kenwood PB-2 Battery for rebuilding, or use the case to
adapt other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

888. radio Operators and other support people critically needed for Feb trip to Honduras !!

Yahoo group: ham
Date: 2010-08-25 13:13:29 UTC
From: John Kirckof
Topic: 888 Message: 888
Attachments: 1 described; binary payloads are missing from this source WARC

Hi,

Thanks for your past interest in the February medical mission to Honduras. For those who go it will be quite the adventure and a very fulfilling experience !!

Please note that we are in critical need of radio Operators and other support people to go on this medical mission trip. With 5 or 6 teams planned for Feb, we sure do need help from you and any other medical and support people you know. For Feb, we also will have 3 surgical teams and 2 or 3 eye teams so you can see where we will need more medical and support people. If you have already sent in your application, thanks for doing that… we anticipate a great mission with quite a variety of team types.

I just received a listing of the people who have signed up for the IHS Feb medical trip. We have several signed up but are very low in numbers of some critical professions. The details are below.

Note that the advertised deadline fro the Feb trip has been 1 October but we really need to get everyone to sign up as soon as we can so we know where our shortages are. Then we can concentrate on ordering supplies & meds plus do some recruiting in those areas needed most.

Important: It is very easy to apply now by simply going to the web site: www.IHSMN.org and go to "Volunteer" to select the Oct or Feb application. Later, you will have to send in a couple forms and the deposit but we will at least have your info and know you can go… great ! This web site also has some photos, Newsbreak newsletters and info about the trip. Also note the attached Team Map which shows our last trip.

Just as important as your going, please consider mentioning our need for medical and support folks to others. If each of you found just one other person to go, all our positions would get filled. I do have Newsbreaks newsletters (paper and .pdf) and other resources if you need them, too. I can e-mail such things directly to anyone as needed.

If you have any questions, feel free to call me, any IHS Director or any IHS officer. We are all here to help.

John

John Kirckof

892. Antenna Tuner, HF Rig, Wattmeters, etc. FS

Yahoo group: ham
Date: 2010-08-27 19:34:40 UTC
From: Ken Simpson, W8EK
Topic: 892 Message: 892

For Sale:

Antenna Tuner, HF Transceiver, Power Supplies, Microphone,
Wattmeters / SWR Bridges, Vertical Antenna, and more

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. I think it has the latest firmware, as it
includes Pactor in it. It works fine, and looks very close
to new. The large, inch thick manual is included for $125.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it. It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original box, with original instruction sheet, and antenna. $30

HyGain 18 HT HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10 and 15 Meters.

This particular antenna is in extremely good condition. It has stainless steel hardware. The galvanizing on the tower is very good. As far as I know all hardware is included. The base insulators are new.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

897. Equipment for digital modes FS

Yahoo group: ham
Date: 2010-09-04 12:10:32 UTC
From: Ken Simpson, W8EK
Topic: 897 Message: 897

Equipment for the Digital Modes For Sale:

AEA items:

AEA PK-232 MBX / DSP,
multi-mode digital controller with the DSP Option
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, Pactor, etc.
This unit has the latest Version 7.2 firmware, and has the
DSP option installed, so it has considerable upgrades compared
to most PK-232's you find for sale.
It works fine, and looks very close to new.
The large, inch thick manual is included for $175.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Heath HD-15 phone patch / digital interface

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes that use a sound card. The meter makes
it great for setting levels.

This one is in excellent condition. It has a couple of great
modifications that are very professionally done. The meter has
been replaced with a slightly larger, and more professional
looking meter. There is a modular jack added for the phone line.
Two RCA phono jacks have been added for speaker in and out. In
both cases, they are in parallel with the original terminal strip,
so either the original terminal strip or the new connections may
be used.

Paper work included for $30.

Heath HD-15 digital interface / phone patch
As above, but this one is all original. It is in excellent
condition. Cosmetically, I can not find a scratch on it.
Everything on it is original.
Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $60

Wattmeters and SWR Bridges:

M C Jones VHF/UHF Wattmeter
This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.
This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.
This one functions fine, and looks extremely nice for its age.
$60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either
peak or average power. It is a digital meter with no moving
parts, although it does have a sort of analog bar graph on it.
It is rated to cover 1.8 thru 30 MHz, so it covers all of the
HF bands. It will measure up to 2000 Watts, in ranges of 2000,
200, or 20. It will also indicate SWR, which requires at least
1/2 Watt. It has a nice back light, and requires 13 V DC for
operation. There is about a 3 foot cable between the digital
display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to
not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original
box, with original instruction sheet, and antenna. $30

19 inch Relay Rack Shelves

This black shelf in made to fit a standard 19 inch relay rack.
The shelf itself is 17 5/8 inches wide (standard width for
inside of the rack) by 18 inches. It attaches to the rack so
that 4 inches of it extends in front of the rack and 14 inches
behind the rack (or you could reverse it for 14 inches in front
and 4 behind). It has vent holes so that equipment that is set
on it can get some air. It requires 4 inches of rack space.

It is similar to one seen here
http://www.l-com.com/item.aspx?id=8487
or
http://www.rackmounts.com/Middle-Atl...MS-DF2984.html
except 4 inches of it extends past the mounting point.

These are in extremely good condition. I can not find a scratch
on them. They look new. Two are available. Buy one for $35,
or both together for $65.

Prices do not include shipping from Florida.

Thanks.

898. Tower and other antenna related items FS

Yahoo group: ham
Date: 2010-09-05 19:00:48 UTC
From: Ken Simpson, W8EK
Topic: 898 Message: 898

Antennas and related items For Sale:
Tower, Mast, Full Power Antenna Tuner, Wattmeters and SWR
Bridges, Lightning Protectors, VHF and UHF Mobile antennas,
Coax Connectors, etc.

The first two items are pickup only near Ocala, Florida,
close to I-75. The other items can be shipped.

Antenna tower:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Heavy Duty Antenna Mast:

18 foot long heavy duty galvanized antenna mast.
2 inch OD with 1/4 inch wall.
This is heavy! But also very strong!

It is in good condition and is located near Ocala Florida,
near I-75. $125

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select power ranges of 20/200/2000 watts forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good. With paper work for $50.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

902. HF Rig, Tuner, Ant Analyzer, Mics, Wattmeters, etc.

Yahoo group: ham
Date: 2010-09-11 13:47:11 UTC
From: Ken Simpson, W8EK
Topic: 902 Message: 902

For Sale:

HF Transceiver, Antenna Tuner, Antenna Analyzer, Power Supplies, Microphones, Wattmeters / SWR Bridges, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

Collins Hand Microphone:

Collins MM-1 Mobile Microphone
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome.

This one works fine; there are a couple extremely small pits (smaller than a pin head) on the chrome, but it looks very good. The coiled cord is a bit stiffer than when it was new.
With PJ-068 connector (often used on Collins and Drake equipment) for $100.

Antenna Analyzer:

MFJ 249 Antenna Analyzer:

This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.

Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly displays your information. Built-in frequency counter.

This particular unit works fine, and looks extremely nice.
With paper work for $150.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just
after WW II. At that time, it was the gold standard of wattmeters,
basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12
Watts full scale in the forward position, and 4 Watts full scale
in reflected. It also has an SWR calibrate and SWR scale on the
meter. I think the frequency range is from 20 to 1000 MHz, but I
am not 100% positive of that. It works well on 2 meters and 440
MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridge:

Quement SWB-2 HF and VHF Dual Meter SWR Bridge
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is

ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Lightning Protector:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

903. Dual Band HT, 2 m HT, HT accessories, and more FS

Yahoo group: ham
Date: 2010-09-12 19:56:54 UTC
From: Ken Simpson, W8EK
Topic: 903 Message: 903

Dual Band HT, Two meter HT, HT Accessories, and VHF/UHF
related equipment for sale, such as Protective Cases,
Speaker Microphones, Batteries, Belt Clips,
Wrist Straps, Rubber Ducks, DMM, and much more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $175.

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, a rubber duck antenna,

belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge like new. $22

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH, etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters. It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the

Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but works fine. $12

Kenwood BC-2 Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Dead Battery Packs:

Please note that all of these battery packs are dead. There is no voltage from them. They are being sold for the purpose of rebuilding, or to be used to build a regulator in them, or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24, and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call sign scratched in case, $5
Buy all four of the above for $20.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

916. Antenna Tuners, Wattmeters, Dummy Load FS

Yahoo group: ham
Date: 2010-09-30 10:51:58 UTC
From: Ken Simpson, W8EK
Topic: 916 Message: 916

For Sale:

Antenna Tuners, Wattmeters / SWR Bridges, Antenna Analyzer,
Dummy Load,

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 941 C antenna tuner for 160 thru 10 meters

This tuner has a "cross needle" SWR bridge built into it,
so one can read both forward power, reflected power, and
SWR at the same time. The meter has a back light, assuming
12 Volts is applied to the tuner. The wattmeter portion
will read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a built in dummy load. Antennas can
be operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including
the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.

Paper work is included for $100.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200
watts. I would not put more than 100 watt thru it, however.
It is in a nice Woodgrain / Eggshell color enclosure that is
a perfect match for some of the earlier TenTec gear, such as

the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

Wattmeter and SWR Bridges:

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it it is rated to be used up thru 2 meters (1.8 thru 150 MHz). It is also a field strength meter.
SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

MFJ 249 Antenna Analyzer:
This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.
Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly

displays your information. Built-in frequency counter.
This particular unit works fine, and looks extremely nice.
With paper work for $150.

Heath HN-31 "Cantenna" RF Dummy Load:
This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.
I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.
Paper work is included for $45.

Prices do not include shipping from Florida.

Thanks.

918. HF Rigs and Power Supplies FS

Yahoo group: ham
Date: 2010-10-02 11:40:50 UTC
From: Ken Simpson, W8EK
Topic: 918 Message: 918

Several HF Transceivers, and Power Supplies For Sale:

Icom IC-756 Pro, 160 thru 6 meter transceiver

The upgraded Icom IC-756 Pro covers all nine HF ham bands plus 6 meters (receive from 30 kHz - 60 MHz). The high resolution 4.9 inch TFT color dot matrix LCD display provides more operating information than you've ever had before, including a spectrum scope (± 12.5, ± 25, ± 50 or ± 100 kHz). The Pro features a 32-bit floating point DSP Digital IF filter with 41 selectable bandwidths, microphone equalizer, manual notch function, digital twin pass band tuning (PBT), all mode, including PSK31, and much more. No additional filters or high stability crystal oscillators are available or needed. The selectivity lets you pull out weak signals like never before. The rear panel features two antenna inputs plus an RCA type receive antenna jack.

It includes such things as a Voice Keyer, 101 Memories, RIT/XIT, Noise Blanker, Multiple Display Formats, Realtime Spectrum Display, Twin Digital PBT, Voice Recorder, 100 Watt Output, Built-in Auto Antenna Tuner, TCXO Built In, 100% Duty Cycle, Built in RTTY Demod, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, Automatic Notch and much more.

This particular unit works 100% as best I can tell. I tried to test everything. It looks extremely nice. It is in its original box, with paper work for $1100.

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in

automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom PS-30 Deluxe Power Supply

The Icom PS-30 power supply delivers 13.8 VDC at 25 amps. This power supply features a meter which can be set to display amperage or voltage. Four outputs are provided on the rear panel. Output 1 is a hard wired, high amperage cable with the Icom standard 6 pin Molex plug. Outputs 2, 3 and 4 provide low amperage 13.8 VDC output. This power supply has a snap-out tilt bracket.

This one works 100% and looks very nice. With paper work for $185.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood PS-430 power supply
This 20 amp, 13 V DC power supply matches TS- 140, TS-430, TS-440, and others. It has the heavy 6 pin Kenwood power cable plus an axillary 13 V DC output on back for running other shack accessories.
This one works fine, and looks good. With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 989 C Roller Inductor Full Power HF Tuner:

This is the most popular legal limit antenna tuner. It
handles 1500 Watts from 1.8 to 30 MHz including MARS/WARC
bands.

You can match dipoles, verticals, inverted V's, random
wires, beams, balanced lines, coax, mobile whips,
shortwave -- nearly any antenna.

It includes a cross needle meter to read forward power,
reflected power, and SWR simultaneously. It will read
peak or average power. It also has a switched meter light,
if you supply 12 Volts to it.
An antenna switch is built in, as is a dummy load.

This one works 100% with absolutely no problems. It looks
extremely nice, with no scratches. It includes paper work,
and is in its original box.

MFJ sells these for just under $400. Buy this one for $230.

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a
Shure 444, and has a controlled magnetic element in it just
like the Shure 444. My assumption is that it is a 444 with an
RCA label.
Of course most of us know that the 444 is an extremely good
communications microphone with great articulation.
This one works fine, and looks very nice. It has a 4 pin
connector on it. $50

Prices do not include shipping from Florida.

Thanks.

Several HF Transceivers, Power Supplies and Antenna
Tuners For Sale:

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory

names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work is included for $650.

Icom MB-62 Mobile Mounting Bracket:

The MB-62 is the mobile mounting bracket that is used for the Icom 706 series, IC-703, and for the AT-180.

This particular one is new, still in its original box, with all mounting hardware, never used, just as it came from Icom. $25

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and

PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood YK-88SN, 1.8 KHz filter for narrow SSB or wide CW
This solder in filter fits the TS-440 (above), plus many other Kenwood rigs. It provides a very effective filter for SSB when conditions are tough, and a medium width filter for CW when the going is not as tough. Of course it works fine. It looks fine also, as if that matters when inside a rig. $79

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 670 Electronic Keyer / Paddle:

The TenTec 670 is a complete electronic CW keyer in one package. It includes the paddle as well as the electronics, so there is no need to add a paddle as with most keyers. There is a cable with two RCA phono plugs on it it -- one for 12 V DC and one for the keying output. This unit is made to key solid state rigs (typically switching 12 Volts). It is a sort of chocolate brown color styled to match the early Omni series A,B, and C, the TenTec Delta, etc.

This particular unit works fine, and looks extremely nice. I can not find a scratch on it.

Paper work included for $60.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. This one works fine, and looks fine also. $45

Ameritron ARB-704 Linear Amplifier Keying Interface

The ARB-704 advanced interface is compatible with all common radios and amplifiers.

The input is designed to be compatible with any transmitter or transceiver, and the output is compatible with AC control lines or DC positive or negative amplifier control lines having up to 200 Volts peak open circuit voltage and 300 mA of operating current.

The ARB-704 has many electrical advantages over conventional relay buffer systems. The ARB-704 has no moving parts so it switches almost instantaneously.

This one is new, in its box, with everything that came with it originally, including all cables, and manual. MFJ sells them for about $60. Buy this one for $45.

Ameritron PNP-7D "Quick Connect" Cable for most Kenwood rigs
(TS-440, 950, 130, 2000, etc.) to ARB-704. New. $12

Coaxial antenna switches:

All have SO-239 connectors, and work 100%.

B & W Model CSR-5G (also known as 376)
This model will switch up to 5 antennas, grounding
all unused antennas. It has SO-239 connectors, with
the coax coming out like spokes of a wheel.
This one works 100%. With paperwork for $45.

MFJ 1702 B, 2 position
Heavy die cast housing, with a center position
to ground both antennas. Works great, and looks like
new. $22

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so they are ideal for the new
rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

I also have many other accessories available such as
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

HF Antenna Related Items For Sale

Automatic and manual antenna tuners, Wattmeters and SWR Bridges, Dummy Load, Coax and Connectors, Tower, etc.

SGC-239 Automatic Antenna Tuner:

The SG-239 will operate from 1.8 to 30MHz with 1.5 to 200W. It has over 130,000 tuning combinations and 170 memory bins. It gives you the most flexibility because it will work with any antenna and any transceiver. It also has push buttons for a manual tune option. It weighs only 2 pounds, so you can use it for base or portable!

TECHNICAL SPECIFICATIONS
HF Frequency Range: 1.8 to 30 MHz
Power Input Range: 1.5 to 200W (PEP) and 80W (continuous)
DC Input Requirement: +13.8 VDC (nominal) at 300 ma
Recurrent set time: Typical: Less than 10 milliseconds
Antenna Minimum lengths:
40 feet(3.3 to 30 MHz) or 100 feet(1.8 to 30 MHz)
Size:7.5L x 6W x 1.85H inches
Case Construction: Aluminum case with exposed PCB

This particular unit works fine, and appears to be new, still in its original box. With paper work for $150.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter:

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF frequencies, covering from 140 to 450 MHz. Since it is a cross needle meter, it can read forward power, reverse power, and SWR simultaneously. It also has a lighted meter if you apply 12 volts to it. The full scale deflections are either 75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual

and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Antenna tower in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as HF rigs,
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

954. Desk Mics, Hand Mics, DTMF Mics, Spkr Mics FS

Yahoo group: ham
Date: 2010-11-07 13:58:12 UTC
From: Ken Simpson, W8EK
Topic: 954 Message: 954

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Kenwood MC-60 A Desk Microphone

The MC-60 A is a deluxe desk microphone that includes up-down
switches, as well as a locking or non-locking PTT switch.
It may be used either in amplified or non-amplified mode.
It has a round 8 pin connector on it, and can be used with
virtually all Kenwood rigs with the round 8 pin connector.

This particular mic comes from a non-smoking environment,
works 100%, and looks very close to new.

Paper work included for $90.

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

Shure Desk Microphones:

Shure 522
This is a desk mic that looks very close to the same as the
common Shure 444, but it has a dynamic mic element in it, with
good articulation. It has a high and low impedance switch on
the bottom.
This one works fine and looks very close to new. $55

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a
Shure 444, and has a controlled magnetic element in it just
like the Shure 444. My assumption is that it is a 444 with an
RCA label.
Of course most of us know that the 444 is an extremely good
communications microphone with great articulation.
This one works fine, and looks nice. It has a 4 pin
connector on it. $50

TenTec Desk Microphones:

TenTec Model 706 deluxe base microphone
The TenTec model 706 is an electret microphone. It has an 8 pin connector as used on the Orion, Eagle, and the newer TenTec rigs. This particular mic works 100% and looks very close to new. $75

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Hand Microphones:

Astatic D-104-M6 Hand Microphone

Most of use know what the D-104 "Lollypop" desk mic is like. This is the hand mic equivalent.

The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.

This one works fine and looks extremely nice.

With paper work for $40.

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

Several HF Transceivers, Power Supplies, Antenna Tuner,
etc. For Sale:

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely
nice. Microphone and paper work is included for $650.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Sangean ATS-803 A Short Wave Receiver:

The Sangean ATS-803A is a "top of the line" receiver. This digital world band radio has dual-conversion covering all shortwave frequencies (1.6-30 MHz), long wave (150-519 kHz), AM (520-1710 kHz) and FM (87.5-108 MHz). A BFO control is included for smooth SSB and CW reception. An LCD display with dial lamp shows frequency, 24 hour time, battery indicator and signal strength. The receiver features an RF gain, tone, wide-narrow selectivity, keypad entry, manual tuning knob, plus 14 memories. There is an external RCA phone antenna jack on the rear panel.
The left panel has a 3.5mm earphone jack plus a DIN type jack for tape recording. It can be powered by either batteries or a wall wart power supply.

This one works fine and looks really great as well.
With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

CW Keys:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Heavy Metallic Base for CW Key
This is a heavy metal base that weighs about a pound and a half,
black color with red felt on the bottom. Attach most any key to
it and it will stay in place on your desk! $20

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or
become a low pass or high pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel. This is the
"A" model that also has an additional notch filter added.
The input is an 1/4 inch phone plug, and the output is a 1/4
inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice.
I can not find a scratch on it.

With paper work for $60.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as
microphones, wattmeters, etc. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

HF Antenna related items For Sale -- Automatic and manual antenna tuners, Legal Limit Baluns, Coaxial Antenna Switch, SWR Bridges, Rotor Control Box, Dummy Load, Low Pass TVI Filters, Speaker, Tower, Connectors and more

LDG Automatic Antenna Tuners:

I have two LDG automatic tuners available. Both will work from 160 thru 6 meters. They will automatically tune with relays, and then hold that tuning. They have memories, so that tuning takes just a fraction of a second after it is done the first time. Both will handle 100 watts on HF. Tuning range is about 6 ohms to 800 ohms, so it is a really broad range.

Z-100 tuner
This tuner can be used with any rig. It can be powered by 9 volt batteries, or a 12 V DC supply. Good for QRP. This one works fine, and looks very close to new. With paper work for $115.

IT-100 tuner
This tuner is made specifically for the Icom rigs with AH-4 interface, which includes the IC-706 series, IC-7000, IC-756, and others. It gets its power from the rig.
This one works fine, and looks close to new. With paper work and cables for $135.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax to a balanced load such as a beam or dipole. It will also help reduce radiation from the coax feedline, that could reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun, and is potted to seal out moisture. It is rated at 4000 Watts for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Coaxial Antenna Switch:

B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel.

This one works fine and looks good as well.

$35

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that

reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

8 wire antenna rotor control box:

Newer 8 wire antenna rotor control box
This control box will work with most of the antenna rotors that require the 8 wire control, which includes most CDE, Ham-M, Ham III, Ham IV, etc.
This is the newer black colored control box, with the HyGain name, designed for the Ham IV. It works fine, and looks very good. Paper work is included for $95.

Please note that this is the control box only, and does not include the actual rotor.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use. Of course with a 1 watt scale it would also be great for QRP use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-1000
This is the copper cased filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $30.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
This is an older, heavier duty model. $35

Yaesu SP-901 P Speaker For Sale:

Although the SP-901 was made to match the FT-901 and FT-902 series, it is a very good match for most ham quipment, and provides a very desirable front facing speaker.

The "P" model of the SP-901 also includes a phone patch, if you would like to use that. Of course you can just use it as a plain speaker without connecting the phone patch portion, if you want.

This particular unit works fine and looks extremely nice. I can not find any scratches on it. It looks perfect.

With paper work for $90.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:
-
Prices are per connector. Several of each are available.
These are NOS (have not been used).
-
BNC male for coax cable
standard type - $2
crimp on type - $3
-
Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3
-
BNC "T" - two female and one male - $3
-
Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5
-
UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3
-
UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

985. Desk Microphones, Hand Mics, and other Mics FS

Yahoo group: ham
Date: 2010-12-11 21:54:27 UTC
From: Ken Simpson, W8EK
Topic: 985 Message: 985

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding
PTT on/off switch, dynamic microphone element and detachable
multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Turner "Plus Three" Desk Microphone
This is an amplified desk mic, so it can be used with most any
rig. Gain can be adjusted from basically no gain to quite a bit.
The reviews on eham, several people say it is the best microphone
they ever used. It requires a 9 volt battery. It presently has
a round 8 pin connector wired for Kenwood, but of course that
can be changed.
This one works fine and looks nice. $40

Hand Microphones:

Kenwood MC-35 S hand microphone
This Hi Z hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This can be a noise canceling mic. It has a switch
to switch the noise cancelling in or out. It has a four
pin plug on it to match these rigs. Of course it can be
used on any rig requiring a Hi Z mic.
This one is in very nice shape, and includes paper work.
$40

Astatic D-104-M6 Hand Microphone
Most of use know what the D-104 "Lollypop" desk mic is like.

This is the hand mic equivalent.
The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.
This one works fine and looks extremely nice.
With paper work for $40.

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

994. Dual Band HT, HT Accessories, and VHF related items FS

Yahoo group: ham
Date: 2010-12-19 23:37:47 UTC
From: Ken Simpson, W8EK
Topic: 994 Message: 994

Dual Band HT, HT Accessories, and VHF/UHF related equipment
for sale,
such as Wattmeters / SWR Bridges, Duplexers, Protective Cases,
Speaker Microphones, Belt Clips, Wrist Straps, Rubber Ducks,
and more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $155.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu
logo. It has never been used. $6

Duplexers / Diplexers:

These units are designed to split transmit and receive signals between 2 meters and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. These units can be used either to combine or separate the two bands. Both work fine and look great also.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. $50

Diamond MX-72 D
It has a 1.6-150mhz input on one port (so it can be used to split 6 meter or HF as well as 2 meters) and a 400-460mhz port. The HF port will handle 1kw and the UHF port 400 watts. Isolation is 60db between ports. It has an SO-239 on one end and two PL-259's on the other. $40

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on

the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to a computer so that you may operate using over 100 existing and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster, a radio and a computer is the easy and modern way to operate with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all of the items listed on the enclosed paper work. Software CD is included, along with many cables. It looks like this unit may not have ever been used. Most bags appear that they have not been opened.

West Mountain sells these for about $160. Buy this one for only $120.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood PG-3 E Filtered Cigarette Lighter Cable
This cable is used to power the Kenwood TH-215 series, TH-225 series, TH-25, TH-75, and other Kenwood HTs. It plugs into a cigarette lighter, and filters the noise.
This one is NOS (New, Old Stock), still in its original blister pack. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs For Sale:

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for
the TH-21 series, and may also be used on other Kenwood radios.
$12

DEAD Kenwood PH-21 H battery pack
This is the heavy duty (high capacity) battery back used with the
TH-21 series HTs. The batteries in it are dead, but it can be sued to
put a new "insert" in, or for building a 12 V DC adapter. Physically
it is in good shape. $10

Kenwood RA-6 Rubber duck antenna for the TH-21 HT
This is the original 2 meter rubber duck. $15
As above, but shorter "Stubby Duck" $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, 5 inches long
BNC - Stubby about 4.5 inches long
-

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Rubber Duck Antennas with SMA Connectors:

All of these have SMA connectors as used by most modern
multiband HTs. All work fine, and look very close to new.

All provide gain over the standard rubber duck.

MFJ 1720 S, for 6 meters, 2 meters and 440 MHz
This MFJ Triple Band HT FlexiDuck antenna is 19 inches tall. It is a 5/8 Wave on 440 MHz to give you 3.2 dB gain. On 2 Meters it is 1/4 Wave antenna with 2.15 dBi gain. On 6 Meters you get an efficient full size 1/4 Wave antenna for full-size performance. $25

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on both 2 meters and 440 MHz. $20

Two meter vertical antenna:

This 2 meter antenna is made for base station or for portable use. It is a 5/8 wave antenna (so it has about 3 db gain), with four radials. It is made to be mounted to a 1 1/4 or 1 1/2 inch mast pipe. It has an SO-239 connector on it, for connection to a PL-259.

The construction of this is relatively light duty. To put it another way, this one will not survive 100 MPH winds! It appears to be a commercially made unit, but I can not find any name on it. It goes together very quickly, with each radial screwing into a bolt, and then simply attaching the whole thing to a mast. As such, it would be great for portable work.

While the construction is light duty, it appears to be quality hardware. Some appears to be stainless, and some of it anodized. There is no corrosion evident on it. $25

Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that needs 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Prices do not include shipping from Florida.

Thanks.

998. Heil Mics and accessories, Mic Stands, other mics and accessories FS

Yahoo group: ham
Date: 2010-12-31 14:04:39 UTC
From: Ken Simpson, W8EK
Topic: 998 Message: 998

A variety of Microphones and Microphone accessories,
including Heil Mics and accessories, other Desk Microphones,
Hand Microphones, DTMF Touch Tone Microphones, and HT
speaker microphones for sale:

Heil Microphones:

Heil GM-5 "Goldline" Professional Microphone

The "Gold Standard" Studio Microphone for Amateur Radio

The GM Series of microphones is a unique, innovative
microphone renowned for its gorgeous audio production. It's
crystal clear response made it an instant best-seller, and
it is the microphone of choice in thousands of Ham shacks
around the world today.

The GM includes the Heil-exclusive "Light Touch" PTT switch,
and is encased in a beautifully-finished high-gloss black
lacquer enclosure. The GM is fitted with a 4-pin XLR connector
compatible with the Heil CC-1 Series of adapter cables.

This GM5 version is equipped with the new full-range mic element
and the famous HC-5 element. It works with most rigs, but is NOT
made to be used with Icom rigs. See HM-I below if you have an
Icom radio.

This one works fine and looks like new. No defects of any
sort. $95

Heil HM-I for Icom Radios

The Heil Sound HM-I is a microphone that is specifically made
for Icom transceivers (green band). It is basically equivalent
to the GM-5 (above), except it is made specifically to work with
Icom rigs. It has a switch to switch between the wide and
narrow elements.

This one works fine, and looks like new. $80

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

Heil CH-1 I8:
4 pin XLR connector (for GM-5 or HM-I) to round 8 pin mic
connector wired for Icom. It also has a 1/4 jack for a PTT

switch. $20

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

AD-1-iCM Headphone Adapter
AD-1 iCM: iC modular, no cap (for use with iC elements only)
It has a modular connector for Icom on one end, with a 1/8 and 1/4 jack on the opposite end. $15

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Icom OPC-589
Icom round 8 pin microphone jack on one end with a modular 8 pin connector on the other end. Made to convert your mic with the round connector, so it can be use on a rig that requires the modular connector. $22

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Solid 12 inch Tube
Male connection both ends. Chrome plated threaded tubing, with a small hole so that a mic cable can be brought out of the center of the tube. Standard 5/8 inch threads. 12 inches long. $10

Triangle Flange
This is a trangle shaped flange that will mount to a desk, board, or other flat wood or metal object. It is about 2 1/2 by 2 inches, chrome plated, with mounting hardware. Standard 5/8 inch threads. $8

Heil Wind Screen

This windscreen can be used with a variety of microphones, including the GM-5 and HM-I above. Excellent condition. $5

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Desk Microphones:

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Johnson equivalent to a Shure 444 desk microphone:

Although the front of this mic says Johnson on it, it looks like a Shure 444. My assumption is that it is a 444 with a Johnson label.

Of course most of us know that the 444 is an extremely good communications microphone with great articulation.

It appears that this one has a low impedance element in it, making it a better match for the more modern rigs.

This one works fine, and looks nice. $45

Gooseneck Microphone:

Astatic Model 810-6.
This mic is on a 12 inch gooseneck. The mic itself is brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

It is similar to the one found here:
http://www.focusedtechnology.com/1191-19.html

This one works fine and looks good. $45

Hand Microphone:

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S,
451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector,
works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Prices do not include shipping from Florida.

Thanks.

1002. 2 m rig, dual band HT, Multimode, & Wattmeters FS

Yahoo group: ham
Date: 2011-01-07 21:11:25 UTC
From: Ken Simpson, W8EK
Topic: 1002 Message: 1002

Two meter mobile transceivers, dual band HT, Multiband Multimode transceiver, and VHF and HF Wattmeters For Sale:

Alinco DR-150T VHF FM Mobile Transceiver:

The DR-150 is a 50 watt 2 meter transceiver that will also receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any scratches on it. Mobile bracket with hardware, DTMF Microphone, power cord and paper work are included in the original box for $150.

Kenwood TR-7400 Two Meter FM Transceiver:

The Kenwood TR-7400 is a digitally synthesized high performance, 2 meter mobile FM transceiver. It features a full frequency digital LED display. Transmit power may be set for 5 or 25 watts. Frequency range is 144-147.995 MHz. It is 7.3 x 2.875 x 10.6 inches in size and requires 13.8 VDC at 8 amps.

One of the really nice things about the TR-7400 is that the frequency selection is by means of a rotary switch that has a stop at each end. It can be turned from 0 to 9 for both 10s and 100s of KHz. The MHz switch is a 4 position switch with a detent. This means that someone who is blind or vision impaired can easily count the clicks and know the frequency.

This particular unit works 100%. The front panel is very nice and the digital readout is crisp and clear. It includes a hand mic, DC cord, and tilt bail.

With paper work for $45.

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with convenience features. In additon to top quality performance on 2m and 70cm, you will also be able to enjoy stereo FM and AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive frequency coverage, providing local-area two-way amateur communications along with unmatched monitoring capability. The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz (Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz (FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220), 420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band [cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has its original box, rubber duck antenna, LiIon Battery, charger, and paper work all for only $155.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B

* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

I also have many other accessories available.
Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Hey Subscriber

I have heard the Wikileaks is about to release an "unknown" document
that reveals the EXACT System that people are using to generate to
$8,523 per day.

Download Now : http://good-links.us/mass-money-makers.html

1004. DSP Signal Processors and Audio Filters FS

Yahoo group: ham
Date: 2011-01-08 15:30:30 UTC
From: Ken Simpson, W8EK
Topic: 1004 Message: 1004

DSP Signal Processors and Audio Filters For Sale:

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

JPS NIR-10 DSP Audio Filter

The JPS NIR-10 audio filter allows reception of difficult to
read signals and reduces listener fatigue. It operates on
radio receiver audio outputs, then provides its own volume
adjustable processed audio to an external 3 to 8 ohm speaker.
The NIR-10 reduces or eliminates white/pink noise, ignition
noise, static interference, RTTY interference, and power line
noise. PEAK function reduces white noise interference. The
Notch Filter mode removes multiple heterodynes and acts in
3 milliseconds. Band Pass mode has continuously adjustable
center frequency, selectable bandwidths (0.25, 0.6 and 1 kHz),
vertical-skirted filters, and greater than 60 dB ultimate
rejection. The rear panel has RCA phono jacks for Audio Input,
Speaker Output, Remote Bypass, and Inverted Remote Bypass.
There is also a jack for 12 VDC Input (1 amp). The front
panel has a 1/4 inch headphone jack.

This unit works fine, and looks very close to new. I can not
find a scratch on it. With paper work for $75.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio
filtration capability which includes peak and notch functions,
with variable bandwidth and frequency. In this respect, it
seems to be similar to the Autek QF-1 filter, but it is built
in to the speaker enclosure. It also has a tape recorder
activation feature with a variable hold. Tape out and
activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Prices do not include shipping from Florida.

Thanks.

1025. Digital Controllers and DSP Filters FS

Yahoo group: ham
Date: 2011-01-29 14:27:44 UTC
From: Ken Simpson, W8EK
Topic: 1025 Message: 1025

Digital Controllers and interfaces, DSP Signal Processors
and Audio Filters For Sale:

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to
a computer so that you may operate using over 100 existing
and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that
your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster,
a radio and a computer is the easy and modern way to operate
with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all
of the items listed on the enclosed paper work. Software CD is
included, along with many cables. It looks like this unit may
not have ever been used. Most bags appear that they have not
been opened.

West Mountain sells these for about $160. Buy this one for
only $110.

Heath HD-15 digital interface / phone patch

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
-
One is in excellent condition. Cosmetically, I can not
find a scratch on it. Everything on it is original.
Paper work included for $25.

I have another available, but it shows some minor wear.
With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the

sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story. It is really much more. It represents the latest generation of Digital Signal Processing (DSP) audio filtering, incorporating the newest high speed CPU. The LCD display, push buttons and Visible Memory let you see the exact settings of the filters. The DSP-599zx works in all modes. It is a dream for the non-voice modes, as well as voice and CW modes. Data filters supported in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV, WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall wort power supply and paper work are included for $300.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio filtration capability which includes peak and notch functions, with variable bandwidth and frequency. In this respect, it seems to be similar to the Autek QF-1 filter, but it is built in to the speaker enclosure. It also has a tape recorder activation feature with a variable hold. Tape out and activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Code Practice Oscillator:

MFJ 557 code practice oscillator with key

This is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. It

operates from a 9 volt battery or from a wall wort (not included).

This one works fine and looks fine also.

With paper work for $25.

CW Key and Cables:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Cables for CW keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

1026. HF Antennas and related items FS

Yahoo group: ham
Date: 2011-02-02 00:45:38 UTC
From: Ken Simpson, W8EK
Topic: 1026 Message: 1026

HF Antenna related items For Sale --
SWR Bridges, Legal Limit Balun, Low Pass TVI Filters,
Vertical antennas, Tower, Connectors and more

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for the new
rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. Both have SO-239
connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that
reads SWR has a crack on the very right edge of it. Strictly
cosmetic. $25

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax
to a balanced load such as a beam or dipole. It will also
help reduce radiation from the coax feedline, that could
reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun,
and is potted to seal out moisture. It is rated at 4000 Watts

for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines! No corrosion evident. Penetrox was used on the original assembly, so it comes apart easily.

Paper work is included. but connection points are well marked for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75. It will easily fit inside a minivan, or it can be broken down more to go inside a car. It is possible to ship it, but the cost is high due to it being oversize. Obviously, shipping is not included in the price.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so

that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:

Prices are per connector. Several of each are available. These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1031. Microphones and related items FS

Yahoo group: ham
Date: 2011-02-04 17:56:47 UTC
From: Ken Simpson, W8EK
Topic: 1031 Message: 1031

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphones designed for use as a communications station microphone for Amateur Radio and other transmitting applications. The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable. The element has tailored frequency response from 30 Hz to 12 kHz designed for excellent transmit audio in SSB, AM, and FM modes. It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

DTMF Touch Tone Microphones:

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down switches and a lot of sophisticated functions built in. This was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along with other special buttons. It also has 14 memories included in it for remembering phone numbers to dial. It has a round 8 pin connector on it, and works with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic

also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing memories. It looks extremely nice, with no scratches.
With paper work for $90.

Alinco DTMF Touch Tone Microphones:

I have two Alinco hand microphones with 16 digit DTMF Touch Tone Pads, and Up-Down switches on them. Neither have an Alinco number on them, but simply say "Alinco". These have the round 8 pin connector on them, and will also work with most Kenwood and ADI rigs, as well as Alinco. Both work 100% on all 16 tones, and Up-Down switches, plus the mic and PTT switch.

One is a more rectangular shape, with only the PTT, 16 digits, and Up-Down switches. It does have a scratch on the side with the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock switch and a switch to turn the DTMF pad off, in addition to the other buttons. I think it is an EMS-12, but that number is not on the mic any place. It is in very good condition. $45

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5 above. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It includes the
chrome screw/bolt, and looks like new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

1075. Transceivers, Power Supplies, Mics, DSP Filter FS

Yahoo group: ham
Date: 2011-03-25 12:57:03 UTC
From: Ken Simpson, W8EK
Topic: 1075 Message: 1075

Several Transceivers, Power Supplies, Desk Microphones,
and DSP Filter For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters
all mode. 100 Watts of output is available on all bands - HF,
50 MHz and 144 MHz, making the IC-746 Pro a practical choice
for all-around base station use. The die-cast aluminum chassis
and a large cooling fan help to stabilize the PA circuit,
providing 100% full duty cycle operation. The new Pro version
features 32 bit floating point DSP and 24-bit AD/DA converter.
There are NO more expensive optional filters to buy. The
digital IF filter allows one to select 51 filter bandwidths.
There are three user selectable filter memories per mode.
Soft and sharp filter shapes can be selected in both SSB and
CW modes independently. You can also change the settings on
the fly and compare! For repeater operation theres is a
built-in tone encoder and decoder with 50 CTCSS and 108
DTCS based tones. There is even a built-in Baudot RTTY
demodulator.

It has 100 alphanumeric memories, digital RF speech
compression, spectrum display, Manual and Automatic Notch,
digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF,
two stage preamp, automatic antenna tuner and electronic
keyer. A built-in automatic antenna tuner operates on the
HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23
amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs
20 Lbs. See the May 2002 issue of QST for a review of
this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to the same. I can not find a scratch on it. With paper work for $1050.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Shure 444 D Dual Impedance Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome
tube coming up from the middle. Standard 5/8 inch threaded. $15

Timewave DSP-599zx DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

I also have many other accessories available such as many
different types of microphones, wattmeters, keyers, and many
other ham accessories. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1082. Many HT Accessories FS

Yahoo group: ham
Date: 2011-03-31 13:15:14 UTC
From: Ken Simpson, W8EK
Topic: 1082 Message: 1082

Many HT Accessories For Sale:

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom BC-110 A Wall Wort Charger:
It produces 12 V DC at 200 ma.
I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am

sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.
This one works fine and appears very close to new.
Icom charges almost $40 for this. Buy this one for $15.

Icom batteries and DC accessories:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom BP-22
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and
probably on others as well. This one appears to be new,
with hardware, still in its original plastic bag. $10

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on

both 2 meters and 440 MHz. $20

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood BH-3 belt clip and hardware for Kenwood TH-21 / 31 / 41 series HTs. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries

for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

DEAD Kenwood PB-21 battery pack
This battery pack is used on the TH-21 series HTs. This one is
dead, but can be used for rebuilding. It is in good physical
condition, with no cracks. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TR-2500, TH-205, TH-215, and many others
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and probably on others as well. This one appears to be new, with hardware, still in its original plastic bag. $10

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Duplexer / Diplexer :

This unit is designed to split transmit and receive signals between the 2 meter and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. This unit can be used either to combine or separate the two bands.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. It works fine and looks good as well. $50

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other items, including HF rigs, power supplies, microphones, and other items too numerous to list. Please let me know what you need. I might have it.

Prices do not include shipping from Florida.

Thanks.

1083. Microphones FS - Desk Mics, DTMF, Speaker Mics, Mic Accessories

Yahoo group: ham
Date: 2011-04-02 13:23:17 UTC
From: Ken Simpson, W8EK
Topic: 1083 Message: 1083

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Shure 444 D Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. $35

Regular Hand Microphone:
This one says Midland on the front, but no model number
given. It has a transformer inside, so it can be used for
either Hi Z or Low Z. Stripped and tined leads. $25

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706 $15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

1092. HF Antennas and related items FS

Yahoo group: ham
Date: 2011-04-12 15:08:46 UTC
From: Ken Simpson, W8EK
Topic: 1026 Message: 1092

HF Antenna related items For Sale -- Vertical antennas,
SWR Bridges, Low Pass TVI Filter, Connectors and more

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. Penetrox was used on the original
assembly, so it comes apart easily.

Paper work is included. but connection points are well marked
for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a minivan, or it can be broken down
more to go inside a car. It is possible to ship it, but the
cost is high due to it being oversize. Obviously, shipping
is not included in the price.

Solarcon A-99 vertical antenna:

The Solarcon A99 is a half wave over a quarter wave variable
mutual inductance antenna for 10 to 17 meters. It features
the Solarcon twin ring Adjust-A-Match system to obtain the
optimum SWR. Simply raise the rings to raise the frequency
or lower the lower rings to lower the resonant frequency.
The rugged three-piece white fiberglass construction features
triple plated brass fittings.

This antenna is 17.75 feet high. It has 3 dBi gain and the
power limit is 2000 watts. It accepts a PL-259 and mounts on
a 1.5 inch mast.

This particular unit is in good condition, with no corrosion.
With paper work for $50.

Pick up of this antenna near Ocala, FL, just off of I-75 is
preferred. It could be shipped, but it is long enough that
it may be considered oversize. Shipping is not included in
the price.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1143. HF Rigs, Desk Mics, Coax Switches, Wattmeters FS

Yahoo group: ham
Date: 2011-06-11 12:39:16 UTC
From: Ken Simpson, W8EK
Topic: 1143 Message: 1143

HF Transceivers, Power Supply, Desk Microphones, Coaxial
Antenna Switches, Wattmeters and SWR Bridges For Sale:

TenTec 561 Corsair II, HF transceiver:

Many consider the Corsair to be the best rig that TenTec
ever made, before the Orion or Eagle. It is not a
synthesized rig, so phase noise is virtually nonexistent.
This means that it has a really superb receiver that is
far better than most of the Japanese rigs. It covers 160
thru 10 meters, including the WARC bands, and has such
things such as band pass tuning, notch filter, QSK, noise
blanker, etc. It has 8 pole filter in the 9 MHz IF, for
additional selectivity. It has up to 100 watts output,
with front panel adjustment for QRP, and is all solid
state. It also has a built in keyer.

Electrically, everything works 100%. It is an exceptional
performing unit. The PTO is smooth and works great.
Cosmetically, it is also in great condition. No defects
that I can find. Manual is included for $550.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one is in exceptional condition. It also has the
Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that

matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $175

TenTec 705 desk microphone
This electret desk mic has the PTT and "hold" buttons.
It works great, and looks close to new.
With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239 connectors coming out the back of the rectangular enclosure. It does ground all unused connections.
This one works fine and looks like new. With paper work for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239 connectors coming out of the switch like the spokes of a wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and appears unused. These go for about $75 new. Buy this one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel. It is in good condition and works fine. Mounting bracket is included for $30.

Wattmeters:

Dentron W-2 Dual Meter HF Wattmeter:
This wattmeter has two separate meters and is designed for use on the HF bands (1.8 to 30 MHz). It has full scale readings of 2000 Watts and 200 Watts. It has a separate sensor that can either be used remotely, or can be attached to the enclosure for a more compact unit. It is in a nice black enclosure that will match most ham gear.
This one works fine, and looks very close to new. No scratches, dents, or dings.
With paper work for $75.

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a remote pickup sensor with about 3 feet of cable to the dual meter control head. It reads both SWR and forward watts at the same time, on the dual meters, which are fairly large. This one is in extremely nice, close to new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great and includes paper work for $45.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1149. Report on amazing trip to Honduras

Yahoo group: ham
Date: 2011-06-16 23:34:58 UTC
From: John Kirckof
Topic: 1149 Message: 1149
Attachments: 1 described; binary payloads are missing from this source WARC

Hi,

Trip Report: It is great to report we had a great mission trip to Honduras in February where we had many medical and support people working together. We had six medical/dental clinic teams scattered throughout the country. We also had 3 surgical teams plus an eye glasses team. I do not have the exact numbers but it is estimated we saw well over 9,000 people in the 9 to 10 days of work at all the sites we went to. We were well stocked with medical supplies and eye glasses so we were able to give quality care to all we saw. The medical personnel had the help of ham radio folks plus other people skilled doing general work, we were able to accomplish so much. IHS (International Health Services) thanks of all of you who helped in this !!

NewsBreak newsletter: If you are interested to hear more about our exciting trip, you can read more in our NewsBreak newsletter and the next one will be out in July. Many of you are on the mailing list but if not you can write me and I can get you a copy. It will have many stories from those who went plus other details on how to go. If you go to our website at www.IHSMN.org you can download the last several issues in pdf file format.

Interested In Going? Several people have gone after hearing about our trip from this e-mail group. I have gone just about every year since 1995 and love it. So, if you have questions you can certainly give me a call or send an e-mail. I recommend you use my main e-mail address for that at JMKKEK@.... We do want to get as many applications done soon so the IHS Planning Team can start selecting sites for the teams that will go. They have team maps and other great details.

What Professions Do We Use? We use just about anyone who has medical skills plus many support people. Below is a list of the most common ones. We go in Feb and Oct and can use all these professions either time except the surgical folks who only will go in Feb this time around.

Interpreters (Spanish)
Ham Radio Operators
Handyman folks
General Workers/Helpers

*** We also have a critical need for medical people:

Physicians
Nurse Practioners
Physician Assistants
RNs
LPNs
Paramedics and EMTs
Dentists
Dental Assistants and Hygenists
Optometrists

Other eye care professionals
Pharmacists
Pharmacy helpers and students
Surgeons
CRNAs
OR nurses and Techs

Team Map: I will attach a Team Map that shows typical team locations, team types, and team member professions. If it does not come through, just ask me for it as it is great at showing the overall work we do.

More Detailed Info: Below is the info letter I have sent to many interested people. It also has a LOT of details. You may have seen it already but I did want to make sure you to have it to get some good info about our work.

MOST IMPORTANT, if you have ANY questions about the mission details or the application process (which is simple enough), I am available to help. I work at home for the most part so I am usually here except when I am running an errand, etc. with evenings during the week good, too. I do recommend a call before proceeding with the application. Take a look at the attached Team Map of the IHS mission as it gives you a good idea of where we go, types of teams, and some of the many professions we use. The October medical team is very similar to the Kruta River team shown on the map. We also plan to send an October eye team, it will be like the PLP (Puerto Lempira) Eye team.

John

*****
Info letter about IHS (International Health Services)

- the bottom letter was originally written for a radio guy a while ago and it is still very applicable and informative, so I still use it to give people an idea of the day-to-day mission. Below is a lot of general info for all who want info about the IHS mission trip. It is long but worth the read as it has so much info.

Are you interested in volunteer medical work or translating for a team? Are you looking for a worthy place to give support or to donate medical or radio gear? If you are considering any of these, you certainly have come to the right place. Joining our mission next February is easier than you think. We are always in dire need of translators, dentists, doctors, anesthetists, nurses, eye specialists, and pharmacists… anyone with medical skills. We also need radio folks plus engineers and many helpers. Please consider this.

What we do... In October we send one or two teams of about 10 people each. About 100 volunteers will go to Honduras the last two weeks of February. Each year in February we usually have 2 surgery teams and about 6 or 7 medical/dental clinics. In addition, we usually send 1 or 2 eyeglasses clinic teams. We would have more teams if enough people signed up. The village clinic teams typically have two doctors, one or two nurses, a pharmacist, a dentist, sometimes a dental assistant, a ham radio operator, an engineer, 1 or 2 translators, and 2 or 3 general helpers. Depending on the qualifications of those who apply, sometimes a person may do two positions. I am a ham radio operator but I usually do the engineer job and some general helper tasks as well. The engineer work is just a basic

task of keeping the small generator full of gasoline and other basic handy-man tasks. In that capacity I have repaired many things including door handles, installed shower curtains, put up a clothes lines, repaired LP cooksets, and other basic fix-it tasks besides keeping my own gear in good repair. For the general helpers and others there is a LOT of miscellaneous work to do to assist the doctors, dentists, and pharmacists to keep them going in a busy day. So, if you have someone who wants to go with you (spouse/friend) they can usually fit on to the same team as you. Once we get to a village, we all tend to share the work so we all get a hand in doing many different things. Each village is different but generally we will have a medical clinic open for about 10 full days plus at most sites we will also have a dental clinic. Most years we will also have two surgery sites. At those locations we will have one or two surgeons, two O.R. nurses, an anesthetist, a radio person, one or two general helpers and in some locations, an engineer. For radio operators plus the doctors, nurses, and other medical folks, we do need to have copies of licenses in advance to give to officials in Honduras to get everyone certified for operations there. Normally, copies get sent in with applications and when the October logistics team travels to LaCeiba, Honduras, all the papers are filed. That is good, all we do is turn in the paperwork and the rest is taken care of. We also need many helpers so you do not have to have a license to go. We also need many helpers so you do not have to have any license to go.

Where do we go in February... we have a variety of locations. We have a couple medical/dental clinic teams that go to the mountain areas of central Honduras. There, it is semi-modern (relatively speaking) usually with local electricity available some of the day. Other clinic teams are in small remote villages in the eastern ‘LaMosquitia’ region where there are very few roads and usually no phones or local electricity. In these places we bring our own generator and a radio for communications. We do use a few trucks and buses but our transportation is mostly by large and small airplanes. The Wings of Hope and other organizations donate the use of their small planes during the days of our mission. Because of this, we can bring all the supplies we need such as our food, gear, personal items, and medical supplies. We have been doing this for 25 years so we have a good idea what we need. We send out detailed Orientation information to give you a lot of detailed info including what IHS provides each team and each team member.

Costs... the project fee is about $600 ($500 for the October trip). This is actually a bargain since this is less than half of the total average cost to IHS to send someone. With that fee, and many large and small donations from organizations (Lions, Rotary, churches) and friends, we are able to take care of nearly all of your basic expenses for the entire two weeks you are on the mission. It also helps us to buy needed medical and pharmacy supplies. It is only logical to bring the necessary medications to treat what the doctors find with the patients they see. On the average, each of the clinic teams will receive over $4500 in medical supplies. From your project fee, you receive a lot. From the time you arrive in LaCeiba, all food, transportation, and basic housing are taken care of. When in small villages, it is obviously NOT in a Raddison Hotel but it is in a clean facility of some type. For example, many choose to stay with a host family while we are in LaCeiba. They are VERY nice homes and are close to the Hotel Paris, our headquarters and radio net control during the mission. The other expense to participants of the mission is transportation from our homes in the U.S (or wherever you live), to LaCeiba, Honduras and return. Some people choose to make their own plans because there are many great sites to see and places to go before or after the mission. Diving or checking the beach on Roatan Island, visiting the Copan Mayan ruins, visiting a rain forest park, white water rafting, sightseeing in the mountains, or just shopping for bargains are some things people do. Most of the IHS people do some little venture, usually after the mission. Obviously our main

purpose is not to just go and have fun, we have very important work to do in the villages, etc. However, after 2 weeks of work it is nice to take a day or two and relax. Also note that flights to San Pedro Sula can go on Delta via Atlanta,
Continental via Houston, and on American via Miami so you have some options as to days to travel and getting a good price. I do have a handy letter that describes how to get your airline tickets to and from Honduras.… just let me know if you want it and I can e-mail that to you. Karen and I lived in England for four years and did a lot of travelling, but I can honestly say, this is the best two week trip we ever do for the price, even though it is work.

What is happening right now. We are actively seeking applications right now for both the October and February medical mission trips. Many things get done prior to the mission dates on a time line that is important to get all our gear, supplies, and participants to Honduras and get everyone well informed about the mission.

Shipping items to Honduras….. yes we can. Dole Fruit graciously lets us use several of their containers to send down our gear, personal items, purchased medical supplies, food, and lots of medical equipment (for hospitals and clinics). We will send down our IHS radios plus any donated and other replacement gear. Chris, our shipping guy, arranges for a lot of the food for each team. IHS will buy soups, and a lot of dehydrated type things that actually cook up pretty good, at least it is better than beans and rice every day. Most of that is shipped in the container although some beans and rice, plus a lot of other fruits and vegetables get purchased in LaCeiba on the first day down there. Each year we also get generators and such things purchased or donated and they get shipped as well. So, if you are going in February and you want to send some clothes or whatever (so you have less to drag through the airport) that is fine. Your personal box or tub needs
to be sent to our collection point in Minneapolis by the end of December. We have a simple inventory sheet to do this. Many people send clothes and other items that they just give to the local people when they leave, so their suitcase stays light coming home, too.

More info... IHS has a small web site with some basic info for all applicants. It is: www.IHSMN.org I suggest looking at the Newsbreak newsletters for a lot of personal info and stories of past experiences. The Newsbreak also has VERY HANDY maps that shows the locations, types of teams and the professions we send. This site will give you the on-line application forms. I also have many materials for you including a great computer CD with lots of info on it. The photos (hundreds of them) and journals on the CD show typical medical/dental teams in villages plus eye care and surgery teams. The CD is packed with other info including several super Power Point presentations that give a lot of detail in our work. I often use the CD as orientation materials for group presentations and for first time applicants. If you want any of these items, just let me know what to send and where to mail them and I will send them to you right away.

If you have any questions related to other jobs on a team, let me know and I will pass on the info or I will get you in touch with another Director or someone who can get you all the latest info for that job.

I do ask that whether or not this mission works for you, consider passing the word along… we can always use a few extra folks and support to help us out. If it is not this year, we can plan ahead for next time as we always go the last two weeks of February and October. This is especially true for doctors, nurses, translators, dentists, and other medical folks who may have a tougher time getting off work on short notice.

Most new folks have called me directly, before signing up for a mission. I highly recommend that you do that to start with. My phone number is: 320-634-4386. I am home most of the time and some on weekends. You have my e-mail address, so write whatever questions you have, if you prefer that over a phone call.
I and the very poor of Honduras thank you so much for an interest in this very wonderful and rewarding work!

Best regards,

John

Important personal stories about those who went….
Since we finished our recent medical mission to Honduras the end of February, many amazing events are still fresh in our minds! Paul, K9PEP, was our radio net controller and once again he was in the thick of things. We had a medical emergency where several ham radio operators helped to get a severe burn patient out of the remote village of Auka and into a burn center in Tegucigalpa. That was in the middle of seeing the many hundreds of patients we see on a 'normal' basis.

This year Bill and I were providing radio and engineering support for a medical and dental team in the remote village of Uhi. We set up an Icom IC-706 radio for HF voice communications plus e-mails via a laptop. I also connected a Ringo Ranger antenna for 2 meter ops for 24/7 communications to our nearby surgery team in Puerto Lempira. We got up and running just in time for patient referrals and other critical messages.

One of the first mornings a woman showed up in a wheelbarrow because she could not walk on her own. This is not surprising since there are no roads or vehicles in this village (to get here we must travel by boat or use a small plane). We did not have any adaptive devices on hand, so Jim, our doctor, advised her to return the following week. We called in on the 2 meter radio to see if a walker could be brought by our small airplane. When the woman came back several days later, we had a walker waiting for her. We cleared out the waiting room and waited to witness this great event. Dr. Jim helped her out of the wheelbarrow and tremendous joy spread over her face and all of ours as she began to walk!! It was the greatest feeling in the world knowing that we made a big difference in her life.

Another time, a girl about 9 years old was brought into the clinic with a fever of 104 and was shaking terribly. She had been vomiting, had a poor appetite, and was not drinking anything. We immediately sprung into action, with Dr. Jim making a consult radio call to another IHS team doctor in another village. Dr. Jim determined she had malaria. Malaria is not very common here but it does happen on rare occasions. Jack, our pharmacist, gave the young girl a combination of chloroquine and primidone for the malaria. She was given liquid Tylenol and placed in a back room with cool wet towels to reduce her fever. Dr. Jim also started an IV to keep the girl well hydrated. In a few hours she was improving. The next day we made a house call to the hut she lived in and she was amazingly better. Her fever

had gone down, she was drinking water, and even eating a little. It is a good thing we can take chloroquine as a preventative.

About the same time we saw the girl, we also had a middle-aged woman come to the clinic with a deep cut on her forehead. She said it was from a large stick but it looked more like a machete cut to us. Dr. Jim did a great job of cleaning the wound and stitching her up but the lady must have been tough as nails. She hardly flinched through the entire procedure.

Manuel was our team dentist. He is from LaCeiba, Honduras and has come with our Uhi team for 3 years now, due to our shortage of U.S. dentists signing up. He did great, pulling many teeth during our 10 days of work in the village. That is about all he had time to do since there is no dental care available in the village. The one village nurse (who is the entire medical care for the village) has her hands full delivering babies and all the other medical care needed. I also ended up being Manuel’s dental assistant when a squirming kid needed to be held still plus I helped to sterilize his equipment. The kids had no idea what was happening when Manuel came with the lidocaine needle. Occasionally, some teams may do fillings when time permits. This year we even had a dentist who made a few dentures on the Yocon team.
We also had a young lady show up with her baby that was about a month old. The baby was not feeding properly, causing malnourishment and was in very grave condition. Bill immediately got on the radio and again talked to Jaime, our radio operator in Puerto Lempira to send the small airplane to get our patient. Within a couple hours we had the mother and the struggling baby flown to the hospital where she now has a chance at life. A special thanks goes to Ruth our translator who is also a nurse and helped a lot to get the baby on to the plane. She also did a ton of good work to talk with the locals plus she helped a lot with other babies and children. Thanks Ruth !

By the end of the mission, we had flown about 10 referral surgery patients from Uhi to Puerto Lempira to see Dr. Tim, our surgeon with the IHS surgical team there. Other IHS village teams did the same. It is a good thing we have a small plane available to do this and radios to make it happen. Dr.Tim performed many surgeries while he was there and no doubt saved lives. That makes our medical care in that part of Honduras able to handle most anything that we see from simple cuts to important surgical care.

Near the end of the mission we had a radio call asking if we had any spare reading glasses. We did so the small plane came in, got them, and took them to another village where IHS had an Eye Glasses team. They saw many hundreds of eye patients and distributed many prescription and reading glasses. It turns out no one had ever been in that location before to give out glasses. We also thank the Lions clubs that collect the many glasses for us!

1151. Coaxial Antenna Switches, Wattmeters FS

Yahoo group: ham
Date: 2011-06-18 14:57:47 UTC
From: Ken Simpson, W8EK
Topic: 1151 Message: 1151

Coaxial Antenna Switches, Wattmeter/SWR Bridges For Sale:

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239
connectors coming out the back of the rectangular enclosure.
It does ground all unused connections.
This one works fine and looks like new. With paper work
for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239
connectors coming out of the switch like the spokes of a
wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and
appears unused. These go for about $75 new. Buy this
one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground
unused antennas. It has SO-239 connectors on the sides,
with the coax coming out like spokes of a wheel. It is
in good condition and works fine. Mounting bracket is
included for $30.

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters, and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1156. Digital Interfaces and related items FS

Yahoo group: ham
Date: 2011-06-24 12:20:41 UTC
From: Ken Simpson, W8EK
Topic: 1156 Message: 1156

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

Ham CD:

Ham Exams
Software for studying for Tech, General and Extra Class License
exams. It also includes Morse Code Software, plus a variety of
other nice ham programs, including digital programs. $15

MFJ 484 C "Grandmaster" Memory Keyer:

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone
adjustable on the front panel. Speed and weighting are
also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery
to preserve memory contents during a power failure. It can
be powered by either a 9 Volt battery, a 9 V DC wall wart,
or your station 12 V DC power supply.

It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. This one works fine and looks great.

With paper work for $55.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1159. Mobile FM Transceivers, dual band HTs FS

Yahoo group: ham
Date: 2011-06-26 13:18:57 UTC
From: Ken Simpson, W8EK
Topic: 1159 Message: 1159

Dual Band mobile FM transceivers, 2 meter FM transceivers,
and Dual Band HTs, For Sale:

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with an MC-48, 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13.8 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* MC-48 DTMF Microphone with up/down switches

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally
be. That means that an external speaker needs to be used with
it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and
paper work for $160.

Icom IC-228 H, 45 watt 2 meter mobile transceiver:

The Icom 228H is a 45 watt 2 Meter mobile FM transceiver.
There is also a setting for 5 watts output when less power is
needed. The multi-colored backlit LCD display is readable
over a wide range of light. This radio has 20 memories and
priority watch. It also has programmed scanning or memory
scanning. This radio requires 13.8 VDC and receives from
138 to 174 MHz. It has a built in tone encoder.

This particular unit works great and looks very close to new.
It is in its original box, with mobile bracket, power cord,
and DTMF Touch Tone Microphone. It even has the bag of misc
hardware that I don't think has ever been opened.

With paper work for $110.

Icom IC-28 H, 2 meter FM mobile transceiver:

The Icom IC-28 H is a well-built 2 meter FM mobile transceiver
providing 45 watts of power. There is also a setting for 5
watts output when less power is needed. The backlit LCD display
is readable over a wide range of light. This radio has 21 memories.
It also has programmed scanning or memory scanning. This radio
requires 13.8 VDC and received from 138 to 174 MHz. It has a
built in tone encoder.

It works fine and looks fine also. No mobile bracket or "extras"
with this one -- just the radio and paper work for $80.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Yaesu VX-3 dual band HT:

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives 500-1800 kHz (AM Band), 1.8-30 MHz
(Shortwave), 30-76 MHz (VHF Lowband with 6M), 76-108 MHz
(FM band), 108-137 MHz (Air), 137-174 MHz (VHF with 2M),
174-222 MHz, 222-420 MHz (VHF with 220), 420-470 MHz (440),
470-800 MHz and 800-999 MHz.
You get a 1000 channel memory system, and can enjoy
stereo FM and AM broadcast reception.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has a rubber duck antenna, LiIon Battery and charger in its original box, with paper work all for only $155.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1164. Microphones of many types FS

Yahoo group: ham
Date: 2011-07-01 17:30:32 UTC
From: Ken Simpson, W8EK
Topic: 1164 Message: 1164

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Note: There are new listings, and also deletions.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Hand Microphone:

Azden PCM-463
I think this mic was used on the Azden PCS-4000 and probably other Azden rigs as well. It has an up/down switch on it, and a round 8 pin connector. This one works fine and looks very close to new. $35

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch. This one works fine, and looks close to new. With paper work for $45.

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It has been rewired with a round 8 pin connector for Kenwood. Nice condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $8

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It looks like
new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1175. Wattmeters, Low Pass TVI Filters FS

Yahoo group: ham
Date: 2011-07-13 22:23:47 UTC
From: Ken Simpson, W8EK
Topic: 1175 Message: 1175

Wattmeter/SWR Bridges, Low Pass TVI Filters For Sale:

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters,
and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time. They were made in Japan, and
labeled with various names, including Swan, Siltronix, and
Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new
rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Full Power Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. It has paper work.
Bencher currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Lower power Low Pass Filters:

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is only 100 Watts.
Use this one after your rig, and before
your amplifier. Nice shape for $18.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1186. Crystals FS

Yahoo group: ham
Date: 2011-07-26 15:26:35 UTC
From: Ken Simpson, W8EK
Topic: 1186 Message: 1186

Crystals For Sale:

FT-243, HC-6, etc.:

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7094 (HC-6), 7174 (HC-6), 7175, 7186, 7189, 7198.5 (HC-6),
7200 (HC-6), 7200, 7207, 7225, 7236.2 (HC-6), 7248,
7261, 7283.33 (HC-6), 7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 12.0, 15.0, 16.0, 30.75, 32.5, 39.0, 42.7,
44.5, 46.0, 46.7, 49.9, 51.1,

All crystals above are $8 each.

Crystals for 2 meter ham rigs For Sale:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and rig,
and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig. These crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

1188. Radio, handyman, interpreters and general helper people urgently needed for Honduras trip

Yahoo group: ham
Date: 2011-07-27 14:23:02 UTC
From: John Kirckof
Topic: 1188 Message: 1188
Attachments: 3 described; binary payloads are missing from this source WARC

Hi

I am sending this note to all who may be interested in going on the October or the February medical trip to Honduras. We do need your help ! The deadline for the October trip is 15 August... just around the corner. the February deadline is not that far off either. With the huge amount of planning and work we do to get ready, the sooner we know who is going the easier it is to get our work done.

We can use all of the professions that commonly go but for the October trip we urgently need a physician, an NP or PA, a DDS, some eye care professionals, and several general helpers.

For February we have only a handful of people so we need many more including all surgical, medical clinic, dental, eye care, interpreter and support people.

Radio, handyman, interpreters and general helper people do very important work to keep the clinics and other sites operational and enable the medical folks to see more patients. We do need your help !

The need for both trips is critical so please consider going and also pass on the word to any who may be interested in going. Attached is info to help in that.

Important note: www.IHSMN.org is still operational with info BUT some past things are not there. The on-line application was not working so it has been removed. If you used that system, you likely will need to send in the attached paper copy. The paper copy now used does have all the preliminary forms and info to apply for a mission trip. Also, some site information has been removed. So, even though there is some good basic info on the site, other items are available but will be sent via e-mail upon request. Just e-mail back for anything needed.

News Item: The NewsBreak newsletter is now going to press. So, you should see it in the mail soon. If you are not on the mailing list it soon will be on the web site as a pdf You can also ask for it to be sent via e-mail.

Thanks everyone for thinking about IHS and all the people we help. If you can go to serve that is wonderful. Whether or not you go also consider some financial help. The Feb mission was a great one but it did have its expenses. Whatever help you can give will be very much appreciated !!

Call or write us anytime,

John

1190. Dual Band HT, mobile rigs, and related accessories FS

Yahoo group: ham
Date: 2011-07-27 19:16:10 UTC
From: Ken Simpson, W8EK
Topic: 1190 Message: 1190

Dual Band HT and Dual Band mobile FM transceivers;
DTMF Touchtone Microphones, and Speaker Mics, For Sale:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with a 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* DTMF Microphone

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally

be. That means that an external speaker needs to be used with it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $160.

Icom IC-281 H, 2 meter transceiver with 440 MHz receive:

The Icom IC-281H 2 meter mobile FM transceiver boasts 50 watts output plus 440 band receive (440-450 MHz) for full duplex crossband operation. Other features include 60 regular memories, 10 scratch pad memories, 14 auto dialer memories, built-in pager and code squelch functions and auto memory channel advance. The IC-281H is packet ready. A data jack is available for direct TNC connection, supporting speeds up to 9600 baud. It features a huge heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $150.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad.
This one works fine, and looks extremely nice.
With paper work for $45.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in

the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood. Nice
condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1191. Antennas and related items FS

Yahoo group: ham
Date: 2011-07-30 17:18:23 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 1191

Antennas and related items For Sale, such as HF Antenna Tuner, 2 meter and 440 MHz mobile antennas, mobile antenna mounts, VHF Wattmeter, SWR Bridges, HT Rubber Duck Antennas, Coax Connectors, and Low Pass TVI Filters:

TenTec 229 Full Power HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to never have been used. It even has its rubber washer with it. Coil only for $20.
Coil, with 4 foot used whip. $29

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other antenna that requires a 5/16 inch stud. Coax is included for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen VHF and UHF Mobile antennas:

All are in very nice condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud. It can be cut for 2 meters,
220 MHz, or 450 MHz bands. $9

UHF (440 MHz) Mobile Antennas:

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $30

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $15

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with 250
and 25 watt scales. It can also be used to check SWR, and

has a remote sensor that can either be left inside the
meter, or separated from the actual meter. SO-239
connectors in and out.

This particular meter works great. It looks very close
to perfect with no defects that I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector. Several of each are
available. It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50
ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
This one works great, and looks close to new. Bencher
currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

B & W FL-10/100 low pass filter
Similar to FL-10/1500, except power rating is only 100 Watts.
Use this one after your rig, and before your amplifier.
Nice shape for $18.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1209. Variable Bench Power Supplies FS

Yahoo group: ham
Date: 2011-08-16 11:55:42 UTC
From: Ken Simpson, W8EK
Topic: 1209 Message: 1209

Several Variable Bench Type Power Supplies For Sale:

Kepco CK 18-3 Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means
that it will produce up to 18 V DC at up to 3 amps. This is
an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping) in this
condition on that e place. Buy this one for $160.

Kepco Model ABC 40-0.5 Variable Bench Power Supply:

This variable power supply is a Kepco Model ABC 40-0.5, which means
that it will produce up to 40 V DC at up to 1/2 amp. This is
an ideal bench power supply.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $125 to $150 (plus shipping) in this
condition on that e place. Buy this one for $90.

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.

Just too many to list here. Please e-mail your requests.

Thanks.

1214. Digital Interfaces and related items FS

Yahoo group: ham
Date: 2011-08-20 16:00:37 UTC
From: Ken Simpson, W8EK
Topic: 1156 Message: 1214

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Date: 2011-08-28 11:43:32 UTC
From: Ken Simpson, W8EK
Topic: 1223 Message: 1223

CW Items For Sale -- Keyer Paddles, Keyers, etc.

TenTec KR-20 A Single Paddle Electronic Keyer:

The KR-20 A is a single paddle keyer with the paddle
actuation force factory adjusted. It is basically the
same as a KR-5 A keyer, with the addition of a 110 V AC
power supply.

Contact spacing adjustments are on the front. The weighting
factor is factory set for optimum smoothness and articulation.
An Over-ride "straight key" is conveniently located on the
top for emphasis, QRS sending or tune-up. It has reed relay
output and a side-tone generator with adjustable level.
117 VAC or 6-14 V DC. Finished in an etched aluminum panel
and black textured top and sides that matches the TenTec
Triton IV and others of similar vintage.

This particular unit works fine and looks extremely nice.
It has had a 1/4 inch jack added to the left side so that
an external paddle can be used if desired.

Paper work for the KR-5 A is included for $45.

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043
Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like
a bug) operation. Also, it can emit a solid "key down"
for tuning up. It works with tube or solid state transceivers.
It has sidetone with a front panel volume and tone control.
Weighting is adjustable from the front panel. It can be powered
via four internal C cells or an external 6 to 9 volt DC
power supply.

The styling of this unit is the wood grain and eggshell color
that TenTec used with their early equipment. TenTec made the
enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course
it works. Paper work is included for $35.

TenTec KR-2 A Vintage Keyer Paddle:

The KR-2 A keyer paddle dates to the 1960's and 70's. It
is a keyer paddle only -- no electronics. The styling is
wood grain and eggshell that matches the early TenTec equipment.

The KR-2 A also has a a button on the top (known as over ride switch) that can be used as a straight key, or to tune up a tuner, or whatever you might want to use it for.

This is the same paddle mechanism that TenTec used in the KR-5 and KR-20 keyers.

In addition, there is a heavy weight in it, to keep in in place, so you do not need to chase it across your operating table. It would be a great match with the MFJ 8043 keyer above.

This one works fine, looks good, and even includes the single sheet instruction manual for $25.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

From: Ken Simpson, W8EK
Topic: 1235 Message: 1235

Two meter and dual band mobile rigs and HTs and
related items For Sale:

Icom IC-281 H, 2 meter transceiver with 440 MHz receive

The Icom IC-281H 2 meter mobile FM transceiver boasts 50
watts output plus 440 band receive (440-450 MHz) for full
duplex crossband operation. Other features include 60
regular memories, 10 scratch pad memories, 14 auto dialer
memories, built-in pager and code squelch functions and
auto memory channel advance. The IC-281H is packet ready.
A data jack is available for direct TNC connection,
supporting speeds up to 9600 baud. It features a huge
heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With mic, tone encoder, mobile bracket, power cord,
and paper work for $150.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very

crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Several HT Speaker Microphones:

Speaker-mic for Yaesu Vertex VX-6 / VX-7 / VX-8
This speaker mic has a 4 conductor 3.5 mm connector, with
the threads as used by the VX-6 / VX-7 / VX-8.
Looks to be unused. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41 series HTs. $8

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It produces 10.5 V DC at 42 ma, with a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Speaker-mic for Yaesu (Vertex) VX-6 / VX-7 / VX-8
No number on this speaker-mic, but it has a 4 conductor 3.5 mm connector, with the threads, as used by the VX-6 / VX-7 / VX-8. Looks to be unused. $15

Yaesu E-DC-5 B Cigarette Lighter Cord
DC Cable with voltage regulation, filtering and cigarette lighter plug. For many Yaesu handheld radios including FT-530/415/50R/FT-60R, VX-5/VX6/VX-7/VX-8/VX-170, etc. These sell new for $27. Buy this one for only $18.

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom BC-110 A, Wall Charger:

I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am
sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.

This one works fine and appears very close to new.

Icom charges almost $40 for this. Buy this one for $12.

Icom DC adapter, and battery packs:

Icom DC-25 DC Adapter
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Icom BP-22
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a

service pack. It has schematics, circuit explanations, voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

SubAudible Tone (CTCSS or PL) Encoder:

This unit is designed to add subaudible tones (sometimes called PL tones or CTCSS) to a rig that does not have them internally. This is usually used on some of the older 2 meter FM or 440 MHz FM rigs produced before the tones were included in the rig.

This particular unit can be used on most any rig, although it came from an Icom IC-22 S, and I think was also used with an Icom IC-230. It has a 9 pin plug on it that looks like the base of a miniature 9 pin tube. This was the type of

socket used on these Icom rigs, but it could be changed.

This unit has a switch for 6 different tone on the front panel.
Each of the tones are internally adjustable. It is presently
set up for 71.9, 74.4, 94.8, 100, 123, and 179.9 Hz tones,
although they could be changed. It is housed in a black box
about 6.2 W, 2 H, X 4 inches deep.

This unit works fine. $35

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with 250
and 25 watt scales. It can also be used to check SWR, and
has a remote sensor that can either be left inside the
meter, or separated from the actual meter. SO-239 connectors
in and out.

This particular meter works great. It looks really
terrific -- very close to perfect, with no defects that
I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $38.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $30

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to
never have been used. It even has its rubber washer
with it. Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included
for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

UHF (440 MHz) Mobile Antennas:

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1266. Alinco Dual Bander, 2 m rig, HT and other Alinco FS

Yahoo group: ham
Date: 2011-09-28 15:00:20 UTC
From: Ken Simpson, W8EK
Topic: 1266 Message: 1266

Alinco dual bander and 2 meter FM transceivers and
dual band HT, plus other Alinco items For Sale:

Alinco DR-605 T Dual Band Mobile Transceiver

The Alinco DR-605 T is a dual band FM transceiver covering
both the 2 meter and 440 MHz ham bands, plus extended receive
outside of the ham bands for weather, police, fire, etc.
It will cross band repeat, receive both 2 m and 440 at the
same time, and many other neat things. Subaudible (PL) tones
are built in. A DTMF microphone with up/down switches is
included.

You can find details at
http://www.alinco.com/Archives/Mobile/dr-605t.shtml

This one works 100% as best I can tell. Cosmetically, one
of the lights behind the display is burned out, but the
others work, so there is plenty of light to read the
display. It looks great.

Paper work is included for $170.

Alinco DR-110 T, 2 meter FM Transceiver

The Alinco DR-110T is a full-featured 2 Meter FM mobile
transceiver with 14 memory channels. Power output is
selectable at 45 or 5 watts. Subaudible tone encoder
and decoder is included. Tuning steps may be selected
at 5, 10, 12.5, 15, 20 or 25 kHz. It is 5.5 x 2 x 6.75
inches. With hand mic.

Features:
* 14 Memories
* VFO Scaning
* Memory Scanning
* Odd Offsets
* CTCSS Encode/Decode
* Large LCD
* Function Lock
* Reverse Key

This unit works fine, and looks extremely nice. It
includes a mic, power cord, internal tone unit, and
paper work for $90.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$140

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Hand Microphone that can be used with Alinco rigs:

Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, and also on most
Alinco rigs with the round 8 pin plug..
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood/Alinco.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1267. MFJ Items FS

Yahoo group: ham
Date: 2011-09-30 13:51:42 UTC
From: Ken Simpson, W8EK
Topic: 1267 Message: 1267

MFJ Items For Sale -- "Amplifier Saver", HF Antenna Tuner,
Coax Switches, CW Keyers, Wall Wart, HT Speaker Microphones

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier
for full power output and best linearity. It protects your
expensive amplifier during tune-ups from over-heating, tube
damage, power supply stress and arc-over. MFJs innovative
pulse tuning technology lets you tune your amplifier at full
peak output power. It can also be used to evaluate wattmeters
and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune
button and tune your amplifier normally for maximum power
output. It has Duty Cycle and Pulse Rate controls on front
panel, and is in a fully shielded all metal case. Uses 9 V
battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells
these for $80. But this one for $60.

MFJ 941 E HF Antenna Tuner

MFJ 941 E antenna tuner for 160 thru 10 meters
This tuner has a "cross needle" SWR bridge built into
it, so one can read both forward power, reflected power,
and SWR at the same time. The meter has a switched back
light, assuming 12 Volts is applied to the tuner. The
wattmeter portion will read either 30 W or 300 W full
scale, either peak or average power.

An antenna switch will switch between either balanced
line, two coax antennas, or an external dummy load.
Antennas can be operated thru the tuner, or the tuner
can be bypassed. This tuner will operate on 160 thru
10 meters, including the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.
Paper work is included for $110.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at

higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

Cables for CW keys and keyers:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Several HT Speaker Microphones:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1279. Several Wattmeters and SWR Bridges FS

Yahoo group: ham
Date: 2011-10-11 15:27:03 UTC
From: Ken Simpson, W8EK
Topic: 1279 Message: 1279

Several Wattmeters and SWR Bridges For Sale:

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Autek WM-1 Computing HF Wattmeter:

The WM-1 Meter doesn't make you stare at crossed needles or make adjustments or do any calculations to read SWR. Instead, like magic, it shows SWR instantly and continuously. So it's a snap to do SWR plots, adjust antenna tuners, or just glance at the SWR occasionally to see that it's still low.

This meter has scales of 20, 200, and 2000 watts. It will measure either peak or average power. And peak is true peak, with a slowly decaying display that can really can be read. It also has a separate sensor that can be separated from the actual meter. It covers from 1.5 to 30 MHz, and will cover to 54 MHz at reduced power, so it will cover all of the HF bands, plus 6 meters.

This particular meter works 100% and looks fine. Paper work is included for $100.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF Standing Wave Ratio Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name

on it. In its original box with original instructions. $28

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1283. Heath Items FS

Yahoo group: ham
Date: 2011-10-14 14:16:24 UTC
From: Ken Simpson, W8EK
Topic: 1283 Message: 1283

Heath Items For Sale - HF transceiver, Station Console,
Wattmeters, Misc Parts, and Original Manuals:

Heath SB-1400 HF Transceiver:

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone:
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a
PC to your transceiver. It was originally designed to
be used as a phone patch, but many have converted them
to a digital interface.

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. The meter makes it great
for setting levels.

This one is all original. It is in great condition.
Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available.
Most of the internal parts are available, but no clock.
Front panel and outer case are gone, but reflectometer
assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

RCA VT-138 / 1629 Magic Eye Tube:

This magic eye tube is a RCA VT-138 that is also known as
a JAN-CRC-1629, or simply a 1629.

The RCA 1629 / VT-138 is a military spec magic eye tube
for use as a tuning level indicator. It has a green phosphor
element.

This tube is often used as an indicator in capacitor checking
instrumentation. I know it is used in some of the Heathkit
units, and probably others.

This one works fine and is $17.

ORIGINAL Heath manuals For Sale:

These are manuals / brochures / schematics only.
They are all originals, not copies, and all are in
extremely nice condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

GD-600 Photoelectric Light Switch, 1972, $5

HM-102 HF Wattmeter
1971, Schematic in book $10

HW-29 A "Sixer" 6 meter transceiver
1964, Schematic in book, $12

HW-2021 2 meter hand held transceiver
1975, No check marks $9

SB-620 Scanalyzer
Schematic Only, Large fold out page, $4

These are original manuals / brochures / schematics only.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1284. 2 m rig, HF Amp, Filter, Mics, and more FS

Yahoo group: ham
Date: 2011-10-15 13:26:16 UTC
From: Ken Simpson, W8EK
Topic: 1284 Message: 1284

2 meter FM transceiver, HF Solid State Amplifier, Active
Audio Filter, Speaker Microphones, Amplifier Saver, Charger,
Manuals, Coax Switches and other Miscellaneous For Sale:

Icom IC-229 H, 2 meter mobile transceiver

The Icom IC-229 H is a 2 meter FM mobile transceiver
providing 50 watts of power. There is also a setting for
25, 10, or 5 watts output when less power is needed. The
LCD display is easy to read. This radio has 20 memories
and priority watch. It also has programmed scanning or
memory scanning. This radio requires 13 V DC at 10 amps,
measures 5.5 x 1.6 x 6.1 inches, and weighs 2.2 lbs.

Features:
* SubAudible (CTCSS, PL) tones
* 20 Memories
* Priority Watch
* Call Channel
* Memory Skip
* Scan
* Backlit LCD
* Receive 138-174 MHz
* 4 RF Output Levels

This particular unit has extremely low power output in
all power positions. I am 99% sure that the problem is
the output power module. It receives great and functions
fine in all other respects. It was used for packet and
does not include a microphone. Cosmetically, it is in
nice condition. It does have a bulb burned out. $60

Ameritron ALS-600 HF Solid State No Tune Amplifier:
-
This is a solid state, HF no tune linear amplifier, including
coverage of the WARC bands, and is supplied with a separate
power supply. It is a great match to Icom gear.

Features:
No Tubes - all solid state
Instant band switching, no tuning, no warm up
Output Power 600 Watts PEP, 500 Watts CW
Continuous HF Coverage
SWR Protection
Over Power Protection
Extremely quiet low speed fan

Very Compact
Illuminated Cross-Needle SWR/Wattmeter
Operate / Standby Switch
Transmit, ALC & SWR LED indicators
Step Start Inrush Protection
Power Supply has voltage & current cross needle meter

This is a really great amplifier. It has full output, working 100%. The amp proper looks extremely nice, although a bit of the very bottom of the laxan panel on the power supply has a bubble. It ends up on the floor out of sight anyhow, so does not mater.

With paper work for $900.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Pryme Speaker Microphone
It works fine and look line new. $20

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your

expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Wall Wart Power supplies:

All are standard "non-switching" types, with no noise like the switching types have.

AEA AC-1 "Wall Wart" Power Supply
This "Wall wart" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Icom DC adapter and batteries:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage needed for the HT. It is used in place of a battery. This one works fine and looks fine. $18

Icom BP-21 and Icom BP-22
Neither of these battery packs hold a charge and are sold
for rebuilding, for using the case, etc. $7 each

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at
higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antenna are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas, and has lightning protection built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1285. Amp Saver, Filter, Wattmeters, Microphones and more FS

Yahoo group: ham
Date: 2011-10-16 11:54:36 UTC
From: Ken Simpson, W8EK
Topic: 1285 Message: 1285

Amplifier Saver, Active Audio Filter,
Wattmeters/SWR Bridges, Coax Antenna Switches,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. It also permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. With lightning protection. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu,

and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for CW keyers and keys:

NEW listing of additional cables

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15

Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1287. Antenna related items FS

Yahoo group: ham
Date: 2011-10-21 22:34:12 UTC
From: Ken Simpson, W8EK
Topic: 1287 Message: 1287

Antenna related items For Sale:
Coaxial Antenna Switches, SWR Bridges and Wattmeters,
VHF and UHF Mobile Antennas and Mounts, Coax Connectors
and Adapters, Rubber Duck HT Antennas, etc.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. This means it permits good operation
at higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antennas are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

HF and VHF SWR Bridges For Sale:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300 HF SWR Bridge
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath SB-634 Station Console w/ Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $12

UHF (440 MHz) Mobile Antennas :

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1293. Many Accessory Items FS

Yahoo group: ham
Date: 2011-10-28 13:58:29 UTC
From: Ken Simpson, W8EK
Topic: 1293 Message: 1293

Many Miscellaneous Accessory Items For Sale
Coaxial Antenna Switches; Active Audio Filter; Amplifier Saver; CW Keys, Keyers, Cables, and Tapes; Deluxe Speaker; Digital Controller; Station Console; Wattmeter; SWR Bridges; Station 24/12 hour clock; Power Supplies (both for rig and for bench), and more

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters

and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

CW Keys and cables:

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass. Includes shorting switch.
It works fine and looks fine. $18

Generic straight key
This is a generic CW straight key with a plastic base.
It is nothing fancy, but it will do the job. $10

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

Autek MK-1 Memory Keyer:

The Autek MK-1 is a keyer which runs on 120 V AC or on DC
from 9 to 14 V. It has four programmable memories, two of
which can be bridged by throwing a switch on the front
panel. Memories are selected by front panel switches.
Another switch selects "record" or "play". There are two
outputs on the back for negative and positive keying,
which means this unit will key most ham gear including
older tube transceivers.

It also has a built in side tone with volume control on
the front panel and an internal tone control. Of course
there is also a speed control on the front panel.

Cosmetically, this unit looks very nice. Electrically,
it emits a solid tone, so it will need some repair. All
of the ICs are socketed, which should make repair easier.

With complete paper work, including schematic diagram and
parts placement diagram for $20.

Cassette Tapes for learning the code:

These tapes came from a silent key estate, and are the only
ones we found.

ARRL "Increasing your code speed -- 10 to 15 WPM"
This is a set of two cassette tapes, but only the first tape
is in the original packing. It includes the booklet listing
what is on the tapes, but only has the first tape.
Great condition. $7

"The Radio Code by the Word Method"
Side 3 and Side 4
Apparently side 1 and side 2 are missing!
This cassette tape is in good condition. $5

Buy both of these for $10.

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it.
It is the matching speaker for the Yaesu FT-990 and many others.
It permits one to switch between two different rigs, and has
adjustable filters on both the high and low end to permit one
to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not
a single scratch or mark on it. You will not find a nicer one
unless it just came out of the box.

With paper work for $150.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. It has version 7 firmware, which I think
is the latest. It includes Pactor in it. It works fine,
and looks very close to new. The large, inch thick manual
is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc.
This is a "regular" wall wort -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_w...0a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

HF and VHF SWR Bridges:

These cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

MFJ 108 B, dual digital clock:

The MFJ 108 B is actually two digital clocks on one base --
a 12 hour clock for local time, and a 24 hour clock for
universal (GMT) Time.

Read both UTC and local time at a glance with the dual 12 / 24
hour LCD clock that displays 12 / 24 hour time simultaneously!
Mounted in a brushed aluminum frame, the 12 / 24 Hour LCD Clock
features huge, easy-to-read 5/8 inch LCD numerals and a sloped
face that makes it easy-to-read across the room. One can
synchronize the two clock faces to WWV for split-second timing.
The clocks are quartz controlled for excellent accuracy. It
measures 4.5W x 2.5H x 2D inches.

This unit works fine, and looks very close to new.
Paper work (if you can call a single sheet paper work) is
included for $18.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which
means that it will produce up to 18 V DC at up to 3 amps.
This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping).
Buy this one for $160.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.

This unit is not a "top of the line" unit, but is a
utility type power supply. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Various Microphones For Sale:
Desk Mics, Hand Mics, DTMF Touch Tone Mics, Speaker
Mics, and Miscellaneous Mic accessories

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop, stuck
into a gray base. The chrome PTT switch is a bar that is
parallel to the "stick" of the lollypop. This is the
unamplified version.

This particular D-104 is in extremely nice condition.
Of course it works well, and has good frequency response.
Cosmetically, it is extremely nice. The chrome seems
perfect, with no scratches or defects of any sort.
The gray base has a couple of very minor scratches.
It presently has a 4 pin connector, but that obviously
could be changed. $55

Another Astatic D-104
This D-104 is the mic element and chrome housing, but does
not have the base with it. It has a short (about 3 inch)
tube that is made to screw into a regular mic stand (see
stands available in this listing). It has an in line PTT
switch, and presently has the 2 pin Amphenol plug as used
by Heath, Johnson, Hallicrafters, and others.
It works well, and looks great. $35

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with about a 4000 ohm impedance. The gooseneck
terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Turner 350, High Impedance Hand Microphone
This is a Hi Z hand mic, that looks like a Turner 350. The
label is off of it, but I am 99% certain it is a 350. This
one is the grayish color, and has a right angle 1/4 inch
stereo plug on it, as used by many rigs in the 1970's. It
has a great pattern on the scope, and looks fine as well. $28

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal! This one has a round 8 pin connector
wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $75

Heil HM-10-5 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y (also known as Yellow)
4 pin XLR connector on one end, to Yaesu round 8 pin connector
(Yellow cable) $25

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Microphone Stands and holders:

Microphone Stands:

Heil SB-2 small boom
The Heil Sound SB-2 Small Boom is ideal for mounting your
Heil microphone.
The SB-2 includes the 'stealth' C-Clamp.
This one is in extremely nice condition. $50

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Heil Mic Holder
Black plastic holder, for 1 inch diameter mics.
Standard 5/8 inch threads. $8

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-5-, TS-60, TS-430,
TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number. It is very similar to an MC-47, but the
4 buttons are at the top instead of the bottom.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a Heath label. Use it with the SB-1400, or with Yeasu rigs with the round 8 pin connector. Like new for $40.

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Several HT Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu HT with the 4 conductor 1/8 inch (3.5 mm) plug, such as the VX-5, VX-3, etc.
This one is just like new. $35

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Yaesu YM-24 A speaker microphone
This speaker mic fits the Yaesu FT-207, 208, plus many others. It can be modified for Santec, Wilson, and others. It has the odd little round connector on it like Yaesu, Wilson, Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

All of the following speaker mics have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Yaesu Items For Sale -- HF transceiver,
microphones, cables, HT accessories, and more

Heath SB1400 HF Transceiver (similar to Yaesu FT-747):

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console with Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end. Ideal to add your own connector.
Can be used with the CC-1 XLR-4 above. $20

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Yaesu MH-1 Hand Microphone:
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $38

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6, VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think it also fits the FT-50 and FT-60, and maybe others. It has a single 4 conductor, 3.5 mm plug on it. This one is just like new. $35

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, and others used in the 1970s and 80s. This particular unit works fine, and looks great also. $20

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Pryme Speaker Microphone
This speaker mic has the 2.5 mm and 3.5 mm molded connector as used by Icom, Alinco, Radio Shack, some Yaesu, and others. It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Yaesu HT Accessory Items:

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1327. Kenwood and other ham items FS

Yahoo group: ham
Date: 2011-12-13 23:25:19 UTC
From: Ken Simpson, W8EK
Topic: 1327 Message: 1327

HF Rig, Power Supplies, Dummy Load, Station Console,
Wattmeters/SWR Bridges, Coax Antenna Switch,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

Kenwood TS-130 HF rig, and PS-30 Power Supply:

Kenwood TS-130 HF SSB / CW transceiver
This rig covers 80 thru 10 meters, including the WARC bands.
It has about 100 watts out, with slightly lower on 12 and 10
meters. Of course it has IF shift, speech processor, and other
features. It is all solid state.
This one works fine, and looks fine. With paper work for $350.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power
most 100 W output HF transceivers. It also has auxiliary
terminals on the back to power an additional rig, such as a
2 m rig. The main connector is the 6 pin molex connector
that will match most Kenwood, Icom, and Alinco HF radios,
as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

Buy both of the above for $425.

Pyramid PS-25 Power Supply:

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase is the same, but of course the shipping will be higher with the oil.

Paper work is included for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it.
In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

MFJ "Strip Line" Coaxial antenna switch:

This antenna switch is in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.

It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle. This one has
a 1/4 inch hole in the base, half way between the center and
the edge, where I think someone might have had a PTT switch
in the past.
Standard 5/8 inch thread. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone

plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5
Vintage cotton covered cord, with brass PL-55-A
(1/4 inch) plug (probably from WW2) $10

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1331. Microphones and Ham Publications FS

Yahoo group: ham
Date: 2011-12-17 15:19:40 UTC
From: Ken Simpson, W8EK
Topic: 1331 Message: 1331

Microphones and Vintage Publications For Sale:

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal! This one has a round 8 pin connector wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $75

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stand:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with a 3 inch chrome tube coming up from the middle.

Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch
for DX. It has up and down switches, in addition to a
"fast" switch. Of course it also has the normal PTT
switch. It has a round 8 pin mic connector, wired for
Yaesu.

This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

ARRL Handbooks and other Publications:

ARRL Handbooks:

1973 - 50th edition - This one is in the smaller format.
It is in very nice condition, although the pages have
yellowed some. $14

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

ARRL Antennas Books:

1970 - 12th edition
Nice condition - $12

1984 - 14th edition
Great condition - $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL How to Become a Radio Amateur,
1970, 26th edition
Extremely nice, close to new condition,
with many vintage ads in the back, $15

Single Sideband for the Radio Amateur
1970, Fifth edition, $12

Specialized Communications Techniques
1975, First Edition, $15

ARRL "FCC Rulebook"
1986, Seventh edition, $3
1988, Eighth Edition, $4
As above, but "Newly Revised to include Codeless Technician" $6
2004, 13th edition $10

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1398. Power Supplies FS

Yahoo group: ham
Date: 2012-03-06 20:22:49 UTC
From: Ken Simpson, W8EK
Topic: 1398 Message: 1398

Power Supplies For Sale:

Astron VS-35 M Power Supply:

Astron power supplies feature solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output. Crowbar over-voltage protection is also provided.

This supply is rated for provide 35 amps ICAS, or 25 amps continuous at 13.8 V DC, so it is more than enough for all of the 100 watt rigs. This model has the voltage adjustable from the front panel from about 5 volts to 15 volts. Current limiting is also adjustable from the front panel, permitting one to set it to protect your solid state rig. Voltmeter and ammeter are included.

This particular unit works 100%, and looks really great. I can not find any scratches on it, although there is one very small defect on the top that one can see if the light is just right.

These sell for about $250 new. Buy this one, with the paper work, for $145.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power most 100 W output HF transceivers. It also has auxiliary terminals on the back to power an additional rig, such as a 2 m rig. The main connector is the 6 pin molex connector that will match most Kenwood, Icom, and Alinco HF radios, as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is electrically very quiet, and well shielded. It does not produce any electrical noise

that I could find.

Of course it works fine, and looks fine also. $175

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

AEA AC-1 "Wall Wart" Power Supply

This "Wall wart" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.

This unit has a 2.1 mm coaxial power plug, with the
center positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc.

This is a "regular" wall wart -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom DC-25 DC adapter :
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.
This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1400. Antennas and related items FS

Yahoo group: ham
Date: 2012-03-10 15:17:58 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 1400

Antennas and related items For Sale:

Doublet Antenna and "Window Line":

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

"Windows Line" 450 ohm transmission line
This is similar to "open wire" transmission line, but has
some plastic insulation on it instead of being open, so it
is protected more. The openings look like windows, hence
the name. I have three lengths available. Two are about
50 feet long, and are $15 each. The third is over 80 feet
long, and is $25.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

MFJ 989, 3000 Watt rated, HF Antenna Tuner:

The 3 KW MFJ-989 features two massive transmitting capacitors
and a roller inductor with a three digit counter. You won't
have arcing problems with this roller inductor, because firm
springs put considerable pressure on a plated contact wheel.

You can tune your SWR down to the absolute minimum from 1.8 to 30 MHz, including MARS and the WARC bands. It has a super heavy duty balun for balanced lines.

You can select two coax antennas direct or through the tuner, balanced line or random wire, plus a built-in 50 ohm 300 watt dummy load. A wattmeter is also included.

This one works fine, and looks good, although there is some slight wear. The meter light has burned out. Paper work included for $175.

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it. Paper work is included for $325.

W2AU "Big Signal" 1 to 1 balun:

W2AU baluns operate at a low VSWR from 1.8 to 40 mHz, and handle powers up to 2 KW PEP (at SWRs of less than 3:1). W2AU Baluns are transformer designs with ferrite cores to provide 95% minimum coupling efficiency. Each has a built-in lightning arrestor, hang up hook, and 600 lbs of pull-apart strength in a weatherized, rugged package using only stainless steel hardware and quality materials.

This is the 1 to 1 model.
It appears that this one was never used. W2AU sells these for about $30. Buy this one for only $20.

MFJ 207 HF Antenna Analyzer:

The MFJ-207 10-160 Meter Antenna SWR Analyzer gives you a direct readout of your antennas SWR without the need for

formulas or indirect readings. The MFJ-207 can also be used
to adjust a tuner to match your antenna without the need
for transmitting. Its frequency coverage is approximately
from 1.75 MHz to 30 MHz in five bands.
The bands and coverage are approximately:
BAND A: 1.75 - 3.00 MHz
BAND B: 3.00 - 5.00 MHz
BAND C: 6.50 - 11.70 MHz
BAND D: 11.65 - 20.00 MHz
BAND E: 18.00 - 30.00 MHz

The MFJ-207 uses a 9V battery or 110VAC from a wall wart
power supply.

This one works fine, and looks fine. It is in its original box,
with paper work for $60.

Wall Wart power supply for use with the MFJ 207. $12

Buy both of the above for $70.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.
With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.

This particular meter works great, looks really great,
and includes paper work for $50.

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Avanti "On Glass" mobile antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

This one is still in its original tube, unopened. $33

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more

attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but
looks ugly. With paper work. $25

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

1970 ARRL Antenna Book
This is the 12th edition of this classic ARRL publication.
This one is in the older, smaller size, and is in very
nice condition. $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cables
tandard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1413. Microphones FS

Yahoo group: ham
Date: 2012-03-23 15:19:12 UTC
From: Ken Simpson, W8EK
Topic: 70 Message: 1413

A large variety of microphones For Sale -- Desk Mics,
Hand Mics, DTMF Touch Tone mics, speaker mics, etc.

Kenwood MC50 / MC-60 Desk Microphone:

I know. How can the mic be an MC-50 and also an MC-60?
Actually, it is an MC-50 desk mic, configured like an MC-60.
It is an MC-50, but to the right of the main stem coming
from the base, a bat handle toggle switch has been added
for Up / Down selection. This has been done very neatly,
and it looks good, as well as functioning well. In
addition, the connector has been changed to a round 8 pin,
wired for Kenwood. So it functions like an MC-60.
Of course the MC-50 can have the connector to the mic
reversed for either high or low impedance.

This one works fine and looks fine also. I will include
both MC-50 and MC-60 paper work with it for $60.

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with low impedance. The gooseneck terminates
in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood MC-30 noise canceling hand microphone:

The Kenwood MC-30S noise cancelling mic is used on many of
the older Kenwood rigs, including the TS-120, TS-130, TS-520,
TS-820, and many, many more.

Most had a 4 pin connector, but this one has a 5 pin connector
on it. It looks original. Apparently this was the original mic
on the Kenwood TR-7600/7625, and maybe others. The 5 pin
connector also matches some of the 10 meter ham rigs.
Of course the connector can be changed.

The mic works fine and looks very close to new.

Paper work included for $35.

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above, but with 8 pin modular connector. $30

Shure EM-33D, controlled magnetic hand microphone:

The Shure EM-33D was used by GE on many of their rigs.
This mic has a controlled magnetic cartridge, similar to
the Shure 444 desk microphone, but this one is a hand mic.
Apparently it is tailored for voice communications "punch"
like the 444's.

This one works fine and looks OK, although it does show some
use. It presently has a 1/4 inch stereo connector on it as
used by early TenTec, Swan, and many others.

The cartridge alone is worth $40. Buy this entire mic for $40.

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch. Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug.
Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.Stripped and tinned ends. Great condition.
$40

Speaker Microphone / Antenna Extender:

Niche MS-105 Speaker Microphone, plus extender for BNC Rubber Duck antenna. This is the speaker mic that is often clipped up high on the shoulder by police and fire personnel. In addition to being a speaker mic, it has a BNC connector on both the speaker mic end, and on the opposite end, so that the BNC rubber duck can be raised to a higher location. The speaker mic connection is the 2.5 mm and 3.5 mm combo connector as used in most Icom, Alinco, some Yaesu, and many others.

This one works fine and looks very close to new. $30

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

I also have many other items available such as many
different types of various ham accessories, microphones,
HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1416. VHF and UHF Items FS

Yahoo group: ham
Date: 2012-03-28 20:20:14 UTC
From: Ken Simpson, W8EK
Topic: 1416 Message: 1416

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, 2 m mobile rig for parts,
HT accessories such as speaker mics, rubber ducks, etc.,
SWR Bridges, mobile antennas and mounts, DTMF Touch
Tone and regular Microphones, and more:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works

fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.Stripped and tinned ends. Great condition.
$40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch. Stripped and tinned ends. Great condition. $40

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142,
ST-144, ST-440, etc. The real leather case includes a built
in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and
rig,and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Vintage Ham Publications For Sale:
Mainly ARRL, but some others

ARRL Handbooks

1973 - 50th edition -
This one is in the smaller format, which means it has
tube charts and vintage ads.
It is in very nice condition, although the pages have
yellowed slightly. $14

1985 - 62nd edition
This one is in the larger format. It has been "well used"
and has some loose pages, but I think they are all there.
The binding has duct tape on it, but the important info
is still there. $7

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's
call sign on the inside cover. $22

Other Vintage ARRL Publications:

These are in the smaller 6.5 x 9.5 inch format.
Most have some very nice vintage ads in them.
All are very pristine, in close to new condition.

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL Hints and Kinks for the Radio Amateur
1968, Close to new condition, Collectible. $12

ARRL Single Sideband for the Radio Amateur
1970, Fifth edition, $12

ARRL Specialized Communications Techniques
1975, First Edition, $15

The next two are in the larger 8.5 x 11 inch format.

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to Work with Integrated Circuits, First edition $10

ARRL Books about Operating your ham station:

ARRL "Radio Amateurs Operating Manual"
2nd edition, $8
5th edition, over an inch thick, $12

ARRL "Operating an Amateur Radio Station"
1972 - 53rd edition $4
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, $3

ARRL Amateur Radio Field Resources Directory
First edition, $7

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Vintage ARRL Licensing materials:

Check and see what the FCC tests were like in the past!

All books are in excellent condition, with some in very
close to new condition.

ARRL Tune in the World with Amateur Radio
1976, First Edition $3

ARRL Now You're Talking
1993, 2nd edition $10

ARRL Tech Q & A, 1997, First Edition $8

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

Vintage Ameco Ham Licensing Publications:

These are all Ameco Publications that are in
extremely nice, close to new, condition.

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Miscellaneous Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Radio Amateur "Flying Horse" Callbooks:

All are in extremely nice condition, close to new.

1981 Foreign "DX" Callbook - $5

1994 International "DX" Callbook - $8

1995 North American "US" Callbook with over
700,000 listings, including Canadian - $10

Digital and Satellite Books:

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

FCC Rule Books and other ham publications:

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, but fairly recent $3

World Atlas, World Map, and DXCC List:

Radio Amateur World Atlas - 13th edition
Includes many different maps of the world with
ham prefixes on them.
Nice condition $8

The Radio Amateur World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

ARRL DXCC Countries List
This is a large check list for working the various
countries, and also includes other information such
as prefixes, applications, etc. New condition $4

Ham CDs:

Set of Extra Class CDs
This is a set consisting of six CDs. I am not certain who
made them or where they came from, other than they came
from the drawer of a silent key. They simply say "Extra
Class, Volume 1", "Extra Class Volume 2", etc. on them.
$18 for the set of six.

ARRL Morse Code Exam
5 WPM version, sent at 15 WPM, but spaced for 5 WPM, with
750 hz tone $7

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

HF Antennas and related items For Sale -- Dipoles,
Verticals, Dummy Load, SWR Bridges, Antenna Tuner,
Low Pass TVI Filters, and Connectors

B & W Broadband HF Dipole Antenna:

B & W states that this broadband dipole will tune from 3.5
thru 30 MHz. From their web site: "Our field proven
broadband HF antennas operate all frequencies continuously
from 1.8 to 30 Mhz without an antenna tuner, plus 6 meters.
If you are participating in various programs such as MARS,
ARES, RACES or CAP these antennas will work all of your
frequencies all the time. If your frequencies get reassigned,
it does not matter."

This particular antenna is the AC 3.5-30, which is also
called the BWD-65. It does not cover 160 meters. It is
about 65 feet long, and has a special balun and loading
coil, plus the wire and spreaders.

This particular antenna works fine, and looks very close
to new. It was installed inside an attic, so has not been
exposed to the weather.

These sell for over $300 new. Buy this one that is close
to new, with paper work, for only $175.

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.

$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching
Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Dentron "Big Dummy" RF Dummy Load:

This is Dentron's equivalent to the the traditional Heath
"Cantenna" dummy load that will handle a kilowatt. It has
a derating curve with it.

It is in good shape both electrically and cosmetically.
It has no rust, dents nor dings.

I measured the resistor and it is 53 ohms, so obviously it
is in good shape. I have never seen any others this close
to 52 ohms!

I can ship it either with or without oil. The cost to
purchase is the same, but of course the shipping will be
higher with the oil.

With derating curve paper work for $45.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --

one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz. 5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available. It looks like these have not been used.

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

"N" Connector - Double Male $8

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1437. Power Supplies FS

Yahoo group: ham
Date: 2012-04-23 19:08:58 UTC
From: Ken Simpson, W8EK
Topic: 1398 Message: 1437

Power Supplies and related items For Sale:

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell used for $125 to $150 (plus shipping). Buy this one for $88.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use. It provides a variable voltage source from about 5 V DC up to about 15 V DC. It has one knob for course voltage that is labeled 6 V, 9 V and 12 V. An additional knob will fine tune the voltage.

I do not have specs on this supply, but I would guess
that it is good for maybe 1/3 to 1/2 amp current. It
has an analog meter that seems to be fairly accurate;
at least it compares favorably to my lab type DMM.

This unit is a great utility type power supply. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK.
With paper work for $20.

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1443. Coax cable, connectors, HF antennas and related items FS

Yahoo group: ham
Date: 2012-04-29 21:20:09 UTC
From: Ken Simpson, W8EK
Topic: 1443 Message: 1443

It is "Antenna Season."

HF Antennas and related items For Sale -- Coaxial
Cable, Connectors, Dipoles, Verticals, SWR Bridges,
Antenna Tuner, Low Pass TVI Filters, etc.

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 160 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit

a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3
-
Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.
$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching

Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50

ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly.
With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more
attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1452. VHF & UHF equipment and accessories FS

Yahoo group: ham
Date: 2012-05-08 22:49:19 UTC
From: Ken Simpson, W8EK
Topic: 1452 Message: 1452

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, HT accessories such as
speaker mics, rubber ducks, SWR Bridge, mobile
antennas and mounts, DTMF Touch Tone and regular
Microphones, and more:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $115. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500 and TR-2600 HTs. The HT slips into the unit, and will charge the battery, or power the unit, or both. The HTs use 9.6 volts DC to operate. This unit converts 13 V DC down to the required 9.6 V DC. It also functions as a holder for the HT in the car, and as a light to illuminate the LCD display on the HT.

This one works fine, and looks OK. With paper work for $20.

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Cable For Sale:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 160 feet. To put it another way, I have jumpers for in your shack, and lengths to run up your tower. I can not list all of the lengths. Please let me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus $2 for each installed PL-259, plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and Kenwood
on the front, with no model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the

TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.

It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1460. Coax Switches, Wattmeter, SWR Bridges FS

Yahoo group: ham
Date: 2012-05-15 23:53:59 UTC
From: Ken Simpson, W8EK
Topic: 1460 Message: 1460

Coax Switches, Wattmeter, and SWR Bridges For Sale:

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HD-1234 Coaxial Antenna Switch:

This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. It will handle full legal power.

This particular switch works 100% and looks fine also.

With paper work for $35.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks

very nice.

With paper work for $100.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Monarch FSI-5
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1466. Dual band rigs, 2 m rigs, HF rig, and more FS

Yahoo group: ham
Date: 2012-05-22 16:39:28 UTC
From: Ken Simpson, W8EK
Topic: 1466 Message: 1466

Dual band (2 m and 440 MHz) transceivers (Mobile and
HT), 2 meter FM transceivers (mobile and HT), HF
transceiver, HF Linear amplifier, Power Supplies,
Coaxial antenna switch, coaxial cable, and related items
For Sale:

Icom IC-2350 dual band FM transceiver:

The Icom IC-2350H features large dual LCD displays,
simultaneous dual-band receive, simultaneous two
frequency reception on the same band, built-in
duplexer, separate volume and squelch controls,
high power output, built-in programmable tone encoder,
auto repeater shift function and compact size. This
radio supports sub band mute, three output levels,
tone encode, built-in duplexer and dual volume and
squelch. Enjoy extended receive on the 2 meter band
from 118 to 174 MHz. Includes DTMF hand mic and DC
power cable.

Features:
Two Call Channel
Tone Scan
110 Memories
Scanning
Time-Out Timer
Multi Function Mic
50/10/5 Watts Output 2 M
35/10/5 Watts Output 440
Two Call Channels
Priority Watch
Extended receive
Auto-repeater Function
Air band Receive [AM]

This particular unit works 100% and looks the same.
I can not find a scratch on it. With paper work for $275.

Alinco DR-610 dual band FM Transceiver w/ cross band repeat:

The Alinco DR-610TQ dual-band FM transceiver (144/440 MHz)
combines a Hi-Tech rugged design with exceptional user
friendliness. The front panel can be separated from the
main body for custom installation. Full duplex cross-band
operation and cross-band repeater function are standard.
It has two VFOs, 120 memories plus split channel, call

channel and program scan mem. The DR-610 also utilizes Alinco's advance channel scope display with real time monitor to give you a visual indication of activity on up to 11 frequencies. Mono band dual receive is also supported, along with aircraft receive.

Power output on VHF is 50/10/5 watts and on UHF is it 35/10/5 watts. Receive range: 108-173.995 MHz and 420-470 MHz. Size: 5.5 x 1.6 x 6.4 inches 2.4 Lbs

Features:
120 Memories
Encode/Decode
DSQ
TOR and APO
Bell Function
Cross Band Repeat
Air band Receive [AM]
5 Channel Auto Dialer
Remote Front Panel
9600 bps I/O Jack

This one works 100% and looks very close to perfect. With paper work for $275.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. Of course it transmits in the 2 meter and 440 MHz ham bands. It is my understanding that it can also be modified to receive into the 800 and 900 MHz region. It will also cross band repeat, and is an extremely rugged radio.

Power output has 3 different levels. With the 7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W. If used with the larger 12 V batteries, it will produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both electrically and cosmetically. The keyboard has very crisp and clear lettering. It includes desk charger, rubber duck antenna, belt clip, wrist strap, battery, and paper work. $130

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Kenwood TR-7730, 2 meter FM Transceiver:

The Kenwood TR-7730 is 2 meter mobile transceiver that has
CTCSS subaudible tone capability (tone board not installed).
It has 25W or 5W output, with 5 memories and scan functions
(band & memory).
This is an easy to operate radio! It is a great radio for
APRS or packet.

This one works 100% and looks OK, but certainly not mint.
It does have some scratches. Paper work is included.

I will sell it one of two ways.
With the MC-46 DTMF touch tone mic (which works fine and
looks really great), it is $80.
With a generic, non DTMF touch tone, regular mic, it is $50.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Yaesu FT-990 Deluxe HF Transceiver:

The Yaesu FT-990 features multiple direct digital synthesizers
for pure local signals and high performance. It has an
automatic antenna tuner. A 500 Hz CW filter is built in.

It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
Multi-function illuminated analog S-meter
90 Memories
Dual VFOs
Built-in AC Power Supply
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $895

Ameritron AL-84 HF Amplifier:

The Ameritron AL-84 is a grounded grid linear amplifier using four 6MJ6 tubes driven thru an impedance matching and power swamping network. It has a pi net output, and an illuminated meter that reads plate current and voltage. There is a connector on the back that will furnish 12 V DC at low current for such things as lights on an antenna tuner, powering a keyer, etc. The AL-84 is rated to deliver 400 watts when driven with a 100 watt rig.

This particular unit has had the 10 meter mod done, so it covers 160 thru 10 meters. It works fine, producing rated power, and looks almost perfect.

With paper work for $400.

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally adjustable from 11 to 15 V DC) at up to 16 amps continuous and 20 amps ICS. The RS-20 features crowbar over voltage protection and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new. I do not find a scratch on it.

With paper work for $60 plus shipping from Florida.

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $100.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6
-
UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Kenwood Items For Sale
Two meter FM HT, 440 MHz HT "Tech Special", chargers
and other HT accessories, desk and hand microphones,
cable for switching linear amp, power cord, coaxial
cable, coax switch, original Kenwood manuals, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $110.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood TH-41 BT HT for 440 MHz:

The Kenwood TH-41 BT is an easy-to-use and compact 440
MHz HT. Frequency selection is via thumbwheel switches
on the top of the radio. There is a DTMF touch tone pad
on the front, along with DIP switches for selection of
the built in PL subaudible tone.

This HT is a "Tech Special" or could be used for parts.
It could also be used to get subaudible PL tone if you
have one of the older "AT" models that lack the tones.
Basically, this unit transmits fine. On receive it sounds
like it is working (squlech action is OK, it has audio,
etc.) but a signal is not received. It acts like the

receiver may be off frequency. Of course it could also
be used for "fox hunts" since the transmitter works fine.

I am selling the HT only, with no accessories.
Cosmetically it is nice. I will include both operating
and service manuals on CD. $25

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK. With paper work for
$20.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Hand Microphone with 8 pin modular plug for Kenwood:

This hand mic says "Electret Condenser Mic" on it, with no model number.

This mic has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

This mic has the 8 pin modular plug (like a computer LAN)
on it, as used by the Kenwood TM-261, TM-271 and others.
It has been tested on a TM-261, but probably works on
many others.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all
metal cavity construction for maximum efficiency, high
isolation and minimum resistance. Isolation is better
than 60 dB at 300 MHz. Insertion losses are less than
0.2 dB. The Daiwa CS-401 permits the selection of up

to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1493. Many miscellaneous items FS

Yahoo group: ham
Date: 2012-06-16 12:55:16 UTC
From: Ken Simpson, W8EK
Topic: 1493 Message: 1493

I have a variety of "new" miscellaneous items that
are now available --
Rotor Control Box, Rotor cable, HF Balun, Lightning
Arresters, Wattmeter, 2 m FM Rig, Linear Amp Switching
Cable, Scope Probes, Variac, and other miscellaneous things:

Alliance HD-73 Rotor Control Box:

This is the control box only for an Alliance HD-73 rotor.

It has been checked and works fine. It looks extremely nice.

With paper work for $60.

Heavy Duty 8 conductor Rotor Cable:

I have approximately 45 to 50 feet of heavy duty 8
conductor rotor cable. I think that all 8 conductors
are number 18 wire; at least it is much heavier than
the standard cable. $25

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am
not sure if it is rated at 3000 watts or 5000 watts, but
it is the big one. It is 4 inches in diameter and about
3 1/2 inches high. It has an SO-239 connector on the
bottom, that has a gold plated center pin, and silver
plated outer. It has "pigtails" coming out of the top
to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!
$60

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Tektronix Oscilloscope Probes:

Both work fine and look fine.

Tektronix P 6008 Probe
10 X, 10 Meg ohm, 7 pf
$20

Tektronx P 6101 A Probe
Direct, 60 MHz. 1 Meg ohm, 32 pf
$20

"Electronic Variac":

Technically, this is not a variac. It is not made by the
Variac Corporation, and it is not a physical autotransformer.
But the function of this device is the same as what most of
us call a variac.

This unit has about 8 feet of heavy power cord, going to a
small enclosure (about 4 x 2 x 2 inches), and then another
foot of heavy power cord. The box has a dial on it that
permits one to go from essentially zero voltage output,
to full line voltage. There is a large bat handle switch
that has a center off position, with a normal position
(full voltage, bypassing the unit) or "On", using the control.

This unit works fine and looks fine. $20

AC to DC power supply unit:

This is sort of an unusual unit. It is in a gray hammer
tone box that measures 7 x 5 x 3 inches. It has an AC
input (lamp cord with alligator clips). The output is
red and black binding posts. Inside is a full wave
bridge rectifier, a huge filter cap, and bleeder resistor.
I think the SK probably used it with a Variac to give
him a variable DC power supply for testing things. It
has a maximum output voltage of 100 V DC, as that is the
rating of the filter cap. $5

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Books about DXing:

All are in "like new" condition.
It appears they have never been read!

Secrets of Ham Radio DXing
by Dave Ingram, K4TWJ - Tab Books
Hardbound First Edition $12

DX Power - Effective Techniques for the Radio Amateur
by Eugene Tilton, K5RSG - Tab Books and ARRL
First Edition $10

Where do we go Next?
by Marti Laine, OH2BH $10

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1500. Yaesu Items -- 440 rig, 2 m rig, Speakers, HF rig, etc. FS

Yahoo group: ham
Date: 2012-06-22 20:03:23 UTC
From: Ken Simpson, W8EK
Topic: 1500 Message: 1500

Yaesu Items For Sale:
440 MHz FM Transceiver, Two meter FM transceiver,
Communications Speakers, HF transceiver, Coax Jumpers,
Microphones, HT accessories, and more

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone
can be set, and changed easily.

This one works fine, and looks great. It includes the
chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

Poly Planar MB-41
This cream colored 4 inch square speaker is about 2 inches thick and is rated at 10 watts. It has a mobile mounting bracket. $15

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $900

Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it

(the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one has stripped and tinned ends on it, which means any connector can easily be added.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $70

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.

Although most are RG-8 (the larger, approximately 0.4 inch coax that takes full legal power), I also have some that are RG-8 X (the medium coax approximately 1/4 inch in diameter). Please ask for RG-8 X, if that is what you would like.

All jumpers are $6 each.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Antennas West "Maxi-J" 2 meter antenna:

The "Maxi-J" is a specialized version of the J pole antenna,
and is made by Antennas West. It is made to be used for
portable applications, although it could be used in a more
permanent situation. Basically, the antenna needs only one
support; a suction cup is included so that it can be attached
in many places. Of course it can also be hung from a tree
limb in a portable situation. It is very versatile. It
provides a significant amount of gain, compared to the
normal rubber duck antenna used on an HT.

The radiating portion of the antenna is just under six feet
long, with an additional six feet of coax, that terminates
in a BNC connector.

This particular antenna works fine and looks very close to
new. It includes paper work, plus a carrying case, for $25.

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1517. IHS - Honduras medical mission trip update

Yahoo group: ham
Date: 2012-07-09 12:41:50 UTC
From: John Kirckof
Topic: 1517 Message: 1517
Attachments: 4 described; binary payloads are missing from this source WARC

Hi Everyone,

A lot has happened in the past few weeks so here is an update on some important IHS Honduras mission matters. Write to me if the attachments do not go through our Yahoogroup site. Many in our profession are interested in going on a trip so I thought I would send this out to let everyone know what is happening right now.

1. As you may know, we use many medical/surgical/dental/eye care professions on our teams (as shown on the map) but we also use interpreters, engineers, ham radio operators plus many general helpers. In this way many spouses, family members, and friends go together. We are in critical need of all such folks for both October and February.

2. The October trip is coming soon on the dates of Oct 21 through Oct 29. The deadline we ask for the application be sent in is 15 August which is just over a month away. The February trip is from 15 Feb through 1 March, 2013 and we would like to get applications for that trip very soon as well as there is a 1 Oct due date on that. So, please send it at your earliest convenience. If you have some questions or issues, let us know.

3. We are having a brunch style fundraiser on 30 September in the Minneapolis metro area. The details are in the attached flyer that will also go in our NewsBreak newsletter. It will also get on our website: www.IHSMN.org There will be silent auction items, door prize raffles, good food, music, and other fun things. Put this date on your calendar and plan for a fun time if you can make it. If not, consider helping in whatever way you can. As said before, your going on a mission is the most important way you can help. Also attached is a message from our IHS President Drew Mathews. In it are some details about our financial situation and needs of support for the fundraiser. He gives our present mailing address that still can be used to send donations and such things.

4. The attached Oct & Feb application is just out and has a few changes. The main one is the address where you should send it which is at the bottom of the form but may not print correctly. Be sure to use this one:

I.H.S. Attn: Proj Dir Steve Rice
2037 Randolph
St Paul, MN 55105

5. As always, let others know about our needs... financially but also for new folks to go with us. At this point in time we can use all professions and support people who want to go.

6. The attached Map is a very good one to show a typical mission in Feb or Oct as it shows locations and professions we use. Show it to others, too. As I said above, e-mail me if this or other attachments do not come with this important message.

Thanks !

John

MFJ and related Items For Sale
Wall Wart power supplies, Speakers, speaker
microphones, Coaxial cable, connectors, and more

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

Heathkit "Converter Charger"
9 Volts DC at up to 100 ma.
No Heath number on this, and I don't know what it was used
on. It has a 2.5 mm male plug on it, with the tip positive,
so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coaxial Cable "Jumpers":
I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 3 feet long. Send me the lengths that you would like, and I will see how close I can come.
All jumpers are $6 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1535. Yaesu Items FS

Yahoo group: ham
Date: 2012-07-25 18:40:20 UTC
From: Ken Simpson, W8EK
Topic: 1325 Message: 1535

Yaesu Items For Sale:
Two meter FM transceiver, 440 MHz FM Transceiver,
HF transceiver, Communications Speakers, Microphones,
HT accessories, and more

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone

can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $875

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up to 7 watts, and has a 8 ohm impedance. It works fine, sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great,

and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep.
It is black with a gimbal mount. 4 ohm impedance. $15

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $12

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

A R R L Handbooks:

All of these are in the larger format.

1984 - 61st edition
It looks close to new. $15

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's call sign on the inside cover. $22

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1594. Many Misc Items FS

Yahoo group: ham
Date: 2012-09-11 15:58:17 UTC
From: Ken Simpson, W8EK
Topic: 1594 Message: 1594

Miscellaneous Items For Sale:
Power Supplies, Speakers, Headphones, 440 MHz
transceiver, 2 meter transceiver, Lightning
Arrestors, Wattmeters, Linear Amp Switching
Cable, and many other miscellaneous things:

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Cariole Headphones:

This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.

These work fine, and look extremely nice. $20

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz FM.
It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter) version, a UHF (440 MHz) version, and a dual band version that used the first two units, plus a switch box. This is the UHF unit only.

The rig includes a connector for PL subaudible tones. This unit has a Comm Specs SS-32 attached to it, with the DIP switches replaced with toggle switches, so that the tone can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent APRS or packet rig. It works fine and looks fine. Since it was used on packet, there is no microphone included, but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers.

Before using this cable, please check the switching capabilities of your transceiver.

This cable has one coax for switching the T/R relay. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Icom HM-4 Hand Microphone:

The Icom HM-4 is a 600 ohm dynamic hand microphone that can
be used on most rigs requiring a low Z mic. It is a dark
gray color, with "Icom" on the front.

This one works fine, and looks great. It has stripped
and tinned ends, so that any connector can easily be added.
$22

20 meter trap:

This is an LC "Trap" to eliminate 20 meter interference.
Nominal frequency is 14.250 MHz, but it has a variable

capacitor to adjust it for best signal rejection. It
is in a minibox about 5 x 2 1/2 x 2 1/2 inches, with
an SO-239 connector on each end. It looks as if it
would handle 100 watts, but not a linear amplifier.

A note on it says "14.250 MHz Trap. Use on 10 m and 15 m"
$10

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below 30
MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks
ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts

PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1599. VHF and UHF Antennas and related items FS

Yahoo group: ham
Date: 2012-09-15 18:20:22 UTC
From: Ken Simpson, W8EK
Topic: 1599 Message: 1599

VHF and UHF Antennas (6 m, 2 m and 440 MHz) and
related equipment For Sale:

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile
antenna. It is 5/8 wave center loaded on 2 meters providing
4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB
gain. VSWR 1.5 : 1 or less. This antenna can handle up to
150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.

$30

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong
magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Metz 214, 2-Meter Mobile Antenna, with Mag Mount:

This is a very high quality two meter antenna. It is a
half wave antenna, which means it does not require a
ground plane, and would have about 3 db gain. The
magnetic mount includes 20 feet of quality RG-8 X coax
(not the smaller, more lossy RG-58), with a PL-259
connector. Apparently Metz is well known for its
marine antennas designed to hold up well in a salt
water environment.

Features:
Stainless Steel 17-7ph Whip
Stainless Steel Housing
Silver Plated Brass Whip Post
UV resistant Cap
All connections soldered
Compression Whip retainer

Technical Specifications:
SWR Less than 1.2:1
1/2 Wavelength, Shunt Fed
Frequency Range 144-148 Mhz
Whip length 37 inches
No Ground plane required

This particular antenna works extremely well. It looks
really great -- close to new.

HRO sells these for a discounted price of about $70.
Marine dealers sell the marine equivalent for well
over $100. Buy this one for only $50.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

Prices do not include shipping from Florida.

Thanks.

1628. Wattmeters FS

Yahoo group: ham
Date: 2012-11-07 16:38:20 UTC
From: Ken Simpson, W8EK
Topic: 452 Message: 1628

Various Wattmeters For Sale:
Peak reading, average reading, Cross needle,
regular meter, HF, VHF, UHF, and more

Daiwa CN-101 L cross needle Wattmeter:

The Daiwa CN-101 L cross-needle meter displays both forward and reflected power over a frequency range of 1.8-150 MHz so it will cover all of the HF bands, plus 6 and 2 meters. The power range is 15/150/1500 watts forward and 5/50/500 watts reflected. With the cross needle meter, it also reads SWR. Minimum power for SWR detection accuracy is 4 watts. Accuracy is ±10% at full scale. There are SO-239 connectors on the rear panel.

This meter will read either peak or average power at the flip of a switch. Back lighting is provided when using a 12 V power source.

This meter works 100% and looks very close to new.
With paper work for $65.

Daiwa CN-465m Cross Needle 140 to 450 MHz Wattmeter:

The Daiwa CN-460M compact cross-needle meter displays both forward and reflected power over a frequency range of 140 to 450 MHz in ranges of 15 and 150 watts forward and 5/50 watts reflected. Accuracy is ±15% at full scale. SO-239 connectors. This meter includes a mobile mounting bracket and meter illumination. 12 V is required for the light.

This particular meter works 100% and looks close to new. It is in its original box, with the styrofoam packing, and includes paper work for $50.

Heath Wattmeters / SWR Bridges:

Heath HM-2102 VHF Wattmeter / SWR Bridge:
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out.

This particular meter works great, looks great, and includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $90.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top)
that fits either of these wattmeters. This one is in
extremely nice condition, with no scratches or blemishes.
$12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp
lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including
the aluminum case, and the cable. $15

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Keithley Model 179 A True RMS DMM:

The 179A is a 4 1/2 digit True RMS reading DMM that
runs off of 115 V AC. It has DC voltage ranges
up to 1200 volts, with AC voltage ranges to 1000
volts. Ohms readings go up to 20 Meg, with both
DC and AC current ranges up to 2000 ma. This is
a true precision DMM, designed for bench/lab use.

This particular unit works 100% and looks extremely
nice. Probes are included, as is the paper work for
$100.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1631. Mobile Antennas FS

Yahoo group: ham
Date: 2013-01-06 01:04:07 UTC
From: Ken Simpson, W8EK
Topic: 1631 Message: 1631

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of mobile HF resonators. They also make an MO-4. The MO-3 is 54 inches long, and the MO-4 is a "shorty" only 22 inches long. This particular mast has been modified and is between the two -- it is 34 inches long. It would be ideal if you have the room for slightly more length than the MO-4, but not enough for the MO-3. Of course this one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a BNC connector on the coax. Among other things, it can be used to put a BNC rubber duck outside on the roof of your car, instead of using it inside the car on your HT. I think this is really what it was designed for. It is in nice condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259. Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-250 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1632. Icom HF rig, Power Supply and more FS

Yahoo group: ham
Date: 2013-01-24 19:38:14 UTC
From: Ken Simpson, W8EK
Topic: 1632 Message: 1632

Icom and related items For Sale --
HF transceiver, Power Supply, Clock, Speaker
Microphones, Speakers, Charger and DC Adapter,
Manuals, cables, and other Miscellaneous Items

Icom IC-738 HF transceiver:

This all band HF transceiver features a 500 kHz to 30
MHz general coverage receiver, and a built-in automatic
antenna tuner. 10 to 100 watts full duty RF output
SSB/CW/FM (40W AM). Double band stacking registers
store 2 frequencies along with modes in each band so
it can be used like 2 VFO's in one band. Ten electronic
'memo pads' are available for DX hunting or contests.
The frequency tuning resolution is 1 Hz. This is
particularly useful when dealing with AMTOR, PACTOR
and other digital modes. Other enhancements include:
PBT (Passband Tuning), Notch, RIT and XIT.
Requires 12 VDC at 20 amps.

Features:
All Mode
Analog S/RF Meter
160-10 Meters
1 Hz Tuning
All Mode Squelch
IF Notch
10 Hz Display
Automatic Antenna Tuner
Electronic Keyer
101 Memories

This one works 100%, and looks very close to new. Immaculate.
Paper work and original box are included for $575.

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others.
This one works fine and looks very close to new. $15

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom DC adapter:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $18

CW Key and Keyer cables:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1633. Mobile antennas FS

Yahoo group: ham
Date: 2013-01-26 12:58:33 UTC
From: Ken Simpson, W8EK
Topic: 34 Message: 1633

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
20 meter resonator RM-20 $16
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of
mobile HF resonators. They also make an MO-4. The MO-3
is 54 inches long, and the MO-4 is a "shorty" only 22
inches long. This particular mast has been modified and
is between the two -- it is 34 inches long. It would be
ideal if you have the room for slightly more length than
the MO-4, but not enough for the MO-3. Of course this
one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259.
Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1634. HTs and HT accessories FS

Yahoo group: ham
Date: 2013-02-18 16:57:33 UTC
From: Ken Simpson, W8EK
Topic: 1634 Message: 1634

HTs and HT accessories For Sale:

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT with extensive receive coverage, and leading-edge features. The American version even transceives with 300 mW on the 220 band. Power output on 6 meters, 2 meters and 440 MHz is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast bands, shortwave (AM), VHF and UHF TV audio, VHF Air and public service frequencies. This model features a rugged magnesium case with rubber bumpers and gaskets. Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM
BCB AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES™

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning

Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) is black hammertone, and looks very nice.

With paper work for $85.

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag. Icom lists them at $21. Buy this one for $10.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in this series:

MFJ 287 Speaker Microphone This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It has a standard 2.1 mm coaxial connector. $12

Accessories for Realistic HTX-202, 2 meter HT:

DC cigarette lighter cord for the HTX-202. $12

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others. This one works fine and looks very close to new. $15

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long Centurion,
still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400 Yaesu
FT-209

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A

This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance,
and is listed as a 300 to 3000 Hz frequency response,
making it ideal for communications. It has a 3.5 mm
(1/8 inch) mono plug, as used by most modern rigs. It
is black in color, looks great, and sounds great. $17

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available --
both transmit and receive. Most are in the 146 and 147 MHz
band segments, with very, very few in the 145 MHz segment,
and none in the 144 MHz segment. These are for ham rigs only,
and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail the
operating frequency you need. I have them listed by operating

frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Crystals are $6 each.

Two position coax switch:

B & W 550 A 2 Coax Switch

This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.

Although this one is an older switch, it is also more heavy duty, and will easily handle 1500 watts.

This one is in its original box, and obviously works well and looks great also. $22

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.

In its original box with original instructions. $25

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug". It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" -
Double female, as above, but for mounting thru a window,
siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
(BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables standard type $2 crimp on type $3

Chassis mount BNC female square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

Heath Items For Sale - Code Practice Oscillator,
Vintage SWR Bridge, Wattmeters, Desk Mic, Phone
Patch, Speaker, Miscellaneous Parts, power supplies,
original manuals, and other miscellaneous items:

Additional original manuals have been added.

Heath HD-1416 code practice oscillator For Sale:

This is a small code practice oscillator that is
powered by a 9 volt battery. It has an internal
speaker, but also provisions for headphones.
The volume is adjusted on the front panel, with
the tone adjustable by an internal control. The
key connects to binding posts on the front panel.

This one works fine, and looks fine also. Paper
work is included for $20.

Heath AM-2 HF SWR Bridge:

This HF SWR Bridge matches the DX-40, although it can be
used with any HF transmitter. It is about 8 inches wide
and 4.5 inches high, with the meter in the middle, and a
gray colored knob at each side near the bottom. It covers
160 thru 2 meters and will handle full power.

This particular unit works fine and is in very good shape.

Paper work is included for $25.

Heath HM-2141 Dual Meter VHF PEP Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz, and also has
a battery test position (9 volt battery needed for "peak"
operation). It has a remote sensor with about 3 feet
of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $90.

Heath HM-2102 VHF Wattmeter /SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out.
This particular meter works great, looks great, and includes paper work for $45.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top) that fits either of these wattmeters. This one is in extremely nice condition, with no scratches or blemishes. $12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including the aluminum case, and the cable. $15

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a PC to your transceiver. It was originally designed to be used as a phone patch, but many have converted them to a digital interface.

This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. The meter makes it great for setting levels.

This one is all original. It is in great condition. Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available. Outer cover and knobs are gone. What do you need?

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many of the older rigs, and is often seen pictured with them. It looks somewhat like a giant chrome plated lollypop, stuck into a gray base. The chrome PTT switch is a bar that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition. With paper work for $60.

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available. Most of the internal parts are available, but no clock. Front panel and outer case are gone, but reflectometer assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power

pack" or as a charger. It has a 2.5 mm male plug on it, with the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power other items needing 9 V DC at low current. It has a 2.5 mm male plug on it, tip positive. $12

AEA AC-1
This unit supplies 12 V DC at up to 1 amp.
It has a 2.1 mm coaxial power plug, with the center positive, so it can be used on many different things that require about 12 V DC at up to an amp. $14

Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $20

ORIGINAL Heath manuals:

These are original manuals only, for Heath equipment.
They are in very nice condition. Schematic is in the book.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

How to Understand and use your VTVM
Spiral Bound Educational series, $8

GD-600 Photoelectric Light Switch, 1972, $5

HD-1234 Coaxial Switch, 1972, $5

HD-1426 Relative Field Strength Meter, 1977, $5

HD-1481 Remote Coax Switch, 1984, $8

HM-15 Reflected Power and SWR Bridge, 1965, $5

HM-102, HF Wattmeter, $8

HW-2021 2 meter HT, 1975, No check marks $9

ID-1290 Weather Station, $10

IM-11 VTVM, $8

IM-36 Transistor Tester, $6

IM-5284 Multimeter, 1977, $8

These are original Heath manuals only.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Kenwood and related Items For Sale:

Two meter FM HT, DTMF Microphone, speakers, chargers
and other HT accessories,desk and hand microphones,
original Kenwood manuals, Coax connectors, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $100.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.
So you get the HT with the normal accessories, plus a
desk charger, plus a new battery for $100.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MC-48 B, DTMF Touch Tone Microphone:

This is a DTMF Touch Tone microphone with a 16 digit pad.
It works with most Kenwood rigs with the round, 8 pin
connector, such as TM-201, TM-211, TM-221, TM-231, TM-241,
TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc. It will also work
with most Alinco and many Radio Shack rigs with the round
8 pin plug.

It has UP and DOWN switches and PTT, along with 16 digit
touch tone pad.

This one works 100%, looks great, and includes paper work
for $50.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60 plus shipping from Florida.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.

This adapter can be used on any HT with a BNC connector. $5

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It is black in color, looks great,
and sounds great. 3.5 mm (1/8 inch) mono plugs. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1637. Two meter and 440 MHz rigs and related items FS

Yahoo group: ham
Date: 2013-03-20 15:42:08 UTC
From: Ken Simpson, W8EK
Topic: 1637 Message: 1637

Two meter and 440 MHz rigs and associated items For Sale:

HTX-242 Two meter FM transceiver:

The HTX-242 Two-Meter Mobile Transceiver is a great
two meter rig, with many features.

Features include:
Auto Memory Store
45 Watt and 10 watt power settings
True FM Modulation
41 Memory Channels
Priority Memory Channel
Individually Programmable Repeater Offsets
Subaudible Tone on both Transmit and Receive (CTCSS)
DTMF Page with Group Calling
DTMF Transmit and Memory
Programmable Frequency Steps
Extended Band Coverage, receiving from 136 to 174 MHz
Dual VFO and Duplex Modes

This one works 100%, and looks extremely nice. It does have
tape around the mic cord near the connector to reinforce a
potential weak point. It is in its original box.

It includes the rig, power cord, DTMF touch tone mic, and
miscellaneous hardware, in the original box.
With paper work for $95.

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
This American version even transceives with 300 mW on the
220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB

AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Yaesu VX-5 R tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands, with receive almost from DC to light. Actually receive starts at the AM broadcast band, and goes to about 1000 MHz, so that means it includes all of the public service bands outside of the ham bands, weather, FM commercial, commercial TV, SW bands, and much more. Power output is up to about 5 watts, in 4 steps. Of course PL tones (encode and decode) are included, plus much, much more.

Features:
220 Memories
AM/FM BCB
CTCSS/DCS
Wideband Receive
Dual Watch
ARTS-Automatic In-Range Transponder
Backlit Keypad

This particular unit is in nice shape. It includes the things that came with it originally, including charger and Lithium Ion battery that seems to last forever. The rubber duck antenna is complete with the 6 meter "extension" that is often lost and not included. Of course it works fine.

With paper work for $190.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350, 2410, 2700, 2710, 2800, and likely other rigs that are about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just slides in, it likely can be used with many other rigs, made by many different manufacturers. This means you can use it with a Kenwood, Yaesu, Alinco, etc. in addition to Icom.

This particular unit is new, in its original box, complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Heath Wattmeters/SWR Bridges:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covering
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated
from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $85.

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging
-
PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has

a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1638. 10 meter equipment FS

Yahoo group: ham
Date: 2013-03-24 01:11:12 UTC
From: Ken Simpson, W8EK
Topic: 1638 Message: 1638

10 meter equipment For Sale:

Transceiver, antennas and related items

With 10 meters opening up more now, it is time to get
on the band!

Uniden President HR-2600 10 meter all mode transceiver:

Uniden?s Model HR2600 President 10-meter transceiver
features CW, LSB, USB, AM and FM modes for Amateur Radio
use, plus programmable CTCSS control tones for accessing
repeaters. Although it was designed primarily as a mobile
unit, it can also be used as a base station with a 5 amp
power supply.

This unit covers the entire 10 meter band, so you can operate
CW on the low end of the band, SSB a bit higher, or AM or
even FM. PL (subaudible) tones are included for FM repeater
use. Basically, this unit will do anything you want to do
on 10 meters.

This particular unit has no modifications. It functions just
as it should. Everything works 100%. It looks very good,
but does have a couple very minor scratches. It includes
the mobile mount which looks like new (possibly never used),
microphone with up/down switches, power cord, and paper work,
in its original box. It even has a pack of hardware with it,
just like a new one. There is even a CD with additional information
(service manual, etc.) on it. This is a terrific unit!

All of this for only $140.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a
reversed PL-259 type of connection. All have a spring just
above the coil, at the bottom of the whip. All are about
3 to 3.5 feet long. I have checked each with an antenna
analyzer, to determine resonant frequency. I am sure that
mounting and surrounding objects might shift this frequency
slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

HF Mobile Antennas:

All work fine and are in great cosmetic condition.

"Hamstick" Antennas:
Each antenna, when fully assembled and tuned, is about 7 feet
long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount. No mast is required. Simply
screw the antenna into the standard ball mount.
Each antenna covers a single band only.
These are true Lakeview original hamsticks and not one
of the clones.
With paper work for only $20 each.
20 meter
10 meter
6 meter

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Larsen 10 meter NMO type mobile antenna:

NMO-28 for use on ten meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

Larsen NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas. This is a trunk lip mount, with a short coax. $10

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12 tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 300/3000 watts forward and 60/600 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65 plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 thru 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors in and out on all.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.
In its original box with original instructions. $25

Monarch FSI-3
Appears to be the same SWR Bridge as above, but with a different faceplate and model number. Extremely nice condition. $18

Heath AM-2 SWR Bridge:
This SWR Bridge matches the DX-40, although it can be used with any HF or VHF transmitter. It is about 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom. This particular unit works fine and is in very good shape. Paper work is included for $25.

Coax switches:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and six switched SO-239 connectors on the other side. It has been constructed in what appears to be a heavy solid copper box, about 3 1/4 inches wide X 2 high and 4 1/4 deep, plus knob and connectors. The switching is by three ganged ceramic rotary switches.
It does have one peculiarity, however. It appears that the way it is presently wired, one SO-239 is selected twice, and another one is not selected at all. $15

Workman CX-3, three position coax switch
Switch one rig to up to three antennas.
With SO-239 connectors.
It looks new, and is in its original box. $15

GC 2 position coax switch
This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.
This one looks like new. $12

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $15

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can

imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125 plus shipping from Florida.

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, and many other ham accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1639. Yaesu and related items FS

Yahoo group: ham
Date: 2013-03-29 13:47:15 UTC
From: Ken Simpson, W8EK
Topic: 1639 Message: 1639

Yaesu and related Items For Sale:
Automatic Antenna Tuner, Multi-Band HT, Communications
Speakers, Desk Microphones, HT accessories, and more

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed
to be used on 160 thru 10 meters, including the WARC bands.
It is designed to work with the FT-757GX, FT-757GXII and
FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5,
10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz.
The maximum RF power is 150 watts. The built in wattmeter
has ranges of 15 and 150 watts. There is a 4-bit microprocessor
which allows for fast, accurate automatic tuning. Two SO-239
connectors are provided, and it includes a built-in dummy
load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect;
it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
The American version even transceives with 300 mW on the

220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB
AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the
rubber duck with the 6 m extension, good battery, charger
and paper work for $275.

Accessory Items for the Yaesu "VX series" HTs, including
the VX-1, VX-3, VX-5, etc.:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I
think it also fits the FT-50 and FT-60, and maybe
others. It has a single 4 conductor, 3.5 mm plug on
it. This one is just like new. $25

Yaesu CT-44 Adapter
This adapter cable converts to 4 pin, 3.5 mm speaker mic plug on the
VX HTs to a more standard 3.5 mm and 2.5mm jacks as used on many
speaker mics. Like new. $10

Yaesu CD-15 Desk Charger
Fast desk charger used for the VX-5, etc.
Like new condition. $25

Yaesu FBA-23 "Empty" battery pack
This pack takes two AA cells (Alkaline, NiCad, or NiMH)
and lets you use them on yur VX-5, VX-7, etc. $25

Yaesu EDC-6 DC Cord
Provides power to the VX series HTs. $6

VX-5 Pocket Reference
Has most of the commands that everyone always forgets.
Permits one to have the info close at hand without needing
to carry the entire operating manual. Spiral bound.
Like new. $8

VX-7 Nifty Mini Manual
Similar to the VX-5 Pocket Reference above, but for the
VX-7 and slightly larger. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "gooseneck" type desk microphone.
It has both high and low impedances, which can be selected by a
switch. This means it can be used on some of the older rigs
requiring a high impedance mic, or with the more modern rigs
needing a low impedance mic.

This particular mic has had the mic element replaced with a
Heil HC-4 element, which is the "DX" element that Heil
designed for superior audio punch to get thru pileups.
These elements are no longer available, but are worth
$50 for just the element.

This particular mic is in very nice condition. It works 100%.
At the present time, it has an 8 pin connector, wired for
Kenwood, on it, which of course can be changed. $85

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

The first one works on 6 meters as well as HF:

Drake TV-1000
This filter may also be used on the low end of six meters,
as well as HF. It is good for 1000 W "average" below 30MHz,
and about 200 W up to 52 MHz. It works fine, but looks ugly.
With paper work for $22.

Bencher YA-1, high power, low pass TVI filter
If you need a heavy duty filter for the output of your amplifier,
this one is ideal. It will take full legal power plus, and has at
least 80 db signal attenuation at TV channel 2. This one works
great, and is in its original box.
Bencher currently sells these for about $90. Only $60.

Bencher YA-1
As above, not in original box. $45

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as
a weather radio with full alerting capabilities. There
are more scanning and searching facilities than one can
imagine! Of course it covers the 6 meter, 2 meter, 220
MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears
that it was not used, but that the manual was examined.
I have tested it and everything seems to work perfectly,
although it has so many features I was not able to test
everything. This is a terrific immaculate scanner!
Only $125.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - regular rubber duck

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have
3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.

It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1640. Antenna Tuners FS

Yahoo group: ham
Date: 2013-04-18 14:30:08 UTC
From: Ken Simpson, W8EK
Topic: 1640 Message: 1640

HF Antenna Tuners For Sale:

From very high power to lower power

Nye Viking MB-V Heavy Duty Antenna Tuner:

This antenna tuner is a "brute". Apparently it will take
on the order of 5000 watts -- at least far more power than
you should be running.

This tuner features a heavy-duty silver-plated variable
inductor with a 25:1 vernier dial, 7,000 volt variable
capacitor and 15,000 volt switch selected capacitors. The
frequency range is 1.8 to 30 MHz continuously.
Dual-metering provides for hands free SWR monitoring. The
backlit dual meters show SWR and power continuously.
You get push button antenna switching from the front panel.
The rear panel has inputs for 4 antennas (2 coax, single
wire and twin lead). There is a tuner bypass position for
the coax antenna input.

A 3kW triple core balun is included.
The extra heavy gauge aluminum cabinet provides effective
shielding.

This one works 100% and looks very close to new.

With paper work for $450.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1641. Icom and related items FS

Yahoo group: ham
Date: 2013-04-19 14:58:23 UTC
From: Ken Simpson, W8EK
Topic: 1641 Message: 1641

Icom and related items For Sale --
2 meter HT, HT Accessories, Power Supply, Speaker
Microphone, Wattmeters, Speakers, Charger and DC
Adapter, High Power Antenna Tuner, Mobile Mounting
Bracket, Scanner, Manuals, and other
Miscellaneous Items

Icom IC-2 AT, 2 meter HT:

The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumb
wheel switches on the top; it has a touchtone pad on the front.
For a long time, this was the "standard", since it is such a
well built HT.

The HT has about 3 watts output in high power and just under a
watt in low. Instead of a NiCad pack that would likely be dead
anyhow, this HT has the "empty" battery pack that takes six AA
cells. You can use NiMHs in this, and then recharge the
batteries outside of the pack, or you can use alkaline cells.
Using this type battery pack is the only reasonable way to go.

This particular unit works 100% and looks very, very nice.

Rubber duck and paper work included for $35.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack.
If 13 V DC is applied, it converts the voltage to the proper
voltage for the HT. It can be used with the IC-2, IC-3, IC-4,
IC-02, IC-03, IC-04, and others. This one works fine, and
looks very nice. With paper work for $18.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing
the 2.1 mm coaxial power plug. The opposite end has a cigarette
lighter plug on it. $10

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have

3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select either Peak or Average reading and
power ranges of 200/2000 watts forward and 50/500 watts
reflected. Frequency coverage is 1.8 to 60 MHz, so it covers
6 meters in addition to the HF bands, making it ideal for
some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

Diawa CN-101 L Peak Reading Cross Needle Wattmeter:

The CN-101 L covers frequencies from 1.8 thru 150 MHz, which
means it covers all of the way from 160 meters thru 2 meters
-- much more than most wattmeters. It has a cross needle meter,
so it will read forward power, reverse power, and SWR all
simultaneously. It has a switch for reading either peak or
average power. In addition, it has a very nice back lit
meter, if 13 V DC is applied.

This particular meter works 100% and looks very close to new.
It even has the rubber "bumpers" on the left and right ends.
It is pristine!

With paper work for $80.

HT Speaker Microphone:

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket
fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350,
2410, 2700, 2710, 2800, and likely other rigs that are
about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just
slides in, it likely can be used with many other rigs,
made by many different manufacturers. This means you
can use it with a Kenwood, Yaesu, Alinco, etc. in
addition to Icom.

This particular unit is new, in its original box,
complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as

a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Astron RS-35 A, 35 amp power supply:

Very heavy duty 13 V DC power supply ideal for powering HF rigs, with reserve for your 2 meter and other gear.

This one works sets at 13.8 Volts DC with no load, or with a load. Very well regulated.
It looks close to new, with no scratches, dents, or dings.
$100

Reference Data for Radio Engineers:

This book published by Sams / ITT is somewhat similar to an ARRL Handbook, but in much more depth and detail, since it is designed for engineers.

This book covers the fields of research, development, production, operation and education for radio engineers. It is loaded with tables and charts necessary in communications. Excellent resource book when looking for data,from the acoustic spectrum to radio wave propagation.

This one is the Sixth Edition printed in 1978, but the basic information has not changed much.

This one is hardback, and it is in excellent condition, close to new. The cover does not even appear to be worn. This exact book in this condition is selling on Amazon from between $123 and $338. Buy this one for only $80.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and are not copies. All are in very good condition. These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12

IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1642. HF Antenna Tuners and Wattmeters FS

Yahoo group: ham
Date: 2013-06-07 15:31:15 UTC
From: Ken Simpson, W8EK
Topic: 1642 Message: 1642

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,
manual and automatic

Drake MN-2700 HF Antenna Tuner:

The Drake MN-2700 is a precision instrument covering 160
through 10 meters. It matches antennas fed with coax,
balanced line, or random wire. Front panel controls
allow for adjustment of resistive and reactive tuning,
antenna switching (with by-pass), and band switching.
A very nice wattmeter is build in, with calibration for
200 W and 2000 W.

This device can handle 2000 watts PEP, 1000 watts average.
Although this tuner matches the Drake "7 line" it can be
used with any HF rig.

This particular unit is immaculate. It does not have the
sticky paint. It includes the "riser feet" and is in its
original box and looks perfect. Of course it works 100%
as well.

With paper work for $300.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed
to be used on 160 thru 10 meters, including the WARC bands.
It is designed to work with the FT-757GX, FT-757GXII and
FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5,
10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz.
The maximum RF power is 150 watts. The built in wattmeter
has ranges of 15 and 150 watts. There is a 4-bit microprocessor
which allows for fast, accurate automatic tuning. Two SO-239
connectors are provided, and it includes a built-in dummy
load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect;
it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

Coaxial antenna switch:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and
six switched SO-239 connectors on the other side. It
has been constructed in what appears to be a heavy solid
copper box, about 3 1/4 inches wide X 2 high and 4 1/4
deep, plus knob and connectors. The switching is by
three ganged ceramic rotary switches. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1643. Mobile Antennas FS

Yahoo group: ham
Date: 2013-07-05 00:13:44 UTC
From: Ken Simpson, W8EK
Topic: 1631 Message: 1643

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas, plus
a variety of antenna mounts and connectors

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $25

Antenna Specialists Mag Mount
with short coax $15

Trunk Lip Mount
Male 3/8 inch stud, with coax. $12

Generic Mag Mount
has female 1/4 inch threaded connection, with coax $12

Mobile Antenna Springs:

I found several mobile antenna springs that appear to
be new. They are the chrome plated type, and designed
for light to medium duty use, i.e. use on VHF type antennas,
and not for heavy duty HF use.

These are about 3 inches long. I have some that are
for 1/4 inch diameter antenna mounts and some for 3/8 inch.

These appear to be new, or at least unused.
They are $5 each.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a
reversed PL-259 type of connection. All have a spring just
above the coil, at the bottom of the whip. All are about
3 to 3.5 feet long. I have checked each with an antenna
analyzer, to determine resonant frequency. I am sure that
mounting and surrounding objects might shift this frequency
slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is on the order of 3 feet long and has a
very strong magnet. It has a long coax cable with a
PL-259 connector.

It works great, and looks very close to new. $75

Larsen VHF (2 meter) mobile antennas:

The first two provide about 3 db gain over a quarter wave,
and are very rugged antennas. About 4 feet long.

NMO-150 - for use on 2 meters
About 4 feet long.
This has been the standard of the industry for a very long time.
Coil only $18
Coil with whip $25

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

NMO-Q - Quarter wave whip for 2 meters
Obviously no gain on this one.
about 19 inches long. $10

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1644. HTs and HT accessories FS

Yahoo group: ham
Date: 2013-07-06 16:48:50 UTC
From: Ken Simpson, W8EK
Topic: 1634 Message: 1644

HTs and HT accessories For Sale:

Azden PCS-300, 2 meter FM HT:

The PCS-300 HT covers the 2 meter band, and has 3 watts in high power or 1 watt in low. It has a very good receiver.

Of course it has memories, and scan features as one would expect. The LCD display is larger than some.

This particular HT is in its original box, and in pristine condition. It includes the desk stand charger, and the earphone is still in the box with it. It includes its manual, with the original warranty card.

All of this for only $60

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10

Yaesu VX-7 Reference Manual and Programming cable:

VX-7 Nifty Mini Manual
Has most of the commands that everyone always forgets. Permits one to have the info close at hand without needing to carry the entire operating manual. Spiral bound with laminated pages. Like new. $18

Programming cable
This cable has the threaded connector as used by the VX-7, but it can also be used on the VX-6, 5, 3, etc. Uses USB port. It works great with the free "Chirp" program. I have not tried it with other programs. $18

HT Speaker Microphone:

This HT speaker microphone was made for the
Baofeng UV-3 dual band HTs, but it should fit
many other HTs as well. It has a single 4
conductor connector on it.

This one works fine and is still in its original
box. $8

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

Type F connector - 6.5 inches long

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Optoelectronics Model 7010.1 Precision Frequency
Counter:

The Opto 7010.1 freq counter is a really deluxe
unit. It operates up to 600 MHz. This particular
model features an extra precision TCXO, guaranteed
at 0.1 ppm. Most of these counters came with a
"standard" TCXO that was 1 ppm.

This unit has three frequency ranges -- 10 hz to
12 MHz, 10 MHz to 50 MHz, and 25 to 600 MHz. It
also has three time base counting periods of .1
second, 1 second, and 10 seconds.
This permits extreme precision!

This unit functions flawlessly, and looks like it
has never been used, other than for my testing of
it. It is in its original box, complete with power
cube, the original manual, the original warranty

card (not filled out), and certificate of calibration.

All of this for only $125.

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1645. Power Supplies FS

Yahoo group: ham
Date: 2013-07-11 16:01:21 UTC
From: Ken Simpson, W8EK
Topic: 1398 Message: 1645

Several Power Supplies For Sale
From high current to low current

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$200

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made to set your rig on top, at an angle for good viewing and sound. It is good for about 3 amps, or to put it another way, would be great for powering 2 meter rigs in the 10 to 15 watt category.

This one is a "Tech Special". It produces no output voltage. It looks fine, however. $5

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power pack" or as a charger. It has a 2.5 mm male plug on it, with

the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1646. HF Antenna Tuners and Wattmeters FS

Yahoo group: ham
Date: 2013-07-13 16:00:43 UTC
From: Ken Simpson, W8EK
Topic: 1642 Message: 1646

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12

tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1647. IHS - We criticvally need radio operators for basic radio support of Feb medical mission

Yahoo group: ham
Date: 2013-07-23 15:10:04 UTC
From: John Kirckof
Topic: 1647 Message: 1647
Attachments: 1 described; binary payloads are missing from this source WARC

Hello to all hams,

A couple of us on the IHS board met a few days ago and we talked about the radio support we will need to provide between 8 or so medical teams going to Honduras the last two weeks of Feb. We will just be communicating between our teams for logistics and for patient referrals so we do not have to know Spanish for that work.

The issue we face right now is we will have enough medical people for the clinic and surgical teams but we need more support people, especially ham radio operators. The problem may come to where we may have to cancel a team or two if we do not have voice communications and other support for some of the teams. Cancelling a team would be sad as we have the supplies and food ready to go along with many medical folks to a team site that typically sees 800 or more patients.

I am just wondering (and hoping) if things are looking good for you to go this Feb. Some of our returning veterans do so at intervals of going every two or three years. That goes for medical and general support people, too. The not so good news is the radio operators we are short of this coming Feb are because this is the "off" year for some of them. So... we really are in need of your help. We do need to get applications, hopefully by mid August, so we can ensure we send all teams.

As always, if you know any other knowledgeable hams, interpreters or medical folks who would like to join us, please pass the word of our important need for volunteers.

I have attached our Team Map for last Feb as it is an excellant tool for you plus to show others about our mission. It shows typical sites plus the professions used and the types of teams we send. If the Map does not come through in this e-mail, just write me and I can resend it and a small Power Point presentation about our mission.

Mission details: The Feb mission is planned for 14 to 28 Feb. Most of the 100 or so folks going will stay a few extra days to go to Roatan, the Mayan Ruins, or to see the rain forest. Your only major cost is the project fee and the airfair which varies from what city you travel from but it typically ranges from $475 to about $900. We have help sheets for such topics as airline tickets, side trips, and mission details. The trip is organizedby International Health Services which is a non-profit. We who serve on the Board of Directors go and participate, too so we know what is going on. This trip and a smaller one like it in October are all we do and have done so for 32 years. I have gone on 20 trips, often as a radio person but also as a team engineer or a Team Leader at a team site. My wife, Karen, has gone with me on 15 of those trips as a general helper.

Call me with any questions you may have when you have a moment. I am always (almost) near my home or cell phone.

1648. HF Linear Amplifiers FS

Yahoo group: ham
Date: 2013-08-03 16:37:32 UTC
From: Ken Simpson, W8EK
Topic: 1648 Message: 1648

HF Linear Amplifiers For Sale:

Amp Supply LK-500 Z A, HF Amplifier:

The LK-500 is an HF amp that runs a pair of 3-500 tubes, on the 160 thru 10 meter bands, producing close to the legal limit. On this amp, 30 watts of drive produces about 400 watts out of the amp; 50 watts gives about 650 Watts out; etc.

This amp has a MUCH heavier duty Peter Dahl power transformer, and covers 160 meters. It has a excellent tuned input matching circuit. It is a superior amplifier.

This particular amp works very well. It has a manual step start circuit added, and the electrolytic capacitors have been replaced. Cosmetically it looks very, very nice. I can not find a scratch on it. It looks like new.

Since this is heavy, I would much prefer pickup in the Ocala, FL area.

With paper work for $900.

Ameritron AL-572, HF Amplifier:

Ameritron's new class of Near Legal Limit Amplifiers give you nearly full legal SSB power output for a much lower price. You get 1300 Watts PEP SSB nominal power out on amateur bands 160-15M.

Two lighted Cross-Needle Meters
Grid current, plate current and forward PEP output power are continuously monitored to tell you of proper loading and alert you to abnormal conditions. A fourth scale switches among peak reflected power (and SWR), high voltage, ALC threshold and ALC output voltage.

It has a transmit LED, 12 VDC, 200 mA accessory jack, and 12 VDC keying relay for solid state/tube rigs.
It draws 16 amps at 120 VAC, but can also be used on 240 V AC.

Features:
Instantaneous RF Bias
Step-Start Inrush Protection
Heavy duty power supply
Pi/Pi-L network

Tuned input
Dual lighted Cross-Needle meters
6:1 vernier reduction drives
Four rugged 572 B Tubes

This particular amp is in extremely nice condition
both cosmetically and electrically. Everything works
100% and it looks very close to new.

Paper work included for $900.

TenTec Hercules II 420 HF Amplifier:

This is a fully solid state all-mode HF linear
amplifier covering 1.8 to 30 MHz continuously.
It requires 13.6 VDC at 100 A max. Drive power
is 50 to 80 W typical for 550 W output. Maximum
Power output on SSB/CW/RTTY is 550 W DC at 50%
duty cycle.

This amp features full QSK break in CW. It can
be remote controlled (bands switched remotely)
from many transceivers.

This particular amplifier looks extremely nice.
I can not find a scratch on it. Electrically, I
think all works fine. It requires a 13 V DC power
supply in the 80 to 100 amp category. I only have
a 35 amp supply to test it with. As a result, I
only get 250 watts out of it before the power supply
over current limit kicks off. But all of the QSK
and everything works fine, as long as I keep it low
enough for the power supply I have.

With paper work for $900.

Heath SB-200 HF Linear Amplifier:

The SB-200 uses a pair of 572B tubes, and operates
on 80 thru 10 meters. It may be used on SSB, CW,
or digital modes.

This particular amplifier puts out about 750 watts
on 20 meters, and has been tested for operation on
all bands.

Cosmetically, it is in extremely nice condition.
I can not find a scratch on it.

Paper work is included for $475.

In all cases, pick up of the amplifier is first choice.
The amplifiers are heavy and hard to ship. I am located

near Ocala FL, not far off of I-75.

Obviously, if it necessary to ship, the cost is not
included in the prices listed.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1649. Japan Radio Equipment FS

Yahoo group: ham
Date: 2013-08-10 20:33:47 UTC
From: Ken Simpson, W8EK
Topic: 1649 Message: 1649

Japan Radio Equipment For Sale:

Deluxe HF Transceiver, Matching Speaker, and Headphones

Japan Radio JST-245 Deluxe HF Transceiver:

The Japan Radio Company JST-245 is an extraordinary rig providing 160 to 10 meter amateur band coverage plus 6 meters in all modes (AM/FM/SSB/CW/RTTY).

The built-in automatic antenna tuner is provided as standard equipment. Tuner settings are automatically stored in memory for fast QSY. Three antenna connections are user selectable from the front panel and can be stored in memory.

The general coverage receiver tunes from 100 kHz to 30 MHz plus 48 to 54 MHz. Electronically tuned front-end filtering, quad FET mixer and quadruple conversion (triple on FM) ensures excellent dynamic range (> 100 dB) and third order ICP of +20 dBm. Excellent I.F. bandwidth flexibility is assured with the variable Bandwidth Control. This permits the standard 2.4 kHz filter to be narrowed continuously to 800 Hz.

Other interference rejection features include Passband Shift (PBS), dual noise blanker, three step attenuation, I.F. notch, selectable AGC and all-mode squelch. Notch tracking is automatic. Once tuned, the I.F. notch filter will track the offending heterodyne (? 10 kHz) if the VFO frequency is changed. Very low phase noise is achieved through a single crystal Direct Digital Synthesis system.

The keypad can be used for band selection or frequency input. The rear panel has three antenna inputs.

The serious CW operator will appreciate the full break-in, variable CW pitch, and built-in electronic keyer. Two separate VFOs are featured for split frequency operation.

Memory registers store most recent VFO frequency, mode, bandwidth and other important parameters for each band. Each of the 200 memories stores frequency,

mode, AGC and bandwidth. A built-in interface
facilitates computer control.

The heavy duty, built-in power supply insures reliable
and continuous use. The ergonomic layout, colored LCD
display and thoughtful placement of controls ensure
ease of operation.

For a complete technical review of this product please
see the September 1995 issue of QST magazine.

This unit works 100%, looks perfect, and is still in
its original box. With power cord, and paper work
including the original multicolor brochure for $1400.

NVA-88 M speaker

This speaker matches the JST-245 above, plus most of
the other Japan Radio rigs. It is a very good sounding
speaker. It looks great, with no scratches, and is in
its original box. $100

ST-3 Headphones

These are very nice, comfortable monophonic communications
headphones. They have a 1/4 inch mono plug on them.
They work fine and look great cosmetically - like new.
No box on these, however. $50

Buy all three of the above items for $1500.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1650. Dual Band Multimode Xcvr, and other Yaesu Items FS

Yahoo group: ham
Date: 2013-08-29 13:34:50 UTC
From: Ken Simpson, W8EK
Topic: 1650 Message: 1650

Yaesu Items For Sale:

Dual Band Multimode transceiver, Desk Microphone,
Power Cord, VX-7 Accessories, several Microphones,
2 m HT, HT accessories, and more

Yaesu FT-736 R, Dual Band, Multimode Transceiver:

The Yaesu FT-736R all mode transceiver incorporates up to four band modules covering the 50, 144, 220, 440 and 1200 MHz amateur bands. It is supplied with 2 meters and 440 at 25 watts output. This radio has conveniences such as IF shift, IF notch, keypad entry, noise blanker, all mode VOX and three-speed AGC. The memory system includes 100 general purpose memories, 10 full duplex cross-band memories and 1 call channel, all of which store mode and frequency.

Features:
All Mode
Keypad Entry
100 Memories
IF Notch
IF Shift
Dual Digital VFO's
Semi Break-in CW
All Mode VOX
Built-in Power Supply
10 Duplex Memories

This particular unit works 100% and looks like new. It includes the optional tone unit for subaudible tone encode and decode, and the 600 Hz CW filter. It is still in its original box, with paper work for $775.

Yaesu MD-1 Desk Microphone:

The MD-1 desk mic is a deluxe, high quality desk mic. It features an UP-DOWN tuning function (assuming a compatible Yaesu model radio). Impedance may be selected at either 500 or 50,000 ohms. Round 8 pin connector. It can be used with most any of the Yaesu (and also TenTec) rigs that use the round 8 pin connector.

This particular mic is still in its original box. Not a scratch on it. It has been removed from the box, and verified that everything works 100%.

With paper work, in its original box for only $115.

Yaesu E-736 DC Power cord
The box says for the FT-736, but I am sure it will work
with others as well, as it is the standard 6 pin molex
connector used by many different rigs.
This one is new, still in its original box. $22

Yaesu NC-72 B
This is the wall charger that is used with the VX-5 series
HTs (VX-6, VX-7, etc.), and also the FT-817, and probably
others. It is also used to power the CD-15 desk chargers.
This one is in its original box, apparently unused. $15

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10.

World Map:
The Radio Amateur's World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

Yaesu MH-15 DTMF Touch Tone Microphone:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand microphone:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC "Stubby", about 4 1/2 inches long

BNC Connector, about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on
2 m, 220, or 450 MHz. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1651. HF Antenna Tuner, Wattmeters, and HF related items FS

Yahoo group: ham
Date: 2013-10-19 14:53:09 UTC
From: Ken Simpson, W8EK
Topic: 1651 Message: 1651

HF Antenna Tuner, Wattmeters, and HF Antenna
related items For Sale:

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $60.

Balun / Antenna Center Insulators:

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden HiQ Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol PL-259
Still sealed in the original package. These are the silver
plated, teflon insulation variety. $3

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59. Still sealed in the package. $1

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1652. Power Supplies FS

Yahoo group: ham
Date: 2013-10-22 23:18:54 UTC
From: Ken Simpson, W8EK
Topic: 1398 Message: 1652

Several Power Supplies For Sale
From high current to low current
and also DC Power Distribution Strip

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$199

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This unit sells new for around $85 plus shipping. This one is like new. Buy it for only $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

10 amp, 13 V DC, Power Supply:

This is basically a generic 10 amp power supply made by Stabylex Electronics Corp., and is model 10 SR. It has automatic short circuit protection, and a very large heat sink.

Obviously a supply with a 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 12 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1653. MFJ Items FS

Yahoo group: ham
Date: 2013-12-19 13:58:29 UTC
From: Ken Simpson, W8EK
Topic: 1267 Message: 1653

MFJ Items For Sale:

Dual Audio Filter, Antenna Tuner, Wattmeter/SWR
Bridge, DC Power Distribution Strip, Speaker Mic,
and Wall Warts

MFJ 752 Dual Audio Filter

The MFJ 752 is a dual tunable audio filter that permits
one to zero in on a single sideband and Morse code signal
and notch out interference at the same time. It can also
be used for AM mode shortwave listening. The primary filter
has tunable peak, notch, low pass and high pass. The
auxiliary filter has peak and notch. The filter is
automatically bypassed when the unit is off. Speaker and
phone jacks are provided.
It requires 9-15 VDC @300 ma.

Two of these units are available.

One is a plain 752. It works fine and looks good, but
not perfect. With paper work for $45.

The second is the 752 C. The C model has an LED that
lights when power is applied. There are other minor
cosmetic changes. This one works fine and looks very
close to perfect. With paper work for $65.

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not

normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading Wattmeter:

This Wattmeter is a cross needle meter that reads forward
and reverse power simultaneously, also displaying SWR.
It has 300/3000 Watt forward and 60/600 Watt reverse scales,
and is a peak or average reading meter that covers 160
thru 6 meters. It needs 13 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $60.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe
multiple DC power outlet. It lets you power two HF
and/or VHF transceivers and six or more accessories
from your transceiver's main 13 V DC power supply.
You get two pairs of super heavy duty 30 amp 5-way
binding posts for powering your transceivers. Each
pair is individually fused and RF bypassed, capable
of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty,
RF bypassed 5-way binding posts lets you power your
accessories. They handle a total of 15 amps and are
protected by a master fuse, have an ON/OFF power
switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded
cable with ring tongue terminals, plus a built-in
0 - 25 VDC monitor meter.

This one is like new. Buy it for only $60 with paper work.

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin
compatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $10.

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current, including the
MFJ 752 audio filters above. It has a 2.5 mm male plug
on it, tip positive. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1654. Antenna Tuner, Wattmeters, & other HF Antenna related items FS

Yahoo group: ham
Date: 2013-12-20 17:44:43 UTC
From: Ken Simpson, W8EK
Topic: 1654 Message: 1654

Antenna Tuner, Wattmeter, and other HF Antenna related
items For Sale:

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not
normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239
connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF

or VHF transmitter. About 8 inches wide and 4.5 inches
high, with the meter in the middle, and a gray colored
knob at each side near the bottom.
This particular unit works fine and is in very good shape.
Paper work is included for $22.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings
look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Copper Antenna Wire:

Both coils are new, unused, shiny.

Coil of 100 feet of #12 stranded copper wire $20

Coil of 50 feet of # 14 stranded copper wire $8

Balun / Antenna Center Insulators:

All baluns are 1:1 ratio, and handle full legal power.

Unadilla W2AU "Big Signal" Balun
Use this as a center insulator for a dipole, or on a beam.
Built in lightning arrestor.
This one is new, still in its original box, with paper work. $20

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden "HiQ" Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

VanGorden "Hi Q" Antenna Center Insulator
No balun included in this one, but it is designed to act as the
center insulator for a dipole or inverted V antenna, similar to
the W2AU Ansulator above. This one appears to be unused. $12

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package. 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1655. VHF Items FS

Yahoo group: ham
Date: 2014-01-08 16:43:31 UTC
From: Ken Simpson, W8EK
Topic: 1655 Message: 1655

VHF related Items For Sale:

Antenna Tuner for 6 and 2 meters, VX-7 Accessories,
several Microphones, Wattmeters/ SWR Bridges,
Communications Speakers, Antenna connectors and
adapters, and more

Antenna Tuner for 6 meters and 2 meters:

This Comaire LM-62 tuner is different than any I
have ever seen!

Although the tuner is for 6 meters and two meters,
each tuner is completely separate, with no common parts,
other than the enclosure it is in, which is a nice black
hammertone enclosure with an off white / tan front panel.

The tuner has the standard SO-239 connector for an input,
but has dual outputs on each band for both balanced line
or for coax. This is where it is different. The balanced
line output does not use a balun, but instead is link
coupled. This is something not seen much any more, and
certainly indicates its age.

This arrangement is duplicated with the 6 meter tuner
on the left, and the 2 meter tuner on the right.

There is no indication of power handling capability on
it, but I would guess a couple hundred watts.

This one works fine and looks very nice. $100

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc.
Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. I am fairly sure it is Yaesu and
not aftermarket. $18

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

Thrust Bearing Bracket for Alliance Rotors:

This is a thrust bracket used on most all of the
Alliance brand antenna rotors except the HD-73.
This includes the popular U-100, along with the
C-225, U-98, U-110, and most any of the other
rotors used for VHF and TV arrays. This bracket
increases the capacity of the rotor considerably.

This particular thrust bracket is NEW, unused.
It includes the manual with installation instructions.

Only $25.

B & W 591 Coax "Transfer" Switch:

This switch is designed to switch an auxiliary
piece of equipment in and out (For example,
bypass a linear amplifier, transverter, preamp,
etc.). It has four SO-239 connectors coming out
the back.

It works fine and is in great shape.

With paper work for $35 plus.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239
connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF or VHF transmitter. About 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom.
This particular unit works fine and is in very good shape. Paper work is included for $22.

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers 50 to 160 MHz., with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great, and includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR power supply has automatic short circuit protection, and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts "average" below 30MHz, and about 200 W up to 52 MHz. It is the newer version of the TV-1000. $30

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 V DC monitor meter.

This one is like new. Buy it for only $60.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line, but has some plastic insulation on it instead of being open, so it is protected more. The openings look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end. It is about 60 feet long.

The coax is labeled 50-2 V, which obviously means it is 50 ohm cable, but I don't know what the 2 V means. It appears to be slightly larger in diameter than RG-8 X, but not quite as large as RG-8.

This piece is in good condition, with heat shrink around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
Out of package, 50 cents.

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1656. Scanners FS

Yahoo group: ham
Date: 2014-01-17 18:40:01 UTC
From: Ken Simpson, W8EK
Topic: 1656 Message: 1656

Several Scanners For Sale:

Realistic Pro-2023 Direct Entry Scanner:

The Pro-2023 is also called Model number 20-128.
It is a 20 channel scanner covering UHF, VHF Hi &
Lo and Air Bands.

Features & Specifications:
20 Programmable Channels With Memory Backup
Channel One Priority
Antenna and 3.5mm Earphone Jacks
Scan Delay Lets Your Hear The Return Calls
Automatic Weather Search
Telescoping Antenna
Search Function Finds New Unlisted Frequencies
Backlit LCD Display

Frequencies Automatically Scanned For Active Channels
29-29.7 MHz 10 Meter Ham Band
29.7-50 MHz VHF Lo Band
50-54 MHZ 6 Meter Ham Band
108-136 MHz Aircraft Band
136-144 MHz VHF Government Band
144-148 MHz 2 Meter Ham Band
148-174 VHF Hi-Band
406-420 MHz UHF Government Band
420-450 MHz 70cm Ham Band
450- 470 MHZ UHF-Lo Band
470-512 MHz UHF-T Hi Band

This one works fine and looks fine. It is in its original
box, complete with antenna and paper work for $35.

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that
covers the low VHF, Hi VHF, and UHF frequencies. Of
course this means it covers weather frequencies. It
has battery back up of the programmed frequencies and
also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz

450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work
for $25.

Bearcat BC-560 XLT / PRO-2025 Scanner:

The Uniden Bearcat BC-560XLT 16 channel scanner (also known as
PRO-2025) covers VHF Low Band, VHF High Band and UHF. It has a
priority channel and channel lockout, plus weather search for
instant access to your local NOAA weather station.
Programming is easy. Just key in the desired frequency. You
can press the Review button to check each channel.

External jacks include: external antenna, external speaker
and 12 VDC power.
5.5 x 1.75 x 7 inches.

It covers
29-29.7 Amateur Band 10 Meters
29.7-50 VHF Low
50-54 Ham Band 6 Meters
136-144 Federal Government
144-148 Amateur Band 2 Meters
148-174 VHF High Band
406-420 Federal Government
420-450 Amateur Band 70 Cm
450-470 UHF Band
470-512 UHF "T" Band

This one works fine.
With paper work and power cord for $25.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430
to 512 MHz. It is a small scanner with 8 channels,
and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Regency Scanner:

I can not find a model number on this scanner.
It is a 10 channel, crystal control scanner,
for lo VHF, hi VHF, and UHF. There are jumpers

inside to select any of these three ranges.
There are no crystals installed. The audio
output is fine. The squelch is always open,
probably due to no crystals in it. It might
work fine, and it might not. Assume it does
not work and is for parts only. You may have
a pleasant surprise.

It runs off of 13 V DC. Power cord is included
for $5.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1657. HF Antenna related items

Yahoo group: ham
Date: 2014-01-25 18:16:52 UTC
From: Ken Simpson, W8EK
Topic: 1657 Message: 1657

HF Antenna related Items For Sale:

HF and VHF SWR Bridge:

Royce 2-100 SWR Bridge / Field Strength Meter

Covers from 3 thru 150 MHz, so it includes HF, 6 meters,
and 2 meters. It has SO-239 connectors in and out, and
will take full legal power.

This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.

It is in its original box with original instructions. $20

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings
look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

HyGain BN-86 Balun:

This is a 1 to 1 HF balun, rated to handle full legal power.

Use it to hang a dipole, or add a U-bolt for an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package, 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1658. Power supplies and related items FS

Yahoo group: ham
Date: 2014-03-11 19:48:23 UTC
From: Ken Simpson, W8EK
Topic: 1658 Message: 1658

Power Supplies and Related Items For Sale:

Arranged from highest current to lower current.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe
multiple DC power outlet. It lets you power two HF
and/or VHF transceivers and six or more accessories
from your transceiver's main 13 V DC power supply.
You get two pairs of super heavy duty 30 amp 5-way
binding posts for powering your transceivers. Each
pair is individually fused and RF bypassed, capable
of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty,
RF bypassed 5-way binding posts lets you power your
accessories. They handle a total of 15 amps and are
protected by a master fuse, have an ON/OFF power
switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded
cable with ring tongue terminals, plus a built-in
0 - 25 VDC monitor meter.

This one is like new. With paper work for only $60.

Astron RM-50 M
This supply have a separate voltmeter and ammeter, and is
rated for 50 amps ICAS, or 35 amps continuous. It is a
real brute! It works 100% and looks close to new. With
paper work for $175. Pickup near Ocala FL is preferred.

Alinco DM-330MV
This Alinco Switching Mode DC Regulated Power Supply is rated
at 30 amps continuous and 32 amps intermittent. It has a
meter (both ammeter and voltmeter), and also a cigarette
lighter socket.
This one works fine, and looks like new. It is still in its
original box. $125

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243

remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Clegg PS-20 A / Astron RS-20 A
This supply has an Astron name on it, but also has a Clegg
name added. It is rated 20 amps ICAS, and 16 amps continuous.
It works 100%. Cosmetically, it looks nice, but has a very
few droplets of "overspray" where a previous owner had it
too close to where he was spraying bronze colored paint.
With paper work for $65.

GSC 20 R, 20 amp supply
Although this supply is rated at 20 amps, it is not quite
as heavy duty as the Astron/Clegg 20 amp supply. A more
realistic rating would be 15 or 16 amps. This one works
fine, and looks fine, except for scratches on the bottom.
Made in USA. $50

10 amp, 13 V DC, Power Supply:

This is a basic 10 amp power supply made by
Stabylex Electronics Corp., and is model 10 SR.
It has automatic short circuit protection, and a
very large heat sink.

Obviously a supply with a 10 amp rating is ideal
for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

TenTec Model 937 power supply
This supply is rated at 11 amps ICAS, and 7 amps continuous.
It is normally used the the "Scout" 555 HF transceiver,
although it certainly can be used with other rigs, including
VHF/UHF rigs.
This one works fine and looks close to new. It is still in
its original box, with paper work for $75.

Vintage Icom IC-3PA Power Supply / Speaker:

The Icom IC-3 PA was originally designed to be used
with Icom's 10 watt 2 meter rigs, such as the IC-22,
IC-230, IC-22 S, etc. It produces 13 V DC at 3 amps,
and shuts down at 4.5 amps.

In addition to being a power supply, it also has a front
facing speaker in the enclosure. It is designed so that

the 2 meter rig sets on top of the power supply. It has
four lights for power, normal, warning, and over current.

This particular unit is in extremely nice condition.
The normal and power lights work. I don't know about
"warning" and "Over current", but I expect that they
do. I do not find any scratches on it.

With the paper work for $40.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 13 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

Bench Type Power Supply:

This power supply is completely adjustable
with a multiturn pot, up to about 20 Volts DC.
It appears to be good for about 3/4 of an amp.
The analog meter reads 0 to 15 Volts DC or
0 to 30 V, switch selected.

It is housed in a very nice eggshell and wood
grain cabinet. Of course it works fine. $20

"Wall Wart" Power Supplies For Sale:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

Many uses for the 12 volt variety!
Both have 2.1 mm coaxial connectors with center positive.
12 V DC at 625 ma $14
12 V DC at 500 ma $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.
Only $85.

Large 150 Volt AC Weston Analog Meter:

Weston Model 1934, 150 Volt AC meter
This meter is a nice large 3.5 inch modern meter.
The AC scale is expanded, so that 120 volts is
easier to read. This meter is new, never used,
still in its original box, complete with hardware.
$35

Weston Model 1931, 150 Volt DC Meter
This meter is similar to the one above, except
it is for DC instead of AC.
It is also new, in its original box, with hardware.
$20

Surge Stations and Noise Filters:

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box.
Only $18.

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1659. Coax Switches and connectors FS

Yahoo group: ham
Date: 2014-03-14 20:08:51 UTC
From: Ken Simpson, W8EK
Topic: 1659 Message: 1659

B & W Coax Switches, Coax Cable, and many
coax connectors and adapters For Sale:

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are
50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

B & W Coaxial Antenna Switches:

All have SO-239 connectors, and will handle full legal power.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel.
This one works fine and looks fine as well. $40

B & W 592 two position coax switch
This switch has the coax coming out the back, and it does
NOT ground the unused antenna.
This one is in nice electrical and mechanical shape. $30

B & W CS-3 G three position coax switch
This switch DOES ground all of the unused positions.
It has the coax coming out the rear of a rectangular box.
It works and looks fine. $40

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V, which is slightly
larger in diameter than RG-8 X, but not quite
as large as RG-8.

This piece is in extremely good condition, with heat
shrink around the connectors for strain relief. $35

MFJ 260 "Dry" Dummy Load:

The MFJ 260 Dummy load is rated to handle up to 300 Watts
for 30 seconds, or 100 watts for just over a minute. It
is rated to be good up to 650 MHz.(SWR: 1.1:1 to 30 MHz,
1.5:1 30-650 MHz)
SO-239 input connector accepts a PL-259. 2? x 2? x 7 inches

This one works fine. It measures 55 ohms, so it is an extremely
good match for a 52 ohm load. Of course it looks fine as well.

With paper work for $25.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I just got an assortment of "N Connectors" in.
Please let me know what you need.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2

crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1660. VHF and related items FS

Yahoo group: ham
Date: 2014-03-19 12:21:28 UTC
From: Ken Simpson, W8EK
Topic: 1660 Message: 1660

Wanted: Icom BP-90 "Empty" Battery Case

I am looking for an Icom BP-90 battery case.
This takes six AA cells, and is used on a variety
of Icom HTs, including the IC- 2SAT, 3SAT, 24AT,
W2/A, 2SRA, 4SRA, R1, and others.

Do you have one in good usable condition?

VHF related Items For Sale:

Yaesu VX-5 tri band HT, "Strip
line" constant Z coax switches, several Microphones,
Wattmeters, Communications Speakers, Chargers and
power supplies, VX-7 "Nifty Manual", Scanners,
Antenna connectors and adapters, and much more

Yaesu VX-5 R S tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands,
with receive almost from DC to light. Actually receive
starts at the AM broadcast band, and goes to about 1000
MHz, so that means it includes all of the public service
bands, weather, commercial FM, and much more.

It provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz,
at three power levels.

Features include 16 digit 9 memory DTMF autodialer, CTCSS/DCS,
220 memories, aluminum die-cast case and 8 character alphanumeric
display. It is a compact 2.3 x 3.4 x 1.1 inches.

This is the silver "R S" version of the VX-5.

To say that this is better quality and has more features than the
Chinese HTs would be an understatement!

This particular unit works 100%, and is in very nice condition.
It includes charger, a good Lithium Ion battery, rubber duck with
the 6 meter extension, and paper work for $145.

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are

50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

VHF Wattmeters:

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHZ, up to 1000 watts
input continuous. Full scale readings of 100 W and 1000 W.
It has the type N input and output connectors, although
adapters are available, if you want.
This one works fine and looks like new. No scratches.
With paper work for $80.

Adapters from Type N connector to PL-259. $8 each

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated

from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR
power supply has automatic short circuit protection,
and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and
dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 Watts "average" below
30MHz, and about 200 W up to 52 MHz. It is the newer version
of the TV-1000. $30

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Scanners:

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that covers the low VHF, Hi VHF, and UHF frequencies. Of course this means it covers weather frequencies. It has battery back up of the programmed frequencies and also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz
450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work for $25.

Uniden Bearcat BC-50 XL Scanner:

The BC-50 is a handheld programmable scanner that covers the low VHF, high VHF and UHF bands. It can run off of five AA cells, or external 7.5 volts DC. It has a BNC antenna connector.

Frequency coverage:
66 - 88 MHz
136-174 MHz
406-512 MHz

More info at
http://www.rigpix.com/bearcat/bc50xl.htm

This one works fine with an external speaker, but not with the internal speaker. This could just be dirty connections, as the SK who had it stored it in his garage. It could stand some cleaning, but it does work.

With paper work for $10.
If you desire a rubber duck antenna with it, add $10.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430 to 512 MHz. It is a small scanner with 8 channels, and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V. It is slightly larger
in diameter than RG-8 X, but not quite as large
as RG-8.

This piece is in good condition, with heat shrink
around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I have quite a few different variety of "N" connectors.
Please send your request.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package. $1

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1661. IHS - Fantastic mission trips are planned in Oct & Feb !!!

Yahoo group: ham
Date: 2014-06-19 14:27:02 UTC
From: John Kirckof
Topic: 1661 Message: 1661
Attachments: 3 described; binary payloads are missing from this source WARC

Hi to all hams on the Site,

Well, I am excited to say that IHS has some some fantastic mission trips to Honduras planned for this October and February. They can use both medical and non-medical folks to cover medical, dental and eye clinics. We also are planning 3 surgery teams. We have all the resources and logistics in place so all we need are the volunteers to go. This obvously is a medical mission but we do use many many non-medical people, too to do important support tasks and hams play a vital role in that support!

RADIO OPERATORS..... We have a huge need for ham radio operators and other general workers to go on what many call a Super Field Day experience. Handymen do the engineering job as it is just basic tasks such as keeping the generator filled with gas. On small teams the radio guy may do the Engineer job as well. The radio guys mostly use their basic HF skills to talk with other IHS teams so no Spanish is needed for their job. I am a ham myself and one hat I wear is that of the Communications Director. Besides the main IHS web site (mentioned below) we have a small Yahoo.group site at www.groups.yahoo.com/group/IHSradio All hams are welcome to join the group. We use it a lot at certain times of the year to do prep work for a mission but we have a lot of good general info on there as well. Give me a call any time and we can chat about the radio work we do for each mission.

The good news is we have started to get a great response from physicians and several other professions. We also have it planned where we can put several relatives and friends on the same teams so bring someone with you !!

IHS is International Health Services. Take a look at the attached TEAM MAP to see the places that IHS goes to and the many medical and non-medical professions we will need. If this site does not forward the attachments, let me know and I will send them to you. If you have any thoughts of doing a mission trip, this is the one for you. My wife and I have been going for nearly 20 years and I have yet to find one better for the money !!!

I have attached some good information files. The Guide was just redone last week, too with added info. Feel free to pass any of these on to others who may have an interest in going. Our new web site is small but has some general info. www.IHSMN.org The best bet may be to give me a call to answer any general questions. For medical folks, I can then also refer you to our Medical Director Dr Joe Tombers who can give better info on the daily work in a typical clinic.

* * To answer some basic questions......

The acctual dates to travel to and from Honduras are the dates shown at the top of the first page of the application file.... 28 Sept to 8 Oct for the firdt trip and 13 to 27 Feb for the later, large group. The Map shows the many teams we typically send each Feb. The Oct trip is smaller and this year it has one medical.dental team and one eye glasses team. So, I would say that next Feb may be the better bet for you but either time is great to go. We will have 5 or 6 clinic teams in Feb so we can still use many with your background.

We have several physicians who have said they will go in Feb but still need several more. If you know any who may be interested, please let them and other medical professions (shown on Map) know we can still use more folks on the teams. Support people are the interpreters, radio guys, engineers, and general helpers on each team and we can sure sue some more of those folks, too.

This is a volunteer mission trip but about half of the overall costs are subsidized by IHS from many fundraising efforts we have through the year.

Call when you can or let me know a number to call you.

Thanks for caring about the very poor of Honduras.

John

1662. Wattmeters, Coax Switches and Connectors FS

Yahoo group: ham
Date: 2014-07-01 19:06:09 UTC
From: Ken Simpson, W8EK
Topic: 1662 Message: 1662

Wattmeters, Digital Rotor Control Box, Coaxial Antenna
Switches, and Coax Connectors For Sale:

Bird 43 Watt Meter:

The Bird 43 is an insertion type RF watt meter, designed
to measure RF power and load match in 50 ohm coaxial
transmission lines. It is intended for use with CW, AM,
FM, and TV modulation. It measures power from 100 mw
to 10KW, depending on the element used. The meter provides
direct readings in watts with an expanded scale for easy
reading. The scale is graduated for 25, 50, and 100 full
scale. Elements are available in a variety of power, and
frequency ranges.

This particular meter is model 4300.21 manufactured in
March 1957, so it is the older, well constructed model.
It has "N" connectors, with the leather handle, which
is in good shape.

The meter works well. $175

50 H Element for Bird Wattmeter
This measures 50 watts full scale over the HF spectrum
from 2 to 30 MHz. $65

Buy both of the above together for $225.

VHF Wattmeters:

The first two of these have sensors that may be separated
from the meter.

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHz, and has full
scale readings of 100 W and 1000 W.
It has type N connectors in and out.
This one works fine and looks like new. No scratches.
With paper work for $80.

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 covers 50 to 160 MHz, with 250 and 25 watt
scales. It can be used to check SWR. SO-239 connectors
in and out.
This particular meter works great, looks great, and
includes paper work for $45.

MJF 812 B VHF Wattmeter SWR Bridge:
The MFJ-812 B measures forward / reflected power and
SWR. The wattmeter measures power on two scales, 30 Watts
and 300 Watts. It is designed for 2 meters and 220 MHz,
but can be used down to 21 MHz. It includes a field strength
meter.
It works fine and looks fine. With paper work for $25.

HyGain DCU-1 Deluxe Digital Rotor Control Box:

The innovative DCU-1 Pathfinder Digital Rotor control unit
gives you automatic operation of your brake and rotor. It
has computer control with RS-232 pass through and is compatible
with many logging and contest programs as well. It has 6 presets
for your favorite beam settings, 1 degree heading accuracy,
automatic 8-second brake delay, and 360 degree choice for
center of rotation. It operates at 110V.

The DCU-1 digital rotor control unit is compatible with the
T-2X, HAM-IV, and HAM-V families of rotators.

This unit works fine and looks fine as well.
Paper work is included for $450.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. Coax comes out the side, like
spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box.
Connectors on the back. In original box. May be new. $25

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Kenwood and related Items For Sale:

Two meter muti-mode transceiver, 2 meter mobile rig, Dual Band HT, Microphones, High Power Antenna Tuner, Original Boxes, Coaxial Antenna Switches, HT Accessories, Noise Filter, Original Manuals, and more

Kenwood TS-711, multimode 2 meter transceiver:

This unit is an FM, SSB, and CW transceiver for 2 meters. It has 40 memory channels, and up to 25 Watts of output power, which is continuously variable (no Hi or Low switch, but a front panel control to continuously vary power). Of course it will scan, and do the things one expects in a 2 meter rig. It has a GASFET in the front end for one of the best receivers I have ever used. The 120 V AC power supply as well as 13 V DC, is built in. The case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. I do not find any scratches, but it does show slight use. It has the optional TU-5 subaudible tone PL encoder in it, so it can be used with modern repeaters. Power cord and mic are included, with paper work for $425.

Kenwood TM-G 707 A Dual Band Transceiver:

The TM-G 707 has an extra-large control panel with the welcoming glow of its amber-colored LCD. This mobile transceiver provides 50 watts on 2 meters and 35 watts on 440 MHz. The TM-G 707 offers features such as memory name function, tone encode/decode, dimmer, and auto power-off. Non-simultaneous cross-band repeat is supported.

Receive coverage is 118-174 and 410-524 MHz.
Transmit range is 144-148 and 430-450 MHz.
It requires 13.8 VDC at 11 amps.

Features include:
180 Alpha Memories
Big Display
Guide Function
Auto Repeater Offset
Dimmer
Time Out Timer
Visual Scan
Priority Scan
DTSS Selective Call

PL Decode/Encode
Packet 1200/9600 DIN plug
Hi/Med/Lo RF Out

This particular unit is still in its original box. It functions 100%, and looks the same. As best I can tell, even all of the little packages of screws, fuses, etc. are included. $250

Kenwood TH-78 A Dual Band HT:

The Kenwood TH-78A is a sophisticated dual-band HT. It has built in tone and paging functions, alphanumeric memory and message paging. Additionally it has dual-frequency receive capability (including VHF+VHF and UHF+UHF). There are 50 memory channels. The operator can choose from 8 different scan types. DTSS allows DTMF access to the transceiver.

The receive range is 118-173.995 and 438-449.995 MHz.
It has three RF output levels of about 5.0/0.5/0.02 watts.

Features include:
Two Line LCD Display
50 Memories
Alphanumeric Memory
Message Paging
Cross Band Operation
Backlit Keypad
Multi Scan Function

This one works fine, and looks fine. It includes the HT, rubber duck antenna, wall charger, and paper work.
A PB-13 standard battery is included, that holds its charge fine. Also included are two PB-17 heavy duty packs that are in bad condition. $135

Kenwood MC-60 A Deluxe Desk Microphone:

The Kenwood MC-60A has been a popular desk mic among Kenwood owners for many years. It has a communication type dynamic unidirectional moving coil type mic element and features UP-DOWN tuning (on compatible Kenwood transceivers) plus a built-in pre-amp. There is a switch for PTT (push to talk) and also a lock feature. The mic impedance may be set for 50K ohms or 500 ohms. The frequency response is 150 Hz to 10 kHz (-6dB) with the Preamp off and 200 Hz to 7 kHz (-6 dB) with the Preamp on.

The heavy zinc die-cast base provides extra stability. The mic terminates to a standard 8 pin mic plug. The preamp requires two AA cells which are mounted through the bottom of the base. Please note that the earlier MC-60 (non-"A")

version featured a 4 pin mic plug and did not have UP-DOWN tuning.

This one works 100% and looks very close to new.

With paper work for $100.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Dentron Super Super Tuner High Power Antenna Tuner:

Dentron made a very heavy duty antenna tuner. It covers from 160 meters thru 10 meters continuously, including the WARC bands, and includes a balun that is also very heavy duty. This is one of the most rugged tuners available.

The super super tuner is rated at 3000 Watts and a real brute. I don't think there is a heavier one made! Unless you are running far more than legal power, you do not need to worry about this one!

This one works fine and looks extremely nice. At first glance, it looks like new, but there are a couple of very light scratches that can be seen if the light is just right. With paper work for $225.

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment are available. They are all in very nice condition, and include the molded styrofoam inserts to protect the rig, plus the box itself.

Kenwood TM-221 two meter transceiver $5

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Special Kenwood "Tone Plugs":

Many years ago, Kenwood used a special plug to go into the back
of many of their radios. If my memory is correct, these rigs
included some TR-2200 models, TR-7400, TR-9000, and some others.

This plug is about 1/4 inch in diameter, and has four small pins
arranged in the shape of a Y. It was used to provide an audio
input for things such as a touch tone DTMF pad or other audio,
plus provide voltage to operate the external device, PTT and
ground.

Recently these plugs have been "Unobtanium". I have found two
from a silent key stash. These are new, still in the plastic
bag. They are $10 each.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box. $18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual bander mobile, $15
Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 1664 Message: 1664

Icom and related items For Sale --
Many HT Accessories including batteries, Original Boxes,
Cable / Adapter, Speaker Microphones, Communications Speakers,
Manuals, and other Miscellaneous Items

Accessories that fit the Icom A6, A24, V8, V82, U82, and
other Icom HTs:

Batteries America CBE-20 Battery eliminator
Goes on HT; plugs into cigarette lighter to power HT.
Appears new, unused. $18

Icom BP-210 Battery, 7.2 V, 1650 mahr
Heavy duty, high capacity NiMH battery.
Looks like new; holds charge well. $30

Icom BP-222 Battery, 7.2 V, 600 mahr
Light duty, light weight NiMH battery.
Looks like new; holds charge well. $15

Icom BC-146 Desk charger
Use with BP-209, BP-210, and BP-222 battery packs.
Appears to be new. Includes the "spacer". $15

Icom BC-147 A, Wall charger
Can be used to charge the HT direct, or to power
the BC-146 desk charger (above).
In original box. $15

Icom MB-86 Belt clip
Connects to the BP-208, 209, 210, and 222 battery packs.
New condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom BC-30 desk charger
This charger will fast charge many different battery packs used
on the Icom IC-2 AT, IC-02 AT, and other HTs of this series. This
includes the BP-2, BP-3, BP-4, BP-5, etc. With paper work for $30.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other
items needing the 2.1 mm coaxial power plug. The opposite
end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3,
and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
Good condition. $15

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. It looks good, and of course works fine. $22

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Icom HM-9
This mic was originally used on the Icom IC-2 AT series of HTs. This one works fine and is in great cosmetic condition. Mic clip included. $18

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included. It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15

IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-765, HF Transceiver, appears to be new, $18
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
SM-6 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1665. VHF / UHF Antenna related items FS

Yahoo group: ham
Date: 2014-10-11 17:52:38 UTC
From: Ken Simpson, W8EK
Topic: 1665 Message: 1665

VHF and UHF Antenna related items For Sale:

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

Round NMO Mag Mount
Black, 4 + inches in diameter, with coax. $24

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is

not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, some for 5/16, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black
color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low
profile, with a 3/4" hole required. Includes 15' coax and connector,
and is rated to handle up to 200 Watts of power. This particular
antenna is new, still sealed in its original shrink wrap package. $15

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave,
and is a very rugged antenna, about 4 feet long. In very good
condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT ground
unused antennas. Coax comes out the side, like spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on
the back. In original box. May be new. $24

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz with
low insertion loss less. All are two position and are typically rated
for 2500 W PEP, and good to 600 MHz.

Diawa CS-201 - $20
Opek CX-201 - $20
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1666. Ham radio support needed for Feb mission trip

Yahoo group: ham
Date: 2014-10-27 20:50:00 UTC
From: John Kirckof
Topic: 1666 Message: 1666
Attachments: 5 described; binary payloads are missing from this source WARC

Hi Everyone,

I am always looking to swap radio gear.... mostly HF items . My prime reason is to keep a good supply of gear ready for our ham group that goes to Honduras in Feb to provide communications support to many medical teams that travel to remote locations. Often there is no power except the generator we bring. If you want to discuss radio gear, that is fine, but I also have some good new/bad news....

The good news is we (IHS) have enough docs and others to have 5 clinic teams plus 3 surgery teams going to Honduras in Feb. That means we can support the work that will see many of the poor in Honduras. The not so good news is if we are to give optimum coverage of radio support, we could still use at least one more ham radio guy. My appeal is if you have any interest in going, give me a call right away to get the details. We do have a good group to work with plus we also have quite a bit of radio gear to loan out if you do not have all that is needed.

Note that I have attached some good info files. If they do not make it with the e-mail, let me know direct and I can forward them to your address, You will especially like the Power Point file and the Info Guide. The Team Map and the Team Directory are from last Feb but they give you an idea of the teams we send and how we manage our Communications Plan.

Also note that Bob Watson, K7RBW was on my team last time to Rus Rus and he has written a great article about his Honduras radio experiences. The link to that story is:
http://www.eham.net/articles/33101

Call me at my house. If not at home, try my cell number. I live down in Glenwood so I can work with you direct to get you up to speed in going. The dates of the trip (including a travel day each way) are 13 Feb to 27 Feb.

John

1667. Antenna related items FS

Yahoo group: ham
Date: 2015-01-06 18:08:07 UTC
From: Ken Simpson, W8EK
Topic: 1287 Message: 1667

Antenna related items For Sale:

Antenna Books:

All are paper back, in nice condition.

The ARRL Antenna Book - 13th Edition - 1974
Close to new condition - $12

The ARRL Antenna Book - 14th Edition - 1984
Close to new condition, although some yellowing of pages, $12

The ARRL Antenna Book - 17th Edition - 1994
Several inches thick! - $18

Antennas - Selection, Installation, and Projects
Published by Radio Shack - 3rd Edition by Evans and Britain - $6

UHF Antennas, Converters, and Tuners by Milton Kiver
Sams Book - $10

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is
not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low profile, with a 3/4" hole required. Includes 15' coax and connector, and is rated to handle up to 200 Watts of power. This particular antenna is new, still sealed in its original shrink wrap package. $15

Hustler "Double Talk" Phasing Harness:

Back in the 1970's, Hustler sold a harness of coaxial cable that they called a "Double Talk Harness". It was used to connect to two mobile ball mounts, each of which would have an antenna for the same band. In theory, they would be phased such that there was about 3 db gain, but the reality is that they really shined by reducing QSB, in effect acting as a sort of diversity system.

This phasing harness looks fine and works fine. $17

Heavy Duty Mobile Antenna Ball and Spring:

This is an extremely heavy duty mobile ball mount designed for heavy HF antennas. Also included is a very heavy duty spring. Both are stainless steel. This is NEW, still in its original package, complete with paper work and all hardware. $50

Quick Disconnects
Hustler QD-1, stainless steel, still sealed in package. $18
Lakeview set of four top portions, and one lower portion, often used with Hamsticks. Like new. $24

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side, and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave, and is a very rugged antenna, about 4 feet long. In very good condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switch:
SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. SO-239 connectors
on the back. In original box. It looks to be new. $22

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1668. Test Equipment FS

Yahoo group: ham
Date: 2015-02-06 16:20:30 UTC
From: Ken Simpson, W8EK
Topic: 1668 Message: 1668

Test equipment for sale:

Heath VC-3 Oscilloscope "Voltage Calibrator":

This unit is used to output precise values of voltage so that an oscilloscope can be calibrated. It uses three tubes and some very precision resistors.

Apparently this unit was produced in the late 1950's and early 1960's. This one looks very nice. It does have a small chip out of the back corner, but otherwise is very good. It has had the electrolytic caps in it replaced, and it has output which varies as one turns the amplitude switch.

Paperwork is included for only $20.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

Micro-Z Frequency Prescaler:

Do you have a frequency counter that does not cover 2 meters, but you want to check the frequency of your 2 meter rig? If so, this is what you need. It is a divide by 10 frequency prescaler. Connect the prescaler to your frequency counter, and a short antenna to the prescaler, and you can do it.

This unit works OK, and looks OK, assuming you like the red color of the cover that Micro-Z used. Powered by 115 V AC.
$15

SWR Bridges / Wattmeters For Sale:

All have SO-239 connectors and work fine.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and
is actually a 10 W and 100 W full scale watt meter as well
as the "normal" SWR meter. It is still in its original box,
with original paper work, and appears to be new. $25.

Lafayette 99-25835 SWR Bridge
This HF single meter SWR Bridge also functions as a field
strength meter. This one is also in its original box, with
original paper work and appears to be new. $20

Radio Shack 21-524 SWR and Power Meter
This HF meter measures both average and PEP power in 20/200/2000
watt ranges as well as functioning as a regular SWR meter.
Looks close to new. With paperwork for $25.

This SWR bridge is good for use from 3 to 150 MHz, meaning it will
cover the HF bands (not including 160 meters), but also 2 meters
and 6 meters. This is a well constructed homebrew unit measuring
about 4 x 4 by 2 1/2 inches (plus knob and connectors).
SO-239 connectors are on the side.
This one works fine and looks fine as well. $12

25 KHz Crystal Calibrator:

This unit is marked "25 Kc Frequency Standard".
It produces markers at 25 KHz intervals for calibrating
your receiver.

This unit is a homebrew unit using two transistors and one
IC, and is powered by three AA batteries. Of course it
includes a 100 KHz crystal that is divided by four. It is
in a black enclosure about 5 inches wide by 4 1/2 inches
deep by 3 1/2 inches high. $15

Miscellaneous Heath Parts:

Heath HM-102/HM-2102 Wattmeter Parts (all are common to both meters):

Outer clam shell cabinet (left and right sides plus top) in nice
condition. $12

Dark Green knobs with aluminum skirt, 1 1/8 inch in diameter.
These are the same knobs as used in all of the SB series of
transceivers, receivers, transmitters and accessories. $5 each

Set of four feet, w/hardware. $10

Three position SWR/Power switch
Switches between SWR, high and low power. $7

I have many Heath SB-630 Station Console parts available. Most of
the internal parts are available, but no clock. The clock movement,

knobs, front panel, outer case and reflectometer assembly are gone, but switches, etc. are still available. Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

Parting out Daiwa Wattmeter:

These parts all come from a Daiwa CN-460 M wattmeter which covers from 140 to 460 MHz. This is the "mobile" type of meter. Except for the actual reflectometer assembly, the other parts should fit any of the various "mobile" Daiwa wattmeters.

Reflectometer assembly
Covers from 140 to 450 MHz. SO-239 connectors in and out. Includes the three wires that go to the switch board, and mounting screw. $12

High Low Power Switch board
This includes the switch and the small circuit board that includes the four adjustment pots - high power forward and reflected, and low power forward and reflected. Single mounting screw included. $7

Light assembly
With two good bulbs, circuit board, wire pigtail, and two mounting screws. $6

Outer plastic case
Should be the same as all of the mobile meters.
With mounting screw. $5

Buy all above for $25.

Micronta Radio Shack 22-024 Transistor Tester:

This unit is capable of checking a wide range of transistor types, either "in circuit" or out of circuit. It was designed to utilize dynamic testing under current amplifier conditions. The visual indication of the output signal is the result of dynamic current gain in an actual operating circuit.

This particular unit is in the original box. However someone left a battery in it, so it needs the battery holder cleaned, plus some general clean up.

With paper work for $15.

Solid State 5U4 Rectifiers:

These are solid state replacements for 5U4 vacuum tube rectifiers. Basically it is a glob of epoxy with an

octal base to plug into the original 5U4 socket. The
silk screen on the base says "S-5U4 Silicon Rectifier
Tube Replacement." No manufacturer indicated.

Two are available for $15 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol $.75; NON-Amphenol $.50

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "L" Elbow, 90 degree connector $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

Electronic Catalogs FREE:

I have a variety of electronic catalogs available free for
the cost of shipping. The shipping cost should be relatively
low since they can be shipped via "Media Mail". Of course
some of these are several inches thick.
All are in extremely good condition.

Here is what is available:

Mouser #641 for Feb-June 2010

DigiKey # A091B for 2009

Newark
#103 for 1985
#115 for 1997
#116 for 1998

Allied
1987
2001
2002/03
2007

EEM - Electronic Engineering Master
2000
2008

Electronic Industry Telephone Directory
2003
2004

Take any or all.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1669. Power Supplies FS

Yahoo group: ham
Date: 2015-02-08 18:24:35 UTC
From: Ken Simpson, W8EK
Topic: 1398 Message: 1669

Power Supplies For Sale:

Regulated 13 Volt DC power supplies:

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $140

GSC 20 R, 20 amp
This supply is rated at 20 amps. Output terminals are on the back,
with the fuse, power switch, and pilot light on the front. This one
works fine, and looks fine, except for a few scratches on the bottom.
$50

EVG Model 10-395, 4 amp power supply
This supply is regulated, with switch and pilot bulb on the front,
and binding post output on the rear panel, along with the fuse.
It works fine and looks good. $30

Micronta 22-120 A
This supply is rated at 2.5 amps. It is well regulated. It has a
switch and LED light on the front, with a circuit breaker and output
terminals on the back. The case (left & right side & top) is
basically all a heat sink. This one works fine and looks like new.
No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with
binding posts for the output on the front, along with a pilot bulb
and power switch. The back panel has a fuse and the regulator.
It looks to be good for about 1.5 amps.
It works fine and looks really great. No scratches or defects. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these, and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive. $12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. 2.1 mm coaxial power plug output, with center +. 12 V DC at 50 ma. Still in box, unused. $12

Eico 751 AC power supply / Speaker:

This power supply is used with tube type transceivers. It includes a speaker as well as the power supply in a very nice cabinet. It was designed to be used with the Eico 753 transceiver, but can be used with most any of the tube type rigs from the 1960's and 70's.

The manual says it provides the following voltages:
750 V DC at 300 ma High Voltage
280 V DC at 170 ma Low Voltage
-100 V DC at 5 ma for bias
12.6 V AC at 4 amps for filaments

This supply comes from a silent key estate; I am sure it has not been used for years. I do not have a rig to test it, but

would expect it to work fine, but the filter capacitors likely will need to be replaced, as is the case with any of the units of this vintage.

With manual for $120.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1670. requesting support in building a all discreet 27.00MHz CB ssb transceiver

Yahoo group: ham
Date: 2015-02-09 20:33:48 UTC
From: shubham VU3SXN & KC3CWD
Topic: 1670 Message: 1670

Subject – requesting support in building a all discreet 27.00MHzCB ssb transceiver

hi,

i am an electronics engineer living in northern part of India.
i have more than 10 friends who are swl and are interested in amateur radio as they are from non-technical background it seems quite difficult for them to understand electronics and all radio stuff...but they regularly visit my shack and are highly interested in radio qso over CB radio,
in India CB radio is license free upto 5 watts...
i have a small request from members of this group,

i am planning to make a qrp single frequency or fixed frequency CB {citizen band} SSB transceiver of 27.000MHz,

this transceiver design is meant for anyone and everyone who want to pick up a soldering iron or wants to experience the taste of hamradio QRP.

All swl can operate and be on air as its license free

I have a14mhz transceiver design which uses all discreet components like common npn transistors BC547 and does not use any fancy IC..

I am trying to change this design to 27mhz and in place of vfo I need a fixed frequency oscillator.

The specifications of this transceiver will be –

1.Easy to make with all discreet components.

2.No fancy IC to be used.

3.5 watts ssb output

4.USB upper side band

5.Fixed frequency 27.000mhz

I would like to share my design with anyone who is interested in this project,

Please share your ideas and email me..

Email – vu3sxn@...
thanks

shubham tiwari
kc3cwd & vu3sxn

1671. Kenwood Monitor Scope, Mics, and other Kenwood items FS

Yahoo group: ham
Date: 2015-03-04 20:52:17 UTC
From: Ken Simpson, W8EK
Topic: 1671 Message: 1671

Kenwood Items For Sale:

Monitor Scope, Microphones, Original Boxes, HT Accessories,
Original Manuals, and more

Kenwood SM-220 Monitor Scope, with BS-8 Pan Adapter

The Kenwood SM-220 Station Monitor is a multi-function monitor
scope which functions as a band-scope since it includes the BS-8
pan display option, monitor and tone generator. It is the ideal
product for supporting, monitoring and calibrating equipment.
It can be used to observe SSB distortion, CW key clicks, and
test linearity of linear amplifiers. It has four sweep ranges
and also can serve as a RTTY tuning scope. Frequency range:
1.8-150 MHz. Maximum Power: 2000W 1.8-54 MHz and 100W 150 MHz.

Features:
Bandscope ± 100 kHz (with optional BS-8)
10 MHz Oscilloscope
Matches many Kenwood Transceivers
Wideband Transmission Monitor
RTTY X-Y Tuning Meter
Built-in 1000/1575 Hz Two-Tone Generator

Cosmetically, this one looks like new. I can not find a scratch
on it, and all lettering is nice and crisp. Electrically, it works
fine. The intensity varies as it should, the focus does as it
should, and when I connect a signal generator to it, the sine wave
looks like a sine wave. I have no TS-820 or TS-830 to confirm
that the BS-8 works, but I am fairly certain it is fine, since
other parts of it are fine. $350

Kenwood MC-48 DTMF Touch Tone Microphone
Used on most Kenwood rigs with round 8 pin mic plug.
Includes up/down switches as well as the 16 digit tone
pad. Excellent, close to new, condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and
"Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has

up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer,
and never used. $30

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment
are available. They are all in very nice condition,
and include the molded styrofoam inserts to protect
the rig, plus the box itself.

Original Box for Kenwood TM-221 two meter transceiver
It is in very nice condition, and includes the molded styrofoam
inserts to protect the rig, plus the box itself. $6

Original Box for TH-41, 440 MHz HT
Complete with insert. Looks like new. $8

Original box for Kenwood TR-2600, Two meter HT
Complete with insert. Looks like new. $8

Original box for TenTec 2591, Two meter HT
Complete with insert. Looks like new. $8

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
In bag, with original paper work. May be new. $10

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual band mobile, $15

Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1672. Icom HF rig, Speaker and more FS

Yahoo group: ham
Date: 2015-04-01 13:00:04 UTC
From: Ken Simpson, W8EK
Topic: 1672 Message: 1672

Icom and related items For Sale --
Deluxe HF Transceiver, Power Cable, Speaker / Phone Patch,
Hand Microphones, Many HT Accessories including batteries,
Original Boxes, Cable, Speaker Microphones, Communications
Speakers, Manuals, and other Miscellaneous Items

Icom IC-756 Pro II HF plus 6 meter Transceiver:

This rig will do it all! It has so many bells and whistles that
I am certain you will not use them all. It transmits on all ham
bands from 160 thru 6 meters, and receives from 30 KHz to 60 MHz.
The color LCD display provides all sorts of information, including
a real-time spectrum scope. The ProII has a DSP Digital IF filter
with 51 selectable bandwidths. You also get a microphone equalizer,
manual notch function, twin peak audio filter, digital twin pass
band tuning (PBT), all mode squelch, multi-function analog meter,
and much more.

For more info
http://www.universal-radio.com/catalog/hamhf/1756.html

This particular unit is immaculate. I can not find a scratch or
defect on it. Power output is 100 to 105 watts on all bands 160
thru 6 m. Receive is great. You will not be disappointed!

With mic, power cord, and paper work for $1200.

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. It looks good, and of course works fine. $22

Icom Speaker / Phone Patch

Although a phone patch is included, this is also a very nice speaker
with Icom styling.

This one works fine and looks great. $65

Icom HM-14 DTMF Touch Tone Microphone:

The Icom HM-14 has the standard round 8 pin connector as used
by most Icom radios. It has a 16 digit DTMF Touch Tone pad on
the back. It will work with the IC-25A, 28, 38, 45, 48, 77, 78,
120, 229, 271, 275, 290, 375, 451, 471, 475, 505, 575, 707, 718,

725, 728, 729, 735, 736, 737, 745, 746, 751, 756/PRO, 761, 765,
775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400,
3200, 3210, and probably others. It can be used to add a DTMF
microphone to a rig that does not normally have one.

This one has good audio quality, all 16 digits on the DTMF pad
work like they should, and the coiled cord is in extremely good
shape. $40

Icom HM-36 Hand Microphone:

The Icom HM-36 is used on most of the Icom HF rigs. It has
a round 8 pin plug, making it compatible with almost any of
the Icom rigs with this connector. This includes the IC-746
and 756 series, plus many more. It can also be used on VHF
UHF rigs.

It also has up / down buttons on the top for changing the frequency.

This one works 100% and looks like it is new. It likely was put
in a drawer after receiving it with a rig, and never used. $35

Extra mobile mounting bracket for IC-28 (or any rig needing a
5 1/2 inch wide bracket) $15

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other
items needing the 2.1 mm coaxial power plug. The opposite
end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
For rebuilding only. Battery is dead. $5

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.

These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-820 H, Dual Band Transceiver, original, $18
IC-820 H, good copy, not original $10
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1673. Microphones FS

Yahoo group: ham
Date: 2015-08-04 14:31:16 UTC
From: Ken, W8EK
Topic: 70 Message: 1673

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Heil Microphone and Cable:

Heil HM-I Microphone for use on Icom rigs.
This mic is a beautiful gold/bronze color. It has BOTH
the wide (designed for rag chewing and full fidelity) and
the narrow (designed for maximum "punch", especially
for DX pileup penetration) elements. It also has a PTT
switch on the mic, which has a 4 pin XLR connector.

This one works great, and looks great as well. $85

Cable for use with Icom rigs
Has 4 pin XLR connector to mate with the above mic, with a
very nice rubber covered cord, and a round 8 pin connector
wired for Icom on the other end, along with a 1/4 jack that
can be used with an external PTT switch, if desired. $25

Buy both of the above for $100.
Cable sells only with or after the mic.

Icom HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Kenwood Hand Microphones:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug.
Includes up/down switches, and lock switch, along with
the 16 digit DTMF pad. Excellent condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones For Sale:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug. Includes up/down switches, and lock switch, along with the 16 digit DTMF pad. Excellent condition. $40

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone with a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons.
This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1674. HF Amplifiers and Amp Related Items/Parts FS

Yahoo group: ham
Date: 2015-10-10 15:06:31 UTC
From: Ken, W8EK
Topic: 1674 Message: 1674

HF Amplifiers and Amplifier Related Items/Parts For Sale:

Heath SB-1000 HF Amp, Kenwood TL-922 HF Amp, SB-614 Monitor Scope, Parts for Amp Supply LK-500 Z A, Parts for Heath SB-220/221, NOS Raytheon 572 B tubes, and more

Heath SB-1000 HF Linear Amplifier (Heath's version of AL-80 A):

The SB-1000 uses a single 3-500 to produce up to 1000 watts output on the 160 thru 10 meter HF bands. I questioned Heath's claim of 1000 watts out with a single 3-500, but depending on band, this one does actually produce 1000 watts out. To be a bit more conservative, 50 W drive typically gives about 750 W out. This is using 120 V AC.

This particular amp has had a glitch resistor added, along with some protective diodes. It looks like the filter caps may have been replaced by a previous owner. In any case, they seem to be in good condition. The 3-500 is an Eimac that is in great shape.

Cosmetically, this unit looks extremely nice. I do not find any scratches or defects. This is a terrific HF amp.

Paper work is included for $750. Pickup near Ocala FL is preferred, although shipping is possible.

Kenwood TL-922 A, HF Linear Amplifier:

The Kenwood TL-922A HF linear amp is designed to provide close to maximum legal power, utilizing two 3-500Z high performance transmitting tubes. The amp features two meters for maximum operating convenience. Power is 2000W PEP SSB, 1000W DC CW/ RTTY input. Drive power is about 80 W.

For all practical purposes, the TL-922 A is similar to the SB-220/ 221, but with improvements added, since it was designed after the Heath amps. It also includes 160 meters. It has larger transformers, and heavier duty tank circuit.

This one has had the filter capacitors replaced, the Harbach "Soft Key" added, along with a glitch resistor, and various protective diodes. All bulbs have been replaced.

The Eimac 3-500's produce from 1300 watts to over 1500 watts into a dummy load, depending on band. Power output was measured with an LP-100 A wattmeter, calibrated traceable to NBS.

Electrically, this amp is a 10, and cosmetically it is a 9.9.
It is an exceptionally nice amp, both electrically and cosmetically.

Power requirement is 120V AC at 28A or 240V AC at 14A.

Paper work is included for $1250. Pickup near Ocala, FL,
is definitely best.

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood
rigs. The other end has an RCA phono plug, as used by most
linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver, and the requirements
of your amplifier.

This cable is for switching the relay. $15

Cable as above, but also includes the connection for ALC in
addition to the amplifier relay keying. $20

Heath SB-614 Monitor Scope:

This unit matches the SB line of Heath equipment, and is
made to monitor your transmitted signal. It uses a 3 inch
CRT.

Heath has designed at least three different monitor scopes.
This is the latest model, and is all solid state, except for the
CRT.

I have used it to monitor transmit signals, and it works great.
Cosmetically, it looks great as well. The graticule is sharp and
nice. No scratches or defects that I can find. Pristine!

With paper work for $150.

Amp Supply LK-500ZA HF Amplifier Parts:

The LK-500 ZA uses a pair of 3-500 tubes, to produce close to
legal limit power. Parts from one are being sold. Most of these
parts could be used on other amps using a pair of 3-500 tubes.

High Voltage Power Transformer
This is the good Peter Dahl transformer. After the full wave bridge
rectifiers, it produces about 3100 volts with currents towards an
amp. This is a very heavy duty transformer! $275

Filament / Control transformer
Provides 5+ volts at 30 amps for the 3-500 filaments, plus 18 V to

be used in control circuitry. $50

Input matching board
This amp has a separate board to be used to match the rig to the amp. It covers 160 thru 10 meters, and is switched by relays. $100

Other parts are available. Please e-mail or call for more info.
Pickup near Ocala FL would be preferred for the heavy parts.
Shipping is not included in the above prices.

Heath SB-220 / SB-221 parts:

Heath SB-221 logo
This is the logo with the Heath name and SB-221, that goes in the upper left of the front panel. It looks perfect. No scratches or defects. $15

Heath SB-220 original metering and rectifier PC board
This is the original board from an SB-220 HF amp that was replaced with one of the Harbach boards. Almost all of the resistors on this board drift over time, and result in inaccurate meter readings. This board has had ALL of the metering resistors replaced with 1% or 2% precision resistors. The 4.7 Meg resistors in the high voltage measuring section have been replaced with resistors rated to take the high voltage, as well as being more precision. This board includes the 10 watt zener diode. This effectively makes the board very similar to the Harbach board, which they sell for $38. Buy this board for only $25.

Original metering rectifier board, as above, but does NOT have the 10 watt zener diode included. $20

Original 10 watt 5.1 volt zener diode for SB-220. $10

SB-220 grid choke (1 mh, Part # 45-4, RFC 4 and 5)
These often go up in smoke when there is a tube problem. These are fine, with no problems. $5 each

Knobs for SB series:
Dark green knobs with aluminum skirt, 1 1/8 inch in diameter. These are the medium size knobs used in all of the SB series of transceivers, receivers, transmitters and accessories.
Two available at $5 each.

Pair of 572 B tubes
This is a pair of NOS Raytheon 572 B tubes. The Raytheon are often considered to be as good as the Cetron 572 B's, and may even have been made in the same factory. These are pristine, unused tubes in their original boxes. Just what you need to make your SB-200 return to original specs. $150 for the pair.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, connectors, miscellaneous accessories,
etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.
On the heavy items, pickup near Ocala FL is much preferred.

Thanks.

73,

Ken, W8EK
